ONE MINUTE SAVED PAYS FOR IT

One minute of a machinist's time is worth more than the difference in first cost between the most expensive hack saw and the cheapest one you can buy.

For the cheap saw wastes time by clogging and dulling and if too brittle wastes still more time through frequent breakage.

But the better saw, especially if rightly selected for the shape or kind of metal, saves time by cutting faster, and saves first cost by lasting longer. And how many gross of hack saws do you use in a year? Or, how many minutes do your machinists devote to sawing?

The question of first cost should not worry you.

There is no question as to who makes the best saws. The

Starrett Hack-Saw

is not a cheap saw. It is unexcelled just as Starrett Tools are unexcelled. These saws save the machinist's time in largest quantities because there is a Starrett best adapted to a given job. Each saw is numbered and what one to use is shown on page 208 of the Starrett Catalog No. 21MA.

UNIVERSAL

"Universal" Electric Iron

New Model

No. E905. 580 Watts.
Nickel-Plated Base and Hood.
Ebonized Handle.
No. E9051. Same model with push button switch.
Weight of Irons, 6 lbs.

A sturdy, dependable Electric Iron built of finest materials and designed to stand up under the hardest service.

Terminal troubles are practically eliminated by ingenious design and careful workmanship.

The large heat storage capacity and efficient heat distribution aid the user, as it is unnecessary to wait for the iron to heat up.

Persistent and well-balanced national advertising creates a steady demand for UNIVERSAL Irons. Are you prepared?

Have You Seen The New $1.00 Mops?

SPRUSTEX POLISH AND MOPS
Trademark

They have decided improvements over all that have gone before.

Handles will not come loose as they are held by an easily adjusted screw. No threads to break.

Pads are easily removed for washing.

Entire mop is strong and scientifically made. Nothing to get out of order. Centre will outlast many pads.

Swivel joint permits use under furniture, Self-measuring top, holds just enough polish for re-saturating.

Sprustex Polish is a superior lustre-restorer for furniture, automobiles, fine floors, etc., and should always be used in connection with Sprustex Mops. There is no other polish like it. A trial will convince anyone that it is the all-desirable thing to use for dusting and glossing.

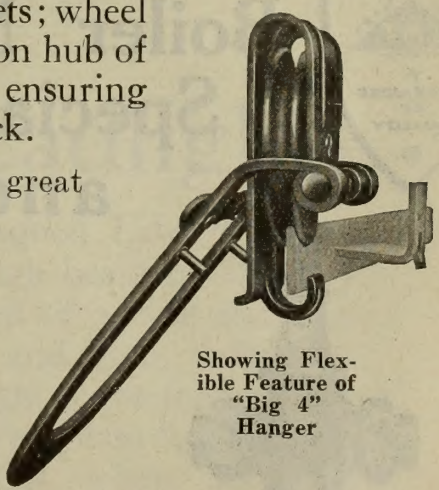
Front view of "Big 4" Hanger

The most satisfactory Barn Door Hanger

"Big 4" Flexible Door Hangers are carrying easily and smoothly on their Anti-Friction Steel Roller Bearings thousands of barn doors in all parts of this continent. Ever-increasing sales and the total absence of any "come-back" in the way of kicks and dissatisfaction prove that "Big 4" meets fully the requirements of most builders and barn owners.



Side view of "Big 4"

The "Big 4" is simply but heavily built entirely of steel; has no complicated parts to get out of order; runs smoothly on anti-friction steel roller bearings; is flexible; is fastened to but one side of the door; brings the door close to the track; has sherardized axles and rivets; wheel housing is effectually prevented from binding on hub of wheel; japanning is done *before* assembling, ensuring bearings free from japan; cannot jump the track.

These are the features that have made "Big 4" the great seller it is.

Packed the careful "National Way"—one pair in a box with bolts for attaching. A printed tag is also packed in each box, giving a list of articles required to properly equip each door. This serves as a reminder to the clerk and will help make sales of articles listed.

Have you a "National" Catalog?

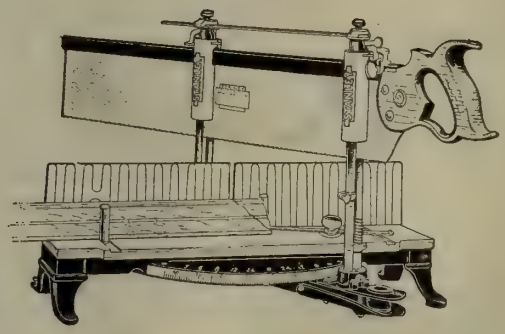
Order Yours Now Be Prepared

Each of the three Freezers, LIGHTNING, GEM or BLIZZARD, has served the housewives of America for thirty years, and, like the cream they create, are in demand in all seasons.

They are built of the very best material and workmanship possible—their ingenious construction makes them easy to operate, quick freezing, and economical to both dealer and user.

The Blizzard, being simpler in construction and cheaper in price, makes it a good running mate with either the Lightning or Gem. They sell themselves and stay sold! No comebacks or complaints.



This means easy, net profits for you. Your jobber will supply you.

Include the Lightning Ice Chipper. It helps the sale of Freezers.

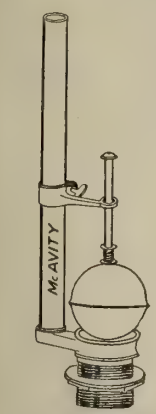
"RELIABLE" CHURNS ARE BEING ADVERTISED FOR YOUR BENEFIT

All through the Dominion women who churn are reading in the advertising columns of their newspapers and farm journals of the "Reliable" Churn. They are becoming impressed with what the "Reliable" can do for them in the way of lightening labor. Having had experience with old-fashioned dash churns they recognize the true principle on which the "Reliable" is built and are convinced that it will give perfect results.



A feature that appeals strongly to every one is its capacity. A "Reliable" will churn successfully cream to 80 per cent. of its capacity, something no other churn can do.

There are hundreds of such women in your locality. Somebody is going to sell them. Our advertising has done its work. The demand is created. It will pay you handsomely to satisfy that demand. Write to-day for our proposition and get busy.

How Much is it Worth to Have no Complaints?

If the wringer or washer you sell does not give satisfaction, you get the complaints. You are blamed, although it is not your fault. You lose a customer, perhaps more than one, because women compare notes on such things.

Sell the Warranty Wringer and tell your customers that the Manufacturers invite criticism. Ask them to let you know if they find any point in which the washer or wringer may be improved. Recommend the Warranty to the limit and we will stand back of you.

The Warranty has steel ball bearings, flat steel springs, covered cogs and "sure grip" clamps. It is worthy in every detail.

Note the change in the firm name.

Making Files For Fifty Years

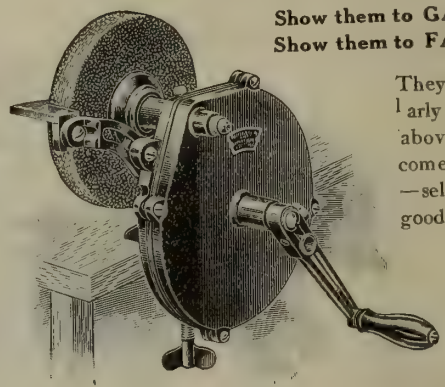
If fifty years of specializing and progressive experience in the manufacture of one thing tends to quality and efficiency, then the "Famous Five Files" are of the best quality and the most efficient.

Innumerable investigations were made before a formula was finally adopted for the steel. Each file is now made from steel best suited to the class of work for which it is intended.

The shape of the teeth has been subject to careful experiments. You can always get a "Famous Five File" with teeth that will cut fastest, and leave the best surface on any kind of metal.

Our hardening process insures long life to each file. Finally, every file is inspected several times during process of manufacture, and, if it shows the slightest defect, at any stage, it is rejected.

Every "Famous Five File" is mechanically perfect. Their qualities are standardized in the trade. Specify them when ordering. They are:



Now is the time for Canadian dealers to display in windows and stores

"AMERICAN SELF-OILING GRINDERS"

Show them to MACHINISTS
Show them to CARPENTERS
Show them to GARAGE MEN
Show them to FARMERS

They will appeal particularly to the needs of above classes. They come in different sizes—sell at fair prices—at good margin of profit.

The Most Important Factor

Mr. Merchant:

THE most important factor in the success of any business is the *man* behind it. The business is but a reflection of its director.

If he is ambitious, energetic and intelligent, he will watch his business closely, discover every weakness, and painstakingly nurse it through to success.

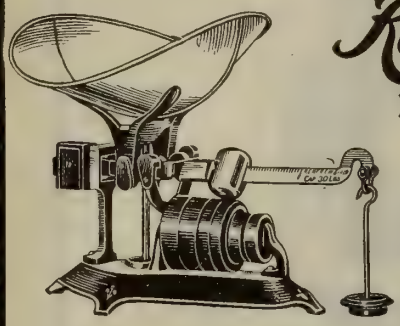
He will seek advice, improve his knowledge and increase his efficiency so that he may know how to cure the ills of his business.

Too many men are self-satisfied and refuse to follow the methods that have brought success to other business men.

Think of the ten most successful men in your own line of business and ask yourself why they succeeded.

National Cash Registers are not cure-alls, but they have helped the most successful merchants in the world and they can help you.

Send for our literature and talk with our representative, because we have made a study of curing a great many of the troubles that beset the storekeeper.



Cast aside indifference and determine to improve your business in 1918.

Vol. 30 TORONTO JANUARY 5, 1918 No. 1

Current Events in Photograph

No. 1---Just Behind the Battle Lines

EVERYWHERE we read of the mud of Flanders. Mud is evidently the thing that most forcibly presents itself to the remembrance of everyone who has been through the fighting on the western front. The illustration above shows how the British Officers and Tommies have succeeded in getting the better of the mud. This picture was taken only a short distance behind the famous salient at Ypres that the Canadians know so well. Note how comfortably matters have been arranged in this double terrace of huts; the drainage canal for carrying off the rainwater, and keeping the huts always dry and sanitary; the pipe line for draining the huts and providing sanitary comforts, the electric light wires, and the close-fitting door to keep the glitter of light from curious flyers. Note also the well upholstered roof. It is as complete a little city as could well be imagined, not only within the sound, but well within the reach of the guns. The hut number is plainly to be seen.

EDITOR'S NOTE.—*The above is the first of a new series of photographs which will appear in* HARDWARE AND METAL *during* 1918. *The name "Current Events in Photograph" indicates the nature of the new series. Other new features for* 1918 *will be announced in the near future.*

Getting Results from Roofing Dept.

Good Roofs Essential to Good Buildings—The Hardware Dealer's Opportunity—Reviewing the Talking Points—Sales a Matter of Merchandising—Keeping in Touch With the Contractor.

WHEN selling roofing one of the most important factors in the construction of any building is involved and it would be well for merchants to pay careful attention to this feature of their hardware tender. There is perhaps no part of the entire building on which greater returns to the merchant are possible—no greater advertising medium exists than a roofing applied which stands up under adverse weather conditions and backs up the claims made by the merchant in selling.

What then are the important points to be borne in mind of the retailer in the matter of roofings? First of all, he must, of course, select the line which he would handle. There are many different brands being marketed and the merchant's judgment must be exercised in the adoption of that line in which he can put his faith just the same as would be involved in the selection of a line of tools, enamelware or paints. Some merchants do not push the sale of roofings as they should. It is decidedly a hardware line just as much as other building materials, and to those merchants who keep a couple of rolls stored away in the basement it need only be pointed out that similar methods employed with their other goods would soon result in their closing up shop.

The Hardware Dealer's Opportunity

The hardware merchant has a splendid opportunity for developing trade in roofing. In the construction of a house, barn, store, or any other building he is the one consulted for a price on nails and hardware. It should not then be very hard to bring to the attention of the contractor or owner calling for quotations that your store is the headquarters for roofing. Driving home the fact that the brand you carry is the one best suited to their needs resolves itself into a question of salesmanship.

Right here, then, is where the hardwareman who knows his line has a distinct advantage. What are the many points to be taken into consideration in the sale of roofing? What does the customer want to know about it? Is it easily applied? What factors in its construction bear out your claims as to its durability? Will it need frequent repairing and painting? Is it fireproof?

Application An Important Factor

In the case of ready roofings which come in rolls there is no doubt but that they are easily applied but in bringing out this fact every consideration should be shown and steps taken to insure proper application. The merchant should point out the necessity of a proper level base for the roofing—it will not give long service if the foundation is faulty Having a flat surface on which the roofing can be applied without wrinkles appearing is necessary but the one laying the roof should see that creases are not allowed to remain when the job is finished.

Then there is the joining process, which can be done to give rain and snow proof results or form the basis for unlimited complaints; and what the merchant wants to avoid is giving his customers cause to complain. A leaky roof is not only unsatisfactory in itself but the damage done to the interior of the building affected sometimes reaches figures that are mighty large. It is human nature that the owner should blame the roofing and the fact that it leaks in two or three years' time or less through faulty application does not altogether free the merchant from blame when his guarantee as to durability has set ten, twenty or thirty years as the lifetime service the owner might expect. Too much importance then can not be placed on the necessity for the merchant seeing that the roofing he sells is properly applied.

Using a cut brightens an ad. materially as will be seen in the above. The reading matter is brief, but to the point and brings out points of interest to possible purchasers.

What Are the Talking Points?

When you make the statement that the roofing you sell is durable, that it will give so many years of satisfactory service, do you know what elements in its construction bear out the assertions you make? Is the roofing you sell a combination of paper and tar and, if so, are they so compounded that you know the service you claim is built into it?

Secret processes of manufacture notwithstanding, it will be found that the manufacturer gives to the merchant the basis on which his roofing is made—so much of one ingredient, so much of another, compounded in a manner which experience has justified as being, to their minds, correct. What particular part each plays in the life of the roofing is outlined for the merchant and it would be well to study not only the line you are selling, but the other lines being offered as well, so that any questions asked about them can be answered intelligently and to the merchant's own advantage as well.

Cost of Upkeep Should Be Stated

The upkeep of a roof is a point which bothers some owners, and what action, if any, is going to be necessary to preserve roofing satisfactorily should be brought out. This point can be dealt with without in any way detracting from the strength of your arguments. If a coat of some special paint or other material every year or five years should be applied, emphasize the fact. The results would certainly show in a roof which should last twenty years and it should have the impression of creating confidence in the purchaser when he sees that you are looking into the future and not making big claims to effect an immediate sale.

Fireproof Qualities Deserve Mention

To what extent the roofing you sell is fireproof could be brought to the notice

of your customer. In the case of a big fire which would destroy the entire building the point does not matter so much but whether sparks from other buildings which might alight on the roof would start a fire is of vital interest. The average owner of a building hopes to avert a fire on his own premises but has a dread that fires originating in others might be transferred to his own. If, then, there is a measure of fire protection in the roofing you sell your customer would welcome the fact.

Sales Result From Good Merchandising

The methods to be employed in securing roofing business do not vary to any great extent from other items in your stock. This department should be given publicity through your newspaper advertising and in your store displays. Reproduced with this article are newspaper ads used by retailers in different localities and it is well known to the average retailer that newspaper advertising can be made a very important factor in the distribution of their goods.

Quality Advertising the Best Kind

As has been pointed out in connection with other lines of merchandise it is by no means the size of the space devoted to the advertising but the copy which goes into that space which brings results. Ads which are carefully thought out, planned ahead, which you can leave and come back to read without getting a bad taste in your mouth over some expression used are the kind to put in your paper. It is not only your own views you must express but it is getting outside of yourself—criticising your own work to determine what effect the ads will have on your prospective customers that you must exercise. Selling copy can only be written when the merchant finds out what his customer wants to know about his goods and makes his appeal along those lines. Newspaper ads which pull, which deliver a message straight to the reader are the kind every merchant should try to write and it is only by planning ahead that success will attend the efforts of the ad-writer consistently.

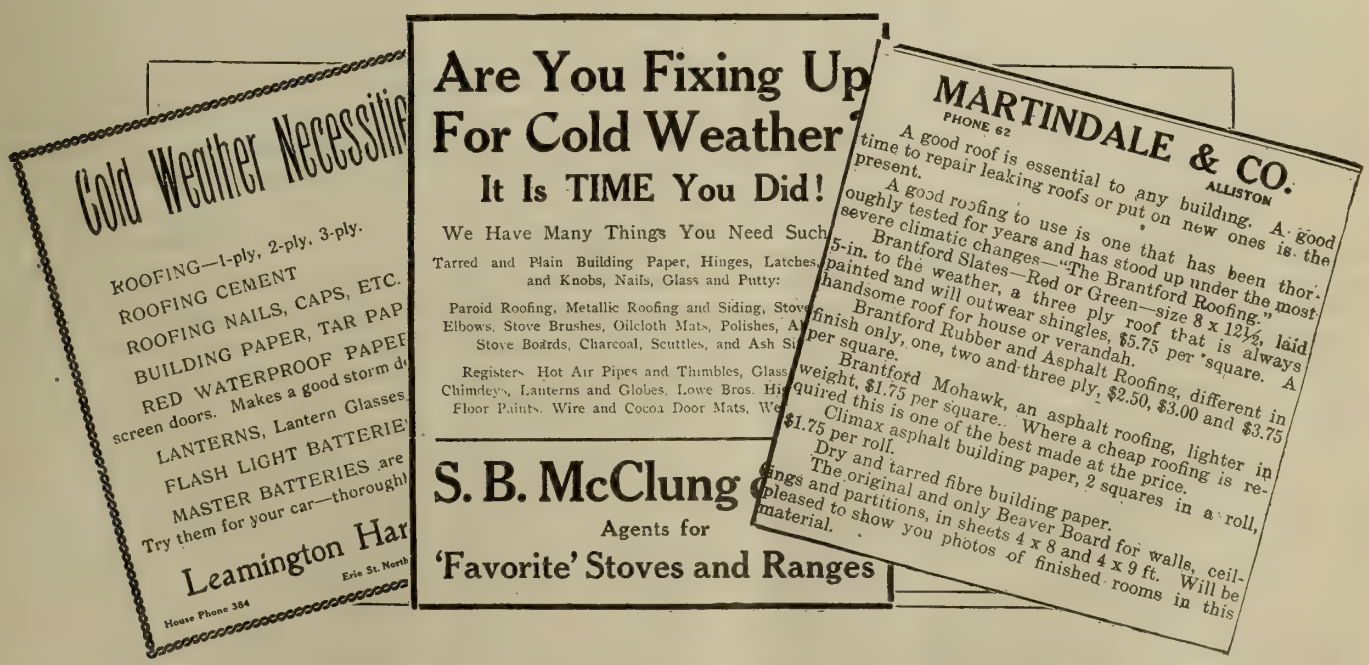
Store Interior Displays Suggest Roofing

The writer had occasion some time ago to visit a hardware store in an Eastern Ontario town and one thing which made a distinct impression on entering the store was the appeal made for the brand of roofing this firm was selling. Every customer who entered that store saw roofing advertising and there can be no doubt but that when any of that store's customers were in the market for this product, they remembered that this hardware store could supply their needs.

There are many dealer helps issued by the manufacturers which attract attention to their products and these can be used to advantage by nearly every retailer. Attractively colored hangers and counter or floor displays can be used to brighten up the store interior to good advantage and will help materially in a window display. There is no reason why a window which sells sporting goods, cutlery or garden tools could not be used occasionally to emphasize the importance you place on your roofing business with satisfactory results.

Keeping in Touch With Contractor

Supplementing all appeals made to the man who is spending the money, it should prove decidedly advantageous to keep in touch with all contractors. Their advice is asked in many matters pertaining to the construction of buildings and if the question of roofing should be left to them, it can readily be seen that the merchant whose products are well known stands the best chance of securing the business. Not only is the contractor a good friend to have in the matter of determining that the roofing you sell will meet the requirements of the building he is constructing, but the merchant who is progressive in selling roofing will get results with his other hardware lines as well.



The roofing end of the hardware business should not present difficulties of an insurmountable nature to the average hardware man and it should work in splendidly with the builders' hardware department. Let the people know that you handle roofing through your newspaper ads and store displays and the results you will secure should prove very gratifying.

TRADING FIRMS AMALGAMATE

Announcement was made a few days ago that the business of the Frontier Trading Co., of Ogdensburg, N.Y., and the Canada Shipping Co., of Montreal, had been taken over by the George Hall Coal & Transportation Co. The deal gives the Hall Co. an extra fleet of sixteen vessels with an aggregate tonnage of 20,000. The vessels will be placed in the coal and wood pulp trade between ports on Lake Ontario and the St. Lawrence River. Four vessels owned by the Hall Co. were commandeered recently by the United States Government.

CROW'S NEST PASS COAL OUTPUT

The collieries in the Crow's Nest Pass district of British Columbia, which are now operated under Government control, are producing 23,000 tons of coal a day, the greatest output in the history of the province. Word received by the Minister of Labor from the Director of Coal Operations in the district indicates that everything is running smoothly at the collieries.

Samples of ads. used by hardwaremen which primarily feature roofings. The aggressive methods adopted by most hardwaremen in pushing the sale of this line are more and more securing results and stamping their stores as headquarters for the distribution of roofing.

Enough Tin to Meet Requirements

Expected That Situation Will Open up and Enough Tin Plate be Available to Meet All Requirements

THE possibilities of the tin situation continue to be a very disturbing element. Possibly it is more disturbing than the actual conditions would seem to justify. Rudolf Wolffe & Co., London, England, in reviewing the tin plate situation, suggest that the uncertainty that exists rather than the actual condition of scarcity is the cause of the depressed feeling.

Their report reads as follows:—

Uncertainty More Alarming Than Actual Scarcity

"This metal has been the subject of a sensational advance through various causes, the chief one doubtless being the obscurity now surrounding the position of supplies. For some two years past the consumers both here and abroad have been very alive to the possibilities of metal being lost through the sinking of ships. We no longer receive statistics of shipments, and this has engendered an all-round nervousness. We cannot say that we find any extra demand, but attribute the rise more to the policy of caution on the part of sellers, who after all are committed on the London Metal Exchange to deliver an article in warehouse; for the carrying out of which contract they are mainly dependent upon the oversea supplies."

"The Canner," Baltimore, Md., reports the remarks of Vice-President H. W. Phelps, of the American Can Company, at a recent meeting of canners, as follows:

"With fair luck and conservation the 1918 season will not suffer seriously from lack of cans.

"Prices will be higher than in 1917, but Government control of the steel and tin plate industries will offset a part of the sharp advances in raw material. The only serious disturbing factor is the danger of labor troubles.

The War's Demand for Tin Plate

"Few canners realize the tremendous demand for tin plate for strictly war purposes. All small cartridges are partitioned with tin plate in much the same manner as eggs in an egg case, and then they are enclosed in a tin box and soldered up air and water tight. The larger shells are placed in individual cans, a three-inch shell, for example, being sealed in a can three inches in diameter by 18 inches long. This is only one of the many war demands being made on tin plate outside of the food canning trade.

"In the food trade, increased demand has been phenomenal. For example, milk which is one of the most essential army rations, is being packed in tremendously increased quantities. One concern which bought 18,000,000 cans from the American Can Company in 1916 had purchased 19,000,000 cans up to May 1 this year and on May 1 placed specifications for 68,000,000 cans more to cover the rest of 1917 requirements.

"Referring to the situation for 1918, Mr. Phelps stated that nobody yet knew what the price of cans would be next year or what deliveries would be, but he said under the guidance of the Government the problem of producing cans would be solved.

Difficulties of Getting Supplies

"There is practically no pig tin produced in the United States, and heretofore it has all come through England and, therefore, through the submarine zone. Last year one great cargo of pig tin was sunk by a German submarine, and this caused a great deal of trouble. For the new year arrangements have been made to ship around through the Straits of Malacca to San Francisco, or Los Angeles, and thence by rail to the tin plate mills, thus increasing the freight cost, but successfully avoiding the submarine trouble.

"Another favorable move for the new year is the reduction in exports of tin plate. There can be no question that large quantities of the tin plate exported last year found its way into Germany. This has all been cut off through an embargo system.

"As now worked out, it is believed that the tin plate mills of this country can produce about enough plate to supply the demand for 1918 if they work full tilt. The can manufacturers have sufficient capacity to make this plate up into cans, so there is no great danger on the latter score.

"All of the above does not take into account the possibility of labor troubles and shutdowns. This is a matter which the United States Government will have to take firmly in hand if serious trouble is to be avoided. As to prices for the new year, pig tin, steel plate and all the other materials which go into the manufacture of tin cans have advanced 25 to 33 1/3 per cent. To partly counteract this is the fact that the Government is regulating the prices to be charged by the steel and plate manufacturers."

Optimism Over Railroad Situation

Government Action in United States Welcomed — Canadian Manufacturers Will Benefit

WASHINGTON, D.C.—The United States made its second great step in the war game when all railroads passed under Government control. With conscription as its first great war move, the United States has now taken the second step in taking over the activities of the railroads. The importance of this action in respect to the progress of the United States' war programme is great. William G. McAdoo, Secretary of the Treasury, is the railroad dictator. McAdoo has already taken long steps to bring about a remedy to the railroad congestion which has been hampering the United States for many months. All traffic and facilities of railroads are to be pooled, according to orders issued by McAdoo. This will allow one railroad to use the terminal facilities and equipment of another, and will mean that the thousands of miles of railroads in the United States will act as a unit.

Better Freight Movement Anticipated

Perhaps an even greater effect which will be brought about will be the fast movement of freight. For many weeks now freight of all sorts has been congested on railroads in the United States in a hopeless tie-up. McAdoo is to-day using his wide powers to move all of this material. Munition factories and other war material making plants which have been tied up for lack of material may now go ahead at top speed.

Canadian manufacturers will benefit largely from this action, because those supplies which Canadian manufacturers depend upon the United States for have been caught in the great freight jam. These supplies will now move with rapidity.

Railroad stocks have advanced from ten to twenty points on all markets following the action of President Wilson. This move has been a great boon to all holders of railroad securities throughout the nation and has given the stock market greater impetus than any single act since the outbreak of the war. More than a million and a half shares of stocks were sold on the New York exchange following the announcement.

Government Control to Solve Coal Shortage

In the Government control of the railroads lies the solution for the coal shortage in the United States. Fuel Administrator Dr. Harry A. Garfield told the Senate Investigating Committee that the coal supply of the United States has been reduced by 20,000,000 of tons because of the car shortage. W. B. Colver, Federal Trade Commissioner, declared that the entire shortage of 50,000,000 tons in the United States was caused by a lack of transportation facilities. The sub-committee of the Senate investigating the coal shortage is satisfied that the railroad control will relieve the coal shortage, and has, therefore, directed its attention to the prices of coal. In this respect again Canadian manufacturers will profit. Movement of coal to Can-

(Continued on page 46.)

EDITORIAL COMMENT

THE NEWS IN PICTURES

COMMENCING with the present issue, HARDWARE AND METAL is beginning a series of news stories told in pictures. These pictures will deal with all manner of world events, and we believe that they will be of intense interest to our readers. New pictures of events that are transpiring at the moment will appear every week. Watch for this page, it will give you an idea of where, how and why things happen.

WHAT IS A REASONABLE PROFIT?

HERE is a problem that has been troubling all of us. There has been such a hubbub about merchants charging no more than a reasonable profit, but nobody seems to be quite sure as to how you would describe a reasonable profit. President Wilson has answered the question in part at least. He has issued an order to Food Administrator Hoover to hold the trade down to the "normal average profit obtained in the period prior to the declaration of war in 1914." This the President believes was a "just, reasonable and fair profit."

WHAT ABOUT THE LOST CUSTOMER?

ABOUT every so often retail merchants find that customers are not buying as much as usual. Now it may be that the weather has something to do with it or the seasons, or that people are away; on the other hand it may be that the customers are dissatisfied with something: goods, service rendered or some more trifling thing which may be easily adjusted.

But, in any case, it is for the merchant to find out why orders are not forthcoming. If the customer is dissatisfied the merchant certainly ought to know it so that he can pour oil on troubled waters.

The policy of drift in retail business of failing to note or to profit by these indications is a dangerous one.

ACCURATE INVENTORY ESSENTIAL

ALREADY many merchants are busily engaged in taking the annual inventory; and accuracy should be the keynote adopted in this important task. Figures which do not tell the exact position in which the merchant finds himself are useless—they are deceiving and least of all should a merchant deceive himself about his own business.

It is generally conceded that inventory should be determined on original cost, but it is essential that a merchant be conversant with the present value of his stock. Insurance companies in settling claims usually base same on the replacement value and the 80 per cent. co-insurance clause provides that this percentage apply to actual value. Where a merchant's stock cost him $10,000 and present value would be $15,000, the merchant is, under this insurance clause, supposed to carry 80 per cent. of the $15,000 actual value as insurance.

In determining the actual value of stock, HARDWARE AND METAL'S market service will prove of decided benefit to merchants generally. Points to be considered in the taking of the inventory and how to determine the amount of insurance that should be carried are outlined in an article in the current issue.

SAVING ON RAILROAD DELIVERY

THE nationalization of the American railway systems for the duration of the war may, it is hoped, solve many of the difficulties of transportation that have been such a serious element in freight handling during the past months.

Unquestionably there are many overlappings and abuses that can well be met by such a system. One of the first and perhaps greatest of these has been met by Controller McAdoo's first order that all goods must be routed by the shortest system. This has not been by any means a general practice, logical as it would seem. All the railway systems have numerous agents throughout the productive states drumming up business for their road. A glib-tongued agent or an innocent shipper has often resulted in a car taking an extra trip of some hundreds of miles, in order that it might go by the lines of the solicitor. Now the routing of all cars is to be by the shortest way to destination, irrespective of the railway lines traversed, and the railways are to be recompensed on a basis of former business.

This improved system ought not only to prove an effective saving, but by speeding up deliveries and the general conservation of cars ought to go a long way toward solving some of the more trying of the transportation difficulties. It isn't a cure-all, but it is a help and these are urgently needed in these times.

As so large a proportion of goods used by Canadians are transported over American lines, we will share the benefits that will be derived.

Something New for the Cardwriter

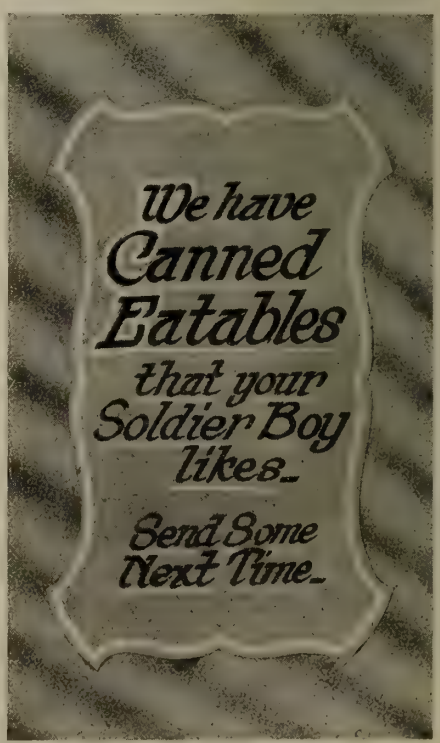
A Series That Will Give Ideas and Instructions for the Cardwriter Who Has Already Mastered the Rudiments of the Work.

By Robt. T. W. Edwards

WE now enter upon the second lesson in air brush work and before going further it might be well to state for the benefit of those who may have missed the previous article that the next few lessons are to be devoted exclusively to air brush work—that is to say the use of the air brush for work on show cards which cannot be accomplished by the ordinary sable-hair brush. Show-cards made in this way lend an air of distinction to a window display or counter decoration.

So many pleasing effects may be produced through the agency of the air brush that one can truthfully say its possibilities are unlimited. For the exquisite blending of various colors, for working out border designs with stencil patterns, for composing a background or for the making of floral and scenic designs it is unrivalled. So many and varied are the uses to which this wonderful little instrument may be put that in the hand of an expert it becomes a veritable magic wand through whose agency are evolved countless delightful creations and all sorts of wonderful transformations. Certainly no cardwriter can afford to be without one. Should you happen to be also a window trimmer there is a double reason why you should own one. The window trimmer uses it for tinting backgrounds, flowers, foliage and groundwork. Scenic backgrounds can also be made with it and these are particularly attractive for spring or fall openings or special displays. But this is a digression, that branch of the work being a subject in itself and one which we may take up at some later date. For the present let us return to the apparatus itself.

FIG. 1



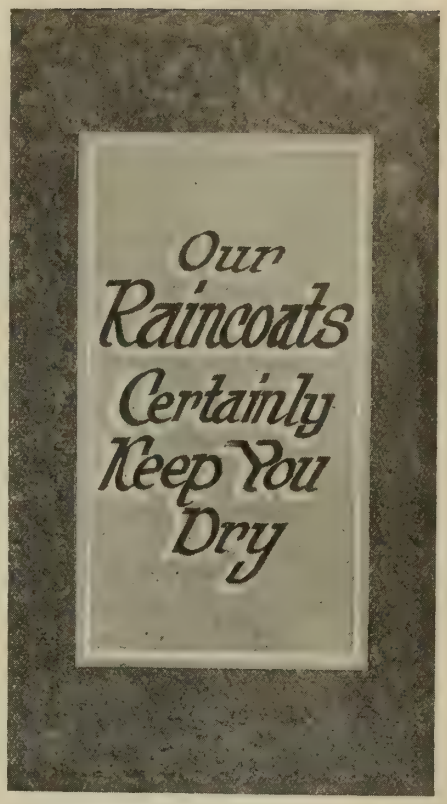
To get the best possible results from the air brush it must be kept scrupulously clean. You may remember that I laid stress on this point in our last lesson as this is an essential which we cannot afford to overlook. A dirty air brush will not throw a fine, even spray, and uneven work is the result. This is something to be avoided. The ink also must be kept free from foreign substances if you do not want it to corrode the fine passageways it has to traverse. A careful regard for these two points alone will save you from many failures and much unnecessary trouble. The best method for keeping the ink clean is represented in Fig. 1.

Here is shown a funnel placed in the neck of a clean bottle. Several thicknesses of cheese cloth are placed over the mouth of the funnel; pour the ink through the cheese cloth. This will remove any sediment which might otherwise prove troublesome.

We have already dwelt on the many uses of the air brush and of the various styles of show cards that can be made with it, from the quite simple to the most complicated examples. In the last lesson was explained minutely the ovaling of heavy faced letters. This is one of the simplest varieties of air brush lettering. In this lesson, therefore, we will take up another variety of simple air brush work, namely, background blending and clouded effects. This class of work makes very effective show cards and is very easily executed once you know how. Anyone can do it with a few instructions. Of course practice with the air brush is just as essential as practice with an ordinary brush, therefore it is best to spend a good deal of time in getting background effects before attempting to make a card.

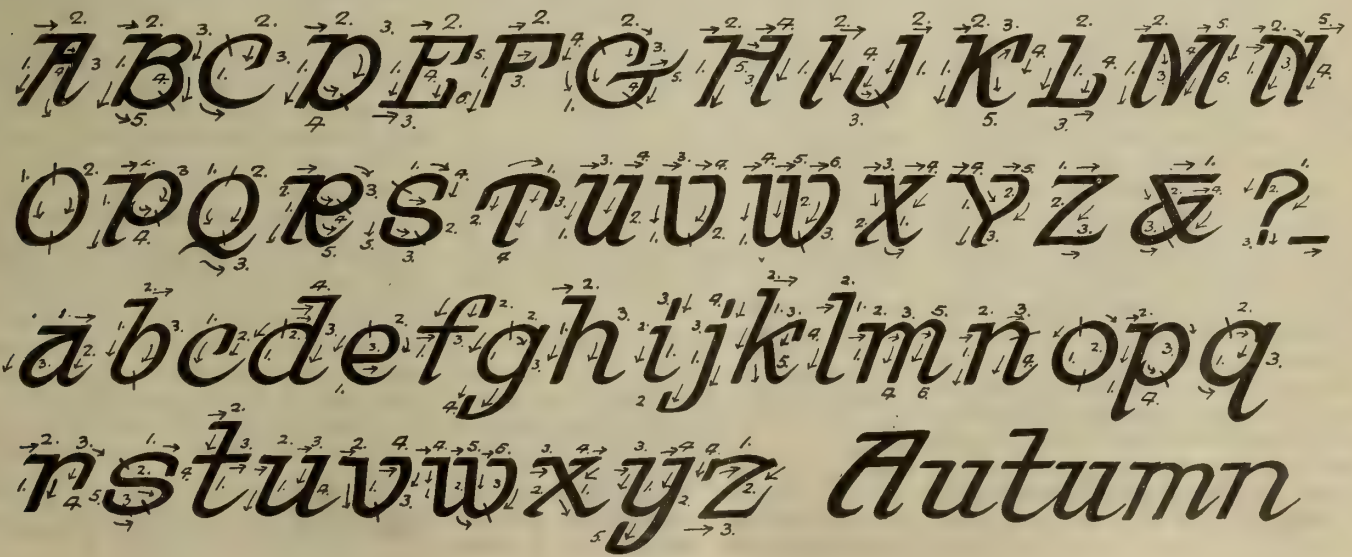
As a start, therefore, get any old white cards you may have and practice.

First let us call your attention to the air brush work on the "Furnace" card. This is a clouded effect background, in the centre of which a white card is mounted on which is placed the lettering. For the sake of reproduction the lettering on this card was done with black ink on a white card but for a show window display many more pleasing effects can be produced. For instance a combination light blue and black would make a very striking card. Spray the blue sparingly in the light parts. That would give you a heavy clouded effect over a blue sky. Be very careful not to get any of your color on too heavy. You must use your own judgment in this respect but practice will help you most. Make your work dainty, not gaudy. There are many other color combinations for a clouded background card, for in-



stance a two tone brown effect can be worked up with excellent results. Black with a slight touch of violet in the lighter parts makes a good card. A two tone green also shows up well. As you go on with this work you will find many more color combinations that are pleasing to the eye.

The "Canned Eatables" card shows another style of background effect but this is quite as easily executed as that we have already explained. In case it is not already clear I should here explain that the centre panel on all these cards is mounted after the air brush work is completed. It is not necessary, therefore, to air brush the entire surface of the background card. The middle may be left bare but be sure you work sufficiently close to it to prevent any bare places from showing after the panel is put in place. The first card shows the air brush work put on in angular stripes. These can be made with the wide spray of the air brush and should not be made too dark. The blackground card is cream and the air brush work is done in brown of a sepia shade. This makes a pleasing contrast with the light grey panel, which is lettered in black and trimmed with white. This is only one of the many color schemes that may be worked out on this class of card. Another very effective combination is made with a white background, using the same diagonal stripes with a black spray and putting a second stripe of blue close to and on the under side of the black stripes. For these colors use a white centre panel. Pleasing tones, such as brown with a touch of yellow for the diagonal stripes and a cream colored panel would make a very suitable card for present displays.



The spotted background, as shown on the "Weather Stripping" card is a very simple one to make as you will soon find out when you come to try it. Many color effects can be used here, as in the case of the cards previously mentioned, to make this more attractive. The other cards demonstrate to what extent this idea of a fancy, air brush card may be developed. They were purchased from the manufacturer already air brushed and are exceptionally well done. Similar effects can be procured by using a very rough surfaced mat board. Hold the air brush so that the heavy spray will be thrown almost parallel with the surface of the card. This causes the ink to be thrown on the one side of the "miniature hills" and not on the other, thus giving it an embossed effect. To obtain an even prettier effect use a very light color from the top of the card down and a very heavy color from the bottom of the card up. This adds greater depth, in appearance, to the surface of the card.

The Alphabet

The lettering lesson this month is a new style which should be quickly picked up and while it can be formed speedily is very effective. It is a very practical type and looks well when used on completed show cards as the illustrations

prove. The entire alphabet is in italics, being all on the slant, and in most cases is a square faced letter. One of its features is that it is of brush stroke formation which means that each stroke is made with one stroke of the brush, no second stroke being required to complete it. This method of stroke formation renders this a quickly made alphabet and therefore a good one to use in the busy times that are coming. Nevertheless all new alphabets require a good deal of practice so it would be advisable to practise each of these letters several times. Follow the strokes as they are numbered and make them in the direction in which the arrows point and you should experience no difficulty in mastering this type. Remember, practice is half the battle.

Why the Inventory is Necessary

Best Buyer, Best Seller is Man Conversant With His Stock—Accuracy Essential—What Co-Insurance Clause Means in Relation to Stock—Merchants Should Watch Values of Stock Closely.

THE Christmas rush is over for another year and hardware merchants are starting in on the next big job of the year, the annual inventory. The more a merchant knows about the constituents of his stock the better buyer he is and also the better salesman, and the best way to become thoroughly acquainted with what there is on the shelves to sell is to take a physical inventory of the stock. Where possible, and it usually is possible in the average hardware store, the proprietor should do most of the listing himself as he gets his eyes opened to a lot of little matters that might otherwise escape his notice altogether.

The Necessity of the Inventory

It is on the other hand unfortunately true that some merchants do not take inventory at all; they claim that they see no use for it, that they know they are making money and they are not asking anyone for extended credit and that it is nobody's business what stock they carry save their own.

It is hardly necessary to say that the number taking this attitude is now comparatively small, but for the benefit of these few it might be advisable to recount some of the reasons that make the taking of a physical inventory necessary at least once a year. First and foremost is the fact that it is absolutely impossible to tell whether you are doing a profitable business or not until this is done. There may be enough money coming into meet the bills as they come due but that money may be coming out of decreased stock. It is astonishing how thoroughly experienced merchandise men can be deceived as to the size of the stock that is on their shelves. The case of a general merchant who recently made an assignment might be quoted. He could have made arrangements with his creditors to carry him through if he had known even approximately the value of his stock. The estate after going through liquidator's hands, paid 100 cents on the dollar, but winding up expenses had eaten up the proprietor's share. This is an extreme instance of what may happen from neglecting this important duty. No man can tell, however, when he may be forced by some unknown circumstance to ask some credit from either his bank or his creditors and in this case the presentation of a statement of affairs will be necessary. The law says that a false statement of financial condition is a crime and how can one know whether he is making a false statement or not when he has not taken stock? Then apart from this the actual satisfaction of knowing his exact position more than pays any man for the work that is involved.

The inventory should enable a dealer to become re-acquainted with every article in his store.

What Price Basis Should Be Used

The first thing to decide is the basis upon which same will be taken, or in other words shall the selling or cost figures be used? Moreover shall actual values be used or actual cost? For instance, at the present time most merchants have much stock on their shelves that is worth anywhere from 10 per cent. to 100 per cent. more at existing market values. Should this stock be listed at this enhanced value? To answer the first question the right basis for the average merchant is cost value. A profit is not made until the goods are sold and the percentage basis is a poor standard to go by as it is impossible to tell in advance at what price these goods may have to be sold before they are finally off the shelves. Then too the question of insurance would have to be considered, as adjustment would only be made on cost values.

Do Not Use Appreciated Values

The second question, that of taking stock at actual cost or at appreciated values is open to more room for discussion. However, the consensus of opinion is that original cost is the basis to work upon. While there are no legal reasons why a man desiring so to do could not list his stock at market figures still by so doing he is very apt to be deceiving himself by reckoning on a profit that has yet to be earned and is only a probable profit after all as no one can tell what may happen in a year's time. Then, too, he is putting a heavy burden upon the coming year as a profit would then have to be shown upon the increased figures and as many retailers to-day are selling merchandise at less than present cost this would be very hard to do. It would seem then that the original cost on stock, with sufficient allowance off all slow selling lines to put them on a salable basis, would be the correct way to figure.

Accuracy is the essential thing in the inventory as incorrect or carelessly acquired figures may well prove worse than none at all as they may be the means of confirming some badly mistaken ideas that the merchant may have about his own business.

The Matter of Insurance

The next thing that has to be considered is insurance. It is necessary that in the event of a fire loss must be proven, and one of the first things that the adjuster will ask for will be the last inventory sheets. In case these are not forthcoming there will be great difficulty in getting a fair adjustment as it would **be impossible for any man to swear to the amount of his loss when he did not really know what it was himself.** There are actually some merchants who are to-day insured under the 80 per cent. insurance clause who do not know the value of their stock and who in consequence might just about as well be entirely uninsured.

How Co-Insurance Clause Works

Co-insurance which many merchants now employ means that the merchant agrees that he will keep his stock insured up to 80 per cent. of the **real value** of his goods.

It is necessary then that the merchant keep in close touch with present-day costs so that he may determine what to-day's valuation on his stock may be.

Suppose that under normal conditions the value of a stock was $10,000, and if he was insured for 80 per cent. or $8,000. Then the value, owing to the present abnormal market conditions, goes up to $15,000, to use a simple example, although this would not be the average increase. In order to comply with the co-insurance clause, he should have his goods insured for 80 per cent. of the $15,000 or $12,000. What if he fails to do this? Should the fire destroy his full stock he would get the $8,000; but in this case he would lose the difference between $8,000 and $15,000, or $7,000. Had he insured up to the $12,000 he would have lost only $3,000. This point he meets by saying, of course, that it is very seldom a total loss occurs.

Loses Heavily on Partial Destruction

But he stands to lose heavily if only a partial loss occurs. Suppose his loss is only $5,000; in that case he would not get the whole of this amount even if he were insured for the $8,000. The insurance companies would take the stand that he insured only for $8,000 instead of $12,000—that is, for eighty one-hundred and twentieths, or two-thirds of what he should have insured for. He violated his agreement to this extent, and, therefore, they would pay him only eighty one-hundred-and-twentieths of the $5,000, or two-thirds.

Buildings Also May Need More

It should be noted that the co-insurance clause is interpreted by the insurance companies, not on the valuation by the merchant, but on the cash value of the goods or property at the time of the fire, so that the insured, if he cannot show that he has increased his policy to keep pace with the increase in the real value of the merchandise, will be penalized.

This point applies as much to his property in the way of buildings and equip-

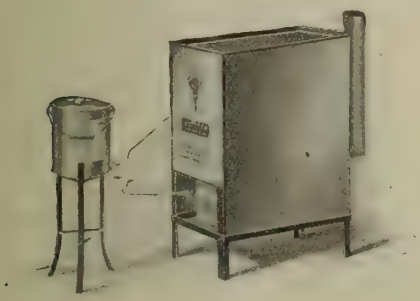
NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN



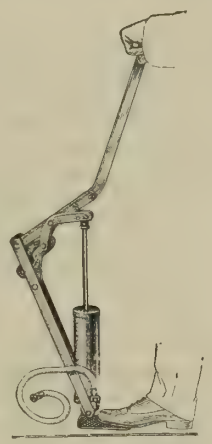
KEROSENE GARAGE HEATER

An oil burning garage heater has just been brought out by the Scientific Heater Co., of Cleveland, Ohio.

This heater will, it is stated, burn either fuel oil or kerosene and embodies a new principle in oil burning. It is claimed the burner itself is wickless and sootless, and no matter how strong the flow of fuel will give perfect combustion.

The manufacturers advise that the Scientific heater is in no sense a stove, embodying none of the characteristics of the usual oil stove and it is so constructed that all heat escapes from the top, and none is radiated from the sides, thus making it practical for use in garages where there is little space between car and wall.

The Scientific oil heater is built, it is stated, on the principle of the miners'



Kerosene Garage Heater.

safety lamp, by which all air for combustion is taken through a fine gauze and through which flame will not pass. Gasoline can be poured over and all around the heater without the slightest danger of fire.

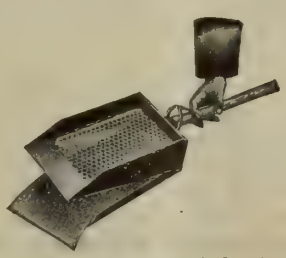
The makers state that this new oil heater is extremely economical—only requiring a very few cents worth of oil a day to heat an ordinary size garage. They also claim that a garage heater quickly pays for itself in the saving of damage to an automobile caused by cold weather. Starting troubles, danger of radiator or battery freezing, damage to body finish and upholstery are entirely eliminated.

J.-K. LEVER PUMP

The Jensen-Kohlert Manufacturing Co. of Saint Charles, Ill., are now marketing the J.-K. lever pump which, it is claimed, hits the 200 lb. pressure mark and more. The pump is made of pressed steel throughout, which it is stated, makes it light, compact and strong, as well as neat in appearance. It is further intimated that the pump folds up just right for space in a tool box or under the seat.

J-K Lever Pump.

Points which the makers enumerate as being features are that it does not get leaky, as it is single acting; there is no stuffing box; there is a single large cylinder. It is stated that the large heavy cup leather that is used will, with ordinary use, last several seasons without any trouble.

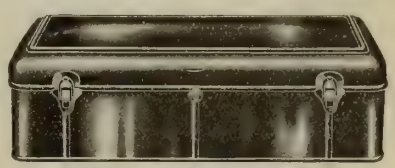


It is claimed that by the time the plunger gets close to the bottom of the cylinder, the operator's strength becomes ten times as great as it was at the beginning of the stroke and that is given as the reason why one can work against high pressure without much effort.

NEW WAY DUSTLESS ASH SIFTER

The P. J. Murphy Company of Minneapolis, Minn., have recently made arrangements with C. L. S. Holmes of 702 Boston Block, Minneapolis, Minn., to market their New Way dustless ash sifter, with J. E. Beauchamp & Co., 20 St. Nicolas St., Montreal, representatives for Canada.

It is claimed the New Way Dustless ash sifter actually performs the function of two tools; it removes the ashes from the ash pit, sifts them, throws the coal into the furnace and with a simple movement of the finger opens the lower compartment and allows the ashes to slide, without dust, into the ash can. This, it is stated, is all done in one operation, saving time, labor, trouble and money. It is claimed that the New Way Dustless ash sifter offers a clean and easy method of sifting and is a decidedly advantageous and economical tool with which to save coal.



The sifter is made of a good weight of material and put together in the most workmanlike and durable manner.

New Way Dustless Ash Sifter.

PEERLESS TOOL BOX

A special feature in connection with the Peerless tool box which has just been brought out by the Corcoran Manufacturing Co. of Cincinnati, Ohio, is stated to be the corrugation of the sides and bottom of the box. This, it is claimed,

Peerless Tool Box.

lends great additional strength to the box with a considerable saving in the weight of same by the use of a lighter gauge steel. The box is long enough to hold a pump and the manufacturers believe is a very desirable size for all purposes.

Details enumerated by the manufacturers reveal that the hinges are riveted on (not welded); there is a lock and two suitcase catches; the box is 22 in. long, 9 in. wide, 7 in. deep, finished in black Japan and packed in individual corrugated carton.

BRITISH STEEL CONCERNS MERGE

Advices from London, England, state that arrangements have been made for the amalgamation of four prominent iron and steel companies—the Worthington Iron and Steel Co., of West Cumberland; the Phoenix Steel Works, of Rotherham; Samuel Fox and Co., of Sheffield, and the Frodingham Iron and Steel Co., of Lincolnshire. The capital will be at least £4,000,000 sterling. The total weekly output is about 25,000 tons of iron and 21,000 tons of steel.

EVENTS IN THE TRADE

BUSINESS CHANGES

Ottawa, Ont.—P. Leslie & Son, manufacturers of tinware, have dissolved partnership. Business continued by F. W. Leslie.

Winnipeg, Alta.—Larson & Hinck have bought the business formerly conducted by the Southern Alberta Hardware Co.

FIRE LOSS

Regina, Sask.—Imperial Oil Company's plant here was damaged by fire to the extent of $30,000 recently when the condenser box between two stills exploded.

Edmonton, Alta.—J. A. Werner, hardware, stock was damaged by water to the extent of $5,000 in recent fire which destroyed building and stock of Cockshutt Plow Company, Ltd.

DAMAGED BY WATER

Martin-Senour Company, Toronto, suffered extensive damage to stock when the building was completely flooded by a sprinkler bursting.

MOVED TO HESPELER

The washing machine and truck departments of the London Foundry Co., Ltd., are being moved to Hespeler, Ont., where it is stated these lines will be manufactured on a much larger scale than in the past.

MONTREAL NEWS

Members of Starke-Seybold & Co. staff, to the number of about twenty-five, report a pleasant social time at the Windsor Hotel on Friday evening last. Toasts and speeches were the order of the evening. William Starke occupied the chair for the evening.

A. E. Warren, buyer for Frothingham & Workman, spent the holidays with Quebec friends.

ST. JOHN, N.B., NEWS.

Philip Grannan, ex-M.P.P., hardware and stoves, St. John, is seriously ill in the Royal Victoria Hospital, Montreal. His condition is regarded as critical.

The St. John members of the Commercial Travellers' Association who volunteered for relief work in Halifax, to the number of almost fifty, were entertained at dinner this week by Mayor Hayes, who was chairman of the St. John Relief Committee.

Eighteen plumbers who have been on strike in St. John since May 1, last, solved their own problems by leaving this week for Halifax where they are promised steady employment.

Work will be started immediately in Moncton, N.B., on the erection of a building for the newly organized Farmers' Co-operative Creamery Co., and it is hoped to have building and equipment ready by next May.

R. A. Corbett has been awarded by the Military Hospitals Commission the contract for extensions to the St. John county hospital. The work includes the erection of a new brick wing and two wooden structures for use as nurses' home and doctors' residence. The contract price is $70,000.

W. S. Fisher, of Emerson & Fisher, addressed the last meeting of the St. John Rotary Club, giving an interesting talk on the Canadian Arsenals at Quebec and Lindsay, the Ross rifle factory and munition making generally, drawing on his own experiences since accepting a position on the government board.

The employes of W. H. Thorne & Co received substantial Christmas gifts from Senator Thorne. Apart from the youngest who received cash presents, all the members of the staff received gifts of Victory bonds, the amounts running up to $500 for those longest with the company.

WINS D.S.O.

Major Harry C. Hatch, son of Lieut.-Col. Arthur F. Hatch, general manager of the Canada Steel Goods Co., Ltd., Hamilton, Ont., is one of the Hamilton officers whose services at the front have resulted in his being awarded the Distinguished Service Order. He was second in command of the 19th battalion, and during the absence of Lieut.-Col. Millen on furlough Major Hatch was in command of the battalion when it was inspected by General Haig. He was struck with Major Hatch's smartness and invited the young officer to an inspection of British troops. At General Haig's suggestion he took a senior officer's course at Aldershot, which will place him in line for the position of commanding officer. Major Hatch distinguished himself at Courcelette, St. Eloi, the Somme and Vimy Ridge and in other engagements for which the award was made. He is only 26 years of age.

Lt.-Col. Arthur F. Hatch, father of Major Hatch, is a veteran of the North-west Rebellion, serving at that time with the Grenadiers.

PERSONAL

Martin Engers of the Dominion Battery Co., Toronto, has just returned from a trip to Western Canada in the interests of his firm. During Mr. Enger's trip which extended right through to the coast he arranged for distributors for his company throughout the West.

CORDAGE ON THE COAST

A company which will probably be known as the Pacific Coast Cordage Company will be incorporated in Victoria in the first two weeks in the new year, according to Judge W. T. Bard of Seattle who is the moving spirit behind the enterprise. The judge has associated with him J. S. Wynton, also of Seattle, much of the necessary capital for the enterprise having been raised in Vancouver where the plant will be established. The company will be incorporated with a capital of a million dollars, half of which will be spent on the first unit. The raw material will be shipped direct from Manilla which will be of considerable benefit to shipping circles in Vancouver.

REBUILDING BRANDRAM-HENDERSON CO. PLANT

In an interview with Mr. George Henderson, President of the Brandram-Henderson Co., paint makers of Montreal and Halifax, HARDWARE AND METAL was acquainted with the facts concerning the company's loss in the recent Halifax explosion.

"I am compelled to believe that after investigation by careful examination of the plant our loss will be well over $40,000. Notwithstanding this monetary loss, I am very pleased to be able to say that there was no loss of life, whatever.

"There was considerable excitement upon the part of the plant workmen, who were bruised or cut with flying glass, and some of them sustained the loss of fingers or a broken arm. Beyond this there was a fortunate absence of death among the workmen."

The company has been very prompt in its action to undertake the work of reconstruction, and through the promptness of its management the products made in this plant will be soon turned out with the usual dispatch. Carpenters were sent down promptly from Montreal, where the head office is located.

and with a large gang at work the premises should be ready for occupancy again early in January.

It is a matter for congratulation that no time has been lost by the men. In some cases it was impossible for the time being to set the men at their accustomed tasks, but all were retained and by assisting in carpentry or other work an uninterrupted wage payment was maintained to all members of the factory.

Those who are accustomed to purchase supplies from the Halifax factory can thus be assured of future wants being supplied promptly.

Annual Sales Conference of McArthur, Irwin, Limited

THE annual gathering of the McArthur, Irwin, Limited, sale force was held at Montreal during the last week of the Old Year.

Owing to the war all elaborate entertainment was eliminated. The only things attempted in the way of general entertainment were a dinner given at the Canada Club and a theatre party.

JOHN IRWIN
President, McArthur, Irwin, Ltd.

The balance of the conference was devoted strictly to business.

The meetings were held at the head office in the St. Paul Street buildings. These gatherings were in the nature of round table affairs which brought all the members of the sales force and executives into intimate touch and gave each an opportunity to express himself.

Visits were made to the factories to give all the force an understanding of the practical side of the business. At the dry color plant, Mr. Holkesvig, the superintendent and a practical color chemist, gave demonstration of the making and testing of dry colors. The sales forces were then shown through the factory and the actual making of dry color demonstrated from start to finish.

In the chemical and testing laboratory, at the home plant, Mr. Mooney, the chief chemist, gave a practical talk on dyestuffs and chemicals. This talk was illustrated with laboratory tests and demonstrations. The sales force start the New Year with new enthusiasm and understanding.

BUSINESS PRESS AT FRONT

Importance of Trade and Class Papers As Medium for Informing Business Men on the War is Recognized.

That the business press carries weight with its regular readers the business men, is recognised, and latest and most advanced tribute to the important function of trade papers is found in the special permission accorded a business press representative to visit the firing lines in France so that readers of the trade papers as well as of the dailies may secure first hand information on the war's progress.

Mr. John C. Curtiss, manager of the London office of the "Dry Goods Economist" was invited to visit the Western Front as representative of the business press. It was felt that for the good of the country all the business papers should have the results of his first hand observation for the authorities fully recognize the function of the business press to inform business men accurately and without sensation as to what concerns them. The fact that the conduct of the war concerns them as business men is also appreciated, hence the appointment of Mr. Curtiss.

That the business papers can be relied on to pursue the policy which is in the best interests of the Allies is of course clear to all concerned. The fact that their readers are accustomed to rely upon them for the businesslike statement of facts gives them their right to participation in the dissemination of authoritative first hand information on actual facts at the fighting front.

CATALOGUES and BOOKLETS

Dupont Products Book

Another Dupont Products Book has just been issued by E. I. Dupont de Nemours & Co. and its associates, Dupont Fabrikoid Co., Dupont Chemical Works, The Arlington Works and Harrisons, Inc., whose headquarters are at Wilmington, Del. It lists all the products of the above concerns and describes their uses as well as who uses them.

This firm is expanding its industrial activities and the information contained in the new Products Book will, it is stated, keep their customers posted in regard to new lines as well as the old ones.

Additional information on special literature relative to the particular product in which any may be interested will be forwarded on request.

The ramifications of the explosives business are extensive and varied and involve the manufacture of various chemicals, distillation of wood and of gas tar and the production of the chemical bases of industries apparently remote from the explosives business.

It is stated that the inability of this country to longer import many of its chemicals and raw materials has made it necessary for the Dupont Company to greatly expand its industrial activities, and the purpose of the Dupont Products Book is to tell the public of the increased number of commodities they make and sell.

A. W. POOLE
Sales Manager, McArthur, Irwin, Ltd.

A new Products Book will it is stated be issued at least once a year.

1918 Poster Calendar

F. E. Myers & Co., of Ashland, Ohio, have issued their 1918 poster calendar. This, in many respects, follows the style of those of former years in that a line of pumps, hay unloading tools, door hangers, etc., are shown, but the heading is somewhat different from any that have been used in the past.

The calendar serves a double purpose in that besides its regular duty of giving the date, it can be used by merchants to sell this firm's line of goods.

THE CLERKS DEPARTMENT

FROM "DESERT RAT" TO HEAD OF U.S. MINT

The Picturesque Career of Ray Baker Who Makes All of Uncle Sam's Money—Miner, Soldier, Politician, Diplomat

FROM "desert rat" to boss of Uncle Sam's mint is the remarkable "spread" of the career of a bright young American named Ray Baker. He now has charge of the manufacture of all the money that changes hands in the U.S.—and it is considerable—but the time is not far distant when he grubbed for gold in the desert. In between he has been a prison warder, a traveller, a soldier, a politician and a diplomat.

Something of his career is picturesquely told in the Pittsburg "Despatch" as follows:—

The love of adventure, inherent in young Baker, listened to the call of the wild. He became restive for the big outdoor life. His father had lived in Virginia City when the Comstock was unearthing its millions, when adventurers from all ends of the earth deemed it their Mecca, and a man had to be a man among men. Ray was born in Eureka, Nev., had spent some of his early years there, and when Tonopah, about one hundred miles south of Virginia City, was declared the second Comstock, the young adventurer took himself thither.

A young brother, Cleveland, had followed the footsteps of his father in the practice of law, and had located up in the mining-camp. It wasn't long after the arrival of Ray that Cleveland was elected District Attorney of Nye County, of which Tonopah is the country seat. The camp was set in most picturesque environments. There were good men and bad men, good women and bad, and good "bad men."

Ray Baker wasn't in camp a month before he was part of the picture of Western life at the frontier. He was on equally friendly footing with the big mine-owner and the dance-hall proprietor, and although he bought many a drink he never drank one. He was certainly a unique character in a wild town like that. He was ambitious to discover a mine of his own. He knew that that didn't mean a fortune overnight, but he had the best of backing among his influential friends in San Francisco.

A Picturesque "Desert Rat"

One afternoon, after the "rush" to Greenwater, where big deposits of copper were supposed to exist, Ray Baker, immaculate dresser and drawing-room paragon left Tonopah as the chauffeur of twenty burros to break a trail into Ubehebe, which he discovered in Death Valley. He was the most picturesque desert rat that ever went out of the camp. His big boots were laced over his khaki, into which was stuck a soft shirt. His sombrero was tilted, and a flowing red tie, a touch of the old life, or maybe of savagery, fell away from his throat.

It took a man of iron nerve to attempt a trip like that. He had been in Death Valley by automobile and had located his ground and said nothing about it. He was going now to secure the cream of the copper country, a stretch across the desert into the Funeral Range, forming one of the walls of Death Valley, and he had to break a new trail for one hundred miles of sandy waste and sage-brush. He had no guide and no companion save the burros.

For several months nothing was heard of Ray Baker, and then it was learned that "Jack" Saulsbury, one of the richest men in that section of Nevada, was associated with him, and big reports of the richness of the mines in the Ubehebe section, where Baker and Saulsbury had bought a claim, began to pour into Tonopah.

Then the 1907 panic broke and there was no demand for copper or anything else. This was followed by the Rawhide gold boom.

Ray was one of the first to get in, and located the "Windy Point" and "Dead Mule" claims. By and by Eastern people came clamoring for his claims. Both had good showings and Ray sold for a neat figure, bade good-by to the picturesque gold-mad camp, and went to Europe. One of the celebrities he met over there was Elinor Glyn. She was charmed with the tales the handsome young Hercules told of the West, and it goes without saying that his own deeds were clothed in modesty. The hardest thing to do with Ray Baker is to get him to talk of himself. But the author got his promise to show her a mining-camp when she "came over" in the following year.

He showed her Rawhide. But it wasn't the Rawhide that he had left. The gold hadn't "gone down" and there was very little money in the camp. But Ray came like his name, one from the sun, to the men who were trying to raise money enough to get home, to get somewhere. He was bringing, with the famous author, Sam Newhouse, mining magnate, of Salt Lake, and a Count or a Prince or something from Paris. It looked like a chance to get some new money in the camp. Newhouse might take hold or a mine or two might be sold to the prince. The boys got busy and here's what happened:

Ray gave a dinner in the biggest restaurant that was left in camp. It was a good dinner, some chickens still being found and some wild celery; also good meat, canned salmon for salad, condensed milk for those who wanted it in their coffee. But there was wine, real wine, plenty of wine—wine which had been brought in for prospective millionaires who never millioned. The table was decorated with sage-brush and wildflowers picked from the hills.

After Rawhide Mr. Baker did the *Dolce far niente* in Reno. Reno—well, Reno is a pretty town through which flows the romantic Truckee River, and besides "Jack" Saulsbury, Ray's former partner, lives there. "Jack" has traveled, too. He came to New York and was recommended to the Waldorf-Astoria, but discovered that it wasn't so first-class after all. They don't keep condensed milk there.

A Hand in Politics

Then Mr. Baker tried his hand at politics. He went back to Tonopah to manage the campaign of his brother, who was running for District Attorney. "Cleve" won, and at the age of twenty-six he was the Attorney-General of the State.

When it came to the next fight in Nevada for United States Senator Mr. Baker managed Key Pittman's campaign. He went to Washington with Senator Pittman. George T. Marye, of Nevada, was appointed Ambassador to Russia. Mr. Baker went with him as confidential secretary and assistant. Mr. Baker saw whither the wind was blowing and plunged on "war-babies." Mr. Baker's judgment was profound.

His adventurous spirit found court life in Petrograd dull. He was too democratic to be continually kowtowing to czars and counts and dukes and other pre-revolutionary dignitaries. He wanted to go to the front to see what real war was like and they wouldn't let him. So he went anyhow and went again, despite the opposition of the aforementioned dignitaries. He saw something there the like of which he never saw in the wild and wooly West, and up to then he had imagined the frontier some life.

And now Ray Baker, desert rat, mining man, traveler, society man, good "bad man," political Warwick, court favorite, dabbler in "war-babies," and diplomat, is director of the Mint. And, he's a bachelor, handsome, and still in his thirties, eligible, doesn't drink, and with a bank-roll that would make Croesus turn over in his grave.

UNITED STATES KINDNESS APPRECIATED

The kindness of the United States people at the time of the disaster in Halifax has been splendid. This is not only noted by the citizens of the stricken city but by Canadians throughout the entire country and is sincerely appreciated. Many money grants in addition to supplies such as clothing, food, etc., have been made and one item which affects the hardwaremen directly is that of the Corning Glass Works of Corning, N.Y.

This concern have advised their customers for Pyrex ware in Halifax that all balances outstanding have been written off and any orders which they favor the company with will be given precedence over all others.

Stanley Works Convention

All Representatives Except One in Attendance — Extensive Discussions on New Goods and Advertising.

ONE of the most successful sales conventions the Stanley Works ever conducted was held in New Britain, Connecticut, Tuesday, Wednesday and Thursday of the week of December 17. It was attended by all the representatives of the Stanley Works with the exception of John T. Rowntree of Los Angeles.

The convention opened Tuesday morning with a speech of welcome by Vice-president E. A. Moore and a discussion on the War's Effect upon Business led by C. F. Bennett, Second Vice-president of the Stanley Works. Papers followed on the Expansion of the Plant by E. W. Pelton, Superintendent of Power, and on Plans for Progress of the New Hot Rolled Steel Plant by M. Farmer, who will have this new plant in charge.

Led by Stuart Parsons, head of the efficiency department, a general discussion was held Tuesday afternoon on New Goods Made During 1917, and suggestions for improvements in the line. This discussion took up all the afternoon and Wednesday morning. On Wednesday afternoon the plans for Stanley Works 1918 Advertising were presented by A. H. Desseau, advertising manager, and samples were shown of new selling helps which will be distributed during the course of the year to Stanley Works' customers. A general discussion on advertising followed, which lasted during the rest of the afternoon.

Thursday was given over to the discussion of Sales and Sales' Policies by A. Zimmerman, sales manager of the company, and a paper was read on the Present Credit Situation by H. P. Carter, the Stanley Works' credit manager. Discussion on these subjects lasted until the convention adjourned late Thursday afternoon.

Tuesday evening the Stanley Club, an organization composed of factory foremen, timekeepers and office employees, gave an entertainment and dance for the visiting salesmen, and the company gave the salesmen a dinner Wednesday night, at which the Hon. George B. Chandler, chairman of the publicity committee of the Connecticut Council of Defense, was the principal speaker.

HARDWARE LETTER BOX

Ideal Oak and Silver King Ranges

Lashbrook Hardware, Ayr, Ont.—Can you inform us where repairs for Ideal Oak and Silver King Ranges can be secured?

McIntyre & Taylor, 501 Queen St. W., Toronto.—Ed.

Britannia Range

B. L. Van Slyck, Plato, Sask.—Can you give us the name of the manufacturers of the Britannia Range?

Wm. Buck Stove Co., Brantford, Ont. —Ed.

REMINGTON PLANT CLOSED

The Remington Arms plant at Bridgeport, Conn., shut down Saturday Dec. 22 for ten days. Ten thousand hands are affected. There is a shortage of gun stock. It was decided to close and make a complete inventory.

The company is installing machinery for making the Browning machine gun. The Colt Company of Hartford and the Remington plant at Bridgeport are to make the heavy type of Browning machine gun and the Marlin Arms Company of New Haven the light type.

Sales force of the Stanley Works in Convention at New Britain, Conn.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

ONE of the outstanding features of the ingot metal market during the week is the easier situation in tin. Big declines were recorded on the London market owing to the announcement that tin is to be placed on the war material list which means that henceforth all speculative trading is abolished, that Government requirements must be met, that there shall be no hoarding, and probably that a fixed price will be established. Provision for supplies of tin to the United States has been made in that shipments of tin are to be allowed to reach that country direct from the Straits Settlements via the Pacific and without permit.

Canadian producers of pig-iron are coming face to face with a difficult situation through the shortage of coke. One large producer has been compelled to bank one of the furnaces and to withdraw quotations for immediate and nearby shipment. This means that the source of supply for Canadian industries will be further restricted if relief is not soon obtained.

Advances in prices of hardware commodities have been numerous during the week and include the following lines: Cotton wrapping twine, clothes lines, awning cord, cotton rope, candlewick, sashcord, shovel handles, revolvers, plow lines, mending materials, electric fans, radiator fillers, cut-out outfits, car heaters, celluloid sheets, lighting systems, throttle valves, lubricators, grease cups, oilers, various kinds of valves, pipe cutters, tube expanders, gasoline torches, ladles. There is a firm undertone to the linseed oil market. Turpentine holds steady but with a tendency to weakness.

Through the movement in prices at the beginning of the new year it would seem that little hope can be held out for steadiness in market conditions during the ensuing months. Travelers for wholesale houses have again started to make their rounds and business will now settle down to normal, following the interruption caused through the holiday season.

MONTREAL MARKETS

MONTREAL, Jan. 2.—Now that the holidays are over jobbers and dealers are settling down to their accustomed tasks and greater attention is being given matters that have temporarily rested. It would seem that there is a tendency to considerable price revision, and while there are not a great many changes for the present week, jobbers have informed HARDWARE AND METAL that more may be looked for in the immediate future. These will be necessary as a result of new price schedules, issued on some lines by the manufacturers. The accentuated conditions as affecting transportation are becoming felt in many quarters, and interest is quite general as to how difficulties that have arisen will be overcome. In the matter of price changes, cotton rope, sash cord and twines as well as awning cord have moved to higher levels. Cash boxes are mentioned as being on a new list with higher tendencies. Some lines of carpenters' planes have advanced. Trammel points have been advanced and a very considerable increase has been made on horse blankets made of the jute materials. Ingot tin has lowered considerably while lead has been in firming market as well as spelter. An advance is reported on a well-known make of revolver but definite schedules are not available. Business for the week has been normal, and in keeping with the season, but of limited compass.

New Running Board Step Plates Selling

Montreal.

AUTO STEP PLATES.—A new automobile step plate is being offered by the trade and this is procurable in three types. This is of Tyler make and is designed to provide a sure footing when the occupant is entering the car. The all rubber type lists at $2; the black enamelled type at $3 and the polished aluminum at $4. Grey rubber inserts are supplied with the $3 line and red rubber with the aluminum frame type. From the list prices a discount to dealers is allowed of 25 per cent.

Automobile Blue Books Are Now Available

Montreal.

NEW ROAD BOOKS.—Dealers who have a demand for the official road books used by motorists can now secure the 1918 issue, which has been printed, and is carried in stock. It gives all the official and most approved road routes to all places in the United States and Canada. The list price is $3, and from this dealers are entitled to a discount of 20 per cent.

Cotton Rope Advances Four Cents a Pound

Montreal.

COTTON ROPE.—An advance of about four cents a pound is recorded in the price of cotton rope, which makes a new high record. The 3/16 size is now quoted at 57c per pound and the quarter-inch and larger 56c lb. This is in accordance with advances made for cotton products all round.

Sash Cord is Higher; Record Price Established

Montreal.

SASH CORD.—In sympathy with the general advance on cotton products, sash cord in the various sizes has been moved up, the advance being around four cents a pound. Thus the No. 6 is now quoted at 63 cents a pound, the No. 7 at 62 cents, and Nos. 8 to 12 61 cents. Awning cord has also reached new high levels and the discount now ruling is 25% from the standard list.

Cotton Clothes Lines Up About 10 Per Cent.

Montreal.

COTTON CLOTHES LINES.—A new discount applies to the list on cotton clothes lines. This is immediately effective, and for the convenience of dealers we give a few of the regular list prices. Thus the 30 foot are listed at $2.60; 40 ft., $3.20; 48 ft., $3.84; 50 ft.,

$4; 60 ft., $4.80 and 72 ft., $5.76. The approximate discount from these prices is 10 per cent.

Important Advance On Lines of Planes

Montreal.

CARPENTERS' PLANES.—An advance is recorded in the price of planes. This applies to the Stanley line and the advances are from fifteen to thirty cents on each of the lines so affected. Thus, the No. 2 has been increased from $2.80 to $3; No. 11, $3.15 to $3.35; No. 20, $6.05 to $6.35; No. 48, $3.85 to $4.15; No. 148, $2.90 to $3.10; No. 71, $2.95 to $3.15; No. 127, $2.05 to $2.20; No. 129, $2.40 to $2.60; No. 135, $2.05 to $2.20 and No. 289 from $2.80 to $3.

Trammel Points Record an Advance

Montreal.

TRAMMEL POINTS.—An advance is registered this week in two lines of trammel points, the new prices being effective at once. The No. 1 which formerly sold at $12.95 per dozen are now quoted at $13.65 while the No. 2 selling previously at $16.65 are now $17.50 per dozen.

Horse Blankets Record Considerable Advances

Montreal.

HORSE BLANKETS.—A big advance is recorded in the price of jute horse blankets, the new prices becoming immediately effective. While there is no definite percentage of advance, we give herewith some of the comparative prices, old and new. Striped jute, unlined, 60 x 70 is advanced from $11.40 to $18.75; the same in a 40-inch lining is up to $27.50 from $17.70, and in this grade the full-lined style is $32.50 per dozen, the previous price being $20.70. The fancy checked jute, with full lining and in 80 x 80 size, is up to $41.25 from $32.40, and the fancy stripe and check jute, with a 60-inch lining, size 60x70, sells now at $53.75, the old price being $39.60 per dozen. Size 60x70 in striped jute, selling before at $20.70 is up to $30.65 and the same with full lining and 2-inch girth and in 64x70 size now sells for $36.25 per doz., the previous price being $24.30 per dozen.

Lead Pipe, Sheets, Hold Still Unchanged

Montreal.

LEAD PRODUCTS.—With the usual quiet conditions prevailing for the various lines of manufactured products, there are no changes reported for the week. It is to be noted, however, that there is a firming in the price of ingot lead, and manufactured lines will probably be held firmly, with tendencies governed by ingot prices in the immediate future. These prices hold and are being quoted as follows:

MONTREAL—	
Lead pipe, lb.	$0.14-$0.15
Lead waste pipe, lb.	0.15- 0.16
Lead traps and bends	Net list
Lead wool, lb.	0.14
Lead sheets, 3 lbs. sq. ft.	0.12½- 0.13
Lead sheets, 3½ lbs. sq. ft.	0.12- 0.12½
Lead sheets, 4 to 6 lbs. sq. ft.	0.11½- 0.12

Steel and Iron Trade Is Confined and Light

Montreal.

STEEL AND IRON.—Few orders of any considerable size are reported as coming the way of jobbers these days, and it is generally stated that there is the usual quiet condition, which prevails at this season of the year. Stock is being taken and lines filled in by jobbers, but aside from the regular small sorting there is little interest to the market.

MONTREAL—	
Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	11 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95

Black Diamond cast steel, lb.	0 18-0 19

Sheets and Plates In Quiet Market

Montreal.

SHEETS AND PLATES.—For this season of the year little interest is looked for in the sheets products market. Thus, there is little of news value reported and dealers are busy with the inventory work, which entails the assistance of all members of the staff. Probably there has been a little more movement since the recent easing of prices, but the volume of trade is small. Dealers wanting black or galvanized sheets can secure quite favorable quotations if the quantities wanted are at all large.

Little Activity For Old Materials

Montreal.

OLD MATERIALS.—Very quiet conditions govern the old material market at the time of writing, and dealers in junk do not expect much change for the next few weeks. There have been no new quotations for the week and prices as furnished herewith are prevailing.

MONTREAL—

Wire and Cut Nails Quiet and Unchanged

Montreal.

WIRE AND CUT NAILS.—There is a general quiet condition reported in the nail market and no change in prices has been made. Beyond the usual sorting, lots moving out are small, and dealers are just buying what present needs warrant them carrying. Cut nails are selling at $5.75 base, while standard wire nails are $5.50 base. It was stated last week that a decline had taken place in cut nails in this market. This statement was based on misinformation. The price is still $5.75. Smooth steel wire at the base price of $6.50 is moving in very limited quantities.

Rope Situation Is Firm But Unchanged

Montreal.

ROPE AND CORDAGE.—A firm tone characterizes the rope market, but prices are unchanged. With transportation so involved and the present and immediate future situation somewhat beclouded, there is little promise of any easier market. The amount of business being done is naturally limited, and dealers report average conditions for this time of the year.

Coal Oil Sales Good; Gasoline Prices Firm

Montreal.

GASOLINE, COAL OIL.—The dealers in gasoline and coal oil report a satisfactory volume of business for this season of the year. Especially is this so for coal oil to outside country points, while the city demand for gasoline keeps up well. Many owners are still using their cars and a great deal of gasoline is consumed. Garage men, however, have reported a somewhat decreased demand. Patrons call for gasoline much less frequently than in the milder weather. Prices are held, with coal oil selling as follows: Royalite, 17c gallon, Palacine 20c, and Electroline at 20c. Gasoline is still 32½c per gallon.

Ingot Tin Weaker; Pig Lead is Firmer

Montreal.

INGOTS.—Interest for the week in ingot metals centres around tin, which is weaker. This is in sympathy with talk of more intervention upon the part of the British government regarding price fixing.

COPPER.—Trading is light and the price holds unchanged here at 33c to 34c per lb.

LEAD.—The scarcity of spot supplies

of pig lead have tended to a firming of prices and these are now quoted at 9¼c to 10c per lb.

TIN.—There is a marked weakness in tin. This has been occasioned by talk of price-fixing across the water by the British government. Quotations here are now being made on the basis of 78c to 81½c per lb.

SPELTER.—This is firmer in sympathy with the lead situation, and quotations are being made at 10½ to 11c per lb.

ALUMINUM.—No change, and with little business passing. Price range from 58c to 60c per lb.

ANTIMONY.—The market is quiet and quite uninteresting with the price holding around 18c per lb.

TORONTO MARKETS

TORONTO, Jan. 3.—With entrance into the new year there does not seem to be much indication of a movement toward lower prices. Changes during the past week have been quite numerous and include such lines as cotton wrapping twine, clothes lines, awning cord, cotton rope, candlewick, sashcord, shovel handles, revolvers, plow lines, mending materials, electric fans, radiator fillers, cut-out outfits, car heaters, celluloid sheets, lighting systems, throttle valves, lubricators, grease cups, oilers, various kinds of valves, pipe cutters, tube expanders, gasoline torches, ladles. Travelers for wholesale houses for the most part started to make their rounds immediately after the holiday. Business during the past week has been light, the attention of wholesalers being given over largely to the question of stock-taking.

Lanterns Have Advanced 50c Dozen

Toronto.

LANTERNS.—An advance of 50c per dozen has been recorded in the price of lanterns, which now makes the price of short globe $12.50 per dozen, japanned dash lantern $15 per dozen, searchlight dash lantern $15.75. Copper well japanned lanterns are quoted at $18.25 per dozen. Price of Little Bobs lanterns remains unchanged at previous quotations, the range being from $2.10 to $4.20 per dozen.

Shovel Handles and Mending Materials Up

Toronto.

HANDLES, MENDING MATERIALS.—An advance of 75c per dozen on net prices of D-handle and long-handled shovels has been made effective during the week, which now makes the selling price $3.75 per dozen. An advance of approximately 10 per cent. has also been announced on Mendets, the small size now being quoted at $1 per dozen while the large size is quoted at $2.15 per dozen.

Revolvers Advance 10 to 20 Per Cent.

Toronto.

REVOLVERS.—An advance of 20 per cent. has been put into effect on Iver-Johnson revolvers in all styles with the exception of Model 1900 on which an advance of 10 per cent. has been recorded. Model 1900 nickel-plated revolvers 22 rim fire, 32 rim fire, 22 centre fire and 38 centre fire are all quoted at $4.60 each net. Safety hammer revolvers nickel-plated 22 rim fire, 32 rim fire and 38 centre fire are all quoted at $11.25 each. Safety hammer blued 32 centre fire, 38 centre fire are quoted at $11.70 each net. Safety hammerless nickel-plated 32 centre fire are quoted at $12 each, blued 32 centre-fire at $12.40 each, 38 centre fire nickel-plated, 38 centre fire blued at $14.70 each.

Electric Fans and Plow Lines Go Up

Toronto.

FANS, PLOW LINES.—Owing to the high price of raw cotton further advances have been recorded in the price of all cotton goods. One of the lines to be affected is that of plow-lines, which are now quoted at $6.85 per dozen net. Polar Cub electric fans have made a further advance of 75c each, which now makes the price to the retail trade $6.25 each.

Clothes Lines and Awning Cord Go Higher

Toronto.

CLOTHES LINES, AWNING CORD.—The firm situation in the raw cotton market with a steadily upward trend in prices has caused a further advance in the price of clothes lines and sashcord. In 30-foot lengths the price is now $2.15 dozen, 40-foot lengths $2.60 per dozen, 48-foot lengths $3.10 to $3.15, 60-foot lengths $3.85 to $3.90, 72-foot lengths $4.75 and 100-foot lengths $6.40 per dozen. White awning cord is quoted as follows: No. 3½, $1.90 to $1.95 per dozen; No. 4, $3 to $3.15 per dozen, and No. 4, $4.15 to $4.25 per dozen. Drab colored awning cord is quoted: No. 3½, $2.15 dozen; No. 4, $3.35 dozen; No. 4½, $4.50 per dozen.

Cotton Twine, Rope, and Sashcord Advance

Toronto.

COTTON PRODUCTS. — Advances were registered in a number of cotton lines during the week by reason of the strong situation in the market for raw cotton. Cotton wrapping twine is now quoted at a range of prices from 50½c to 63c per pound for three-ply, and 54c to 68c for four-ply. Five-ply cotton twine is quoted at 54½c per pound. Sashcord No. 6 is quoted at 63c to 65c per pound; No. 7 at 62c to 64c, while Nos. 8, 9, 10 and 12 are quoted are 61c to 63½c per pound. Cotton rope base size is now quoted at 56½c to 61c per pound; 3/16-inch, 67½c to 62c pound; 5/32-inch, 60½c to 65½c; ⅛-inch, 61½c to 67c per pound. Candlewick is quoted at 66c per pound, which also represents an increase in price. Seine twine No. 15 and under is now quoted at 75c per pound, while No. 18 and over are quoted at 73c per pound.

Radiator Fillers Advance 20c on List

Toronto.

AUTOMOBILE ACCESSORIES. — One of the automobile accessory lines to show an increased price during the week are the Ideal radiator fillers, on which the list price has been advanced 20c, making the price now $2.90 each. These fillers are made of steel and then galvanized. When the word steel is mentioned the mind instinctively assigns a reason for the price change. In lots of less than half a dozen the discount on this line is 25 per cent., in lots of six the discount is 30 per cent. and in lots of 24 the discount is 35 per cent.

Cut-Out Outfit Advances in Price

Toronto.

CUT-OUTS.—An advance in the list price of Badger cut-out outfits has been put into effect, the increase amounting to 5c. Badger for Chevrolet cars No. 490 cut-out outfit, complete with M pedal, is now quoted at $1.15 list price. Same article complete with Y pedal is quoted at $1.20 each list price. Same outfit with X pedal is quoted at $1.35. This latter price is same as prevailed previously. Discount to trade on this line is 25 per cent. in small quantities, 30 per cent. in quantities of 12 and 35 per cent. in quantities of 48.

Some Car Heaters Advance: Others Decline

Toronto.

AUTO ACCESSORIES.—An advance of $5 on list price in two styles of the Perfection car heater has been made effective while a decline of $3 on list price has been made effective on another type of same heater. Floor type of heaters, Models A and AB, are now quoted at $45, the former list being $40. On Model B, which is the vertical type of heater, a reduction of $3 on list price has been made effective, the present price being $37 each. Extra valves for same are quoted at $7.25. Discount on this line to the trade is 20 per cent. in quantities less than six heaters and 25 per cent. in quantities of six.

Heel Plates and Sheet Celluloid Up

Toronto.

AUTO ACCESSORIES.—An advance of 10c in the list price of Spiro heel plates has been announced by wholesale dealers. Where formerly the list price was 65c each it is now 75c each. These plates are made of aluminum and are

used for placing on the floor board where the heel touches, thus preserving the appearance of the matting. They can be screwed or tacked in position. Discount on this line is 25 per cent. in small quantities, 30 per cent. in quantities of six and 35 per cent. in quantities of 24. Transparent sheet celluloid, used for fronts, curtains and other places, has made a considerable advance on list prices. Size 20x12 inches is now quoted at 75c each list price, an advance of 15c. Size 20x50 inches is quoted at $2.85 list price, an advance of 85c. Size 20x24 inches is quoted at $1.40 each list price, an advance of 40c. Size 20x30 inches is quoted at $1.70 each, an advance of 40c on list price. This line of goods is subject to a discount of 20 per cent. in a small number of sheets and to a discount of 20 and 5 per cent. when 10 sheets are ordered.

Lighting System Shows 20% Advance

Toronto.

AUTO ACCESSORIES.—An advance of approximately 20 per cent. has been made effective on list price of the Type H Genolite side lighting system for automobiles. Where the list price was formerly $53.85 the new list price has been increased to $63.85. Speedometers have also made a considerable advance through the issuing of higher list prices. Where these latter were formerly sold at $3.95 they are now quoted at $6.85 list. These articles are subject to a discount of 20 per cent. in small quantities, while quantities of ten carry a discount of 20 and 5 per cent., and in quantities of 50 the discount is 20, 5 and 5 per cent.

Throttle Valves Have Advanced in Price

Toronto.

VALVES.—New discounts have been issued on throttle valves which provide for a substantial increase in price. Standard brass throttle valves that were formerly quoted at 15 per cent. off list are now quoted at list plus 10 per cent. Standard iron throttle valves that formerly were quoted at list plus 10 per cent. are now quoted at list plus 20 per cent. Standard brass safety valves W&L and standard iron safety valves W&L prices have been withdrawn and are now only given on application. Howard ball valve that was formerly quoted at 20 per cent. off list is now quoted at 15 per cent. list.

Expansion Joints and Lubricators Higher

Toronto.

EXPANSION JOINTS, LUBRICATORS.—An advance in the price of Howard expansion joints has been provided for through the change of the discount applying to this line. Where formerly this line was quoted at 10 per cent. off list they are now quoted at net list. Swift lubricators and parts also show an increase in price. Lubricators of this type that were formerly quoted at list plus 5 per cent. are now quoted at list plus 20 per cent. Parts for these lubricators that were formerly quoted at list plus 20 per cent. are now quoted at list plus 40 per cent.

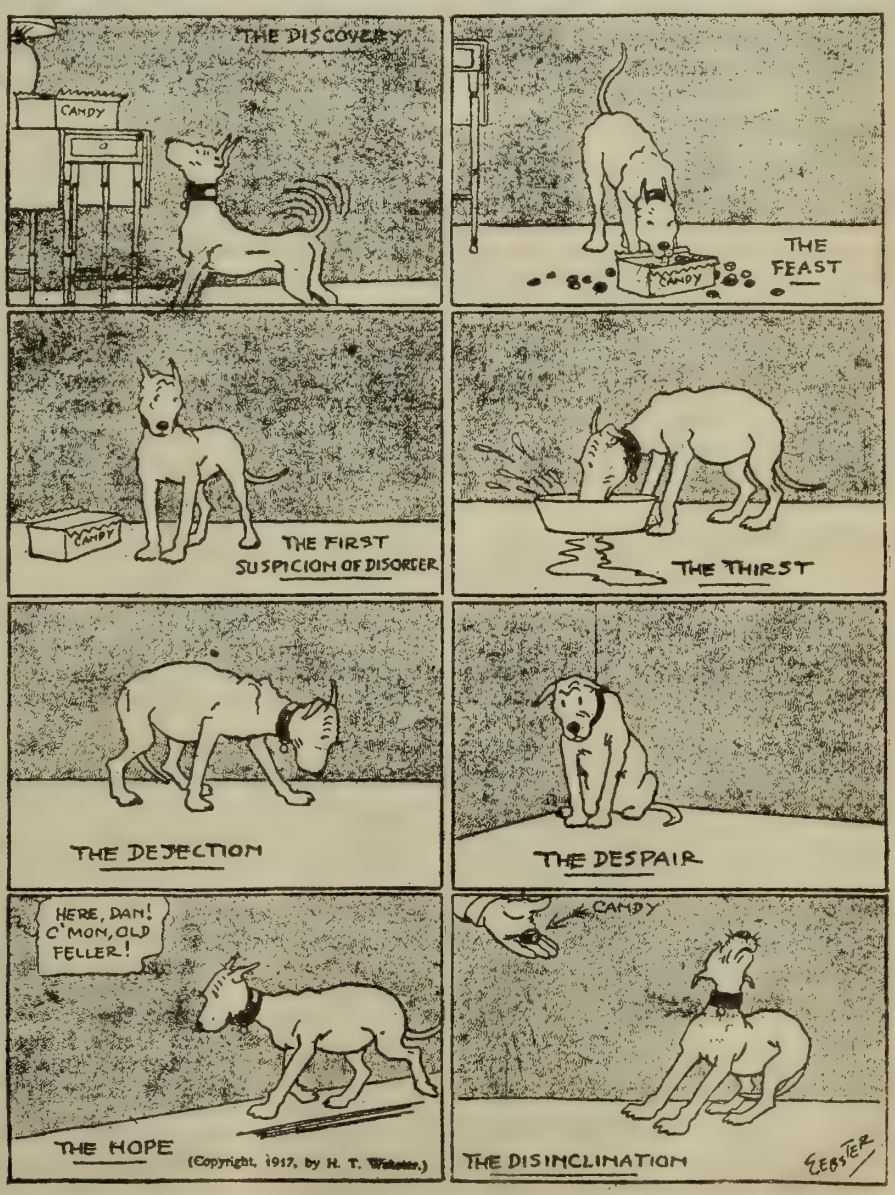
Grease Cups, Oilers and Spouts Advance

Toronto.

GREASE CUPS, OILERS, SPOUTS.—Brass grease cups, oilers and spouts of Fairbanks pattern show an advance in price through the changing of the discounts from list prices. Brass grease cups that were previously quoted net list are now quoted list plus 10 per cent. Brass oilers formerly quoted net list are quoted at present at list plus 10 per cent. Copperized oilers hold unchanged at 50 per cent. from list price. Brass spouts, also quoted previously at net list, are now quoted at list plus 10 per cent. Copperized spouts hold unchanged in price at 35 per cent. discount from list price.

Chronometer Valves and Steam Traps Firm

Toronto.



VALVES, TRAPS.—There is a very firm situation in the market for Fairbanks chronometer valves of screwed and flanged pattern. Prices have been withdrawn on these lines and are given only on application. Screwed pattern were formerly quoted at net list while the flanged pattern were formerly quoted at list plus 10 per cent. Ideal steam traps that were formerly quoted at 20 per cent. off list are now quoted at 10 per cent. off list. Standard steam traps formerly quoted at net list are now quoted at list plus 10 per cent.

Safety Valves, Relief Valves and Gauges Up

Toronto.

VALVES, GAUGES. — Considerable advances have been recorded in the price of Pratt & Cady pop safety valves. Water relief valves of the same make are also higher in price. Case gauges show a considerable advance through the changing of the discount. Following table gives the former discount and present discount for purpose of comparison:

	Former Discount	Present Discount
Pop safety valves, Nos. 899-900	37½%	20%
Pop safety valves, Nos. 902-3.	30%	25%

Hand pullers, No. 932	Plus 25%	Plus 50%

Pipe Cutters and Tube Expanders Go Up

Toronto.

PIPE CUTTERS, EXPANDERS.—In a recent issue an advance in Barnes and Saunders pipe cutters was recorded. This week an advance in Trimo pipe cutters has been made effective through the changing of the discount. Where this line was quoted at 35 per cent. off list they are now quoted at 25 per cent. off list. Tube expanders is another of the lines to show an advance. Nos. 1098-9 tube expanders that were formerly quoted at 25 per cent. off list are now quoted 12½ per cent. off list.

Gasoline Torches and Ladles Higher

Toronto.

TORCHES, LADLES.—Higher prices on gasoline torches have been put into effect. Torches Nos. 1119-33 that were formerly quoted at 10 per cent. off list are now quoted at net list, while No. 1134 gasoline torch formerly quoted at 12½ per cent. off list is now quoted at list plus 20 per cent. Ladles have also registered an advance in price. No. 1138 ladle that was formerly quoted net list has been advanced to list plus 37½ per cent.

Lubricating Oil Prices Not Yet Out

Toronto.

GASOLINE, COAL OIL.—While an advance has been decided upon for motor lubricating oils new selling lists have not yet been issued. It is understood, however, the advance on this grade of oil will be in the neighborhood of 5c per gallon. Gasoline demand is lighter now that winter weather conditions prevail. There is an insistent demand for coal oil for use in oil stoves and oil heaters. Difficulty in getting coal supplies has sent people in quest of oil stoves in large numbers. Price of coal oil was firmly maintained but no changes were recorded. Gasoline was quoted at 31½c per gallon. Selling prices for coal oil will be found in current quotations.

Rope Market Gives Evidence of Strength

Toronto.

ROPE, TWINE.—There is a strong situation in the market for manila ropes due to the upward tendency in fibre. In the primary market manila fibre advanced from ¾c to 1¼c per pound during the last week of the year. There is very little of the fibre offered for sale as stocks on this continent are light. There is great difficulty in getting steamer space to bring the raw material from the Philippines which is the immediate cause for the shortage of raw materials. There seems little hope of bettering the condition in the immediate future. In the meantime manila rope is in a strong situation as a result of this condition. Prices held unchanged at 39c per pound base for pure manila, 33c for British manila and New Zealand hemp ropes and 27½c for sisal rope base.

Coal Oil Heaters Again in Good Demand

Toronto.

STOVES, HEATERS, ENAMELWARE.—The heaviest demand at the present time is for oil heaters as a result of the shortage of coal supplies. From the country districts particularly there has been considerable difficulty in getting delivery of coal and people have turned to the oil heater for relief. Manufacturers have been engaged in cleaning up the balance of orders on contract to the extent of available supplies. Enamelware has held in steady market during the week. Demand for this product was reported very good during the closing days of the old year.

Nails Reported In Strong Market

Toronto.

NAILS, WIRE.—A strong undertone continues for the wire nail market. Manufacturers of nails see no better prospect ahead to get supplies of wire rods for the manufacture of nails. Intimations are made in some quarters that an advance in price would not be out of order in view of the situation in wire rods. Wholesale jobbing houses continue to be quoted on the basis of $5.45 base per hundred pounds for standard steel wire nails. Wire products are holding steady in firm market with prices unchanged. Cut nails are quoted on the basis of $5.65 base, which represents a decline of 15c as announced last week.

Iron and Steel Prices to Remain Fixed

Toronto.

IRON AND STEEL.—The War Industries Board in the United States has decided to continue the present price basis on iron and steel commodities until March 31. This decision was reached after a number of conferences with the leading producers of that country. The price of ore, coke and pig iron will also remain unchanged. New contracts are not to be taken for delivery later than April 1 at a stated price unless coupled with a clause making the price subject to revision by any authorized United States Government agency. This will mean that so far as the United States market is concerned there will be a steadiness of price in these commodities for that length of time at any rate. In the local market prices held unchanged.

TORONTO—	Per 100 lbs.
Common bar iron	$ 5 25
Common bar steel	5 50
Refined iron	5 65
Angle base	5 75
Horseshoe iron	5 50
Tire steel	5 70
Norway iron	13 00

Sleigh shoe steel	5 50
Band steel, No. 10	5 75
Do., No. 12	6 00
Spring steel	15 00
Mining tool steel	30 00
Sheet cast steel	35 00

Boiler Plate May Be Lower in Price

Toronto.

SHEETS, PLATES.—There is a possibility that within the near future lower prices may be named on ¼-inch boiler plate. Intimations are made in some quarters to the effect that stocks that are now in transit can be sold at lower prices on arrival. This boiler plate, however, is all conserved for shipbuilding purposes and importers are placing their shipments in that quarter. The government will not permit the use of these heavy plates for anything except shipbuilding. Black sheets and galvanized sheets were in steady market with prices unchanged. In some of the lighter gauges of sheets there are now fairly good stocks on hand.

BLACK SHEETS—	Per 100 lbs.		
10 gauge	$	$12 00	$12 00

Corrugated Sheets Maintain Firmness

Toronto.

CORRUGATED SHEETS.—The market held firm during the week but prices were unchanged. There is a light demand at this season of the year. Eavetrough and conductor pipe are also in light demand, which is the usual condition for this season of the year. Prices on the latter commodities held unchanged at net list.

Toronto—	Per 100 feet Cold drawn	Lapweld

Boiler Tube Problem Becoming More Acute

Toronto.

BOILER TUBES.—The acute situa-

tion in boiler tubes has been brought prominently to the fore during the week with one large coal company in this city who faced the possibility of having to close down their hoisting machinery if the government does not allow them to secure some tubes for the repair of their boiler. As time goes on this situation will in all probability become more aggravated as boiler tubes become worn out. Prices remain unchanged but they are extremely difficult to secure unless it can be shown that they are required for some national purpose.

Drop in Tin May Affect Products

Toronto.

LEAD AND ZINC PRODUCTS. — A big decline in the price of tin in the London market on Wednesday of this week may have the effect of causing an easier tone to the market for solder and other products into which ingot tin enters. In the local market prices held unchanged with a fair demand reported for the holiday season.

Old Material Market Still Shows Dullness

Toronto.

OLD MATERIALS.—Dealers in old materials watched with a great deal of interest the London tin market, in which there was a big decline during the week. This was considered to have a bearing on the old material situation, particularly if it heralds a decline in the market for scrap tin as well. The market for other old materials held in a stagnant condition during the week, very little interest being manifested either in buying or selling.

Tin Takes Tumble In London Market

Toronto.

INGOT METALS.—Interest in ingot metals during the week centred around tin, where a big decline was recorded in the London market on Wednesday of this week. Other metals were in quiet market, which is usual for this season of the year.

COPPER.—Statistics show that the output of copper for the year 1917 has exceeded the production in 1916. This is a good showing in the face of an estimated loss of 100,000,000 pounds through labor troubles at the mines. While there will not be very much of a surplus to carry over into 1918, still there will be sufficient to meet the needs of the United States Government and private consumers as well. The price is to remain fixed at 23.50c per pound from the producers, while jobbers in the United States will continue to furnish copper on the basis of 24.67½c per pound. There is enough copper for everyone, and there has been no delays in the delivery of contracts. In the local market prices held unchanged at 30c to 32c per pound for casting copper.

TIN.—After much solicitation, the British tin regulations have been radically changed. Announcement is made that the embargo on tin has been lifted by the British Government so far as the United States is concerned, and that shipments are to be allowed to go forward to that country from the Straits Settlements via the Pacific without permit. The tin is to be consigned to the American Iron and Steel Institute, who will see that it is properly and equitably distributed. The British Government has furthermore placed tin on the war material list, which means that all speculative trading is to be abolished, that Government requirements must be met, that there shall be no hoarding, and probably that a fixed price will be established. Cable advice to a Toronto concern on Wednesday of this week stated that tin had declined $175 per ton within a week, or in the neighborhood of 8½c per pound. The New York market was down 4c per pound in sympathy. Quotations in the local market were maintained, being made on the basis of 78c to 80c per pound. Difficulty of getting additional supplies tends to sustain the market.

SPELTER.—It is understood some purchases of spelter have been made by the United States Government to the extent of 4,000 tons. Outside of this transaction there has been little movement in the primary market. Locally quotations held unchanged at 9¾c to 10½c per pound.

LEAD.—The market for pig lead is holding steady, but firm. The principal producers in the United States continue to quote on the basis of 6¼c, while the independents quote on the basis of 6¾c to 7c. The principal producers are not accepting new business on this basis, but are cleaning up on old contracts. In the local market quotations were made on the basis of 8¾c to 9c per pound.

ANTIMONY.—Demand for this commodity is light and the price holds unchanged at 16c to 18c per pound.

ALUMINUM.—Steadiness characterizes the market for aluminum, with movement slow outside of Government needs. Quotations hold at 60c per pound in the local market.

PIG IRON.—A more serious situation has developed with some of the Canadian producers of pig iron. One concern has been compelled to bank one of their furnaces through the shortage of coke and to withdraw all prices for immediate sale. Another concern, however, continues to quote for near-by and future shipment. The supplies of coke of the latter concern have been adequate so far to take care of their requirements. But there is uneasiness about the future. Quotations were made on the basis of $50 per ton for foundry iron by concerns who had not withdrawn from the market.

LONDON MARKETS

LONDON, Jan. 3.—One of the important lines of products to register a general upward tendency is that in cotton goods. Sashcord, cotton rope, cotton twine, cotton clothes lines, awning cord, candlewick, seine twine and bag twine have all been increased in price. Business during the past week has been light, which is a usual condition for this season of the year. Most hardware merchants are either taking stock or preparing to start with the opening of the New Year. Prices for the most part are firmly maintained. Collections are reported very good.

Cotton Goods Show A General Advance

London.

COTTON PRODUCTS.—There has been a general advance of approximately 7½ per cent. on lines of cotton goods such as sashcord, cotton rope, cotton twine, cotton clothes lines, awning cord, candlewick, seine twine and bag twine. Following are the prices which now prevail on these various lines:

Sashcord—No. 6, 63c lb.; No. 7, 62c per lb.; Nos. 8 to 12, 61c per lb.

Cotton Rope—3/16-inch, 57c per lb.; ¼-inch and larger, 56c per lb.

Cotton Twine—Three-ply, 60c per lb.; four-ply, 64c per lb.

Cotton Clothes Lines—Twisted, 30-ft., $2.15 dozen; 48-foot, $3.15 dozen; 60-foot, $3.90 dozen. Braided, 50-foot, $3.85 dozen.

Awning Cord—Braided white, No. 3, $1.70 dozen; No. 3½, $2 dozen; No. 4, $3 dozen; No. 4½, $4.15 dozen.

Candlewick—60c per lb

Seine Twine—No. 18 and larger in 1-lb. cones, 71c per lb.; No. 18 and larger in ¼-lb. cones, 72c per lb.; No. 15 and smaller in 1-lb. cones, 72c per lb.; No. 15 and smaller in ¼-lb. cones, 73c per lb.

Bag Twine—70c per lb.

Nails And Rope Prices Maintained

London.

NAILS, ROPE.—The market for standard steel wire nails held unchanged in a firm market. Quotations were made on the basis of $5.45 per hundred pounds base. Cut nails were unchanged at the decline recorded last week, selling basis being $5.60 per hundred pounds. Rope market gives evidence of strength due to the difficulty of getting raw materials from primary points. Pure Manila is still quoted on the basis of 39c per pound, British Manila and New Zealand hemp at 33c per pound and sisal rope at 27½c per pound base.

Flashlights And Batteries Going Fast

London.

FLASHLIGHTS, BATTERIES.—There is an exceptionally good sale for flashlights and batteries at this season of the year, largely due to the desirability of these lines as holiday gifts. There is a firm market for these commodities, intimations being made in some quarters that higher prices are anticipated. Discount at present remains unchanged at 33 1/3 per cent. off list on Eveready line.

Glass in Firm Market

Although there has been no change in the market for glass so far as prices are concerned there is a firm situation with the probability that higher prices may prevail. Single and double diamond are quoted on the basis of 40 and 10 per cent. off list while cut lights are quoted at 33 1/3 per cent. off list.

Winter Lines Have Been In Active Demand

London.

SKATES, SLEDS, HOCKEY STICKS.—Merchants are feeling quite gratified over the movement in winter lines this season. Hockey sticks are quoted on the basis of 85c per dozen for boys' white and boys' red, $2 per dozen for men's rock elm, and $3.75 per dozen for men's Spalding. MicMac sticks are quoted at $4.75 per dozen. Hand sleds are quoted on the basis of 35c per cent. off list, while Star skates are quoted at 20 per cent. off list. Snow shovels continue to be quoted at 12½ per cent. off list.

Coal Shortage Creates Demand For Sifters

London.

SIFTERS, OIL HEATERS.—Two of the lines of hardware goods that have been in excellent sale during recent weeks are ash sifters and oil heaters. In both instances the shortage of coal has been responsible for interest. Sifters with common wood sides are quoted at $2.15 per dozen, Banner sifters are quoted at $2.90 each and Rocker No. 1 are quoted at $5.25 each. Oil heaters are moved at $5.25 each. Oil heaters are moving freely in all parts of Western Ontario. Perfection No. 520 is quoted at list price of $5.75 each, No. 525 at $5.50 list each and No. 530 at $6.25 list each. Prices on oil heaters are subject to a discount of 25 per cent.

Weather Strip, Toe Calks, Horseshoes In Good Sale

London.

WEATHER STRIP, CALKS, HORSESHOES.—An excellent sale for weather strip continues. Frost King is quoted at $4.40 per dozen packages, Swan hardwood at 75c per set, clincher wood and felt No. 71 narrow at $2.25 per 100 feet and No. 74 wide at $4.25 per 100 feet. Best ½-inch is quoted at $1.50 per 100 feet; ⅝-inch at $1.75 per 100 feet; ¾-inch at $2 per 100 feet. Toe calks and horsehoes are moving freely. Neverslip toe calks are quoted at a discount of 15 per cent. while same brand of horseshoes are quoted at 10 per cent. off list. Capewell horseshoe nails are quoted at a discount of 10 per cent. off list.

Booking Prices on Netting

Booking on poultry netting is now being made for spring delivery goods. Canadian netting, 1-inch and 2-inch mesh is quoted at a discount of 15 per cent. off list.

Lawn Mowers and Harvest Tools

There is a steadiness in the market for lawn mowers and harvest tools. Daisy, Star, Woodyatt and Empress are quoted on the basis of 40 per cent. off list. Harvest tools are quoted on the basis of 25 per cent. off list. Buco hand cultivators are priced at $9 per dozen.

Booking Prices On Summer Accessories

SCREEN WIRE, HINGES.—Prices for booking of screen wire hold unchanged at figures recently announced. Painted screen wire in 100-foot rolls is quoted at $3 per 100 square feet, while bronze screen wire is quoted at 14c per square foot. Spring hinges for screen doors, No. 20, are quoted at $17.75 per gross, while No. 7 tool steel hinges are quoted at $20.20 per gross.

Price on Horse Clippers

Prices on Stewart horse clippers remain unchanged at $11 list each for No. 1, which price is subject to a discount of 25 per cent.

Linseed Oil Firm; Turpentine Steady

London.

LINSEED OIL, TURPENTINE.—There is a firm market for linseed oil and while prices at the time of writing were unchanged there is a possibility they may be increased in the near future. Following are the prices which prevail: 1 to 2 barrels, raw $1.48 per gallon, boiled $1.51 per gallon; 3 to 5 barrels, raw $1.47, boiled $1.50; 6 to 9 barrels, raw $1.45, boiled $1.48. Turpentine is holding in a steady position and in single barrel lots is quoted at 71c per gallon and in 2 to 4 barrel lots at 70c per gallon. In 5-gallon lots the price is 78c per gallon. There is a slow movement of turpentine at this season of the year.

Putty Holds Unchanged

Putty holds unchanged with demand light. Standard in 25-lb., 50-lb. and 100-lb. drums is quoted at $4.65 per 100 lbs. Pure putty is $1.25 per hundred pounds higher than standard.

White Lead in Oil Steady

Steadiness characterized the market for white lead in oil, prices still being quoted on the basis of $16.20 per hundred pounds in ton lots and $16.55 in less than ton lots.

WINNIPEG MARKETS

WINNIPEG, Jan. 3.—Business for the past week has been rather quiet, following the rush before Christmas, which is only natural. With most of the travellers in for the holiday season business cannot be expected to be brisk until they start out again after the first of the year.

The taking over of all the railroads by the United States Government is causing much speculation amongst the trade as to whether it will have a tendency to curtail export business, due to excess military transportation, or on the other hand, all roads under one management may increase their efficiency to such an extent that the present difficulties will be overcome. Markets for the week show numerous advances, amongst which appear sash cord, door checks, babbitt metal, planes, mallets, snare wire, anvil and vise, simplex roofing nails, fusible plugs, and sad iron handles; while reductions are recorded on Dover sad irons, No. 60, lead waste and lead pipe.

Sashcord Goes Up 2c Per Pound

Winnipeg.

COTTON PRODUCTS.—Little need be said regarding the present cotton market, which has gone up by leaps and bounds, and even to-day's prices cannot be considered as the limit; practically all lines manufactured from cotton have been affected, while only limited supplies are available in certain commodities owing to the demand to maintain our armies. Among the recent advances appears sash cord, which shows a further increase of 2c lb. To-day's market prices are quoted herewith:—Hercules in hanks or coils—No. 6, 60c lb.; No. 7, 59c lb.; No. 8, 58c lb.; No. 9, 58c lb.; No. 10, 58c lb.

Door Checks Go Higher By 3 Per Cent.

Winnipeg.

DOOR CHECKS.—The demand for

door checks during the recent cold spell has been good; consequently stocks have had to be replenished at higher prices, necessitating another advance of approximately 3 per cent. on Eclipse door checks and springs, which are quoted to-day at the following prices:—Eclipse checks, No. 1,623, $2.30 each; No. 1,625, $3.10 each; Eclipse springs, No. 1,653, $1.80 each; No. 1,655, $2.30 each.

Levels, Planes And Mallets Go Upward

Winnipeg.

LEVELS, PLANES, MALLETS.—Another advance has just come to hand on all lines manufactured by the Stanley Rule & Level Co. The recent advances show increases of from 5 to 30 per cent., and take effect at once. The following prices cover a few of these lines only:

Tack hammers, No. 2, $1.50 doz.
Level sights, No. 1, $10.80 doz.; No. 2, $10.80 doz.
Plumbs and levels, 36 x 12 in., $27 doz.; 18 in., $32 doz.; 24 in., $36.50 doz.
Carpenters' mallets—No. 2, $5.25 doz.; No. 6, $11.50 doz.; No. 10, $7.20 doz.; No. 13, $16.80 doz.
Tinners' mallets—No. 44, $2.85 doz.
Planes—No. 50, $6.75 each; No. 71, $3.20 each; No. 62, $4.40 each; No. 72, $3.40 each; No. 444, $9.70 each; No. 72½, $5.20 each; No. 74, $7.75 each; No. 146, 147 and 148, $3.15 each; No. 143, $5.80 each; No. 129, $2.55 each; No. 171, $4.65 each; No. 289, $3 each.
Trammel points—No. 2, $1.50 set; No. 4, 70c set; No. 99, 60c set.
Cornering tools—No. 28, $3.60 doz.; No. 29, $3.60 doz.
Butt gauges—No. 95, $12 doz.; No. 95½, $10 doz.

Anvils And Vises And Snare Wire Up

Winnipeg.

ANVILS, VISES, SNARE WIRE.—The price on brass snare wire, which has remained unchanged for the past year, again shows an upward trend. The new prices show an increase of 5c per lb., due to the ever-increasing costs of material. To-day's prices are as follows: On 1-oz. rings, 22-gauge, 85c lb.; 24-gauge, 90c lb.

A slight revision in price has been found necessary on the Diamond anvil and vise, which shows an increase of 50c each over the former price, and is quoted to-day at $5.50 each.

Babbitt Metal And Roofing Nails Higher

Winnipeg.

BABBITT, ROOFING NAILS.—As predicted in HARDWARE AND METAL, new prices were to be expected on babbitt metals. The first to be announced is Frictionless, which advanced 10 per cent., or 3c per lb., making to-day's price 33c lb.

Further advances by the American factory again necessitates an increase in Simplex roofing nails, and shows an increase of approximately 15 per cent. over the old price, to-day's ruling price being 20c lb.

Fusible Plugs Now Sold At Net List

Winnipeg.

PLUGS.—Further increases in the cost of raw materials, principally brass, which enters into the manufacture of fusible plugs, is responsible for further advances in this commodity, which are to-day quoted at net list. Net prices are as follows:

Standard length—½ in., 60c each; ¾ in., 75c each; 1 in., $1 each; 1¼ in., $1.50 each; 1½ in., $2 each.
Extra long—½ in., $1.20 each; ¾ in., $1.50 each; 1 in., $2 each; 1¼ in., $3 each; 1½ in., $4 each.

One Make Of Sad Irons Shows Decline

Winnipeg.

SAD IRONS, HANDLES.—Universal sad iron handles again show an increase in price of 15c per doz., while Mrs. Potts' handles remain unchanged. Prices ruling are as follows: Universal, $2 doz.; Mrs. Potts, $1.30 doz.

Hardware dealers will no doubt be interested to note a reduction in Dover sad irons, No. 60. New prices just issued by the factory show considerably lower prices, made possible no doubt through increased production. Prices now ruling on No. 60 irons are $19.80 doz. sets.

Lead Pipe And Lead Waste Pipe Decline

Winnipeg.

LEAD PIPE.—New prices have just been announced on lead waste and lead pipe, and show a slight reduction over former prices, due to weaker markets. To-day's ruling prices are as follows: Lead waste, $15.40 100 lbs.; lead pipe, $14.40 100 lbs.

Turpentine Prices Have Been Maintained

Winnipeg.

TURPENTINE, LINSEED OIL.—Despite reports from the East of a weaker market on turpentine, the local market remains firm. Prices for to-day are as follows: Barrels, 80c gal.; ½-barrels, 83c gal.; 5-gal. lots, 85c gal.; 1-gal. lots, 85c gal., plus the usual extras for containers.

No change is recorded on linseed oil, with the markets remaining very firm. Prices ruling to-day are as follows: Raw, $1.65 gal.; boiled, $1.68 gal.

PITTSBURG MARKETS

PITTSBURGH, Pa., Jan. 2.—Unless the unexpected occurs, there will be no revision in iron and steel prices at this time or in the near future. After a conference with the Federal Trade Commission, the War Industries Board has recommended to the President that no change be made at this time, and a proclamation to that effect will probably be issued, perhaps formally continuing present prices until April 1.

Undoubtedly there is room for a reduction in prices with regard to the great bulk of the production, but some manufacturers, peculiarly positioned as to raw materials or otherwise, might be unable to produce at a profit in the event of a great reduction. Apart from this fact, the working of the set price system depends upon the voluntary cooperation of manufacturers, and this might not be so easy to secure if the manufacturers felt they were unjustly treated. As a practical matter the lapse of time sees the working out of old contracts at higher than the set prices, and without their being replaced to the full extent by fresh sales. Thus, apart from Government orders the producers will find themselves from month to month with less commercial business on books and reductions in the set prices might occur later in a smoother manner, while there is the possibility of traffic conditions on the railroads so improving as to permit full production of pig iron and steel, and in that event there would be a much better supply of material. Finally, there is the possibility of the Pomerene Bill being passed by Congress to furnish legal authority for the fixing of iron and steel prices. Thus, the fact that it seems quite undesirable to undertake to reduce iron and steel prices at this time does not mean that there will not be reductions later on, possibly only a few months hence.

Railroad Pool

The iron and steel industry is well pleased at the decision reached by President Wilson to take over the operation of the railroads, as announced in the proclamation of December 26. It is felt that this arrangement has no drawbacks and many advantages. While the General Operating Committee, conducting the pool of railroad facilities ordered a month ago by the Railroads' War Board, has accomplished some good, it has been constantly hampered by the anti-pooling laws, and these, of course, are to be suspended by the Director-General of Railroads. Again, Government operation of the roads will doubtless result in the rescinding of the priority orders, the Government instead appointing a traffic manager to direct the movement of Government material. While the priority orders are blind, the traffic manager will be an individual with a brain. The steel trade also has its own interest in the Governmental taking over of the railroads, in that it doubtless means eventually the placing of orders for cars and locomotives to be financed by the Government.

More Set Prices

The American Iron and Steel Institute has issued a long statement, setting additional prices, the most important of which are: Angle splice bars, 3.25c; single shoulder tie plates, 3.25c; stan-

WEEKLY PAINT DEPARTMENT

What to Look for in Varnish

The Uses of Varnish—Methods For Practical Testing—Types of Specifications

THE properties required in a varnish naturally depend upon the use to which it is to be put. Since varnishes for outside use must be elastic and waterproof, a better and more expensive varnish is usually required than for inside use, although some of the very finest and most expensive varnishes are made for interior use on pianos and very costly furniture. Outside varnishes are "long-oil" varnishes and generally dry more slowly than varnishes for use indoors. For general inside use it is not so essential that the film should be elastic. Good grade interior varnish should not turn permanently white with water and the very best grades do not turn white even while wet. In varnish manufacture, hardness, which is usually obtained by addition of resins, is produced at the expense of elasticity and vice versa. The necessary properties of a varnish may be classified under "flowing and drying properties," "appearance," and "durability." The first two of these can be readily ascertained from careful consideration of the requirements, although for some work expert judgment is needed. For instance, it is generally required that piano varnish have a beautiful high lustre and that floor varnish should dry hard in, at most, three days. Color requirements are dependent upon the nature of the surface to be varnished. When it is desired to retain the light color of certain woods or of white or tinted color coats, a light-colored varnish is essential.

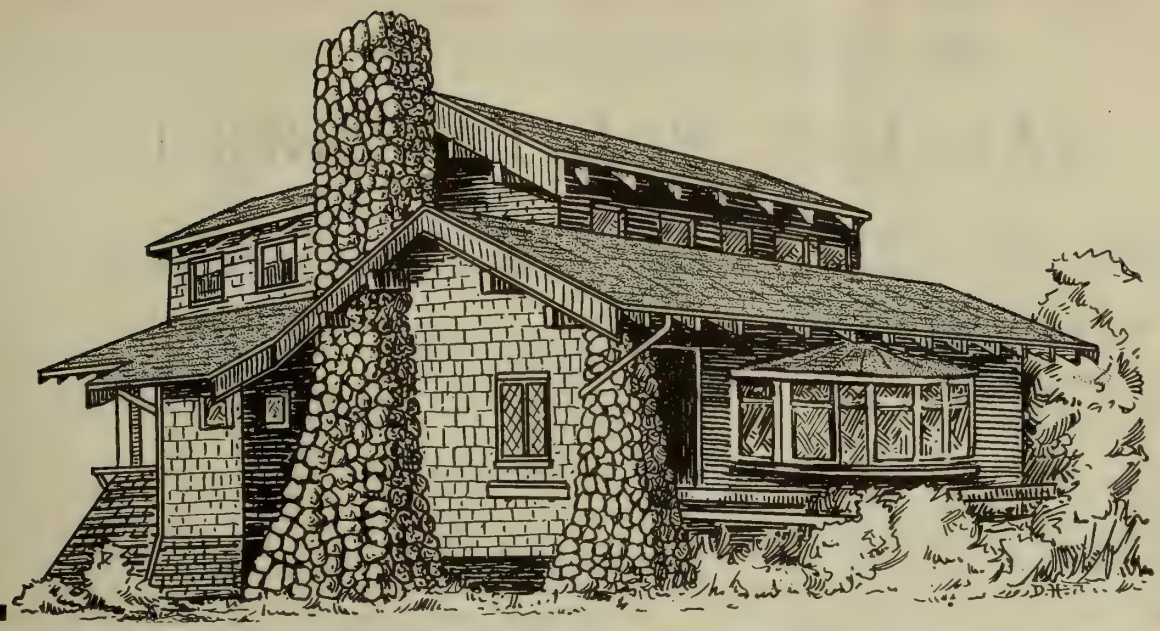
Methods for Practical Testing

Considering the testing of varnish, it may be said that for fine or special work varnishes must be tried out by skilled workmen, who know what qualities, such as elasticity, hardness, lustre, etc., are essential in each particular case. However, for general use certain testing, which can be performed by anyone, will be of value in ascertaining the properties of a sample. For this the following procedure may be used:

Note whether or not the sample has the desired color, clearness, and flowing properties. Apply a coat of the varnish to a metal or wood panel which has been painted a dull black. Drop black in oil, thinned with turpentine and dryer, gives a good under coat. Note the time required for the film to dry hard; that is, when the finger pressed firmly against the surface leaves no impression. Let the coat dry for two days or more, and then rub with steel wool or with powdered pumice and water. Note whether or not the sample has good rubbing properties; that is, whether or not a smooth, dull surface, suitable for the application of a second coat, is obtained. Note whether or not the rubbed surface "sweats;" that is, glossy patches form on the panel after 24 hours. Apply a second coat of the varnish and let the film dry for three days after it has become hard. At this point the relative lustre of different samples can be noted. Let a stream of cold water run over the varnished surface over night, and in the morning note whether the film is unaffected, dulled, or whitened. Then let a stream from a vessel of boiling water flow over the varnish for 15 minutes and note the effect on the film. Any other desired tests, such as the application of soap and water or of household ammonia, can be made.

In addition to the panel test, flow some of the sample on a clean glass plate, and allow it to drain and dry in a vertical position. Note the time required for the film to dry "free from tackiness" (the point at which the film no longer feels sticky when touched lightly with the finger) and to dry hard. After five days run the point of a knife blade through the film at the top of the plate and note whether it is elastic; that is, comes off as a ribbon from a clean cut, or "dusts" —breaking into small pieces.

A varnish which does not give an elastic film is unsuitable for outside use, and naturally the better the waterproof qualities the better the varnish, other things being equal. For some inside work a very hard film, although it dusts, is more suitable than a softer, elastic film. The purchaser must decide whether it is best to insist on certain properties which may necessitate paying higher prices.



The practical testing of dammar varnish and shellac varnish is limited to ascertaining that a sample has the proper color and consistency, and that it gives a smooth film. The practical testing of lacquers, aside from such special requirements as may be necessary, is limited to ascertaining that a sample has satisfactory color, consistency, and drying properties, and that it does not dull a polished metal surface. For testing black varnishes they should be applied to a metal panel, and the time of drying and the nature of the film noted. If in subsequent use the varnished surface is to withstand high temperatures a baking test should be made to ascertain whether the film retains its gloss, elasticity, and adhesive properties at the necessary temperature. Insulating varnishes should be tested principally to ascertain their adhesive properties and resistance to oil and water.

The most satisfactory and reliable information regarding varnish is naturally obtained by actual use, but such information can be collected only after several months. It should be borne in mind, however, that while service tests give useful information regarding certain brands, which are of uniform quality, one must assume or actually prove that such brands remain uniform in composition and properties. In service tests of outside varnishes it has generally been found that a difference in climatic conditions causes a greater variation in the length of service of any brand of good quality varnish than is obtained with different brands under the same climatic conditions.

There are three general types of varnish specifications: Those that state that samples must be equal to a standard sample or brand; those that require only certain physical properties and certain results from practical tests; and those which, among other requirements, state that a sample must be made from or be free from certain materials. Considering the first class, it may be said that the conclusions from comparative examinations of a standard and a submitted sample should be based mainly on the results of service tests and practical tests, such as are outlined above. Practical tests are also the main basis of a report on samples submitted under a specification of the second class. Specifications of the third class necessarily involve chemical tests or analyses.

Present methods of analysis are not adequate to determine the actual composition of a sample or the formula used in its preparation. For instance, the identification and determination of the various gums, when two or more have been used, is practically impossible, as is also the quantitative separation of linseed oil and tung oil. It must also be borne in mind that the relative amounts of the constituents in a finished varnish

(Continued on page 46.)

Make 1918 your record paint-selling year

Take the first step now by inquiring for particulars of this complete and reliable line of paints and varnishes

Jamieson's Paints and Varnishes are tried and proven. For more than half a century they have given satisfaction and service wherever used.

Although without peer as to quality and uniformity, prices are moderate. Dealers are certain of repeat sales with the Jamieson line.

It costs nothing to find out what we have to offer. Let us tell you our story in a few words and you can be the judge.

If you decide to take up the Jamieson proposition you can count on bigger sales and better profits. **Write us now.**

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Jan. 2.—There is a very unsettled condition in the linseed oil market this week. Transportation is very bad and how long present stock of oil will last, if the freight difficulty is not solved, none care to say. The feature of the week in the paint market, therefore, has been the increase of about four cents a gallon in quotations for linseed oil, and even these prices will not be held open. Oil for delivery in February and March will be booked now at $1.42 for raw in single barrels and at $1.44½ for boiled. For five barrel lots and over the booking price is $1.41 for raw and for boiled, $1.43½. Conditions, generally, in the paint markets are satisfactory for this season of the year, and for specialties to go out in the spring several paint makers are more than pleased with the orders coming to hand.

Linseed Oil Higher; Uneasiness Expressed

Montreal.

LINSEED OIL.—The situation with respect to linseed oil is not at all clear, and there has been a fluctuating price condition for several days past, which clouds the situation considerably. Crushers have increased difficulty in securing seed, and the railroads have been compelled to refuse accommodation for shipments from Winnipeg and Fort William to points east for the present. Thus, crushers and jobbers alike have been unable to gauge the situation with much degree of certainty, and so long as severe weather conditions remain and deliveries continue light there is little promise of anything but a decidedly firm market. The advances recorded for the week approximate from four to six cents a gallon.

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
1 to 4 barrels	$1.44	$1.46½
5 to 9 barrels	1.43	1.45½
10 to 25 barrels	1.42	1.44½

Turpentine Steady; Small Amount of Trade

Montreal.

TURPENTINE.—The amount of business passing is confined to small compass, and the retail trade is buying only for the needs of the present. There has been no change and the quotation of 70 cents per gallon is maintained for barrel lots. For lots of five barrels and over one cent per gallon less is quoted.

Turpentine—	Per Imp. gallon
5 bbls. and over	$0.69-$0.71
1 barrel lots	0.70- 0.72
Small quantities	- 0.83

Paint Specialties Are More Popular

Montreal.

MIXED PAINT AND SPECIALTIES.—The manufacturers of paints are reporting a better and more active demand for the usual specialties made by them. This serves to lead dealers to take a growing interest in lines that will yield them profit, and in the long run there will be real satisfaction in selling the customer shelf lines in convenient form. It would seem that the consistency of HARDWARE AND METAL in advocating the sale and advertising of specialties by the dealer is now becoming recognized as sound advice. When the matter is viewed from all standpoints, it indicates a good condition and augurs well for the future of the trade. Mixed paint orders are also quite satisfactory as applying to shipments to be made for spring.

White Lead in Oil Now in Quiet Market

Montreal.

WHITE LEAD IN OIL.—As is to be expected, there is a very limited volume of business for this product. In fact business confines itself pretty much to the orders secured for spring delivery. Five ton lots are quoted at $15.50 per 100 lbs.; ton lots at $16 per 100 lbs. and in smaller lots the price is $16.35 per 100 lbs.

Putty Remains Firm With Movement Slow

Montreal.

PUTTY.—Trading for putty is quite light and apart from small sorting, is one of the slower-moving lines in the list. Owing to the strong market for linseed oil putty still maintains its price, but there is no advance. Bulk, in casks, is worth $3.60 per 100 lbs.; $4.45 per 100 lbs. is asked for the 25, 50 and 100 lb. drums and the bladder putty in barrels is quoted at $4.70 per 100 lbs.

TORONTO

TORONTO, Jan. 3.—Interest in the paint trade during the week has centred largely around the linseed oil situation, in which market there has been a firmer tendency, with considerably higher prices in some quarters. The situation is difficult for crushers at the present time owing to the breaking down of transportation facilities. Receipts of seed have been very small within the past few weeks, and there does not seem any immediate prospect of relief. Turpentine is holding steady, with the belief prevalent that a firmer tendency may come in the primary market toward the end of the present month. Travellers for paint manufacturers have again started on the road, and hopes are running high that the immediate future will see a good placing business.

Linseed Oil Shows An Upward Tendency

Toronto.

LINSEED OIL.—There was a firm market for linseed oil during the week, and quotations were advanced in some quarters from 6c to 7c per gallon. The range of prices for raw linseed oil is now from $1.41 to $1.55 per gallon in single barrel lots. Crushers have been greatly handicapped in their operations through the failure of seed supplies, due to the transportation situation. A situation similar to that which existed in January of last year has again arisen this year. Railroads apparently are unable to move the seed as freely as Eastern crushers would like. The flaxseed market showed a steadily upward tendency during the week for both spot and future seed. In the Winnipeg market on Wednesday of last week spot flaxseed was sold at $3.10¾ per bushel, and on Wednesday of the present week was quoted at $3.18½—a gain of 7¾c per bushel. May seed showed a more spectacular movement upward, on Wednesday of last week being quoted at $3.06 per bushel and on the same day this week at $3.25½c—a gain of 19½c. Advice was received during the week that the Argentine Government had negotiated with the Allies for the sale of 2,500,000 tons of wheat. It was pointed out in one quarter that when space is provided for the shipment of this wheat there may be still less possibility of the Argentine flaxseed moving into the United States market. In the local market in one quarter the price of linseed oil was advanced only 2c per gallon during the week, which makes the basis in the instance cited $1.50 per gallon for raw oil in single barrel lots. Supplies of oil cake are pretty well cleaned up, but there is still a good demand for this product.

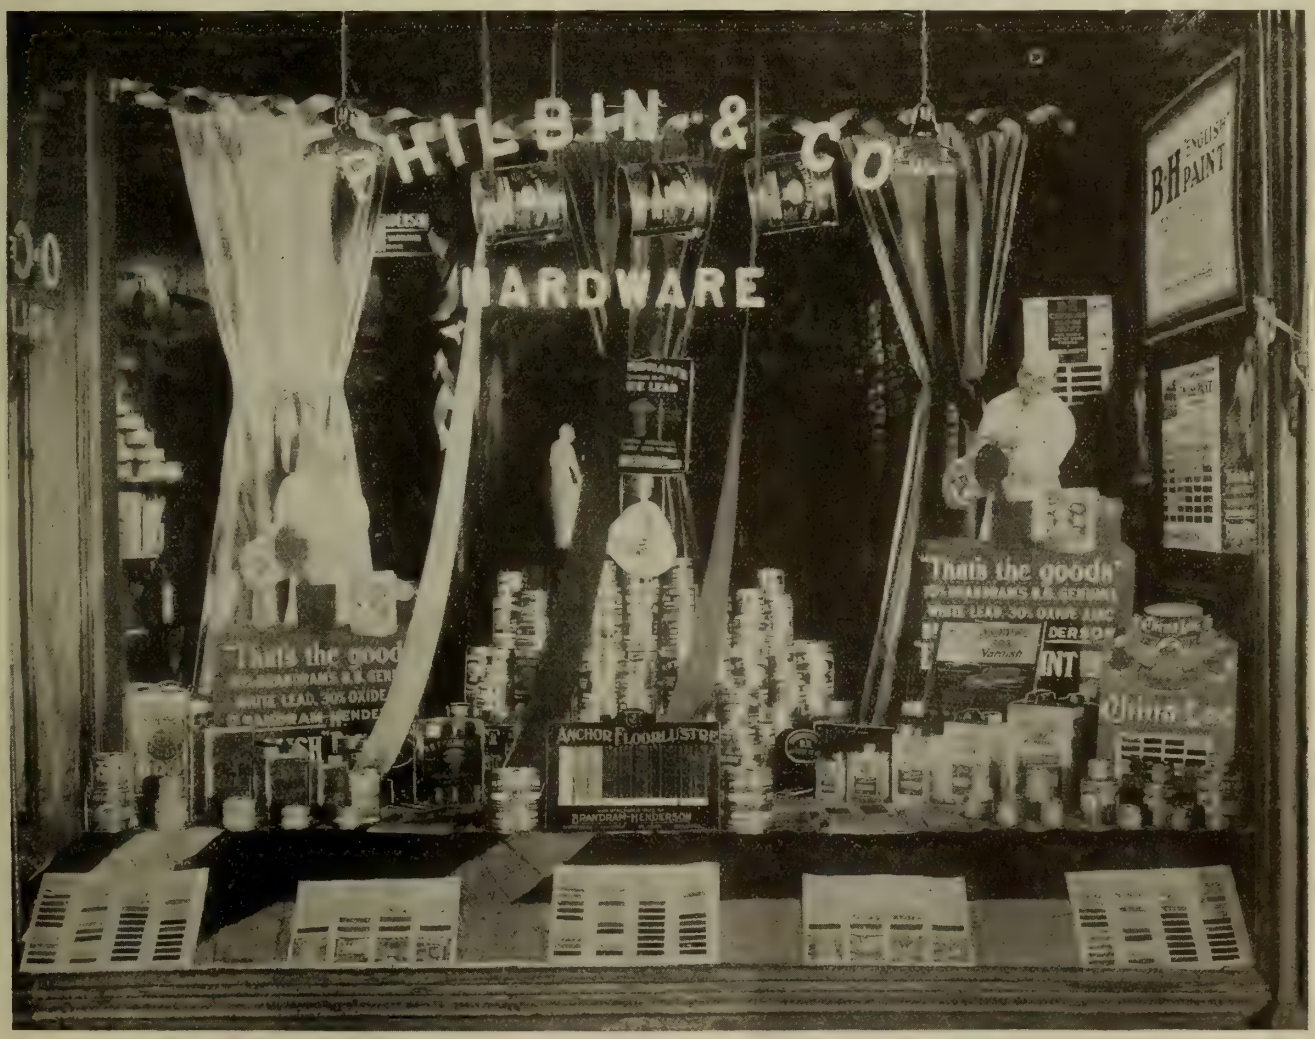
The Value of Window Display to the Paint Dealer

TAKEN as a whole, Hardware Stores throughout Canada appear more progressive than stores of most other lines of business, for their store fronts are usually smart in appearance, well painted and the general effect is most pleasing.

These are impressions that people get when passing—but it is the carefully prepared window display that causes people to stop. The articles in the window give the invitation to "come on in." Many people do come in and buy simply because the window display and the articles in the window gave them the proper kind of an invitation. The "dressed" window—that is the properly dressed window—really changes interest to action—turns prospect into purchaser.

Many Canadian manufacturers realize the value of the window and are helping their dealers throughout the country with suitable display material. One firm, Brandram-Henderson, has devoted considerable thought and effort to develop the most practical forms of window display material with which to supply their many agents. Each feature they have for this purpose is attractive and attention-getting.

Among the great mass of material which they distribute to their dealers may be mentioned an extremely attractive window cut-out, many beautiful display cards, some of the finest enamelled signs that we have seen anywhere, transparencies, dummy cans, colour cards. An unusually high quality runs through the entire line.



Their agents throughout Canada have not been slow to appreciate the value of this merchandise offered to them free, for wherever one goes, one may see the familiar three-can display of the Brandram-Henderson dealer and the attractive window that comes from the use of this display material.

The photo below shows a very handsome window that was trimmed with B-H window display material. At the B-H Salesmen's Convention held recently in Montreal, the four sales divisions of the company each trimmed a window and the photo below of Philbin & Co., 4169 St. Catherine St. West, trimmed by the salesmen of the Central Division, wone the first prize.

The centre of attraction is a large cut-out of the three-can display in colour. It forms the background of the display. Throughout the window may be seen colour cards of various products, also racks of painted slats.

A large cut-out of a painter adds a characteristic touch. The show cards are tastefully arranged among the paint samples. One thing that adds considerably to the effect of this window is the variety of products on display.

This window has many points of excellence to recommend it as a business-getting window, and it will serve as a model for many a hardware man.

Turpentine Market In Dull Period

Toronto.

TURPENTINE.—There was a steadiness in the market for turpentine during the week, but opinion was expressed among local dealers that there may be a firmer market toward the end of the present month. This opinion is based on the fact that stocks of old-crop turpentine are about cleaned up and holders of stocks in storage in the South declare their intention of holding until they can dispose of their supplies to advantage. It is estimated the production of turpentine will be reduced by some 75,000 barrels this year owing to the shortage of labor. This will have a firming effect on the market. New crop turpentine will not start to come on the market until the latter part of March or the first part of April. Quotations of last week were maintained on the following basis:

	Imp. gal.
1 barrel	$0.70-$0.71½
2 to 4 barrels	0.69- 0.70½
5 gallon lots	0.77- 0.78½

White Lead In Oil Holds In Steady Market

Toronto.

WHITE LEAD IN OIL.—There was no disposition to anticipate a change in the price of white lead in oil in the near future. There is a firmer undertone to the pig lead market, although quotations in the primary market have not changed materially during the week. Linseed oil, however, has been on the up-grade and the belief is expressed in well-informed circles that there is every possibility of a continuation of this firm tendency. Demand for white lead in oil is light at this season of the year. Quotations were made on the basis of $16.20 per 100 pounds in ton lots and $16.55 in less than ton lots.

Travelers Are Again Making Calls

Toronto.

MIXED PAINT.—Travellers for paint manufacturers started on their rounds again as soon after the opening of the new year as feasible. In the majority of instances they started to make their rounds on Wednesday of the present week. There is general expectation that booking business will be quite satisfactory and manufacturers are apparently going to get on the field early. Volume of business that has already been placed for spring shipment has been gratifying to the manufacturers. Prices held in steady market, with no indication of a change in the near future.

Putty Market Firm; Glass Still Strong

Toronto.

PUTTY, GLASS.—Further intimations have been made in some quarters that there is a strong probability of an advance in putty in the near future. However, demand for putty at this season of the year is not heavy. The booking dates for putty are still maintained at March 1, which extension of time for delivery on the present basis was made some weeks ago, about the time the differential between standard and pure putty was increased. Prices will be found in current quotations.

Glass continues in strong market. The situation in the United States has shown no improvement during the week so far as the manufacture is concerned. The railroads have recently instituted an embargo on the carrying of glass into Canada. Whether this will be maintained for any length of time remains to be seen. Quotation is still made on the basis of 40 and 10 per cent. off list for single and double diamond and 33 1/3 per cent. off list on cut lights.

OPTIMISM OVER RAILROAD SITUATION

(Continued from page 24.)

adian points promises to be more steady, and if Senators are able to put through legislation which they now have in mind there will be a downward revision of coal prices.

Government Control of Coal Mines

Government control of coal mines is expected to be the next step of the United States Government. Already Fuel Administrator Garfield has warned coal operators that all of their contracts must be made subject to requisition of the United States Government and no contracts may be made for a period longer than one year. Dr. Garfield has served notice that he will ultimately take over the control of all mines. "It is not a question of when, but how soon," he has said.

WHAT TO LOOK FOR IN VARNISH

(Continued from page 42.)

are not the same as those of the raw materials prescribed in the formula, so that, even if we assume that the results of a varnish analysis are correct, the calculation of the formula from such results is subject to serious uncertainty. Methods of varnish manufacture are constantly changing, so that, while a given specification for a varnish may prohibit the selection of a sample of very poor quality, it is very likely to exclude also satisfactory products.

WHY THE INVENTORY IS NEEDED

(Continued from page 28.)

ment as to merchandise that is for sale. One of the leading fire insurance brokerage firms in Canada are sending out warnings to their clients urging that in view of the increased cost of building that it would be well for them to consider whether it would not be advisable for them to add to their policies to cover the increase in the value of their own building, and a great many are responding. Ordinarily, of course, a building depreciates year after year, but not at the present time.

It would then be considered advisable to watch insurance protection closely so that the amount of insurance carried affords protection to the stock at its cash value, which is the cost of replacement with like merchandise at the time of loss. Those who do not increase the amount of fire insurance in keeping with the increasing values are liable to be compelled to bear a portion of any fire loss at the time of an adjustment of claim under insurance policies containing the co-insurance clause.

WEEKLY MARKET REPORTS

(Continued from page 41.)

dard railroad spikes, 3.90c, these base prices being subject to the usual trade extras. A long list of prices and extras is given for steel castings.

While manufacturers nearly all assert that the system of set prices is working very well, and some buyers have the same view, it must not be inferred that there is no complaint. There is considerable complaint in some quarters, but referring to the manufactures of steel more than to the ordinary rolled products of the mills. It is asserted that some of the manufacturers are openly quoting prices higher than those set, and that some have even tried to impose upon the intelligence of buyers by endeavoring to maintain that the set prices are minimum prices, not maximum. There is complaint, too, that producers have not adjusted contracts to the set prices when they were at higher figures. In certain lines it has been trade custom to adjust contracts in the event of a market decline, but the principle seems to be more or less ignored in this instance.

Pig Iron

With production of the merchant furnaces in Western Pennsylvania and the valleys and along the lake front curtailed by about 20 per cent. the make is naturally not sufficient to meet requirements of existing contracts, and there is no iron offered for sale in the open market, as has been more or less the case for weeks past. There is very little inquiry from foundries, as they are receiving moderate shipments and the operations of many of them are curtailed, particularly those making sanitary ware. It is asserted in some quarters that the steel works, by reason of their own production being curtailed, would buy large tonnages of Bessemer and basic iron if the iron were obtainable, but one should not be so sure about this, as the works may feel that in time they will be able to fill their orders with their own pig iron at correspondingly lower cost, and they cannot be certain of replacing the orders in full with other orders at high prices.

Get Them Thinking about Spring Painting

Forestall spring and your competitors. Don't wait until the snow begins to leave, but start in right now to "educate" your paint trade for spring. Keep *Moore's House Colors* well displayed where all can see. Implant the spring painting idea so firmly in the minds of your customers that when the weather does open up sales will come naturally and easily.

Start now—and keep it up. You'll be well rewarded.

The S-W Agency Your Opportunity

To Reap the Benefit of the Largest Paint Consumer's Campaign you must be a S.W. Agent.

Property owners now know that to put off painting means running up bigger expenses. The paint your customers want is SWP. Can you take care of their demand?

This is your opportunity to increase your sales and profits, and to build up the largest paint and varnish business in your district, and incidentally the largest business in all the lines you carry.

This card means the *Sherwin-Williams* representative is waiting on you. Do not let this opportunity slip by, but ask for full particulars, and let our representative explain to you our Big Proposition.

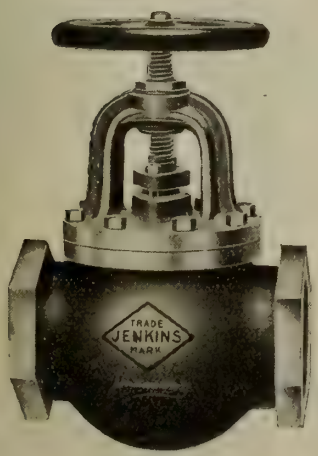

FIG. 141
JENKINS BROS.
Standard Pattern Iron Body Globe Valve Screwed with Yoke.

For use under steam service there are no valves quite as satisfactory as

JENKINS BROS.

Globe and Angle Valves

Fitted with Jenkins' No. 119 Discs

The composition of the disc is very hard, but becomes tough and flexible in service when under steam pressure.

It shows remarkable freedom from cracking and flaking and unrivalled durability in working steam pressures up to 150 pounds.

Royal Canadian, $51.90 per doz., Eze, $56.10 per doz.; Bicycle, $63 per doz.; Ajax, $125.80 doz.

Show your customers the difference between "Stephens'" Paint and "Just Paint"

You owe your customers the full protection of your experience—and it is mighty good business to give it.

Your customers will appreciate the information you can give them about Stephens' Paint. Too many householders have been bitten by the "cheap" paint bug. You know what "cheap" means in paint and you know, too, that there is nothing "cheap" about any "Stephens'" Product.

Point out to your customer that when he buys *"Just Paint" he* takes all the chances. When he buys "Stephens'" Paints we take the chances. Back of every can of "Stephens'" Paint is our unconditional guarantee that it will do all that we claim for it.

Educate your customers to buy only standard brand paints—"Stephens'" preferred.

If there is no "Stephens'" Agent in your district there is a good chance for you to get exclusive territory. We will give you every assistance to produce sales. Get our proposition.

We believe in giving our best service to every buyer be his order large or small.

Great West Electric Co., Ltd. Winnipeg

OUR service is for everyone who wishes to use it, and for each in the same degree. The small order from a regular customer receives the same attention and care as the large order, or the trial order from a prospective customer. We have but one quality of service and we use it always.

You may rest assured that your order for Electrical or Automobile Supplies whatever its size will receive prompt and careful treatment.

Dressing the Store Window

is a big business-builder, no doubt—but—you've got to have the best of goods behind that window to hold the trade.

Take FILES, for instance. Why not stock the best—they're none too good for that discriminating customer of yours.

You'll never go wrong if you stock and sell

WINNING THE BUYER'S FAVOR

THE best possible buyer is not made an actual buyer at a single step It is one thing to win the buyer's favor for an article and another to make adjustments incident to closing the sale. Winning the buyer's favor is the work of trade paper advertising. Under ordinary conditions it should not be expected to do more.

If interested, tear out this page and keep with letters to be answered.

Don't leave that Lawn Mower Order until too late!

Make sure of delivery on Taylor-Forbes Lawn Mowers by placing your order with your jobber before the end of the month. It is so difficult at present to get raw materials that we require to know your wants early so that we may be in a position to contract for iron and steel while it is to be had.

Leaving your order until after the New Year may possibly spoil a good season on Lawn Mowers next Spring and Summer—so order now—don't put it off.

Make Money From Good Pumps--Profit

Unless a metal pump is made just right it will leak at joints or valves.

"Aremacdee" pumps do not give dealers who sell them trouble and loss from defective service in "Aremacdee" pumps sold customers.

Pumps for every use—hand or motor—force or lift—every type a dealer can sell.

All in the big catalogue. Ask for it—for dealer prices—for dealer terms.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for machine. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Only through your jobber to-day.

ICE HARVESTING MACHINERY

Our line of tools and machinery is comp ete. Whether you require a hand saw or a complete outfit—we have it and can fill your requirements.

THE "WANT" AD.

The "want ad." has grown from a little used force in business life into one of the great necessitities of the present day.

Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.

The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the small affairs and incidents of daily life.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada (tf)

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Toronto.

THE SUREST WAY FOR THE MANUFACturers' agent to connect with good live firms, is to tell the manufacturers who read Hardware and Metal, all about his ability to sell their goods. Try an advertisement on the Condensed Ad. Page of Hardware and Metal, under this heading.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

MISCELLANEOUS

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

IF YOUR HARDWARE BUSINESS IS FOR sale, who is more likely to buy it than a hardware man, be he merchant, clerk, or traveller? It is only hardware men who read Hardware and Metal, and a condensed advertisement in this paper offering your business for sale, will put you in touch only with the people who will be most interested.

For Quick Sales

Recently a hardware dealer in Western Canada became overstocked with shotguns. He placed a want ad. in Hardware & Metal. We learned eventually that he not only disposed of his stock, but received several orders that he could not fill. If this man had kept this stock away, it would not only have deteriorated in value, but he would have had to pay taxes, insurance, etc. on it. If you have anything on hand which you wish to dispose of quickly advertise it in our want column. The quick results will make the first cost negligible.

LATEST REPORT

FROM TO-LO-CO FACTORIES

No. 630 Floor Hinge Ready to Announce

BALL-BEARING SURFACE FLOOR SPRING HINGE

New Line Ready for Spring Delivery

This is the latest To-Lo-Co line—a real winner for 1918 business. It is suitable for doors 1¼ to 1¾ inches in thickness—*strong and substantial, attractive in appearance, simple in construction.*

This hinge holds the door open when it is swung to 90°. The tension is strongest at the closing point and decreases as the door opens. This is a strong point in its favor as it means that the door is never left ajar.

The weight of the door is carried on ball-bearings which are located at the top of the hinge away from moisture and dirt.

The eccentric is equipped with hardened steel roller-bearings. The frame is reinforced with a steel bushing where the pintle passes through it.

The compression spring is made of the best tempered steel wire.

Packed one set in a box, complete with screws and full directions.

SEND YOUR SPECIFICATIONS AT ONCE FOR SPRING DELIVERY

Send for descriptive literature on the "Rixson" line. Write now for your copy of the new To-Lo-Co. Catalog which will be ready for distribution January first.

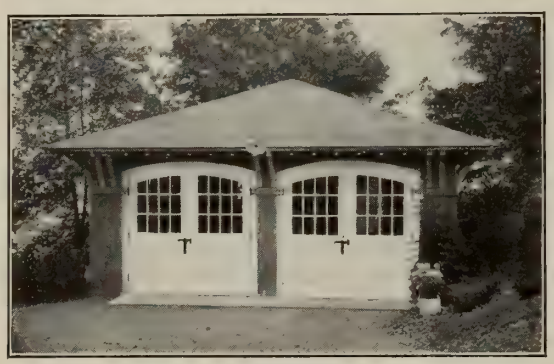
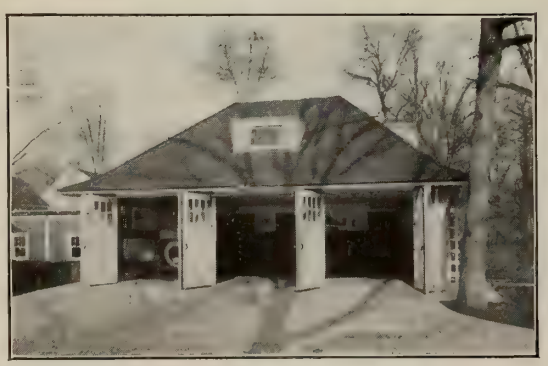
Four Garage-Door Problems Solved by Stanley Garage Hardware



Problem Number One

The owner of this garage wanted doors that would open and close easily, lock securely and close weather-tight. His problem was solved by swinging the doors on Stanley Garage Hinges No. 1457, equipping them with Garage Bolts No. 1055 and No. 1056 and securing them against slamming with Stanley Door Holders No. 1774.



Problem Number Two

This concrete garage has doors that are extra-heavy. Therefore they were hung on 36-inch Stanley Garage Hinges No. 1458, which will support the heaviest garage doors made, swinging them smoothly and without sagging.

Problem Number Three

The architect's plans called for curved-top doors, with windows so placed that strap hinges could not be applied. So the doors were hung with ball-bearing Stanley Garage Butts No. 252, three butts to a door. They are also equipped with Latches No. 1264 and Door Holders No. 1774.

Problem Number Four

When planning this garage, the owner wanted to be able to open all three doorways at once. And, since the garage might at times be crowded, the doors must take up no inside space. Accordingly, the doors were swung out on Stanley Garage Hinges No. 1457. Door Holders No. 1774 keep them from slamming.

Stanley Garage Hardware meets every requirement of the most exacting garage builder, and you can sell it at a good profit. If you do not already carry it, write to-day for Catalog W-52 and full information about selling helps.

Canadian Representatives: **A. MacFarlane & Co., Coristine Building, Montreal**

Official Announcement

SINCE the commencement of European hostilities it has been a difficult matter to secure a reliable Tungsten Lamp. We have purchased from various markets which has given us a wide experience, enabling us to select a lamp which we can absolutely recommend. The "VIVID" lamp is manufactured solely for us, and in placing it on the market we can assure our patrons that nothing better can be produced at the present time.

Every lamp is thoroughly tested before leaving our warehouse. We are, therefore, able to guarantee every one against Electrical or Mechanical defects. Should any lamp bear signs in this respect we wish to impress upon you that adjustments will be promptly made.

We expect the first consignment to arrive end of January, and shall be glad to receive enquiries. Prices mailed immediately upon application.

The "VIVID" lamp can only be obtained from us.

UNIVERSAL

"Universal" Electric Irons

No. E905 New Model.

No. E905 same with push button switch. Both full nickel plated with heat proof stands. Equipped with ebonized handles, 6-foot heater cord and Hubbell lamp socket plug.

Weight of irons, 6 lbs.

A STURDY, dependable Electric Iron built of the finest materials and designed to stand up under the hardest service.

Terminal troubles are practically eliminated by 7 point Connector and Cord Protector grip.

The large heat storage capacity and efficient heat distribution prevent the necessity of waiting for the iron to heat up.

Persistent and well balanced national advertising creates a steady demand for UNIVERSAL Irons.

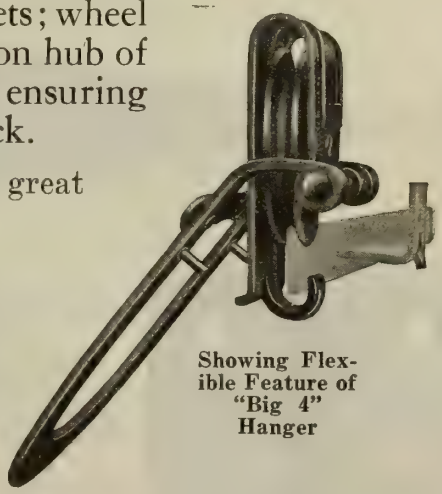
Front view of "Big 4" Hanger

The most satisfactory Barn Door Hanger

"Big 4" Flexible Door Hangers are carrying easily and smoothly on their Anti-Friction Steel Roller Bearings thousands of barn doors in all parts of this continent. Ever-increasing sales and the total absence of any "come-back" in the way of kicks and dissatisfaction prove that "Big 4" meets fully the requirements of most builders and barn owners.



Side view of "Big 4"

The "Big 4" is simply but heavily built entirely of steel; has no complicated parts to get out of order; runs smoothly on anti-friction steel roller bearings; is flexible; is fastened to but one side of the door; brings the door close to the track; has sherardized axles and rivets; wheel housing is effectually prevented from binding on hub of wheel; japanning is done *before* assembling, ensuring bearings free from japan; cannot jump the track.

These are the features that have made "Big 4" the great seller it is.

Packed the careful "National Way"—one pair in a box with bolts for attaching. A printed tag is also packed in each box, giving a list of articles required to properly equip each door. This serves as a reminder to the clerk and will help make sales of articles listed.

Have you a "National" Catalog?

It Carries a Better Profit

"Did a customer ever come into your store and ask for five or ten pounds of Manila Rope?"

We will wager that if he did he was one in a thousand. The average customer does not think of rope in terms of pounds. He knows how many feet he wants for his hayfork, his well rope, or tackle, and he orders accordingly.

Why don't you sell

Plymouth Rope

to your customer on his basis—by the foot? You will satisfy him better and you will make a better profit.

Hundreds of dealers are now selling Plymouth Rope by the foot and they are enthusiastic over the results.

The small town dealer can successfully meet mail order competition by this method and meet it with a rope which will give unequalled service. Plymouth being the only rope which can be profitably sold by this plan, the Plymouth dealer has a direct advantage over his competitors.

Our Dealers' booklet containing full particulars together with the necessary materials for adopting this method will be sent on request by the Rope Service Department of the

Stanley Tools

Stanley Nail Sets And Center Punches

"STANLEY" Nail Sets and Center Punches are made of a special grade of tool steel. They are hardened on both ends by an improved process, given an oil temper and will be found to "stand up" under the most severe conditions.

Special care has been taken in selecting the proper knurling for the shank, and the user will find that the feeling of security as to "grip" is a particular feature of "STANLEY" Nail Sets and Center Punches.

The neat and handy boxes in which they are packed make them an attractive article for counter display.

ONE MINUTE SAVED PAYS FOR IT

One minute of a machinist's time is worth more than the difference in first cost between the most expensive hack saw and the cheapest one you can buy.

For the cheap saw wastes time by clogging and dulling and if too brittle wastes still more time through frequent breakage.

But the better saw, especially if rightly selected for the shape or kind of metal, saves time by cutting faster, and saves first cost by lasting longer. And how many gross of hack saws do you use in a year? Or, how many minutes do your machinists devote to sawing?

The question of first cost should not worry you.

There is no question as to who makes the best saws. The

Starrett Hack-Saw

is not a cheap saw. It is unexcelled just as Starrett Tools are unexcelled. These saws save the machinist's time in largest quantities because there is a Starrett best adapted to a given job. Each saw is numbered and what one to use is shown on page 208 of the Starrett Catalog No. 21MA.

Stirs Up Business

Precious few housewives realize the many uses of an accurate scale in the kitchen—saving losses in careless weighing at butchers and grocers—weighing produce before marketing—weighing flour and other ingredients while baking, etc., etc., etc. It is surprising what a little bit of salesmanship and displaying will accomplish in stirring up big business in Renfrew Scales! The Renfrew is compact, handy, and stands hard knocks. It doesn't get out of order and always tells the truth. A government inspector's certificate accompanies every Renfrew. These features make the Renfrew a lively seller these days. Push business with the

The Publisher's Page

TORONTO JANUARY 12, 1918

Government Reports on Prices

IN the Seventh Annual Report (295 pages), issued by the Dominion Government, Hardware and Metal has been taken as the authority on prices covering hardware products of iron and steel, glass, oils, etc. There are six hundred and twenty-four (624) quotations taken from the weekly market reports of Hardware and Metal.

This is more than double the number of prices on hardware products taken from all other sources combined, including trade and newspapers, manufacturers or dealers.

One of the many reasons why Hardware and Metal stands so high in the estimation of the Canadian hardware trade is on account of its unbiased and authoritative weekly market service.

The weekly market service is consulted by practically all worth-while hardware merchants in Canada.

These merchants not only follow the market reports and other editorial features each week but they also find much to interest them in the advertising pages.

A paper that is read as closely as Hardware & Metal is a mighty good medium in which to advertise.

That is one reason why Hardware and Metal carries the advertising of such a large number of leading manufacturers and wholesalers.

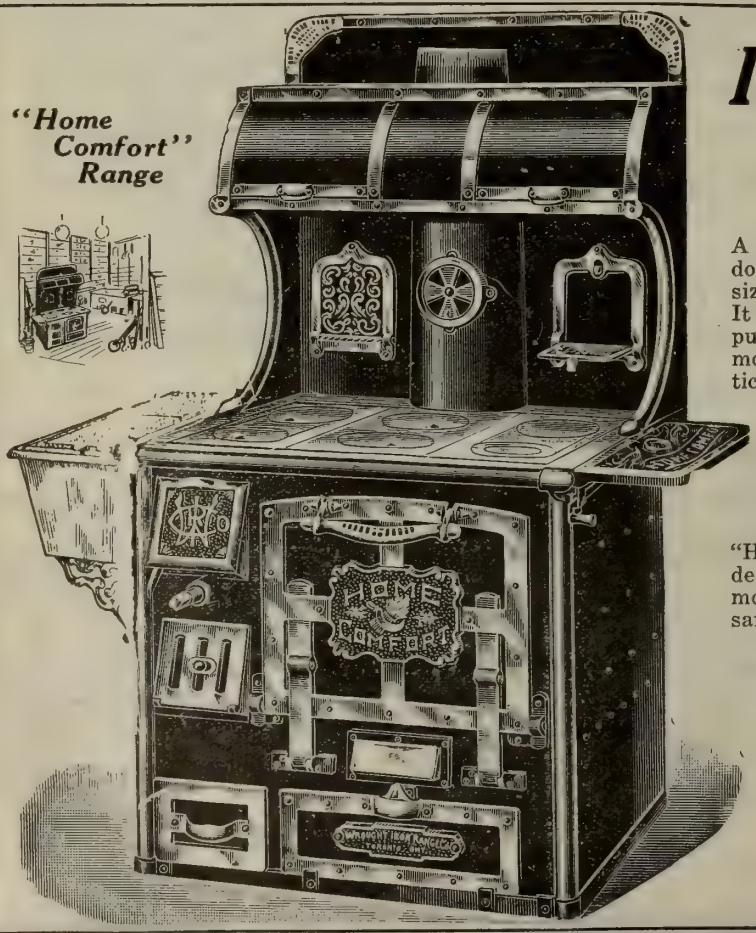
"White"

MOP WRINGERS

EASE OF OPERATION, THEIR GREAT UTILITY AND THEIR SUBSTANTIAL CONSTRUCTION, COMBINED WITH THEIR PRICE, MAKES THE WHITE MOP WRINGER A RAPID SELLER.



Made of malleable iron and the best of hard woods — Maple or Birch. Fits any kind of pail and wrings the mop thoroughly.

It has more than one use —often used for fruit and vegetable presses and works perfectly. The advent of the White Mop Wringer proved a boon to the housewife—it sells itself and is a good profit-maker.

White Mop Wringer Co.
FULTONVILLE
N.Y.

"Home Comfort" Range

It's Wise to Sell a Single Model

A dealer acting as agent for the "HOME COMFORT" doesn't have to keep a big stock. We make only one size and one style. This simplifies matters a whole lot. It used to be, and still is, the custom for the dealer to put forward on his floor the simplest and cheapest model of a range, and to sell his customers this particular range. Then having made the sale, the dealer would proceed to induce the customer to buy extras. For this purpose, the more expensive models kept in the rear would be used for the purpose of demonstration.

Experience has taught a good many dealers that it is wiser to sell but one model, a model like the "HOME COMFORT." It saves time and money—dealers do not have to carry a large stock. This single model plan pleases the customer, too, and makes it safe and easy to make a choice.

We have made the "HOME COMFORT" the most easily sold range on the market. Write for agency proposition. It's a good one.

Wrought Iron Range Co. of Canada, Limited

Office: 151 King St. West **TORONTO, Ont.** Factory: 22 Orillia St.

If interested, tear out this page and keep with letters to be answered.

Will He Come Back?

A Peculiar Problem of the Hardware Business

A neighbor buys some nails at your hardware store. He wants the right size. The rest doesn't matter. The sale over, his interest ends.

He may come back for more later—and again he may **not.** Why? Because it is hard for the hardware dealer to put **personal service** into the sale of nails.

Progressive hardware dealers are to-day looking for articles into whose sale they can add the element of personal advice.

Gargoyle Mobiloils—the scientifically sold automobile lubricants—afford you an opportunity to be of actual service to your customers.

When Mr. Brown, who owns an Overland, stops for oil you do not want to sell him "just oil." You want to sell him the oil that correctly meets the lubricating requirements of his car.

The Gargoyle Mobiloils Chart of Automobile Recommendations specifies the correct oil for every one of your customers' cars.

This Chart is compiled after a thorough analysis of the lubricating requirements of every make and model of automobile.

When motorists know they can get the correct grade of Gargoyle Mobiloils at your store they come back time after time.

You can develop a close and profitable acquaintance with automobile owners who call for high-grade lubricating oil.

The confidence gained in using Gargoyle Mobiloils is naturally extended to other goods in your hardware store.

Scores of hardware dealers to-day are winning steady customers by the display of Gargoyle Mobiloils coupled with the use of the Chart of Recommendations in their sale.

Quicken **your** turnover by following their example.

The four grades of Gargoyle Mobiloils, for gasoline engine lubrication purified to remove free carbon, are:

Gargoyle Mobiloil "A"
Gargoyle Mobiloil "B"
Gargoyle Mobiloil "E"
Gargoyle Mobiloil "Arctic"

Write us at Room 704, Imperial Oil Bldg., Toronto, for 56-page booklet, "Correct Lubrication," containing Charts of Recommendations for all makes of automobiles, motorcycles, tractor and motorboat engines and full information regarding our proposition to dealers.

MacLean's Magazine

for JANUARY

Chasing the Submarine—by a Canadian

A CANADIAN, whose name is withheld, in the Motor Boat Patrol Service in the North Sea, tells in the January MacLean's the story of the work and life and triumphs of the Service to which he is attached. It is a fine performance by MacLean's to get this story for the Canadian people. Successes of this sort have made MacLean's go far forward in public favor during past months.

If the horrid and terrible submarine warfare and the conquest of this pest of the deep interest you, learn more about submarines and their capturing in the January MACLEAN'S, and pass on to others the news of this unsigned contribution.

Ships—more ships—and yet more ships

THIS is a very strong article which Miss Agnes C. Laut contributes. As usual she is very well informed. Regarding the duration of the war she voices American opinion when she says that it is likely to be long drawn-out. The United States people are buckling down to a stern struggle. At this time we want very much to read what well-informed, virile thinkers and writers have to say about the war, since things are not any too bright in certain directions. Miss Laut has a good deal to say about the shipping programme of the United States, and certainly she gives facts and sets us thinking as few writers do.

"Jim" by Robert W. Service

A POEM by this strong poet—a poem wrought amid the smoke and hell of battle, yet fanciful and tender. One wonders how men can write fanciful verse amid surroundings that seem so adverse to thinking and writing, yet some gifted can detach themselves and let fancy play; or is it that their minds see through the real and horrible—through the immediate environment into inner things? Whatever it may be, we ought to be glad for the verse that men like Service give us, remembering how and where it is produced.

Adam and Arthur William Brown, Brothers

ADAM BROWN is a Canadian short story writer of large promise. His brother, Arthur William, is one of New York's foremost illustrators. Both brothers have joined their gifts to make Hannibal Helps a mighty good feature of the January MACLEAN'S.

A New Serial by Alan Sullivan

ALAN SULLIVAN'S recent novel, The Inner Door, is being well received. Perhaps we have no better novelist of his type in Canada to-day. He writes books that show introspection and fine analysis. This serial, The Magic Makers, adds venture and mystery to psychological study, and is a rare good thing. Arthur Heming illustrates the story, which begins in Scotland and is transferred to Canada where the stage is set.

The Regular Departments of MacLean's

REVIEW of Reviews, Women at Work, The Business Outlook—are present in goodly measure. Oppenheim's The Pawns Count, Trench Pictures, and first-class illustrations by artists of note help to make the January MACLEAN'S good value for money.

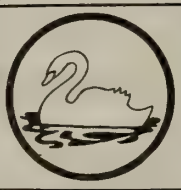
THE "WANT" AD.

The "want ad." has grown from a little used force in business life into one of the great necessitities of the present day.

Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.

The "want ad." gets work for workers and workers for work.



It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the small affairs and incidents of daily life.

Get Your Separator Orders in—Now!

Butter fat is commanding a higher price than ever before. Conservation and the elimination of waste is doubly important this year. That's just why the Sharples Suction-feed Cream Separator is selling bigger than ever—because it is the ONLY separator that automatically prevents all cream losses, no matter how fast or how slow you turn it.

Dairymen all over the U.S. ***know*** of this big cream-saving feature of Sharples—we have educated them through extensive space in practically every farm paper. They ***know*** that they can NOT afford to be without a Sharples. Any member of the family can turn a Sharples and still get ***all*** the cream—mighty important in these days of scarcity of hired help.

Now is the logical time for you to sell separators while other farm implements are not moving, while farmers and dairymen have plenty of time to listen to your sales-arguments.

SHARPLES
SUCTION-FEED CREAM SEPARATOR

And don't forget this: It is getting more difficult every day to obtain materials and make shipments. That frequently means DELAY. The fore-sighted dealer will order his separators right NOW. You can NOT sell separators unless you have them on hand to demonstrate.

The Sharpless contract is the most attractive we know of. Not only does it offer a Quantity Bonus, which will earn you a nice little check, ***in addition to your regular dealer commissions,*** but our system of discounts is exceptionally favorable to you. Our Spring Dating Terms enable you to order now and make payment May 1st—the maturity date. Write us—to-day!

SHARPLES MILKER

—is also going to sell bigger than ever this year, on account of the national shortage of farm labor. Farmers and dairymen are losing their hired men and are being forced to do their own milking, and the only way they can handle it is by installing a milking machine. The big reasons why you should sell Sharples are: (1) It is the world's fastest milker—official tests have proven that it is from 23% to 58% faster than others. (2) It is the only milker with a positive squeeze—absolutely necessary to keep the teats in perfect condition. The same attractive dealer contract applies to the Milker—write to-day.

Convenience versus Profits

Keep your profitable specialties prominently displayed. So arrange your stock that customers, the minute they enter your store, will see the more profitable lines. To *see* such goods is often to *buy* them.

A dealer will always be ahead in dollars and cents when he puts the profitable goods where customers' eyes cannot miss them. People usually know what common necessities they want. But high-class special lines like O-Cedar Polish, though well advertised, *may* be overlooked by your customers if placed under the counter or in a dark corner.

The convenient O-Cedar Floor and Counter Stands help materially in the selling of O-Cedar Polish. These and the Electric Sign Display Assortments are giving dealers a greater opportunity to benefit by the demand created for O-Cedar Products by O-Cedar Advertising and O-Cedar Quality. Ask your jobber's salesmen about these O-Cedar Displays. They will pay big rent for the space they occupy. If you already have these sales helps, ask about our Profit Deals.

Where Successful Methods Win Out

Five Months' Successful Experience With Auto Accessories Creates Enthusiasm — Merchandising Methods Adopted by Aikenhead Hardware, Limited, Retail Store Bringing Results—Showing the Goods Important Factor.

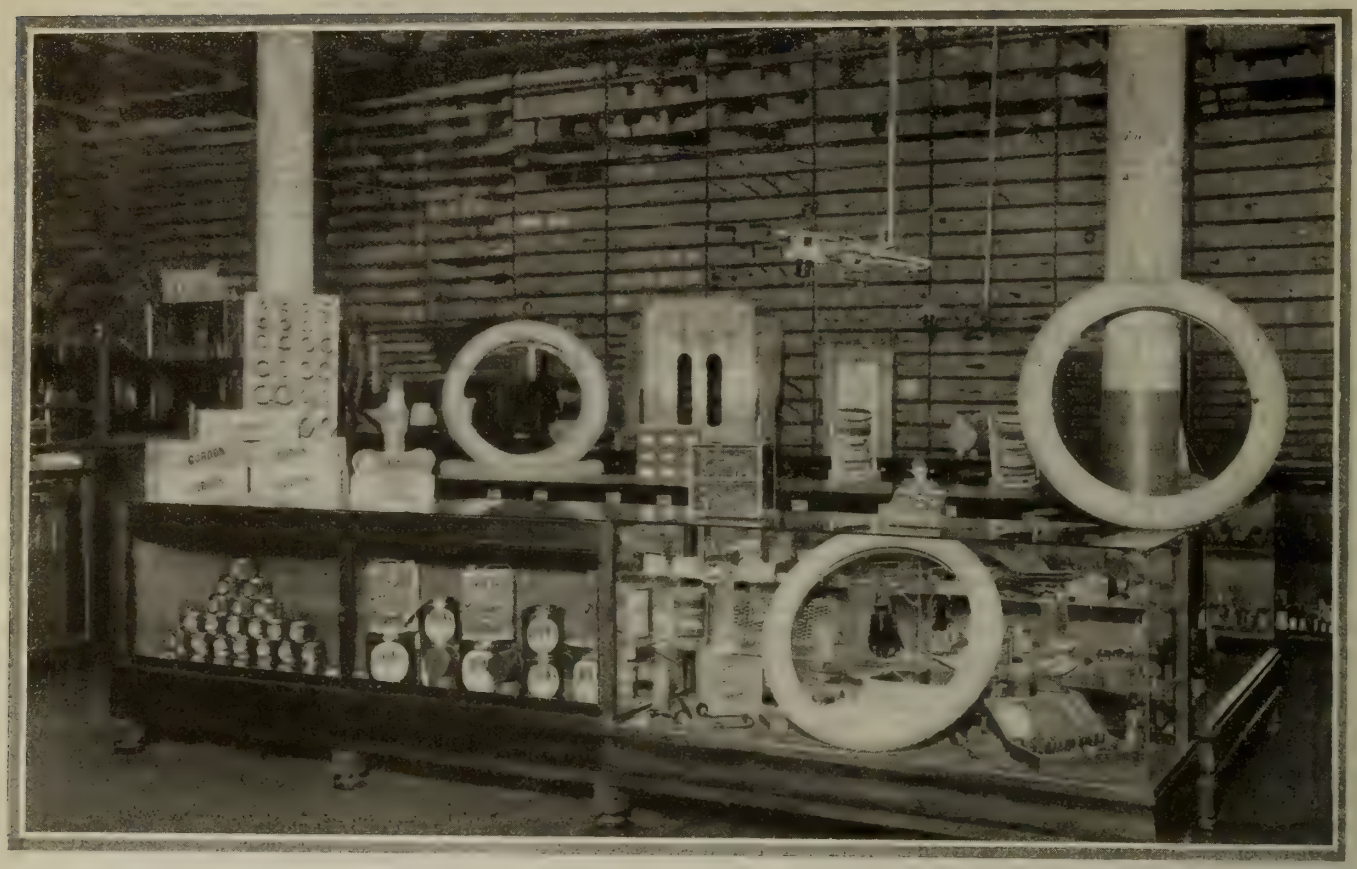
"FIVE months' experience with an auto accessory department has fully convinced us that we have been none too soon in classifying all goods sold to motorists under their proper heading, arranging store and window displays, and going after this business aggressively. The results attained since opening this department have exceeded our expectations and prospects for 1918, when we will have had an opportunity of getting our stock complete, are very bright." In the foregoing words Wilfred Aikenhead, of the Aikenhead Hardware, Ltd., retail store, Toronto, summarized the auto accessory situation in relation to their own business.

One thing which impressed HARDWARE AND METAL'S representative particularly is the fact that only since August has this department been running—during a period really when some dealers would be considering the sale of accessories almost over has this firm stepped in and met with a measure of success which has resulted in developing great enthusiasm and planning big things for the present year.

Classifying Auto Accessory Lines

Prior to the creation of a special auto accessory department, many lines of tools, etc., called for by motorists were carried in stock, but there was no special appeal made by which he would know that this hardware store could supply these items and probably many more. This store's customers for all other lines of hardware were drifting to the garage or other hardware store for their auto supplies, and it is not hard to determine what often happens when a customer is forced to go to another hardware store to secure anything. He looks upon the other store as the one catering to all his needs—it has the up-to-date spirit which this customer likes—it sells the goods he wants—he transfers his trade.

Holding Your Customer's Trade



The question, then, of holding customers is one which must be considered, and a very important factor this is in the success or otherwise of any merchant. Mr. Aikenhead pointed out that the number of new customers for auto accessories was growing rapidly, but one of the biggest factors in the rapid development of their auto accessory department was the interest evidenced by their regular source of trade. This point, then, would loom up as one which undoubtedly all merchants have experienced in branching out into this line, and with those not yet going after this trade should be given careful thought.

How to Add New Department a Problem

In the Aikenhead store space was at a premium; every department wanted more

Getting the eyes of the public through the medium of the store window is the policy of the Aikenhead store. Auto accessories are featured almost constantly in one of the store windows, a re-arrangement of the lines shown keeping the window attractive and serving to keep up interest.

An attractive arrangement of display cases such as the above serves to draw attention to the auto accessory lines which have only recently been added to the stock of the Aikenhead store. The prominence given the line may be taken as evidence of the importance placed upon it by the store management.

room than it already had. How then could auto accessories be given consideration? Why should departments already successful and growing be forced to accept smaller quarters for a new line which at best was uncertain? But was it uncertain? That was a point on which Mr. Aikenhead was willing to accept full responsibility, and the result has been that on the ground floor, immediately to the right as one enters the store, three big show cases make their appeal from the standpoint of the auto accessory lines. In addition to the displays arranged in these cases, one display window is at all times working to stimulate trade for this department. The results already achieved have been outlined, and that business in any other department has suffered is most decidedly not the case—rather has the reverse been true. To those merchants whose plea for not taking up the sale of auto accessories was lack of space, this firm's experience should give conclusive evidence as to their importance and probable stimulus to business in other departments.

Showing the People the Goods

It has been the aim in the Aikenhead store to have on display in their show cases and in the windows a comprehensive showing of the entire range of goods which might appeal to the motorists. It may so happen that the tools called for by the auto owner are still sold over the tool department counters, but in the cases these will be found on display. The same might be said of flashlights and batteries—whereas the automobilist sees these with tire reliners, patches, piston rings and gaskets, the actual sale may develop in the electrical department. This is one method of overcoming shortage of store space, and it will be seen that no opportunity is missed of bringing to the attention of prospective customers that their entire needs can be looked after.

The actual arrangement of the goods is decidedly attractive. The cases are arranged in the shape of a horseshoe, especially made so that large displays are possible, and at the back surplus stock can be carried. Such lines as shoes, reliners, spark plugs, gaskets, locks, radiator cement, etc., are shown, as well as tires, pumps and jacks. Display stands on which many small lines are featured are given prominence, and a hanger, on which are the various sizes of piston rings sold, is within sight and reach of all. The window display is always given careful thought and changed regularly, the main point being considered attractiveness and the displays are arranged to have this desirable feature.

Sale of Garage Hardware Increasing

One of the biggest factors in the auto accessory game as found by this firm is the sale of garage hardware. Whereas two or three years ago the feeling seemed to be that anything was good enough for a garage, this idea is becoming extinct, and the tendency now is towards a building which will really house the car. The natural result of this feeling has been an increased sale of real good hardware, and in addition such lines as garage heaters, tire pumps, etc., have enjoyed far larger sales.

In the construction of homes to-day the garage is considered as part of the building contract; it is a necessary adjunct whether for the owner or built for sale. Even those renting houses to-day want to know about the garage, so it should not be difficult to develop this branch of the business.

Care in Buying Essential

In speaking of the great range of goods now being classed directly under the auto accessory heading, the question of new lines, many of which are novelties, came up. In outlining how necessary it had been to go over every line bought very carefully, watch to see that no jokers were slipped in, one point of decided interest cropped up, which Mr. Aikenhead explained as follows:—"There has been such extensive national advertising done by many manufacturers that a demand exists for their product, and to meet this we have added their lines to our stock. It may be hardly right to say that we do not recommend these lines; they are probably quite all right in many respects, but they do not meet with our ideas entirely. This resolves itself into a case where extreme care must be exercised in buying, for if our judgment is worth anything it is that many lines now on the market will have a very limited sale. However,

(Continued on page 47.)

$200,000,000 Canada's Motor Investment

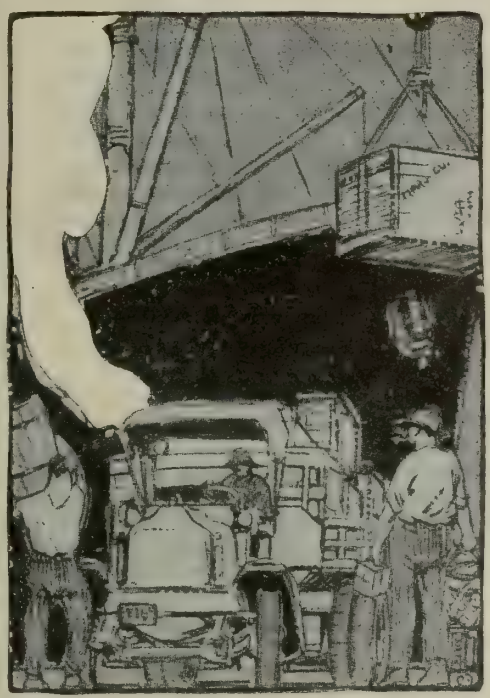
Distribution More Generalized in 1917—Investment Reaches Enormous Total — Products of Canadian Factories Showing Big Increase—One Car to Every 39 of Population

THE sale of motor cars in Canada during 1917 has been marked by a more general distribution throughout the country than in any previous year. Particularly in the west has this been noticeable, but it is apparent that all rural communities have been large buyers, whether due to the increasing measure of prosperity enjoyed by the farming classes, by the intensified good roads propaganda or by the general campaign of motor car education.

Canada has made a very definite gain as a car-owning country during the past year and it is estimated that the number of cars now owned in this country reaches within a few of 200,000. This means that there is one car to at least every forty persons which compares with a ratio of one to sixty shown by last year's figures.

Investment Reaches Enormous Total

There is bound to be a certain amount of guess-work in placing a valuation on Canada's investment in motor vehicles, but among automobile men it is assumed that $750 would represent the fair average value of each car purchased. On this basis, it is a matter of easy calculation that this country has a present investment of $150,000,000 in cars. To this original outlay then must be added cost of equipment and accessories. For these it is estimated that every car owner spends at least $100 in a year which makes a total reaching $20,000,000.



Adding to this the expenditure on gasoline and oil and when other incidentals are considered, it may safely be assumed that Canada's total investment in motor cars for the past year represents an outlay of $200,000,000. No greater evidence is necessary in determining the commanding position that the automobile trade occupies among the industries of the Dominion.

Where Canadian Industry Stands

How much of this vast expenditure goes out of the country and the amount spent at home is difficult to determine, but Canada's capacity to take care of its own demand is increasingly evident and may to some extent be calculated. Registrations in Canada for 1917 represent, roughly speaking, an increase of 80,000 cars over those for 1916. In addition to these must be considered the number of cars that were scrapped, so that in the neighborhood of 100,000 new cars were operated during the past year. These represent a value of $75.000,000, and the value of the output of Canadian factories for the past year is calculated at about $60,000,000.

A review of imports shows that during the first six months of the present fiscal year, April to September, inclusive, motor vehicles, parts and tires, to the value of $13,144,405 were brought into Canada. This compares with a total of $17,056,685 for the fiscal year ending with March, 1917, it will be seen, however, that the imports of passenger cars in the six months almost equalled those of the entire preceding year, while the value of commercial vehicles brought in almost doubled, and that of tires imported showed a marked increase.

It is impossible to secure definite figures as to the value of the product of Canadian factories but an estimate of their growth can be arrived at in comparing government census statistics of 1910 with the special business census

taken in 1916 for the preceding year. These show the value of the product for eight establishments in 1910 at over six and a quarter millions of dollars—whereas in 1915 the amount reached about twenty-four and a half millions. Repairs and accessories for 1910 amounted to considerably less than $200,000 but in 1915 the value of the product totalled about four and a half millions.

There are now twelve automobile factories in operation in the Dominion. The number of accessory manufacturers can only be estimated, but it is notable that their growth has been most marked during the past three years, and they are now believed to be supplying 20 per cent. of the total demand for automobile supplies and equipment within the Dominion. This is, of course, outside of the tire business for which it is claimed a much greater percentage is controlled in Canada for the Canadian trade.

In considering the growth of the motor truck business in Canada, difficulties at once arise in view of the fact that few of the provinces have in the past kept separate records of the passenger and commercial car registrations. In 1916 when the first record for Ontario was kept, about 2,800 trucks were reported but in 1917 this increased to nearly 4,600 which represents a percentage of increase almost identical with that shown in passenger cars. In Quebec a steady growth is noticeable in the number of commercial cars registered, having had 396 in 1914, 534 in 1915, 741 in 1916 and 1,100 in 1917, so far as has been reported. The truck registrations parallel those in Ontario in that they are in the neighborhood of five per cent. of the total. Working on that basis it may be assumed that Canada has not less than 10,000 trucks in operation.

How Cars Are Distributed

Almost one-half of the total Dominion registrations are credited to the province of Ontario. A factor in this situation is undoubtedly the fact that the twelve companies now engaged in the manufacture of automobiles in Canada are located in the province, and this fact has also served to attract by far the greater proportion of accessory manufacturers. Ontario has progressed splendidly in the matter of good roads and presents a very fertile field for the automobile agent, and rural communities have of late become very liberal purchasers.

Figures of automobile registrations in each of the provinces for 1917 show Ontario with a total of about 85,000; Saskatchewan is next with 33,000; there is not much difference between Quebec and Alberta, the eastern province leading with 22,000 and Alberta close on her heels with 21,000; Manitoba with 17,500, and British Columbia with 12,000 complete the western provinces; next in order follows Nova Scotia with 5,700; New Brunswick with 5.100 and Prince Edward Island with slightly over 300.

When it comes to figuring percentage of increase for the year, the Province of Prince Edward Island has the lead, having six times the number of cars it had in 1916, when only fifty were registered. This was, of course, due to the oppressive regulations, it being permissible to use cars only on certain days of the week and only on certain roads. But the breaking down of prejudices has been working gradually, and there are now over 300 cars on the Island, including six motor trucks.

The Prairie Provinces have reflected the prosperity of the farmers in that figures show double the number of cars in Alberta and Saskatchewan. Manitoba has made an almost 50 per cent. increase, while British Columbia has added about 35 per cent. to its quota.

Get Your Goods in Early

Ordering Goods Freely Now Will Reduce Congestion Later on — Already Incoming Shipments Delayed From One to Three Months—Situation Serious, but Undercurrent of Optimism Prevails

RETAILERS, for their own sakes, will give the jobbers a free hand in making shipments of booked orders on receipt of the jobbers' stocks if they want to make sure of having the goods when the real demand comes. Getting your goods a month or six weeks ahead of the usual time is far better than experiencing a delay of a week or ten days when the season is on you and this latter is a condition likely to result with those merchants who hold back. "By keeping up a normal flow of orders through the winter, merchants will do much towards avoiding congestion and stand a far better chance of securing the merchandise they want"; this outlines opinions expressed to HARDWARE AND METAL representatives in an investigation into the supply and transportation of merchandise during the next few months.

Many factors enter into the conditions which now exist and whereas jobbers always have advocated early shipment of goods on which datings are given, it is generally felt that retailers will be displaying excellent judgment in anticipating all their wants well in advance of the actual demand this year. It has been suggested that retailers give the jobbers a free hand to make shipments as the goods arrive without even the necessity of correspondence which must mean more or less delay. Every means by which the orders can be handled expeditiously should be employed and it is not by any means in the sole interest of the jobber that the situation is emphasized so strongly.

Traffic conditions in the United States are even worse than the average man thinks. Coal shipments have been given priority over everything else and whereas splendid things are expected from the recent government action in taking over the railroads, it will be weeks and even months before anything approaching normal can result.

Incoming Shipments Delayed

A very large proportion of Canada's hardware comes from across the line and it was pointed out that many shipments have now been in transit for a period of from one to three months with no indication as to when delivery may be expected. One specific case was quoted in which a jobber had occasion to look up an invoice just prior to HARDWARE AND METAL'S call. The date of the bill of lading on this invoice was October 21, 1917, and no word of the shipment, which was coming from across the border, was available. This jobber stated further that in compiling statistics of goods in transit for their inventory, the amount was found to be five times greater than normal.

This presents a mighty strong reason why even sorting orders should be placed well in advance. The inventory in most hardware stores will be completed by the end of this month and merchants will be familiar with all lines which they are needing. At that time, place your orders for your shelf hardware requirements for the next three months at least—the entire list may not be shipped at once but you will have first call on stock when it does arrive.

The situation is very serious and it is impossible to forecast what the next six months may bring forth. Government control of the railways will, it is expected, bring a measure of relief. All goods are to be routed the shortest way notwithstanding any instructions which those placing orders may have given. This should eventually prove a benefit but it will take some time for details to be worked out.

Priority will be given to essentials which will keep the war industries at full pressure. That is to be expected, of course, and by the time relief from the coal situation is effected, there will be thousands of tons of goods piled up to be transported. Once a working basis has been established, and only then, can the transportation question approach a satisfactory solution. It does not look at present as though much relief could be expected for another six months at least and consequently hardware shipments will very likely come along slowly.

A few details in respect to conditions in New York, which to a greater or less extent prevail in other centers of the United States, are given, not with the idea of casting gloom but to bring realization of their seriousness and how they will be a factor in the situation for some time to come.

It is stated that in New York harbor ships are frozen into their slips. Shippers are going from one pier to another trying by every means to get transportation companies to accept their shipments. The railroad situation is equally bad and the unusual cold weather which has prevailed has played havoc with locomotives, many of which have had to be taken to the roundhouses to undergo repairs. In office buildings in New York, occupants of space on the twentieth or thirtieth story after walking up to their offices have found them cold and practically impossible of occupation. Broadway is dark six nights a week. Through it all, however, business men are showing they are good sports and looking ahead to a brighter side. In their attitude of optimism then, lies the hope of the hardwaremen in Canada.

At the present time hardware jobbers' stocks are in fairly good shape and by anticipating their requirements early retailers will not only stand a better chance of securing what merchandise they need but will reduce possibilities of congestion. The scarcity of labor is such that hardly the same standard of service can be expected but retailers can do much towards easing the situation if they only will.

In spite of the element of uncertainty which exists in some respects, jobbers generally are optimistic in their attitude toward business for 1918. The number and volume of booked orders for shipment during the next few months is large and by co-operation with the jobber in the matter of shipments retailers will avoid unnecessary delays in receiving their goods which means a great measure of satisfaction.

Drastic Demurrage Regulation in States

Heavy Charges Imposed for Tardy Unloading—How Will This Affect Hardware Lines in Canada?—Will it Affect Glass? —Opinions of Leading Men in Touch Say No

FOR the time being the advanced freight rates—not yet absolutely effective and strongly protested against in Manitoba by the provincial government—have not affected hardware prices. In the opinion of several authorities previously quoted there is no doubt that hardware must eventually be affected by increases in freights, and the general precaution of ordering reasonably ahead of immediate requirements is being taken by those dealers in a position to do so. By the time additional freight rates have begun to tell on cost of goods, wholesalers' associations will have taken the necessary steps for the distribution of the additional cost through retail channels to the consumer who of course bears such charges eventually.

A Demurrage Development

The railway situation requires close watching in Canada on account of the vigorous action of the United States Government in connection with freight transportation problems, and the close harmony that must inevitably exist between United States and Canadian authorities in all matters of railway administration.

On Wednesday morning announcement was received in business circles of a new and very drastic regulation effective in the United States as to demurrage. Briefly the requirements are that forty-eight hours after a car is spotted in United States railway yards a charge of three dollars a day for demurrage becomes due for the first day after the forty-eight hour limit, four dollars for the next day, and for each succeeding day a dollar a day additional so that at the eighth day the car is costing in demurrage ten dollars a day. After the eighth day there would probably be room for still more drastic action if a car were left that long unloaded. This regulation is effective in the States after January 21. Whether it will come into force also in Canada is not by any means certain. The condition of car shortage in Canada is not as acute as it is at present in the States.

Will This Affect Hardware Lines?

Asked whether this demurrage regulation might possibly have an effect on hardware lines through its operation in the States Thos. B. Williamson of H. S. Howland Sons & Co., Toronto, said that he did not think it would. "We don't pay demurrage on a car more than perhaps once a year," he said "and as a matter of fact we are anxious to get the goods out of the car while it is still rolling to us so to speak."

Presumably in these times especially United States hardware firms are similarly anxious for the goods so that the demurrage item over there is as in Canada negligible as a factor affecting hardware prices. But the drastic nature of the regulation shows how badly cars are needed.

"That new demurrage regulation has been imposed in the States simply to set cars free as fast as possible for use for other purposes," said Geo. T. Pepall of Samuel, M. & L. Benjamin and Co., (Metals) Toronto. "There are people who find it cheaper sometimes to store in the car than to unload. The regulation aims at them as the cars are so urgently needed. As to its effect in Canada, I hardly think it will be felt to any extent on prices. There have been no further developments in freight conditions here since the announcement that there was to be an increase."

Would It Affect Glass Prices?

Canadian supplies of glass come so completely from the United States that anything heavily affecting U. S. railway transportation costs might be felt quickly in the direction of glass. In the opinion of F. Hobbs of the Consolidated Plate Glass Co. of Canada, Toronto, the demurrage regulation is not likely to bear on glass manufacturers.

"The materials used in making glass are in the nature of coarse freight, sand, etc.," said Mr. Hobbs, "and these materials can usually be dumped quickly from the cars, while there is no need for using the cars as storage places for them. Therefore while any expense added to railway costs may affect glass in the States and in Canada accordingly, I don't think this one will cause any appreciable advance in glass prices."

Is Freight Advance Economical?

An interesting opinion as regards the freight advances not from a hardware merchant but from a wholesaler of foodstuffs is that the policy of granting advances in freight rates to the Canadian railway companies is not entirely the best in the sense of national economy from the point of view of the nation at large.

"It would pay the country better, I believe," said this business man "to grant the necessary millions to the two weaker railway companies which decidedly need support to carry them along in these times, and to let the strong company fend for itself at the present basis of freight charges. It seems adding to the expense which has to be borne by the consumers after all, that is the people of the country, to give the strong company an equal share in the grant the people are giving the railway companies through this advance in freights. It's the people who pay it anyway, and whether it is paid to two companies who need it in the form of a grant of some millions, or in advances in freight rates distributing the millions they mean over many contributing consumers, the result works out the same. But I feel that in the case of a

(Continued on page 53.)

Coal Shortage Curtails Sheet Output

Scarcity of Coal Main Factor in Reducing Production of Sheets —Labor Supply Short—Car Shortage a Disturbing Influence

"THE main trouble in producing sheets at this time is the scarcity of coal." In these words the situation in respect to the production of steel sheets was revealed by A. T. Enlow, president of the Dominion Sheet Metal Co., Ltd., of Hamilton, Ont., to HARDWARE AND METAL on his return from a ten days' visit in the mill district. Continuing Mr. Enlow said: "There is at present a very small available supply of coal in the mill district, some mills having none at all and being forced to shut down tight.

"As regards labor the supply is by no means adequate to the needs of capacity production and whereas the advent of warmer weather later on will in a measure ease off the coal situation, it also means less available labor in the steel plants.

"The transportation facilities are by no means equal to the needs of the producers. This was brought home to me," Mr. Enlow explained "when I visited one plant where I saw three cars of sheets for government use going out loaded but there were over 600 cars of other materials in their warehouses ready to ship and nothing in which to load same. For more than two weeks this plant has been closed as they feel it is useless to produce when no means of transportation exists.

"The supply of sheet bars is very small and the difficulty in delivering from the steel plants to the sheet mills can be determined from the shortage of rolling stock. There are, of course, some plants which are self contained and on this account do not experience this difficulty.

"One redeeming feature in the sheet situation is that spelter is easy but here again the difficulties in respect to transportation are prominent. Many mills or galvanizing works have spelter bought but the shippers cannot secure cars to make deliveries.

"In general, I would say, that this means a slack supply of sheets for several months to come. It is true better weather will solve a great many of these problems but it is then labor will get scarce. Prices have been extended to April 1, and it would appear that the government will make further extensions then unless some material change develops not at present expected."

What Hardwaremen Are Doing

Advertisements of Hardwaremen Throughout Canada — How Christmas Trade Was Solicited—Timely and Seasonable Features—Some Merchants Now Having Stock-Taking Sales

"IF it's hardware, get it at Gillespie's," is the slogan appearing in the top and bottom border surrounding an attractive advertisement of R. GILLESPIE, HARDWARE, OXBOW, SASK. Continuing, it says in part: "You will find an up-to-date stock at lowest market prices" and then a list including foot warmers, ——— oil heating stoves, garbage pails, hand sleighs, weather strip, tank heaters, skates, etc., is given with prices applying to same. Supplementing this list the ad says: "I carry a complete line of ——— stock and animal food, also remedies of all descriptions. I also carry a nice assortment of high grade articles suitable for Xmas gifts, including the following: mahogany, walnut and antique trays; casseroles; pie servers, coffee percolators, silverware and cut glass in great variety. My motto—a square deal to everybody."

This advertising is very seasonable and the Christmas appeal is by no means lost sight of. Prices on the goods is a very effective feature of the ad.

* * *

An appeal to the housewife has been made by BENT & COHOON, LTD., HARDWARE, NEW GLASGOW, N.S., in an advertisement carrying the heading: Help Conserve the Nation's Rations. The ad says in part: "The Canadian housewives are the first line of defense in the war against waste. Food must be saved if this war is to be won. Service in the home as described below will help you do your bit in the national economy campaign. ———Bread Mixer. Delicious whole wheat or graham bread can be made as well as white bread. There is no waste of materials and the entire mixing and kneading takes but three minutes. Sanitary also, as hands do not touch the dough. ——— Food Chopper turns the left-over pieces of meat, vegetables, fruits, etc., into delicious, nutritious dishes. Eliminates waste, cuts down your food bill and saves you time and work. Soon its cost in food is saved. ——— Coffee Percolator extracts the full flavor and aroma from each grain of coffee, uses one-third less coffee than an ordinary pot, saving you money and providing a more delicious and healthful beverage every day."

* * *

In these days of coal shortage a timely ad of RICE LEWIS & SON, HARDWARE, TORONTO, carrying the heading, "Help Out the Coal Bin" has been inserted in the papers. The ad explains itself as follows: "An oil or electric heater will give great comfort these severe cold days, and provide a generous heat without sacrificing the coal. ——— oil heaters, odorless, cleanly, a furnace for heat. ——— electric heaters, an improved electric radiator to be attached to the lamp socket, may be moved from room to room at will."

* * *

The ad of CRAGG BROS. CO., LTD., HARDWARE, HALIFAX, N.S., in its message from the stricken city stands out well from the files of Canadian hardware advertising. It says in part: "We are now in shape to meet all demands on our stock of general hardware, flashlights, skates, hockey goods, etc."

* * *

"The Lord loves a cheerful giver" is the distinctive heading appearing on a Christmas ad of the NICHOLSON-HERITY HARDWARE CO., KERROBERT, SASK. Following the main heading the ad continues: "Who is a giver of practical gifts and hardware is the most lasting and practical gift you can get, as the styles and designs are practically standard, and are easy to add to from year to year. Few suggestions follow:—berry spoons, cream ladles, pie servers, ——— knives and forks, tea spoons, dessert spoons," etc., with the prices given opposite each. Across the bottom of the ad runs the following: "Your Xmas turkey will taste good if cooked in a ——— range, and your wife will appreciate such a genuine quality gift, from $55.00 to $90.00."

* * *

The advertising which many stores employed in their appeal for Christmas trade and the range of goods listed illustrates how extensively the hardware store is branching out and what a factor they are in the holiday trade. Extracts from a Christmas advertisement of THE ADAMSON HARDWARE CO., ORANGEVILLE, will confirm this point conclusively. Under the heading, "The Christmas store in full swing," the following has been taken: "Packed full with the largest assortment of good, sensible and useful articles. Giving you the best selection in presents suitable for the family, friend or sweetheart. Let mother's gift be an electric vacuum cleaner, or if she has no electric current, make it a hand vacuum sweeper—makes play of sweeping—gives her more leisure—cleans the house cleaner—brings a smile to her face instead of an ache to her back.

"Do you—fathers and mothers—realize that there is a force in the development of the finer and nobler impulses that can be fully appreciated only when it is brought into your own home? That force is music." Following, is an appeal on the advantage of having the particular line of talking machine which this firm sells in the home. "For your friend at the front or at home, a safety razor. Come yourself and bring your children to see the kiddies' corner, "toyland," where rocking horses, doll cabs, sleighs, sleds, electric engines, mechanical toys, etc., are all listed. A feature in this store which makes a direct call on the women is noted in the ad, "Ladies' rest room at your service."

* * *

Following the Christmas rush, it is sometimes the tendency of merchants to curtail their advertising space. This is not the case with COWAN'S COLOSSAL HARDWARE, LONDON, ONT., however. The heading on their ad to which reference is made is: "Something for nothing —almost—you will save real money by taking advantage of our stock-taking bargains." Brass smoking sets and shaving stands and flashlights are mentioned at reduced prices. Other items appearing in the ad are carriage and auto heaters, silverware, skates, sleds and toboggans, while this interesting announcement is made: "Your new year's fowl will taste better roasted in one of our enamel self-basting roasting pans."

* * *

A timely ad was run by R. CHESTNUT & SONS, LTD., OF FREDERICTON, N.B., recently on electric heaters. Under this heading the ad continues: "Portable, stands on table or floor; pours forth a wonderful volume of heat, sufficient for any room in your house. A real house necessity. Buy one and save your wood and coal.

* * *

——— electric appliances are the best. Under this caption, the JAMES S. NEILL & SONS, LTD., FREDERICTON, N.B., list goods available in their electrical department, such as water heaters, air heaters, toasters, foot warmers, ovens, percolators, irons, etc. "Now is your opportunity to supply your needs as we have a full line of these goods in stock. Give us a call."

Current Events in Photograph—No. 2

SUCCESSFUL METHODS WIN OUT

(Continued from page 42.)

these lines really represent the exception and not the rule, for as we investigate it is increasingly evident that standardization is the basis on which the auto accessory business is being extended so successfully."

It would appear, then, that the actual selection of auto accessories is not an impossible task even by the man who is unfamiliar with the finer points of automobile construction. With manufacturers working towards a basis of standardization, it is not impossible for any hardware man to choose a representative line of goods to start with, and as he becomes more familiar with the items which have the most rapid sale will be able to go after his trade more and more aggressively.

The auto accessory game is going through a similar period which other lines, now recognized as hardware store stock, experienced years ago. Although some merchants still fail to take advantage of the offers being made to them constantly, the majority are stepping out into 1918 with a campaign outlined for their auto accessory department which will bring in the dollars.

It is only necessary to look over the figures giving the number of cars now owned in Canada compared with one year ago; the increase is nothing short of marvellous. Look over the imports of accessories, which do not cover business done by Canadian firms—they are illuminating. Can the hardware man not yet selling these goods afford to overlook their possibilities? Isn't the success being attained by other hardware men sufficient evidence that the opportunity for profitable trade exists? 1918 presents a splendid outlook for business in spite of any curtailment which may result in the manufacture of cars. The accessory business should enjoy splendid development, and with the possibility that many old cars will be utilized for another year this branch of the business should thrive under the hardwareman's direction.

The Aikenhead store has been established many years, and the layout of the store suggests that a great deal of care and thought has been given to its arrangement. "Display the goods" would seem to be the motto employed, as show cases of both the floor and counter type are prominent throughout the store. In the tool department, in the cutlery, throughout, splendid displays greet the eye and make a lasting impression. Back of the display windows, which run across the entire front of the store, and at each side of the entrance show cases are placed which not only carry neat displays of goods, but utilize space often overlooked in some establishments. The entire atmosphere of the store is enthusiasm, and this is by no means confined to the new auto accessory department. In the builders' hardware, tools, paint or cutlery, the spirit of "go-get-it" represents the attitude of the staff towards business for their particular department, and it must be admitted this is the spirit which makes for success.

EDITORIAL COMMENT

EDITORIAL BRIEFS

REALIZING the value placed on our market reports and the increasing number and importance of our Western readers, HARDWARE AND METAL has added another page to the list of Winnipeg hardware quotations. This is further evidence of our constant desire to give our readers what they need.

* * *

UNITED STATES daily papers report that the store front of a Council Bluffs, Iowa, druggist was painted yellow on a recent night by indignant citizens who resented his declaration that he didn't owe his country anything. This is a new field for paint—and one in which it is to be hoped there will be no large demand.

* * *

IT IS of the greatest importance that a merchant should be able to meet all bills when they become due. High credit standing is one of the retailer's best assets. Moral, watch collections closely.

MASKED bandits entered a preserving plant in Fairpoint, N.Y., and at the point of a pistol forced the watchman to turn over 500 pounds of sugar. Another illustration of the fact that valuables should always be kept in the safe.

A REMARKABLE CAREER

EIGHTY-NINE years of age and still at the head of an industry established 70 years ago. Such is the remarkable record of John McClary, founder and present head of the McClary Mfg. Co., London, Ont. Three-score years and ten is the allotted span of the average man's life. That one man has actively directed a huge business for that space of time is one of the most remarkable facts in Canadian industry. John McClary started his business in a humble way at an extremely early age, so that he adds exceptional precocity to the other unusual features of his long, honorable and active career.

John McClary at eighty-nine is still a dominant factor in the control of the business which has developed to such large proportions during the seventy years. He has become a national figure. It is the sincere wish of every Canadian that many more years of activity extend before him.

BEARING WAR BURDENS

IN these days when the merchant seems to be the sport of so many suspicions, when charges of hoarding and profiteering and usurious prices are the common cry of every day, days when the merchant is almost everybody's black sheep, let us say one word for the man who has stuck to his business through times of uncertainty:

The average man, standing to the same daily task he knew in peace times, is a very real person and bears the brunt of war's support. He meets all the problems of supplies of materials, adequate and efficient labor, new equipment that has to be obtained in markets that are swept clean, shipments of products over routes that bristle with embargoes.

This is the man whose resources of initiative energy, and grinding effort assist to guarantee victory in the great enterprise to which we have set our hand. He may be farmer, blacksmith, railroad president, foundry foreman, clerk or merchant, but every man can assist in keeping the wheels of commerce moving.

JUSTIFIABLE PROFITEERING

IN a recent issue of *The Financial Post* appears one of a series of remarkably fine articles written by J. W. T. This bears upon banking in its relation to merchandising and quotes one bank manager as saying:

"My advice has been that the manufacturer should take the full advantage of the market, that if he has raw materials secured at lower levels that he should not consider himself under any obligation to sell his product below the price set in open competition."

"But is this not profiteering?" I interjected.

"Maybe it is," he came back, "but who is not a profiteer in these times if he has the opportnnity? The laborer gets all he can for his labor, the farmer gets all he can for his produce, and the investor gets all he can in return for his money—even though it may be less than before the war. And of these I think the farmer is the man who has benefited to the greatest extent; yet no one calls him a profiteeer.

"But in the case of the manufacturer there is the sound argument that he should take advantage of the rise of the market in order that he may be in a

position to take advantage also of the decline when it comes. There will be many cases where the profits which a manufacturer has made out of raw materials on the rise will be no more than he will lose when in the course of readjustment the values of his stocks on hand decline in relation to the market for his products."

What is said here as advice to the manufacturer would, of course, apply fully as well to the retailer. Certainly there is a time coming when goods will decline in value. It behooves us all to remember this and to set by a reserve—accumulated by taking at least a part of the extra profit which advantageous buying makes possible—which will enable the writing down of stock when the time for this step comes, without disaster to the business.

PUBLIC OWNERSHIP WORKMEN SLEEP

THE part which the technical and trade newspapers play in their particular fields is too often ignored by public officials and the action of the United States Senate Committee on Military Affairs in calling in Fred H. Colvin, editor of the technical newspaper, *The American Machinist,* to give evidence at the recent inquiry into the Government arsenals would indicate an awakening. THE FINANCIAL POST, under the heading "Public Ownership Workmen Sleep," says: The United States Senate Committee on Military Affairs was not satisfied with the way things were going on at the Government arsenals conducted under public ownership. They called in an expert, Fred H. Colvin, editor of the technical newspaper, *The American Machinist.* He gave some very interesting evidence. His evidence created a great sensation and is leading to a complete reorganization of the arsenals and the War Office officialdom responsible for conditions.

Workmen in arms manufacturing plants played checkers and slept in the shops during August, while the War Department quibbled over non-essential details of rifle designs.

A super-preciseness of requirement in rifle making, going even to the extent of 1-2000 exactness in bayonets, is holding down production 40 per cent., he said.

Mr. Colvin declared the Government arsenals at Springfield, Mass., and Rock Island, Ill., do not understand manufacturing principles and have antiquated machinery. Some of the machinery at the Springfield arsenal is fifty years old.

He charged that "an excessive nicety of requirement" in unimportant parts of rifles held up rifle production "tremendously."

The bayonet is only a butcher knife and a sixteenth of an inch would not make any difference," he said, "yet a variation of 1-2000 is sufficient cause for rejection."

"I have photographs taken of men in the Winchester factory playing checkers last August," he said further. "Details of manufacturing had not been decided upon by the War Department. The one great weakness was that everyone hesitated to take the responsibility in deciding these details."

"Were all the men playing checkers?" asked Senator Hitchcock, of Nebraska.

"No; some were sleeping," Mr. Colvin answered.

That the dilatory tactics of the Ordnance Department will prevent first delivery of the Browning machine guns until a full year after the entrance of the United States into the war was again emphasized by the next witness.

General Crozier, the United States Chief of Ordnance, gave orders that Mr. Colvin should be barred from inspecting arsenals because he insisted that expert machinists and not army officers should be in charge.

This experience shows what happens under public ownership. It also exposes the stupid antipathy that prevails among public officials against business and technical papers. Sir George Foster, Minister of Trade, voted to put Canadian technical newspapers out of business. Hon. Mr. Burrell, late Minister of Agriculture, supported a movement that would tax farm papers out of business. Even Mr. Murray, the Secretary of the Canadian Manufacturers' Association, after recommending every medium of publicity for Canadian manufacturers, from buttons to billboards, deliberately eliminated all reference to the business press.

When the manufacturers wanted to know how to make munitions it was not to the buttons or billboards but to the technical newspapers they applied. The Trade and Commerce department was helpless. The Manufacturers' Association did absolutely nothing for them. Not only did the newspaper, *Canadian Machinery,* show in a series of illustrated articles how to adapt Canadian plants for munitions but they secured the blue prints and specifications for French and Russian shells so that their readers could and did tender on them.

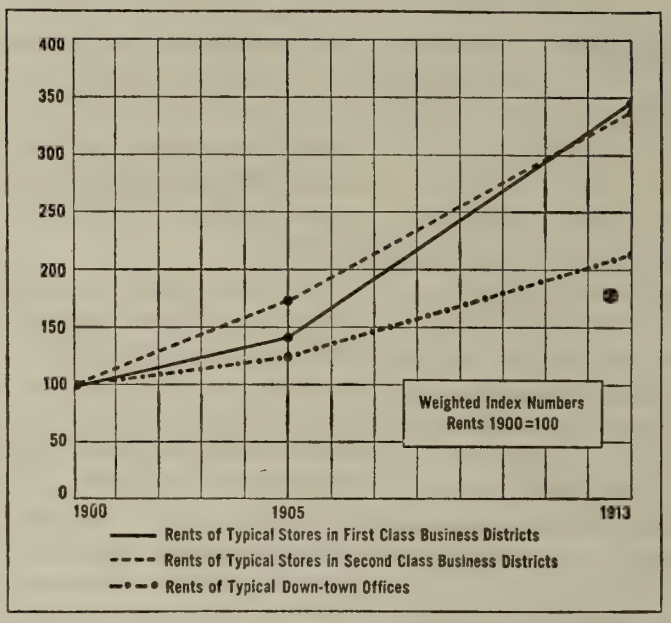
ANOTHER PROPOSED CURTAILMENT.

THE United States railroad war board have recommended to the government that rail transportation be denied to more than 500 non-essential commodities. The extraordinary volume of the freight and passenger traffic incident to war preparations has made some such action necessary.

Such legislation as this if actually put in operation would have a material effect on Canadian trade, as a goodly portion of our goods come to us over American railways. It is but an indication of what demands the war may yet make on the industries of the country.

Would It Pay You To Move?

Probably you've puzzled over your rent bill a hundred times, searching for ways to reduce it. But did it ever occur to you that possibly you should be paying more instead of less rent? The question may strike you as preposterous—yet sometimes a higher rent actually is profitable, as this article points out.



By Professor Ralph E. Heilman, Department of Economics, Northwestern University.

Reprinted by courtesy of "System."

WHAT are the factors that determine the amount of my rent bill? Is my rent bill in proper proportion to my other expenses, my profits, my rate of turnover, and the advantages offered by my location? From the business man's point of view, these are probably the two most fundamental questions regarding rent.

Rent is an important item in the expense of conducting most businesses. In many concerns the outlay for rent is very large. It is a constant and fixed charge. The landlord's bill at the end of the month can be neither evaded nor scaled down.

The importance of rent is further evident when it is remembered that in practically all growing communities the general scale of rentals for business locations is rapidly advancing. The decided upward movement in store and office rentals in Canada since 1900 is shown in the chart* on this page. This tendency has manifested itself in most cities in the United States. In the light of such facts every business man who pays rent for business quarters should give the question consideration.

HOW RENTS ARE GOING UP

This chart shows advances in rentals between 1900 *and* 1913. *It is based on a study of charges for the same properties in* 48 *Canadian localities having a population of* 10,000 *or over.*

There is much confusion of thought regarding the first question mentioned above: namely, what determines the size of the rent bill? Sometimes we are told that the rents of business properties depend upon their accessibility to people, Yet it is obvious that this answer cannot be conclusive. For some stores that are situated on quiet, dignified, and exclusive thoroughfares, removed from the crowds, pay a higher rent, in proportion to their space, than some stores located in more populous districts. Or, it is sometimes thought that rents are governed largely by transportation. Yet frequently higher rents are paid for quarters farther removed from street railways or other transportation than for those which are close to such facilities.

Clearly, it is not possible to explain the variation in rentals by any single factor, such as accessibility to crowds, transportation, or the character of buildings. The scale of rentals is governed by many factors, and many combinations of factors. But these factors may be all grouped together by saying that the rents of business locations depend upon the total income-yielding advantages offered by certain quarters, and the scarcity of such quarters.

These advantages are of two kinds—space and site. Every building provides shelter. Presumably a portion of the rent bill is a return upon the investment of capital in the building. But it is not enough that the building provides a roof. It must also provide advantages of site or location.

As a matter of fact, that part of the rental which is paid simply for the use of the building, as such, does not constitute "economic rent," strictly speaking. It is simply a return upon the capital invested in the building. But that portion of the income yielded by the rentals of a building, over and above a fair interest rate on the cost or the value of the building, represents what the economist calls "economic rent" or "site rent." If a building cost $100,000, and if the market rate of interest prevailing in the community is 6 per cent., $6,000 of the rentals—above depreciation, repairs, and the like—may be regarded as the interest upon the capital invested in the building. For if similar sites were freely available, the construction of buildings for rental purposes would soon be carried to the point where the returns would be cut down to 6 per cent., and, normally, it would not be carried beyond this point. But if the net rentals aggregate $15,000 a year, the $9,000 over and above the $6,000 may be regarded as "ground rent" or "site rent." It represents the additional payments accruing because of the advantages possessed by the particular site upon which the building stands.

Probably the larger part of the rentals paid in the business sections of our cities is paid for advantages of this character — advantages of site rather than of space. For example, in mild climates the west side of streets running north and south and the south side of streets running east and west, generally command the highest rentals in the retail districts.

From noon, or early afternoon, on, these are the shady sides of the streets. Most women shop after the noon hour. They naturally prefer the shady side of the street. The merchant located there can display his goods with less danger of fading, and with greater probability of attracting passing customers in the afternoon. In southern cities the difference in rentals between the sides of the streets is most marked. On the other hand, it is said that in cities far north—such as Petrograd and Montreal — the sides of the streets which are sunny in the afternoon command higher rentals in the retail district.

Locations which are advantageous for one business are not necessarily so for others. It is a mistake to rent space paying a rental based upon the superior advantages of the quarters for other businesses. The business man should study the advantages of a site, in relation to its rental, for his business.

The owner of a dry goods or a department store catering largely to women shoppers might be justified in paying a

*Based upon the report of the Board of Inquiry into Cost of Living in Canada, 1915, Volume 1, Page 460.

high rental for a location on the shady side of the street. But it is questionable whether a dealer in men's clothing and furnishings would be justified to the same extent in doing so. For men, not being confined by household duties in the morning, do not concentrate their shopping in the afternoon.

That the charges which may be wisely incurred for rent vary with the nature of the business is indicated by the results of investigations of the Harvard Bureau of Business Research. These investigations into the costs of doing business in the retail grocery and shoe business covered a large number of establishments in various sections of the country.

The results regarding rentals are summarized in the chart on page 53. Rents were generally found to constitute a much smaller proportion of the net sales in the grocery business than in the shoe business. Rents paid by grocery stores vary from .3% to 4.1%, while for shoe stores they run from 1.8% to 14.6%. The common figure for rent expense in shoe stores is about 5%, while in grocery stores it is only 1.3%. The Bureau regards .8% as an attainable standard for efficiently conducted grocery stores, and 3% for efficiently conducted shoe stores.

These inquiries show that there is a greater possibility of using less expensive sites in the grocery business than in the shoe business. As stated by the bureau, "Groceries are convenience goods in which there is no style element, and which are bought daily in relatively small quantities by almost every family. Consequently the grocery stores are located near residential districts in close proximity to their customers, and generally they occupy comparatively inexpensive sites.

"Inasmuch as service to counter customers is rapid—and since many of the customers give their orders by telephone or to order solicitors the floor area of a grocery store is not relatively large. Shoes, on the other hand, are more in the nature of a shopping line. Each customer purchases at rather infrequent intervals and wishes to make a selection from a varied stock. To attract a sufficient volume of trade the shoe store must ordinarily have a prominent location in a shopping district where rents are higher than in residential districts."

What's the Reason for High Rents?

In other words, the difference in the range of rentals is natural, and arises out of the difference in the character of the two businesses. Such differences are common. For example, it might prove profitable for a druggist to pay a high rental for a transfer corner, where people change cars or wait for them, for drug purchases can ordinarily be made in a few minutes. But it might not prove equally justifiable for a furniture dealer to do so, for furniture purchases require more time than a transferring or a waiting passenger would have.

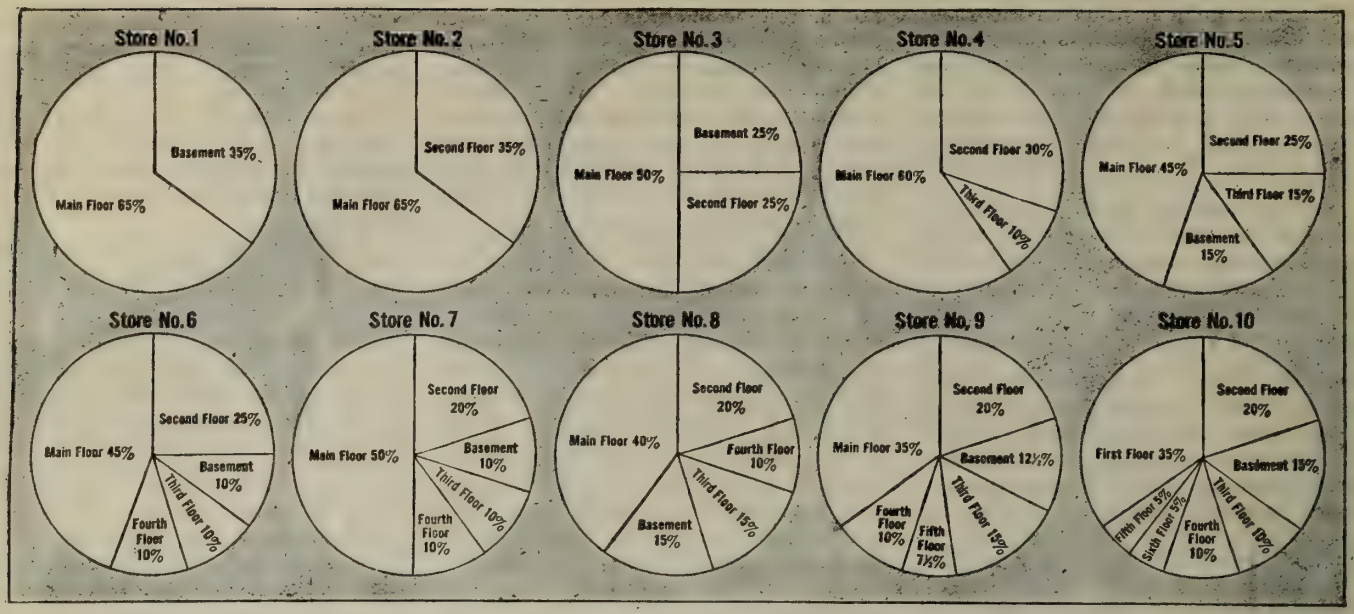
There is one widespread misconception regarding rents. It is that, because of lower rentals, dealers who occupy less expensive quarters can afford to sell more cheaply than their competitors who pay a higher rent. This misunderstanding is partially due to the use of certain slogans by low rent stores, such as, "We are out of the high rent district—you get the benefit;" or "Take the elevator, and save $10 on your suit." Such slogans have been taken by many to mean that the dealer paying a lower rental has a marked advantage in the prices at which he can afford to sell. While it is frequently true that the low rent dealer sells more cheaply than others, these slogans have led some to suppose that prices are governed by the rents which the dealer must pay.

The true situation is just the reverse. Prices are not governed by rents. Rents are the result of price or of selling opportunities; not the cause.

This truth was first pointed out by Ricardo and the earlier economists, in their discussion of farm rents. They said, "Rent is not the cause, but the result of price." Thus, they said, if the price of grain advances, the rentals of farms devoted to raising such products will also advance. Prices being set, the rentals of farm lands follow and depend upon the prices obtainable for the products.

In substance this is true, although when applied to city sites, the statement "rent is not the cause, but the result of price" is somewhat too narrow. For it is not always true that goods sold by those paying the highest rentals are sold at the highest prices. For example, one of the highest space rentals in Chicago is paid by a drug store which sells at cut rates, but which has an unusually rapid rate of turnover on its stock. It would be more correct to say that the rents of retail establishments depend, not upon price, but upon selling opportunities. Thus rent may be high because the site enables the merchant to secure a rapid rate of turnover, at a modest price; or it may be high because the location enables him to charge a high price, and get it. In the latter case, his prices are not high because his rent is high; rather, his rent is high because of the unusual opportunity of successfully reaching those who are willing to pay a fancy price.

The cut rate shoe dealer on the tenth floor, and the merchant in the out-of-the-way location, do not sell at a low price because they pay low rentals. Rather they must offer price or other inducements to encourage people to seek them out. They are less advantageously located than some of their competitors. Their "selling opportunity" is less. And that, of course, is why their rents are less.



True, the customer may take advantage of this situation, and secure his goods for less than he might have to pay in other stores, if he is willing to hunt out the merchant who is less advantageously located. But the low price

HE CAN AFFORD A LOW RENT
Groceries are "convenience goods" and are purchased daily by nearly every household. Style is not important. That's why the grocer can usually profitably afford a low rent site, like this.

HIGH RENTS ARE PROFITABLE
This photograph, taken on a warm fall day, shows how crowds naturally choose the shady side. A merchant may find it profitable to pay more rent to have his store where the crowds are.

CENTRAL, BUT NOT EXPENSIVE
In some lines a central, but not necessarily expensive, location is desirable. Barber shops, for instance, are usually found in high rent districts, in basements or an upper flat.

WHICH FLOOR IS WORTH MOST?

This chart shows 10 stores, which have from two to seven floors, apportion their rent. Note how large a share is charged in every instance to the main floor. The chart is based on figures collested by Paul Nystrom and published in his book, . ."The Economics of Retailing." The upper floors and basement come in, in each example, for a relatively low charge.

obtained by the customer is not the result of the low rent paid by the dealer. Rather, the low rent is the result of the lower price at which the commodities must be sold, or the special inducements which must be made, in order to bring business to such locations.

It is essential for the merchant who contemplates moving to lower rent quarters to keep this clearly in mind. For taking a less expensive site may mean that it will prove impossible to maintain the same volume of sales, and at the same margin of profit.

But taking a less expensive location does not necessarily mean this. The desire to have a conspicuous or a prominent location leads some merchants to take expensive locations, which are no better adapted to their particular business than others which could be obtained at much lower rentals. Other merchants make the mistake of accepting without question the propriety of the established rentals, as determined by the rentals paid by other businesses, without studying these rentals in relation to their own business.

Many concerns could profit by reducing their outlay for rent. The business which finds that the rent being paid by it is out of proportion to the advantages obtained for its purposes, ordinarily has at least two alternatives. It may move out—or up. In Chicago there is a marked movement of many businesses out of the loop district. These are mostly businesses for which a ceneral location in the retail district is not essential, and which have reached the decision that, for them, the advantages of such a location are not commensurate with the prevailing rents. Similar movements are taking place in other cities.

Sometimes a move to a less central location materially lessens the rental, without correspondingly decreasing sales or profits.

Or, savings in rent may sometimes be effected by taking upstairs quarters. Generally speaking, for most kinds of retailing, upstairs locations are less desirable than ground floors. This is shown by the lower rentals charged for such locations. It is also shown by the lower rents apportioned by department and retail stores to their upstairs departments. The chart on this page shows how 10 large retail establishments, all occupying more than one floor, apportion their rent charges over the departments located on the various floors. These fig-

THE UPSTAIRS STORE

The merchant in an out-of-the-way location must usually offer extra inducements to get customers. Lower prices is a common argument with merchants out of the high rent district.

WHERE THEY EXPECT TO FIND YOU

This is "automobile row" in one city. When special lines of business are segregated as here, it often pays individual concerns to assume high rents to be where customers commonly come.

A VALUABLE CORNER—FOR DRUGS

The "run in and run out" type of store can frequently afford to pay high for a transfer corner. This drug store, for instance, has an unusually rapid rate of turnover because of such a location.

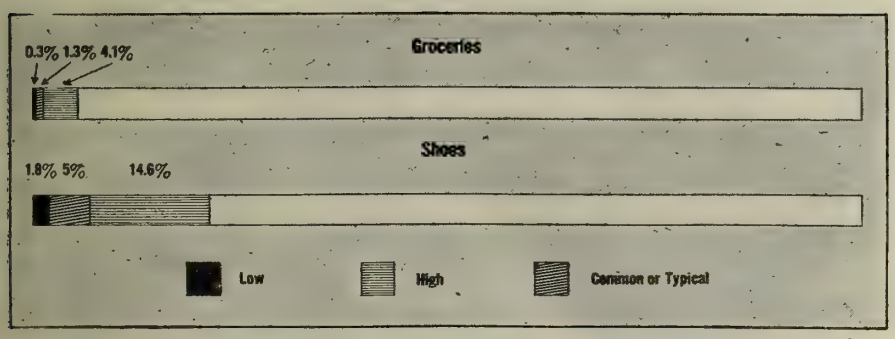
ures* are probably typical and serve to indicate how rapidly the rental values of the upstairs stories decrease for general merchandising purposes.

Nevertheless, many businesses can be advantageously conducted upstairs. Such businesses are those which rely not upon an opportunity to display their wares to large numbers of passers-by, but rather upon developing and holding a permanent body of customers. The barber business is of this nature. A barber shop is seldom found on the ground floor in the business centre of our cities, nowadays.

When It's Wise To Pay Less

It has also been found that other businesses which depend primarily upon quality, style or personal service — for example, tailoring, hairdressing, corseting, millinery, dressmaking, jewelry stores, and furrier shops—can be successfully operated above the ground floors. On the other hand, an effort to move a grocery store or a hardware store upstairs would probably prove disastrous. For here the commodities sold are standardized, and sales depend largely upon convenience.

While there are some businesses which could profit by renting less expensive quarters, there are others which economize unduly on rents. Some could profit by paying a higher rental, which might be more than offset by increased earnings. A Greek fruit dealer in Boston found that he could rent a certain corner stand just outside a subway entrance. The rent appeared tremendous, but he took the lease. This subway entrance was used by thousands on their homeward way in the late afternoon. Many were tempted by his attractive fruits, and, utilizing their last opportunity before entering the subway, made purchases, at fancy prices, to carry home. His profits soon showed a surprising increase.



A dealer in men's furnishings and clothing in an Iowa town of 2,000 decided that men do not shop systematically like women, but buy largely through suggestion. In this town everyone calls at the post office for mail. This clothier rented a store next to the post office. The rent was higher than he had been paying, but this location enabled him to display his goods to all the men of the town on their way to and from the post office. The results more than justified his decision.

In a certain city the street railway company altered its route so that the cars coming into the downtown section swung around a certain block, using the trackage around this block as a loop, upon which to start their outward journey. Thus most of the downtown passengers dismounted upon arriving at this loop. The owner of a variety store decided to risk a high rental bill in order to secure quarters facing this loop. Increased business quickly proved the wisdom of his action.

If a business is dealing in commodities which are of primary appeal to certain classes or groups of consumers, it may prove profitable to pay a greatly increased rent, in order to be located where the largest number of people in this group will pass.

Not only the number of passers-by, but also their character and economic status are important. Some sites used for retailing command high rentals, even when situated on streets where there is a comparatively small amount of foot traffic. Such is the case with quarters located on the exclusive streets and boulevards, frequented by the rich and the well to do. Boylston Street in Boston, Michigan Avenue in Chicago, and Fifth Avenue in New York City are such streets. Similar streets exist in many small cities. It might prove profitable to pay a large rental for the purpose of opening a high grade modiste or millinery establishment, or an antique shop, in such a location. But it would probably prove disastrous for a cut-rate shoe store.

Or, again, it might be justifiable to pay a substantial rental for a location across from or close to a city depot, for the purpose of operating a modest price or inexpensive restaurant or lunch counter. But ordinarily it would prove unwise to do so for the purpose of operating a high grade or expensive cafe. For travelers who are willing to pay high prices usually prefer to save time by using the dining car service.

HOW RENTS VARY IN DIFFERENT LINES.

This chart shows the ratio between rent and net sales in various kinds of grocery and shoe stores; low rent stores average and high rent stores. Note that rents are considerably lower for grocery than shoe stores. These figures are based upon investigations made by the Bureau of Business Research of Harward University.

*From Nystrom, "The Economies of Retailing."

Going Where Your Customers Are

If a business relies primarily on passing or transient customers, it may be wise to pay a high rent for a location giving access to such passers-by. Thus cafes and tobacco stores can afford to pay high rentals for locations near the theatres, and florists for locations near the depots.

It is sometimes wise to pay a higher rental for a location having no intrinsic advantages, aside from the fact that one's competitors are located close by. There are some businesses which have well established retail centres. In most large cities the furniture and piano dealers are clustered in one vicinity. Under such circumstances it might prove profitable for a furniture dealer to pay a greatly increased rental simply to break into this location, for many prospective furniture purchasers naturally gravitate to this section. On the other hand, to do so would prove diastrous unless the dealer's capital and organization were sufficient to enable him to compete successfully with the merchants already established there.

It is impossible to formulate a general rule, which would be applicable in all cases, regarding the advisability of leasing high rent or low rent quarters.

In fact, every business should give the same careful consideration to its rent problem that it does to its buying or its selling activities. The essential thing is to see that the advantages of site and location, and of access to any particular group of purchasers, are commensurate with the rental paid for the conduct of a particular business. The rent problem is frequently intricate and the factors involved in it are numerous. But proper understanding of it may mean the difference between failure and success.

A SOB FROM THE U. S.

My Tuesdays are meatless,
My Wednesdays are wheatless,
I am getting more eatless each day;
My home it is heatless,
My bed it is sheetless,
They are all sent to the Y.M.C.A.
The bar-rooms are treatless,
My coffee is sweetless,
Each day I get poorer and wiser;
My stockings are feetless,
My trousers are seatless,
My God, how I do hate the Kaiser!

DRASTIC DEMURRAGE REGULATION IN STATES

(Continued from page 45.)

government grant to two railways the people pay only what they need to pay to support the companies needing the money, while in the freight rate advance they pay also in part to a company which is well able to carry on without any freight advances. It's just a question of national economy, and can be looked at either way."

EVENTS IN THE TRADE

BUSINESS CHANGES

Sarnia, Ont.—Martin Hardware Company is discontinuing business.

St. Rose du Lac, Man.—Jos. Hamelin, hardware, has been succeeded by Hamelin & Co.

Toronto, Ont.—S. P. Sykes, sanitary and heating engineer at 171 Spadina Ave., is now handling hardware.

FIRE LOSS

Edmonton, Alta.—J. A. Werner, hardware, has suffered loss by fire.

Regina, Sask.—The Imperial Oil Company's plant has been destroyed by fire with a loss of $30,000. The local manager is J. F. Donohue.

Hamilton, Ont.—The cooperage shop of the Steel Company of Canada was completely destroyed by fire early in the week, the loss being estimated at between $12,000 and $14,000. The shop will be rebuilt at once.

Winnipeg, Man.—The Winnipeg Brass and Fixtures Co.'s premises were destroyed by fire, the loss amounting to $13.000.

Peterborough, Ont.—Fire resulted in the almost complete destruction of the factory and buildings of the Peterboro' Canoe Company. The cause and the extent of the loss is not yet known.

Chatham, Ont.—Damage estimated at between $8.000 and $10.000 was caused to the plant of the Pittsburgh & Des Moines Steel Co. by fire which broke out on Sunday morning in the engine room at the plant. Heavy damage was done to the building and machinery. The roof at the west end of the building was demolished and the engine room was transformed into a mass of debris. The plant was formerly owned by the Chatham Bridge Co. and was recently taken over by the Pittsburgh & Des Moines Steel Co. as a Canadian branch.

PERSONALS

Geo. B. Haynes, tinsmith, Gananoque, Ont., has been elected Town Councillor for 1918.

G. A. Binns of Newmarket, hardwareman, visited Toronto on Wednesday of this week.

W. E. Anthony, hardwareman of Brampton, Ont., spent Monday of this week in Toronto.

J. M. Winter, general merchant of King, Ont., was in Toronto on Tuesday of this week.

Senator R. Blain, hardwareman of Brampton, spent a day in Toronto during the week.

George Stewart of Thistleton, general merchant, was in Toronto on business during the week.

Jas. Donevan, hardware merchant of Gananoque, Ont., has been elected Town Councillor for 1918.

James Dandie of Streetsville and H. E. Moore of Oakville, hardwaremen, were business visitors in Toronto during the week.

JAMES HARDY

Member of the firm of Jenkins & Hardy, who has been elected a director of the Standard Bank of Canada.

Harry Bayne, Controller of Metals, is in Washington to discuss with American officials the pig iron supply in that country available for Canadian manufacturers.

Frederick G. Clarke, president of Clarke & Clarke Ltd., leather manufacturers of Toronto, died suddenly in Baltimore, Md., recently while on his way to Florida for the benefit of his health.

Arthur J. S. Hawken has been appointed Ontario representative for the Dominion Paint Works, Ltd., and will be located in Toronto in company with E. L. Warner, sales manager. Mr. Hawken has been located in Montreal recently and has been acting adjutant of a Montreal battalion for some time.

William Hyslop, Jr., president of Hyslop Bros., Toronto; G. M. MacWilliam, general manager for Hyslop Bros.; A. M. Bottcher, purchasing agent for Hyslop Bros.; and Cecil Dixon, sales manager for Hyslop Bros., are in New York this week attending the Automobile Show which is being held in the Grand Central Palace.

D. G. Carter, who for the past three years has represented Lewis Bros. Ltd., Montreal, on the ground between Toronto and Kingston, has resigned his position with that firm owing to the ill-health of his father, and will assume the management of Carter Bros.' hardware store, Picton. C. H. McGubbin, late with Edward & Rose, hardware dealers, Lindsay, succeeds Mr. Carter, and will cover the same ground.

HARDWAREMEN HOLD OFFICE

Results of Municipal Elections Show Many Hardwaremen in Civic Offices

In the civic elections which have been held throughout the province during the past few days, many hardwaremen have been elected to office. Those elected and the offices which they will fill are as follows:

Mayors—W. M. Hogg, Bridgeburg, Ont.; E. F. Earl, Milton, Ont.

Reeves—John Douglas, Wroxeter, Ont.; H. G. Fitzgerald, Lakefield, Ont.

Councillors—G. D. Gillie, Cornwall, Ont.; Robert Bonthron, Hensall, Ont.; Geo. A. Stanley, Lucan, Ont.; C. S. Colquhoun, Morrisburg, Ont.; W. Howey, Port Rowan, Ont.; R. McVittie, Southampton, Ont.; S. W. Vogan, Walkerton, Ont.; Jas. Donevan, Gananoque, Ont.; Geo. B. Haynes, Gananoque, Ont.

ASSOCIATION PROGRAMME NEXT WEEK

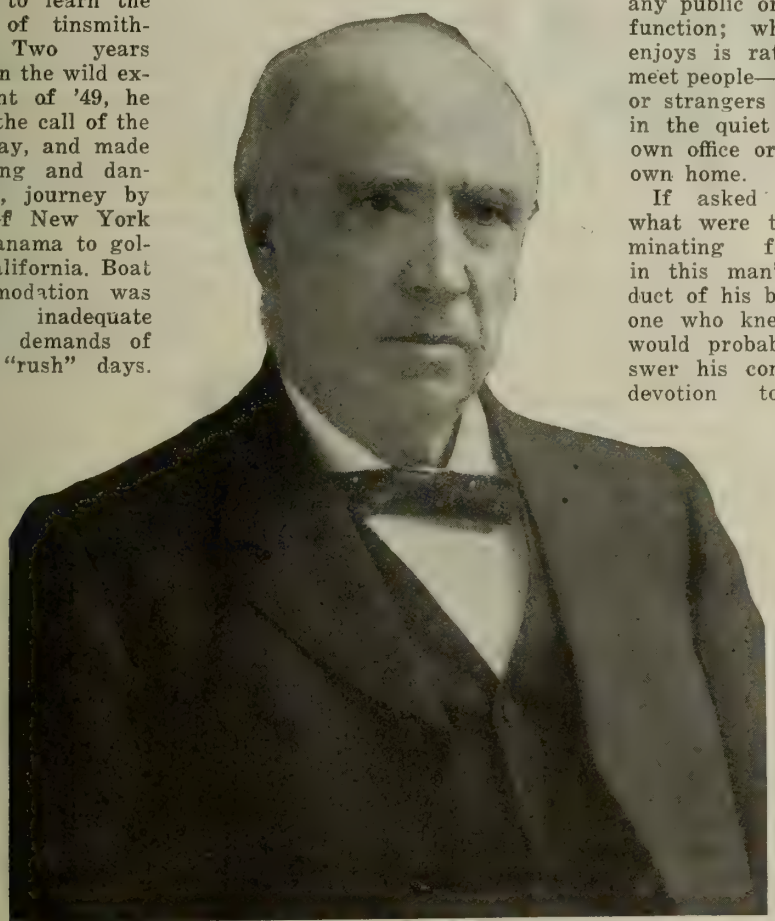
The programme of the Ontario Hardware and Stove Dealers' Association for their convention in Hamilton next week is rapidly nearing completion, and will be published in next week's issue of HARDWARE AND METAL.

JENKINS & HARDY REORGANIZE

A reorganization in the firm of Jenkins & Hardy has been made in that the business connected with the various trade organizations will hereafter be conducted by Messrs. James Hardy & Sons, while the real estate, insurance and accounting branch of the business will be continued as formerly under the firm name of Jenkins & Hardy. The change in the organization of this concern became effective on January 1.

INCORPORATION

Owen Sound, Ont.—The Great Lakes Steel Corporation, Ltd., has been incorporated with a capital of $1,000,000 to manufacture and deal in iron and steel products.



John McClary--The Man

Seventy Years Head of McClary Mfg. Co., London, Canada—Celebrates 89th Birthday

JOHN McCLARY, who has just passed his 89th birthday, and is still the head of the McClary Mfg. Co., London, Ont., an institution 70 years of age, was born on a Nilestown farm, some few miles from London, January 2nd, 1829, and was the youngest of a family of eleven.

His boyhood was spent on the farm, yet very early in his youth his natural bent showed itself to be toward business rather than pastoral pursuits.

When eighteen years of age he went to London and engaged to learn the trade of tinsmithing. Two years later, in the wild excitement of '49, he heard the call of the far-away, and made the long and dangerous, journey by way of New York and Panama to golden California. Boat accommodation was totally inadequate to the demands of those "rush" days.

JOHN McCLARY
Founder and present head of the McClary Mfg. Co., London, Can. Mr. McClary has just celebrated his 89th birthday.

This journey which might, under the natural disadvantages of travel at that period, have occupied three or four weeks, actually took, in this case, six months, every day of it menaced by knife or bullet or disease.

On arrival at last in California, he went into the tin business in a small way, but within a year suffered the loss of this business by fire. It was then that he and some companions went out prospecting for gold; but the briefest experience convinced this young man that gold—not so very much slower in the making, perhaps, and certainly surer—lay for him in the quiet valleys of Ontario rather than on California's gleaming slopes.

Back in London, he again, in company with an older brother, embarked in the tin business under the firm name of J. & O. McClary. From that time until now the single, absorbing purpose of his business life has been the upbuilding of that first enterprise.

Simplicity is the keynote of Mr. McClary's tastes, and in disposition he is most retiring; except for gatherings of his own staff and managers, he is seldom persuaded to attend any public or social function; what he enjoys is rather to meet people—friends or strangers alike—in the quiet of his own office or in his own home.

If asked as to what were the dominating features in this man's conduct of his business one who knew him would probably answer his consistent devotion to his one, first-chosen occupation and manufacturing enterprise; the thoroughness and soundness of his judgments, and a sense of justice, impartial and absolute.

As to his fine justice, perhaps the most characteristic is his constant consideration for his workmen. At the time that a large part of the plant was destroyed by fire in 1902, his first question was of the men—were they all out? During the financial panic of 1907 his greatest fear was that his men might be thrown out of employment. It is so still, under the anxious uncertainties of the present war-imposed conditions.

ST. JOHN, N.B., NEWS

The retail hardware stores of St. John are closing at six o'clock on Saturday evenings during January, February and March, instead of at ten.

Building permits issued in St. John during the year of 1917 showed a total value of $531,250, an increase of $66,900 over the previous year.

Hugh Milley has purchased a property in Brussels Street, St. John, and will remodel it for use as a store for his stove business.

Major T. Malcolm McAvity, D.S.O., of T. McAvity & Sons, Ltd., St. John, who has been serving as brigade major with the 5th division, has been appointed chief intelligence officer for the entire Canadian army corps.

Frederick Campbell, with T. McAvity & Sons, before enlisting, has been reported wounded and missing since November 6.

The firm of Crowell Brothers of Halifax, for twenty-five years a rapidly growing hardware and ship-chandlery concern, has been incorporated as Crowell Brothers, Limited. The officers are: M. O. Crowell, president and managing director; H. E. Fraser, vice-president; O. R. Crowell, secretary; C. H. Northrup and N. W. Rafuse, additional directors. Mr. Fraser has been with the firm since it was organized. Mr. Northrup is their representative for Cape Breton and eastern districts and Mr. Rafuse was formerly their western representative.

INCREASE RAZOR OUTPUT

Gillette Co'y. Has New Plans

A. A. Bittues, managing director of the Gillette Safety Razor Company of Canada, Limited, has returned to Montreal after having attended a convention of the company in Boston.

Plans for a greatly increased production this year for both American and Canadian companies, including an advertising and educational campaign to be launched on an extensive scale, were outlined at the convention during the various talks by three score representatives present.

A. A. Bittues, the managing director of the Gillette Safety Razor Company of Canada, gave an extensive talk on the development of Canada.

There have been of late great demands for shipments of razors and blades abroad.

The Canadian plant reported shipments to England, France, Russia, Australia, New Zealand, the Fiji Islands, Sumatra and South Africa, and a business for the year 1917 which exceeded that of the previous year by nearly 20 per cent.

The present daily output of the Canadian plant at Montreal is to be increased to 800 razors and 10.000 blades. This represents a five hundred per cent. increase in the firm's output and when the new machinery is installed at a cost of $180,000, most of the foreign shipments will be made direct from the Canadian factory.

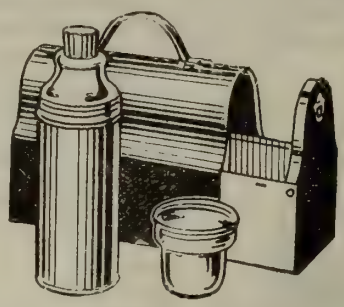
NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

DOMINION LENZ

The "Dominion Lenz" are now being put on the market by the Jefferson Glass Co., Ltd., 388 Carlaw Ave., Toronto, Ont. It is stated the "Dominion Lenz" has been designed to afford a simple and efficient method of overcoming glare and at the same time to effect an improvement in methods of lighting the motorist's way at night.

This, it is claimed, has been accomplished in a manner which breaks up the direct rays of light thrown forward by the reflector so that a softly diffused light is produced bright as day but not dazzling to the eyes of approaching drivers or pedestrians.



The "Dominion Lenz"

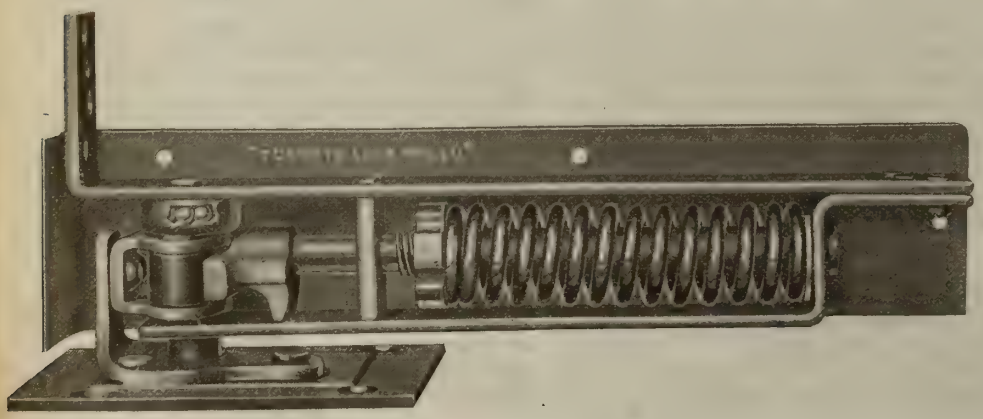
It is stated that the illumination is in this way much improved and a quality imparted to the light which gives a natural appearance to the roadway—lights up the sides as well as the centre of the road and penetrates the dense dust clouds so often encountered in country driving. It is further claimed that the "Dominion Lenz" does not exaggerate the ruts and bumps—reaches out and illuminates curves and turns—shoots a good driving light far ahead of the car and enables the motorist to drive and turn with safety.

VACUUM LUNCH KIT

The No. 410 vacuum lunch kit is a new line being placed upon the market by Landers, Frary & Clark, New Britain, Conn., through their Canadian agents, A. Macfarlane & Co., Limited, Montreal. The new features of this line, as outlined by the manufacturers, are that the vacuum bottle has a protecting shoulder; thus there is less chance of breakage, it is more sanitary, and offers a more attractive appearance than the old model. The cap on the bottle has a folding handle, and can be used as a drinking cup. It is claimed this outfit is very compact, there being no waste space, the whole being very little larger than the old-style dinner pail.

Vacuum Lunch Kit.

MICKELSEN GOPHER POISON

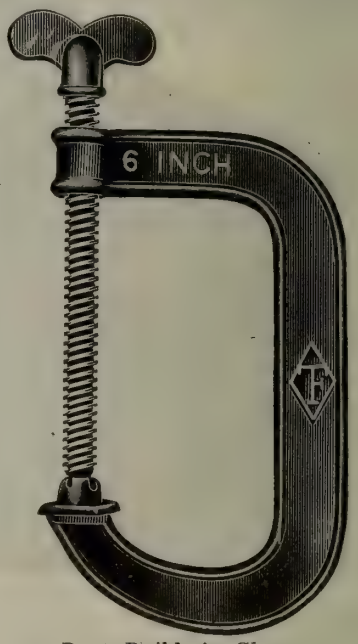


The Prairie Chemical Co., Canada, Ltd., 322 Keewayden Bldg., Winnipeg, is marketing the Mickelson Gopher Poison. This product is put up in three sizes, and complete details will be supplied by the manufacturer on request.

NEW FLOOR SPRING HINGE

The Toronto Lock Mfg. Co., Patterson Place, Toronto, have placed on the market a new ball-bearing surface floor spring hinge, suitable for doors 1¼ to 1¾ inch in thickness.

It is claimed that this hinge holds the door open when it is swung to 90°; the tension is strongest at the closing point and decreases as the door opens. This, it is stated, means that the door is never left ajar.



This hinge is ball bearing, the bearings being located at the top of the hinge away from moisture and dirt. Other points the manufacturers enumerate are that the eccentric is equipped with hardened steel roller-bearings; the frame is reinforced with a steel bushing where the pintle passes through it and the compression spring is made of the best tempered steel wire. One set is packed in a box complete with screws and complete directions for application.

New Ball-Bearing Surface Floor Spring Hinge

BOAT BUILDER'S CLAMP

The Taylor-Forbes Company of Guelph, Ont., is now distributing a new type of boat builder's clamp which they state is used largely in the manufacture of all styles of boats and aeroplanes.

Boat Builder's Clamp.

The frame is made of cast iron or malleable, with a steel screw and malleable swivel. It is made in four sizes, 8, 9, 10 and 12 in.

TO HOLD SALES CONFERENCE

The Steel Company of Canada will hold the annual general sales conference at Hamilton on Jan. 15 to 18 inclusive which will be attended by the entire sales force from Halifax to Vancouver. A feature of this conference will be a series of interesting papers read by various members of the staff, followed by discussions.

How the Draft Affects Hardwaremen

Military Service Act Makes no Difference Between Eligible Men — Hardware Clerks Have Special Qualifications and Are Hard to Replace—Many Have Volunteered

WITH the actual application of the Military Service Act its realities in withdrawing for military service men from civilian callings and the staffs of business concerns become apparent. In no class of business are the effects of the draft felt more decidedly than in the hardware business. The hardware business as regards its employees is in a similar class with banks and railways because the members of hardware staffs have to be trained practically from boyhood to become efficient. To replace men so trained is very, very difficult, often impossible, short of years.

An Intricate Business

In talks with principals of several large hardware establishments HARDWARE AND METAL heard this emphasized, though with emphasis also was given the patriotic view in every case "We do not grudge the men who are taken under the draft. We want them to be where their services are doing the most to win the war."

Nearly every hardware concern in Canada has a large representation of staff at the front. From thirty to fifty and more members of the larger staffs is a frequent contribution. Even the small staffs have sent their quota, and a man or two from a small staff is of course a greater proportional representation than ten men from a much larger staff. These men went voluntarily and with the fighting spirit of their firms behind them encouraging them on to win the war.

Now Comes the Draft

Now comes the draft and trained staffs of expert hardware men come under its scope just as surely as common laborers easy to replace as regards skill at least. Though as one principal of a hardware firm put it "A hardware man can't shoot a German any better than any other man though he has a practical knowledge of the points of a rifle" still the draft applies inexorably. It is the case, however, that highly trained hardware men can be used to special advantage by military authorities in connection with the business end of the war, an end which is ever more important. Men with practical knowledge of metals, of mechanical matters, and of merchandise such as constitutes the stock-in-trade of the hardware business are well adapted to work in connection with military supplies, and are doing valuable work in that direction. But the draft does not primarily consider such qualifications. They may apply after the men have been drafted and drilled a bit.

Ten Years To Replace Some Men

While the great hardware concerns are giving their men over without grudge, and in many cases without even protest or application for exemption, there is no getting away from the fact that there is sacrifice in the business sense.

"We have already sent to the front as volunteers thirty or forty men whose skilled services we miss," said the principal of one hardware concern in Toronto "and the draft takes away six or seven whom without exaggeration we cannot well replace short of ten years training. We would gladly have kept such men but mark you, we do not grudge them for their country's service. It is a matter of having the men where they are most needed."

Foresight Helps Some Firms

"We haven't suffered yet from the draft though we may eventually," said the principal of another firm. "The reason we have not felt the draft is because our young staff members who were eligible are at the front as volunteers, and the young men we have with us now are exempt through physical disqualification or some special cause. Others who are valuable members of our organization are over age. We foresaw the coming of the draft and made preparations by training bright boys, and the boys are doing their bit by helping replace older men able for service. But it takes years to make a thoroughly efficient hardware man. Some of our staff members at the front now had been with us since they were little chaps, and they haven't been replaced exactly though the younger boys coming up are getting experienced and are doing their best. If the draft calls up more of our men we shall just get along as best we can without them. It's all to win the war, and that's what we want."

Patriotic Principle

"We haven't applied for exemption for a single member of our staff," said another hardware firm principal "and we aren't going to on principle. If the country needs our men the country can have them. We have fifty-two members of our staff serving voluntarily, and one is a member of the firm. We miss their help in many ways, but if this war is to be won we must get along without them, and without any more men whose services may be needed."

That opinion, and the preceding opinions show the splendid stand taken by the hardware trade as regards winning the war, and the application of the draft. It is characteristic of the hardware business. Both military service and the hardware business may be described as "A man's job."

Auto Industry Ranks Next to Shipbuilding

Steel Makers to Supply Auto Manufacturers With Necessary Steel—Investigating Committee Convinced Motor Car Industry Vital to Commercial Health of Nation

AUTOMOBILE manufacturers are being assured by steel makers of an ample supply of high grade steel, which will not interfere with needs of other industries. Only 5% of the total steel production is consumed in making motor cars. Coal during the past few weeks has been a serious menace, and the difficulty persists but it is improving and little trouble is anticipated by the manufacturers in securing sufficient fuel. The most serious problem is transportation, which is admittedly bad, but it is believed it will greatly clear up under government supervision and pooling of railroad facilities. There should be no ground for pessimism on this score.

An encouraging element in the situation is the attitude of the government towards the motor car industry as a whole. A recent investigation into its economic value during war time has resulted in a conviction that it is vital to the commercial health of the nation. The investigating committee ranked it third in importance among war industries. It was placed next to the shipbuilding trade.

Leaders of the automobile industry have done much to correct the extravagant rumors regarding the curtailment of the motor industry. Conditions are defining themselves more favorably, we feel, said John Morgan, vice-president of the McGraw Tire & Rubber Co. of East Palestine, Ohio. The effect of these rumors has been confusing to dealers and has caused them to limit their buying of cars and accessories. Unfortunately, few of them have known the real facts or had a correct point of view. These we believe they should have, based on the present outlook for 1918.

The motor car industry is a fundamental in modern business life and has come to stay regardless of peace or war conditions. The automobile is essential to the welfare of American business. Approximately 85% of the output is purchased every year for business purposes and is as indispensable as the electric light, telephone and the telegraph. The so-called pleasure car is more or less a negligible factor. The great bulk of passenger cars are being used by business men, farmers and professional men in the more expeditious handling of their business.

If there is any curtailment in the automobile output during the coming year, it will not be due to lack of demand; in all likelihood more cars will be wanted than can be produced and the outlook for production looks better every day.

Taking all factors into account, it would seem that at least in the accessory

(Continued on page 70.)

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

TWO features of interest during the week are the decline of $1 per hundred pounds in the price of white lead in oil and the increase of 50c per hundred pounds in the price of putty. The decline in white lead in oil is attributable to the fact that this commodity has not been moving very freely of late and stocks have been accumulating. There was a disposition on the part of some grinders to want to turn their stocks into money. Intimations have been made that the prices are likely to advance again soon after a short selling period. Whether or not this will materialize remains to be seen. Putty has been increased in price partially through the scarcity of whiting and also to the higher cost of containers. Linseed oil is in firm market with advances recorded in some quarters during the week.

Advances in automobile accessory prices have again been numerous and include tire covers, blow-out patches, rubber cement, vulcanizers, tire holders, hand pumps, foot pumps, engine driven tire pumps, headlights, side lamps, tail lamps, dash clocks, slip joint pliers, robe rails, foot rests, bumpers. Increases in price have also been recorded on some of the regular hardware lines, such as extension bit holders, breast drills, cornering tools, levels, mallets, iron planes, scrapers, trammel points. The iron and steel situation gives promise of being even more acute in the future as shortage of fuel and the transportation facilities are hampering the trade in the United States. Intimations have been made that the Canadian trade will only be able to obtain 50 per cent. of its requirements in sheet steel from the United States mills during the coming year. Cement has also been advanced in price. There is a good demand for crosscut saws at the present time owing to the shortage of coal which has sent the consumers in quest of other kinds of fuel. Travelers for wholesale houses are again making their rounds of the hardware trade and report business seasonably good.

MONTREAL MARKETS

MONTREAL, Jan. 9.—With the holidays over and stock-taking well in hand the jobbing trade is engaged in new business. This seems to be opening up reasonably well and the volume already to hand indicates a satisfactory condition in the country. Sorting orders are maintained for many lines while some dealers assert the spring bookings are good. There is undoubtedly a decided feeling that supplies are bound to be short for the coming season. With traffic curtailed and the regular avenues of transportation being used for the purposes of war so largely, many are sure that we shall have to be content with slower deliveries than have obtained for some time past. Notwithstanding this, jobbers do feel that the governments of both the United States and Canada will do all that is possible to eliminate friction. There is no acute shortage apparently in any line at the present time. The iron and steel deliveries are among those spoken of as slow and delayed. Tin plates will probably be available soon for real essential purposes such as the making of dairy pails and other supplies. Those who make maple sugar products are already securing needed supplies. For such purposes, manufacturers feel that they can meet the demand. The unsatisfactory deliveries of flaxseed have caused a real short stock of spot oil and dealers prefer to sell only in small lots. White lead in oil has been lowered $1 per cwt. all around and the dry lead also is down $1 per cwt. Putty is up 50c per 100 lbs. The 50-lb. steel drums, heretofore popular, are not now available. Many blast furnaces have been inconvenienced through the shortage of coke, and have been receiving only about 50 per cent. of their requirements. There is undoubtedly bound to be an acute shortage of steel, say importers, and those who have not awakened to the conditions may find themselves in a pinch later on.

Various Hardware Lines Records Advances

Montreal.

VARIOUS LINES.—There are a few changes in some staple lines of goods. Fishing poles of the steel and bamboo varieties are higher, accounted for by the scarcity of stocks and the difficulty of getting new supplies from Japan. A few sample prices follow on the bamboo rods:—No. 0100 are quoted at $3.75 per doz.; No. 0110, $5.90; No. 0112, $5.90; and No. 116, $8.15 per doz. In the steel rods No. B-96 are $2.10 each; No. F-96, $2.25; No. B.C. 46 R, $2.50 and the B.C. 5 R, $2.50 each. Fish lines are also quoted higher, the advance applying to the silk and cotton and hemp lines as well. Fly hooks, baits, minnows, spears, nets and fly hooks all have been marked up, the advances representing an increase of 15 per cent. to 20 per cent. Le Pages and Chase's glues in the bottle sizes are higher, the advance being about 25 per cent. on Le Page's and caused to a great extent by the increased costs for bottles. Thus the 1-oz. bottles are now $1.60 per doz.; the 2-oz. $2.25 and the half gills, $2.25 per doz. The advances on Chase's is a little higher, about 30 per cent

The changes recently made in the prices of Stanley tools apply to the products made at New Britain and the advances of about 10 per cent. previously announced affect iron levels, braces, chisels in sets, mallets and spoke shaves. Markham air rifles have advanced, No. 14 "King," now being $2 higher.

Shell Primers Are Up; Advance Of About 10%

Montreal.

PRIMERS.—An advance is recorded in the price of Winchester primers through a change in the list. This is now advanced, on the new No. 4, to $5.50. This is the price per thousand and when figured against the old price represents a considerable advance. Above price is subject to an advance of 10 per cent. on list.

Automobile Wrenches Are Marked Higher

Montreal.

AUTOMOBILE PLIERS.—An advance has just been made in the price of Carll automobile pliers, a line which has been selling freely among the trade

handling auto accessories. The 8-inch size, which is popular, has been selling on a list of $7.80 and is now advanced to $10. From this a discount of 12½ per cent. is allowed.

Stop Joint Pliers And Ticket Punches Up

Montreal.

PLIERS, TICKET PUNCHES.—A considerable advance is recorded in the prices of two well-known lines of pliers. This will probably be around 30 to 35 per cent. of an advance and applies to the Kraeuter line of stop joint and the regular glass plier. Ticket punches of the same make have also advanced and this will be greater, probably about 40 per cent. Production costs, say the makers, have necessitated the advance.

American Terne Plates And Cokes Are Firmer

Montreal.

TIN PLATES.—The tendency on available supplies of tin plates is to firmer prices. American cokes, 14 x 20 are worth $17 base and the full size, 20 x 28, are quoted at $34. Small supplies are available. In speaking with one large user HARDWARE AND METAL was informed that where he could easily handle 50,000 boxes in the average season, he had promise of probably getting one-tenth of this quantity this year. For any but needs outlined by the government it is doubtful if many supplies will be forthcoming, and the outlook is therefore anything but bright for the regular needs of the trade. I. C. terne plates, 20 x 28 are quoted at $25 per box.

Prices Are Withdrawn On All Tackle Blocks

Montreal.

TACKLE BLOCKS.—Withdrawal of prices as applying to tackle blocks is announced. This will affect both the wood and steel patterns. When the new lists will be issued has not been stated but these will probably be available within the next week or ten days. In the meantime any orders received will have to be filled on the "open price" basis.

Cold Blast Lanterns Advance Fifty Cents

Montreal.

LANTERNS.—An advance of fifty cents per dozen has been made in the price of cold blast lanterns. This applies to the short and long globe styles and the prices at Montreal are now $12.50 per dozen. The difficulties of securing tin supplies and the cost of wick and increased labor are responsible for the advance.

Coal Oil Up One Cent; Gasoline Price Is Held

Montreal.

GASOLINE AND COAL OIL.—A firm condition prevails in the coal oil market and an advance of one cent per gallon has gone into effect. This makes the price of Royalite 18c; Palacine 21c and Electroline 21c. Sales are good to country dealers and a good normal volume of business is being maintained. Gasoline sales are keeping up very well for this season of the year and dealers are well satisfied. One of the factors in making the coal oil trade brisk locally has been that of the active request for oil heaters during the recent severe weather. For a time it was difficult to cope with the demand thus created for this popular heating device.

Hemp Stock Is High; Rope Price Very Firm

Montreal.

ROPE AND CORDAGE.—There is not a great movement of rope these days and jobbers are concerned more with deliveries than with other matters. These have been very slow. One large cordage company has had 25 to 30 carloads of rope in transit for some weeks. In fact some has been on the way since October. Little attention is paid consignees in the matter of tracing shipments, and it seems a very difficult thing for the railway companies to do this under the adverse and unique conditions prevailing. With the advancing prices for hemp, jobbers are expecting that there will be an advance in rope prices in the very near future.

TINPLATE SITUATION.

The following opinions, gathered by Hardware and Metal's Montreal representative, are interesting as expressing the view of manufacturers on the tinplate situation:

"We haven't seen a box of tin for three months. We have been promised some this month in fairly large quantities. It is being held back for food container purposes."

"The tinplate situation will be very acute. We have been able to sell at least 50,000 boxes in an average season; this year we are promised about 5,000 boxes.

"The tinplate situation is bad, and it will be worse before it is better."

"We are giving the matter of tinplates some serious concern and are getting nervous about supplies."

"We are not a bit afraid of the can situation now. Deliveries will likely be slow, but we hope to get our requirements in time."

Bookings Coming In For Standard Nails

Montreal.

CUT AND WIRE NAILS.—There is little interest in the nail market. Jobbers state that the number of orders coming forward for shipment in the spring is very satisfactory. For the time being there is little movement and sorting business continues confined to small compass. Standard wire nails are being received by jobbers, but the deliveries are rather poor. These are selling on the price basis of $5.50 per 100 lb. keg. Cut nail demand is practically nil. One jobber is quoting $5.60 per 100 lbs. base but the recent base of $5.75 is maintained by most jobbers. Standard smooth wire is selling on the basis of $6.50 per 100 lbs.

Slightly Better Market For Old Materials

Montreal.

OLD MATERIALS. — There is a slightly improved tone to the market for old rubbers and other rubber by-products. This is not a marked improvement, but with a somewhat better demand old metal and junk dealers are inclined to offer better prices. One large dealer states to HARDWARE AND METAL that there is a greater degree of confidence, even though this is not decidedly marked. Better demand has developed for No. 2 busheling and this is now commanding a price of $13 per ton.

MONTREAL—

Tea lead	$ 0 04	....

Supplies Black Sheets Ample To Meet Demand

Montreal.

SHEETS AND PLATES. — There would seem to be ample supplies of black sheets for the immediate needs. Orders that come to hand can be handled fairly well. Some are prepared to accept orders on a more favorable price basis and the following quotations will serve to give an accurate survey of the local market.

MONTREAL—

BLACK SHEETS—		100 lbs.
10 gauge	$8 50	$12 50
12 gauge	8 65	11.50-11.60

Slower Deliveries On Iron And Steel Bars

Montreal.

IRON AND STEEL.—Business has been normal for the week, but the usual quiet obtains after the holidays. There have been no price changes for the week and what retail orders are sent forward are filled on the basis of prices quoted below. It may be stated that supplies are increasingly hard to obtain and from this condition there is little likelihood of much improvement for some time.

Jobbers feel that there is small chance of a lower schedule of prices being effective.

MONTREAL—	
Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	11 00

Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 18-0 19

Lead Pipe And Sheets Are In Firm Position

Montreal.

LEAD PRODUCTS.—There is a firm tendency to the market for lead pipe and manufactured lines. This is in sympathy with the price at primary points where a firm price is maintained. There is no marked stir in the matter of sales, but these are about as large as could be expected for the season of the year. Deliveries are increasingly slow and supplies will become lighter if the present tie-up of freights continues. There is no shortage and deliveries are being made promptly.

Lead pipe, lb.	$0.14-$0.15
Lead waste pipe, lb.	0.15- 0.16
Lead traps and bends	Net list
Lead wool, lb.	0.14
Lead sheets, 3 lbs. sq. ft.	0.12- 0.13
Lead sheets, 3½ lbs. sq. ft.	0.12- 0.12½
Lead sheets, 4 to 6 lbs. sq. ft.	0.11- 0.12

Spelter Held Firmly; Most Ingots Quiet

Montreal.

INGOT METALS.—There is rather small movement of ingot metals for the week and dealers are not expecting a great volume of orders. The features are not very startling, the fluctuating market on tin being the most absorbing feature.

COPPER.—Trading is light, but now that conditions are controlled by the government such dealers as have licenses are enabled to know definitely what they can do, with a small margin allowed for handling. 33 to 34c per lb. is quoted.

LEAD.—This is held rather firmly, the Trust price having risen in New York 25c per 100 lbs. Quotations here are 9½c to 10c per lb.

TIN.—With a spread of forty pounds per ton within a few weeks and a recovery again of thirty pounds, in London, tin has commanded very great interest. Quotations are made on a basis of 75c to 81½c per pound here.

SPELTER.—The tone of the spelter market is about normal. Little trading is being done and the quotations are made on a basis of 10½ to 11c per lb.

ALUMINUM.—The market is slow and uninteresting, 55 to 60c per lb. is being quoted for what requirements come to hand.

ANTIMONY.—Slow, with little trading being affected. Prices are unchanged at 18c per lb.

TORONTO MARKETS

TORONTO, Jan. 10.—Now that automobile accessory houses are revising their catalogues for the 1918 selling price list there have been numerous changes in these lines during the week. As indicated in these columns some time ago all fabric goods were in firm market and higher prices were expected. Tire covers and tire reliners are among the lines to show higher prices. Automobile tires have not yet advanced in price but the market is one of considerable firmness owing to the situation in raw cotton. Lines to show increase during the week include rubber cement, vulcanizers, tire holders, hand pumps, engine driven tire pumps, electric headlights, side lamps and tail lamps, auto clocks, slip joint pliers, robe rails, bumpers. Business in automobile accessory lines promises to be exceptionally good this coming year. Bicycles and bicycle accessories have already been booked for delivery up to May 1 in as great volume by one concern as the entire year of 1917.

Lists On Tire Covers And Reliners Advanced

Toronto.

TIRE COVERS, RELINERS.—Some time ago it was intimated in these columns that an advance could be expected in fabric goods of various kinds and reason for the strong situation was due to the condition in the raw cotton market. During the week the list prices on these lines have been advanced and on the size 30x3½ the increase amounts to 35c each, the new list price being $1.85. Price on size 34x4 has been advanced 70c and is now quoted at $3. Tire reliners size 30x3½ are now quoted at an advance of 40c each, which now makes the list selling price $2.30. Size 34x4 tire reliner is now quoted at $3.30 each. These lines are subject to a discount of 25 per cent. in quantities of 12, while quantities over 12 are quoted at 30 per cent. In quantities of 48 and over the discount is 35 per cent.

Blow-Out Patches And Rubber Cement Up

Toronto.

PATCHES, CEMENT.—An advance has been made effective in the price of Hyslop inside blow-out patches to the extent of 10c on list prices; size 30x3½ inside is now quoted at 55c each. Outside patches for same size tire have advanced 40c each and are now quoted at $1.25. Pure rubber cement in ¼-pint tins has been advanced to 22c, the former price being 18c per tin. Half-pint tins have been advanced to 35c, an increase of 7c. Pint tins are now selling at 60c, an increase of 10c. For the quart size tins the new price is 90c per tin, an advance of 10c. On the above lines a discount of 25 per cent. is allowed on lots of less than 12. In quantities of 18 to 48 the discount is 30 per cent. and in quantities of 48 and over the discount is 35 per cent.

Vulcanizers And Foot Rests Show Advances

Toronto.

VULCANIZERS, FOOT RESTS.—Following the advance announced recently in the smaller sized vulcanizers there has been put into effect an advance on the garage size vulcanizers, known as Model S Adamson. The former list price on this line was $12 whereas the new list price is $15 each. This price is subject to a discount of 25 per cent. The Niagara adjustable foot rest has been advanced 25c on list price, making the present price $2.25. In quantities of less than 12 the discount on foot rests is 25 per cent., in quantities of 12 to 48 the discount is 30 per cent., while quantities of 48 and over the discount is 35 per cent.

Tire Holders Make Substantial Increase

Toronto.

TIRE HOLDERS.—Tire holders of various descriptions have made a substantial increase in price. McKinnon rear tire holder for Ford Cars No. 180, to carry one tire, have been advanced to $5.40, the former list price being $3. McKinnon rear tire holder No. 185 for Ford cars, to carry two tires, have been advanced to $6 list price, which is an increase of $2.50. King rear tire holder for Fords have been advanced $1 on list price, the new price being $6 each. Niagara basket type rear tire holders for Ford cars are now quoted at $6 list, the former price being $4.50. Above prices are subject to a discount of 25 per cent. in quantities of less than 6, 30 per cent. in quantities from 6 to 23 and 35 per cent. in quantities of 24 and over.

Hand Pumps And Foot Pumps Go Up

Toronto.

PUMPS.—An advance in various kinds of hand and power pumps has been made effective. Mayo two-cylinder hand pump is now up 25c and is being quoted at $2.75 each. Kellogg No. 10 two-cylinder hand tire pump has been increased in price to the extent of 75c, making the present list selling price $3.50. Twombly foot tire pumps have been advanced to $6.50 list price, which is an increase of 65c. In lots of less than six the discount on the above lines is 25 per cent., in quantities of 6 to 24 the discount is 30 per cent., while quantities of 24 and over the discount is 35 per cent.

Lever Pumps And Power Pumps Higher

Toronto.

PUMPS.—Lever tire pumps of Skinner pattern, for use in private and public garages, have been increased $4.90

on list price, which now makes the selling price $18.90. In lots of less than six the discount on this line is 20 per cent., while in lots of six and over the discount is 20 and 5 per cent. Kellogg No. 101 engine-driven tire pump has been advanced $2 on list, making the selling price now $20. Kellogg front drive engine driven pump for Dodge and Overland has been increased $2.50 on list price, now making the selling price $16. Above engine-driven pumps are subject to a discount of 20 per cent. in quantities of less than six and in quantities of 6 and over the discount is 25 per cent. off list. Mayo regular spark plug pump has been advanced $1 on list price, making the price now $13.50. Mayo Ford special spark plug pumps have recorded an increase of $3 on list prices, which now makes the selling price $10.50 each. This line of spark plug is subject to a discount of 20 per cent. in quantities of less than six and in quantities of 6 and up the discount is 25 per cent.

Headlights, Side And Tail Lamps Up

Toronto.

HEADLIGHTS, LAMPS. — Electric headlights of Clasco Brand No. 1256 have been advanced 40c per pair, making the new list price $8.60. Clasco electric tail lamp No. 26 has been advanced 35c in price, to the present selling price of $1.70 each. Oil side lamps also of Clasco brand have been advanced $1.25 per pair on list price to the present selling price of $6.25. Oil tail lamps of same brand are now quoted at $3.75 each, an advance of 45c. This line of lamps is sold at a discount of 25 per cent. in quantities of less than 12, in quantities of 12 to 48 the discount is 30 per cent. while quantities of 48 and up carry a discount of 35 per cent.

Automobile Clocks Register Advance

Toronto.

CLOCKS. — Advances ranging in amount from 50c to $1.50 have been made on the list prices of automobile clocks. No. 9 Keyless automobile clock formerly quoted at $15 is now quoted at $16.50. Frisco 30-hour dash clock is now quoted at $3.50, which is an advance of 50c on list price. Frisco 30-hour cowl clock has also been advanced 50c on list price and is now quoted at $4.50 each. Shasta 8-day clock is now quoted at $7.50 list price, an increase of 50c. Denver cowl clocks have been advanced 75c each, which makes the selling list price $8. Discount on these clocks in quantities of less than 6, one style or assorted style, 25 per cent. In quantities of 6 to 24 the discount is 30 per cent. and in quantities of 24 and over the discount is 35 per cent. These clocks can all be obtained in assorted styles when a quantity is taken.

Hand Horns Hold Steady In Price

Toronto.

HAND HORNS.—One of the lines to hold steady in price after the recent revision on spring prices are the horns for automobiles. Handphone hand horns are still quoted at $3.75 each, while the Newtone electric motor driven horns are quoted at $6.50 each. In quantities of less than 6 these horns are quoted at 25 per cent. discount from above list prices, in quantities of 6 to 23 the discount is 30 per cent. and in quantities of 24 and over the discount is 35 per cent.

Slip Joint Pliers Show Upward Tendency

Toronto.

PLIERS.—List prices on the nickel-plated and black finish slip joint pliers have been revised upward. For the nickel-plated style the new price is 55c each list price, representing an increase of 10c. Black finish slip joint pliers are now quoted at 35c each list price, an advance of 5c. In quantities less than 24 the discount from list price is 25 per cent., in quantities 24 to 96 the discount is 30 per cent. and in quantities of 96 and over the discount is 35 per cent.

NEW LISTS ISSUED ON WROUGHT IRON PIPE.

Toronto.

WROUGHT PIPE.—Manufacturers of wrought iron pipe have issued new lists and discounts, but the result of the change does not show much material difference in the net prices prevailing previously. A readjustment has been made in a few sizes.

The only changes over the previous list is an increase of $1 on ⅛-inch standard buttweld black, and an increase of $1.50 in galvanized standard buttweld of same size. Black ¼-inch and ⅜-inch standard buttweld have been reduced 2c per 100 feet, while the galvanized on same sizes has been advanced 7c per 100 feet. Following are the new prices:

	Per 100 Feet Black	Galvanized

Folding Robe Rails Higher In Price

Toronto.

ROBE RAILS.—Folding robe rails of the Niagara pattern have been advanced in price from 20c to 35c each. Black rails that were formerly quoted at 75c each list are now quoted at 95c list. Nickel-plated Niagara robe rails that were formerly quoted at $1.25 each are now listed at $1.60. In quantities of less than 10 rails the discount is 25 per cent., in quantities of 10 to 50 the discount is 30 per cent. and in quantities of 50 and over the discount is 35 per cent.

Spring Prices On Bumpers Arranged

Toronto.

BUMPERS.—Prices on bumpers have been subject to rearrangement in preparation for the spring booking season. In some lines there has been a considerable advance over prices prevailing within recent months. No. 6057 Niagara 2-inch clamp-on channel bar bumper formerly quoted at $8.75 is now quoted at $10.60 each. No. 6107 Niagara 2-inch nickel-plated spring bar bumper, formerly quoted at $14 list is now quoted at $15 list. One of the new lines is the Niagara 2-inch nickel-plated spring bar bumper with Nuway universal fittings, the price of which is $15.90. No 6102 Niagara 2-inch nickel-plated channel bar bumper for Chevrolet is now quoted at $11.65, the former price being $9. No. 6106 N. 2-inch nickel-plated spring bar bumper for Chevrolet is quoted at $15.60, the former price being $11. No. 6094 Niagara 1¾-inch nickel-plated channel bar bumper for Ford is quoted at $10.60, the former list price being $7.75. No. 6294 Niagara 2-inch nickel-plated channel bar bumper for Ford is quoted at $11.60 as against the former list price of $8.75. No. 6105N Niagara 2-inch spring bar bumper for Ford is quoted at $15.40, the former price being $11. In quantities of less than 5 these bumpers are quoted at a discount of 25 per cent. In quantities of 5 to 25 the discount is 30 per cent. and in quantities of 25 and over the discount is 35 per cent.

Embargo Is Holding Up Some Shipments

Toronto.

BRASS AND BRONZE PRODUCTS. —An embargo has been placed on the shipment of all brass, bronze and babbit metals by the United States Government. The embargo also applies to finished products in which these raw materials are used. A provision is made to allow them to leave the country under special permit for each shipment. This is making delivery to the Canadian trade of some lines of automobile accessories from United States manufacturers very slow in arriving. It has not resulted in keeping these goods out of the Canadian market entirely, but receipts of stocks have of necessity been slow. Wholesale accessory dealers do not anticipate that there will be a complete stoppage of their movement out of the United States, but state it is interfering with trade to a considerable extent in not being able to know what stocks they can depend upon having.

New Style Primer Shows Higher Price

Toronto.

PRIMER.—A new style primer has been placed on the market which is quot-

ed at a list price $7.50 each. This is a plunger pump arrangement which is designed to throw a rich spray of vaporized, fireable gasoline into the manifold near the entrance to the cylinder which enables the engine to be started easily. The outfit consists of the necessary plunger pump with the necessary bolts, connections and tubing for mounting on the dash. In small lots the discount on this article is 25 per cent. In quantities of 6 the discount is 30 per cent. and in quantities of 24 the discount is 35 per cent.

Calcium Carbide Makes Big Advance

Toronto.

CARBIDE.—In some sizes of tins the price of calcium carbide for automobile lamps has advanced 100 per cent. on list price. One-pound tins that were formerly sold at $2 per case of 24 are now quoted at $4 list, while two-pound tins that were formerly quoted at $2 per case of twelve tins are now quoted at $4. For 5-lb. tins the price is now $6 list, per case of 12 tins, which is an advance of $2.50. For 10-lb. tins the list price is also $6 per case of 6 tins, which is an advance of $2.75 per case. In bulk calcium carbide is quoted list at 25c for single pound, 45c for two pounds, 80c for five pounds and $1.50 for ten pounds. Discount on this line is 20 per cent. off list prices.

New Lists On Push And Pull Switches

Toronto.

SWITCHES.—New list prices have been issued on push and pull switches of nickel and black pattern. No. 1940 single nickel is now quoted at 50c and black at 45c list price. No. 1941 two gang nickel is quoted at $1, with black at 90c. No. 1942 three gang nickel is quoted at $1.50 and black at $1.35 list. No. 1943, four gang, nickel is quoted at $2 list and black at $1.80. These prices represent a decline in price. In lots of less than 25 switches the discount is 25 per cent., in lots of 25 to 100 the discount is 30 per cent., while quantities of 100 and over carry a discount of 35 per cent. from list prices.

Rear End Tire Holder List Slightly Higher

Toronto.

TIRE HOLDERS.—A slight increase has been made effective on the list price of the Hercules rear end tire and demountable rim holder. List price on the black enamel type complete with straps with 7-inch drop is now $8.90 each, which is an increase of 5c on list. Discount which applies to this line is 25 per cent. in small quantities, 30 per cent. for quantities of 6 to 23, and 35 per cent. in quantities of 24 and over.

Tire Tape Has Advanced In Price

Toronto.

TIRE TAPE.—An increase in the price of black adhesive friction tape for use on tires has been made on the heavier sized packages. For the 2-oz. ¾-inch size the list price remains the same at 10c per roll. For the 4-oz. ¾-inch the list price is now 17c, which is an advance of 2c. For the 8-oz. ¾-inch size the list price is now 33c, which is an advance of 3c. Discount on this line is 25 per cent. in small quantities, 30 per cent. when ten pounds are purchased and 35 per cent. if the purchase amounts to 50 pounds.

Tire Tools Show Increase In Price

Toronto.

TIRE TOOLS.—New list prices have been issued on tire tools. No. 1 tire tool is now quoted at 70c list each, an advance of 10c. No. 2 has been advanced 5c on list price which now makes the selling price 40c each. No. 3 tire tool has been advanced to 55c each list, an increase of 10c. No. 4 tire tool is now quoted at 20c, which is the same price as that previously prevailing. No. 6 tire tool is now quoted at 40c list each, which is an increase of 5c. In quantities of less than 12 the discount is 25 per cent., in quantities of 12 to 47 the discount is 30 per cent. while quantities of 48 and over carry a discount of 35 per cent.

Emergency Mud Hooks Advance 20c On List

Toronto.

MUD HOOKS.—List prices on emergency mud hooks have been advanced 20c which now makes the list price $2.70 each. This article is designed to fasten one or two on the rear wheel in order to help the car out of mud, sand or snow. In quantities of less than a half dozen they are quoted at 25 per cent. discount, in quantities of 6 to 23 the discount is 30 per cent., while quantities of 24 and over the discount is 35 per cent.

Chain Cable Lists Advance 2c Foot

Toronto.

CHAIN CABLE.—Chain cable has been advanced 2c per foot on list price, making the selling price now 9c per foot. This chain is used for connecting muffler or horn cut-out to foot pedal and is designed to run through ordinary pulley. For less than 100 feet the discount is 25 per cent. from list price, for 100 to 500 feet the discount is 30 per cent. and in quantities of 500 feet and over the discount is 35 per cent.

Muffler Cut-Out Valves Go Higher

Toronto.

CUT-OUT VALVES.—New list prices have been issued for muffler cut-out valves which provides for a slight increase in price. This cut-out valve is attached by cutting V-shaped hole in pipe and clamping in position. Size 1⅝-inch is now quoted at 75c each, 1½-inch at 75c, 1¾-inch at 90c, 2-inch at $1.10, 2¼-inch at $1.10, 2½-inch at $1.55, 3-inch at $1.90 each. These prices show an increase of from 5c to 30c on the various sizes. Discount in quantities of less than 12 is 25 per cent., in quantities from 12 to 48 the discount is 30 per cent. and in quantities of 48 and over the discount is 35 per cent.

Radius Rods Are Moved Higher In Price

Toronto.

RADIUS RODS.—Auxiliary radius rods designed for the Ford car have been advanced in price during the week. No. 701 that was formerly quoted at $5.40 is now quoted at $7 list price, while the No. 703 that was formerly quoted at $2.30 list price has been advanced to $2.50 list price. In quantities of less than 6 the discount is 25 per cent., quantities 6 to 23 the discount is 30 per cent. and in quantities of 24 and over the discount is 35 per cent. These radius rods are designed to give greater strength to the original rods and to make the car steer easier by holding the axle in position and in keeping the axle from rocking back on the bottom.

Composition Tap Sole Now On Sale

Toronto.

TAP SOLES.—One of the new lines to make an appearance on the Canadian market is the Neolin tap sole which are designed to fill the need for half soles for repair work. Formerly this line was only manufactured in the full soles and heels. Prices for the women's and boys' sizes of Neolin tap soles in cartons of one dozen soles is $6 while the net price on the men's size is $7.20 per dozen in cartons. These soles can either be sewed or tacked to the old shoe.

Cement Advances 15c Per Barrel

Toronto.

CEMENT.—As intimated in these columns recently that there was a strong situation in cement and that higher prices were a probability, such advance has been made effective during the week. The price of less than carload lots is now $3.15 f.o.b. Toronto warehouse, the previous price having been $3 per barrel. The carload price advanced about two weeks previous to the advance in small quantities and was given in these columns, the price in large quantities being $2.55 per barrel. There is a good demand for cement at the present time from sewer manufacturers, which branch of industry seems to be requiring the heaviest supplies at the present time.

Brooms Due For Another Advance

Toronto.

BROOMS, BRUSHES, WASHBOARDS.—Intimations have been made in reliable quarters that there is strong probability of an advance being made effective in the price of corn brooms. It is highly probable that the 20-lb. 4-string broom may soon be quoted at $9 per dozen, while the 23-lb. 4-string may be selling at $10 per dozen in the near future. These prices would represent an advance of $1 per dozen. Paint brushes are still in strong market although announcement of a general increase in

prices has not yet been made. Manufacturers of tin washboards are no longer permitted to use tin in their manufacture as the supplies of this commodity must be conserved for manufacture of cans for food commodities for our armies. Makers will accordingly have to confine their attentions largely to the manufacture of wooden washboards.

Bit Holders, Breast Drills Go Higher

Toronto.

BIT HOLDERS, BREAST DRILLS.—Higher prices have been made effective in this market on Stanley Rule and Level Company's goods, providing for an increased price in extension bit holders, breast drills, cornering tools, levels, mallets, planes, scrapers, trammel points. Following are the net prices prevailing on some of the various lines:

Extension Bit Holders—No. 1 by 16, $18.80 dozen; No. 1 by 18, $19.05 dozen; No. 1 by 20, $19.45 dozen.

Breast Drills—No. 733, $4.60 each.

Cornering Tools—No. 28, $3.35 dozen; No. 29, $3.55 dozen.

Levels—No. 31 by 3, $4.65 dozen; No. 31 by 3½, $5.70 dozen; No. 36 by 12, $25.75 dozen; No. 36 by 18, $30.55 dozen; No. 36 by 24, $43.75 dozen.

Mallets—No. 3, $5.80 dozen; No. 4, $2.60 dozen; No. 6, $10.40 dozen; No. 8, $4.25 dozen; No. 9, $5.25 dozen; No. 10, $6.40; No. 11, $9.85 dozen; No. 12, $12.55 dozen; No. 13, $15.20 dozen; No. 14. $12.30 dozen.

Iron Planes—No. 1, $2.35 each; No. 3, $3 each; No. 48, $4.15 each; No. 71, $3.20 each; No. 71½, $2.50 each; No. 444, $9.70 each.

Scrapers—No. 81, $21.55 dozen; No. 82, $14.40 dozen; No. 83, $14 dozen.

Trammel Points—No. 1, $1.20 per pair; No. 2, $1.53 per pair; No. 3, $2.10 per pair; No. 4, 70c per pair.

List Prices On Primers Advance

Toronto.

PRIMERS, LAMP WICK.—Higher prices were made effective in certain sizes of primers manufactured by United States ammunition firms. New No. 4 primer which formerly sold list at $3.80 per box of 100 has been advanced to $5.50 per box list. U. M. C. primer 33 has also been advanced to $5.50 per box. These prices are subject to an advance of 10 per cent. on list. Lamp wick is one of the lines of cotton goods to show a higher price to the extent of approximately 10 per cent. No. A is now quoted at 80c per gross, No. B at $1.16 per gross and No. D at $1.85 per gross net.

Coal Oil Advances 1c Per Gallon In Week

Toronto.

COAL OIL, GASOLINE.—An advance of 1c per gallon was registered in the price of coal oil during the week following the strong situation that has prevailed in the market for that commodity. The probability of an advance has been referred to by HARDWARE AND METAL on several occasions within recent weeks. Royalite coal oil is now selling at 17c per gallon and Palacine at 20c per gallon. The advance follows an advance recorded in certain parts of the United States several weeks ago. There is an exceptionally heavy demand for coal oil at the present time due to the use of the oil for heating purposes. Gasoline is holding in steady position at 31½c per gallon. While the demand is not as heavy in this commodity as during the summer months there is still a good consumption through motor trucks and delivery trucks of various kinds. New list prices on motor oils have not yet been issued.

Booking Business On Enamelware Now

Toronto.

STOVES, ENAMELWARE.—Manufacturers of enamelware are now engaged in booking business for future delivery and report that the response has been fairly good so far. There is a lack of keenness for business on the part of manufacturers owing to the uncertainties of the market, but at the present time some manufacturers will accept business for delivery up to March 1. Sorting business in stoves and ranges has been fairly good during the week in the face of the quiet period that is generally expected after the holiday period. Oil heaters continue to be in extra heavy demand. Some manufacturers are sold out entirely and are turning down numerous orders.

Cordage Market In Strong Position

Toronto.

CORDAGE, TWINE.—There is a strong situation in manila cordage at the present time which has been caused largely through the difficulty of getting supplies of raw materials from the Philippines and also to the fact that any ocean space that is available commands such excessively high prices. Manufacturers have not yet announced their prices for spring booking. The market for manila rope is in such a condition that should an advance be made effective in the United States the Canadian market would in all probability go higher. Indications at the present time seem to point to higher prices. Pure manila rope is still quoted on the basis of 39c per pound base, while British manila and New Zealand hemp is quoted on the basis of 33c per pound. Sisal rope is quoted at 27½c per pound base.

Iron And Steel Situation Still Acute

Toronto.

IRON AND STEEL.—There is no sign of improvement in the situation so far as iron and steel are concerned. Mills in the United States are far behind to meet requirements on iron and the production of steel has been hampered through the inclement weather and shortage of fuel. In Canada there is a serious shortage for existing needs and the government will in all probability give assistance in some form to the end that production may be increased. In the face of the conditions prices hold unchanged but firm.

Canada Can Only Get 50% Of Requirements

Toronto.

SHEETS, PLATES. — Advice has reached some of the local dealers that the United States government intends to allow only 50 per cent. of requirements to come forward to Canada on sheet steel. This will place existing stocks already in this country in a strong situation. Intimations were made last week that 3/16-inch plate and ¼-inch plate were likely to advance but on further consideration of the matter dealers decided that since existing stocks were so light there was very little object in disturbing prices at present. Prices of black sheets and galvanized sheets held unchanged during the week.

Corrugated Sheets Hold In Steady Market

Toronto.

CORRUGATED SHEETS. — Quiet prevails in the market for corrugated sheets, eavetrough and conductor pipe. This is the season of the year when dealers do not anticipate very heavy business. Recent severe weather has had a tendency to slow up any building that may have been in progress. Prices hold unchanged.

No Hardship As Yet Through Permit System

Toronto.

BOILER TUBES.—Dealers in boiler tubes have so far been able to secure permits for sales of boiler tubes where it has been shown that the industry for which they were intended was necessary to the country's welfare at this time. The instance of the coal company cited

last week, which company was badly in need of boiler tubes to make repairs on their hoisting machinery boiler, has been solved through the granting of the permit by the Dominion Government. Stocks of tubes, however, are within very narrow compass.

Lead Products Were In Steady Market

Toronto.

LEAD AND ZINC PRODUCTS.—Despite a decline in the London tin market reported last week the local situation has shown no change so far as products manufactured partially from tin are concerned. In the primary market pig lead held in a fairly steady position and a change cannot be anticipated from that quarter immediately at any rate. Prices held unchanged. Demand is fair.

Stagnant Market In Old Materials

Toronto.

OLD MATERIALS.—There is a continuation of the dull condition in the old material market. Buyers and sellers are apparently at loggerheads and there seems no immediate prospect of a change in the situation until something more definite materializes with respect to the fixing of prices on these materials in the United States.

Tin Maintains Steadiness In Market

Toronto.

INGOT METALS.—There was a steadiness in the market for ingot metals during the week, with a fair demand reported. Tin stocks are comparatively light in this market, and prices were maintained at the same figure as last week, in spite of fluctuations in the primary market at London.

COPPER.—The exports of copper from the United States during 1917 amounted to 1,100,000,000 tons. This exceeded by 25 per cent. the previous record year of 1913. It is estimated that 75 per cent. of the copper produced is now being used for war work either on this continent or abroad. When the war ends there will have to be a very great readjustment. In the local market there was a steadiness of tone, prices being quoted at 30c to 32c for casting copper.

TIN.—There was a slight recovery in the London market during the week, the recent big decline having been attributed to the liquidation of limited speculative accounts, with buyers shy. Futures declined more heavily than spot tin in that market, and it may be that heavier stocks of tin are en route from the East Indies than estimated. One local metal concern stated they had received advices that it is believed five ships are due to bring stocks of tin into the London market. If they arrive safely it may mean that the stocks will be sufficiently heavy to break the market considerably. In the local market supplies are not heavy and quotations held unchanged at 78c to 80c per pound. Later advices regarding the shipment of Singapore tin into the United States direct without license show that the permit system still prevails.

SPELTER.—Producers of spelter in the United States are of the opinion that production has now been brought down to the level of current requirements. Producers are carrying large stocks, but are not disposed to force sales in view of the fact that reduction in output has been effected. There was a better demand in the local market, with quotations made on the basis of 9¾c to 10½c per pound.

LEAD.—In the New York market the largest producer of lead advanced the price of lead ¼c per pound during the week. In that market lead has been regarded as in fairly strong position. Offerings of several cars in that market during the week did not find keen buyers. The local situation remained unchanged, the price quoted being on the basis of 8¾c to 9c per pound.

ANTIMONY.—The United States Government is reported to be in the market for two or three hundred tons of spelter, and in the face of the dullness in the primary market it is expected there will be keen competition for this business. Prices in the local market held unchanged at 16c to 18c per pound.

ALUMINUM.—Quotations held steady and unchanged at 60c per pound. Demand is only fair at this season.

PIG IRON.—Some of the Canadian producers of foundry iron are still in a favorable position to take business for this commodity for nearby shipment. As stated last week, one of the big producers has been forced to close the foundry iron furnace and to devote all their energies and fuel supplies to the production of steel. Quotations held unchanged at $50 per ton.

LONDON MARKETS

LONDON, Jan. 10.—The decline of $1 per hundred in white lead in oil has been of unusual interest during the week. Putty and linseed oil have been advanced in price. Booking prices on horse blankets are much higher than previously. Crosscut saws are having a good sale in Western Ontario, caused no doubt through the shortage of coal and the desire of people to burn wood. Business, although not very brisk at present, is steady and considered seasonably good. Many lines of spring goods are being booked and shipping of them will start shortly after merchants complete their stock-taking. Collections continue good.

Horse Blankets Much Higher In Price

London.

HORSE BLANKETS.—Booking prices on horse blankets for delivery in fall of this year are much higher than previously prevailing. Kersey blankets with stay-on range from $23 to $40 per dozen. Lined jute blankets with stay-on range from $35 to $45 per dozen. Surcingles No. 1 plain are quoted at $2.65 per dozen, while No. 2 padded are quoted at $3.25 per dozen. The market is firm and higher prices are expected.

Glass Holds Steady

Although there is a firmness in the glass market, prices hold unchanged at 40 and 10 per cent. off list for single and double diamond, with cut lights at 33 1/3 per cent. off list.

New Mops Now On Sale In This Market

London.

MOPS.—A new line of polishing mop is now on sale in this market of triangle pattern, which is designed to go to the consumer at $1 each. The line is known as Sprustex, and to the retail trade No. 2 size is quoted at $8 per dozen. Sprustex polish 4-oz. bottles is quoted at $2 per dozen, 12-oz. at $4 per dozen, and 1-quart cans at $10 per dozen.

Augers And Lamp Wick Increase In Price

London.

AUGERS, LAMP WICK.—Through the changing of the discount on augers a higher price has been made effective. Discount now prevailing on Gilmour ship augers is 20 per cent. off list. Gilmour eye augers are now quoted at a discount of 45 per cent. Lamp wick shows an advance of approximately 10 per cent. No. O is now quoted at 65c per roll, No. A at 80c per roll, No. B at $1.20 per roll, and No. D at $1.90 per roll. Rochester lamp wicks No. 2 are quoted at 50c per dozen and No. 3 at $1.65 per dozen.

Cistern Pumps, Brooms And Clippers Advance

London.

PUMPS, BROOMS, CLIPPERS.—Advances have been recorded on common cistern pumps, which make the following prices effective: No. 1 open spout, $2.01 each; No. 2 open spout, $2.25 each; No. 3 open spout, $2.46 each. No. 1 closed spout, $2.13 each; No. 2 closed spout, $2.37 each; No. 3 closed spout, $2.64 each.

Several lines of corn house brooms have advanced in the neighborhood of 7½ per cent.

Chicago No. A1 toilet clippers have advanced to the extent of 15c per pair, which makes the new price 85c per pair. Chicago No. A1 fetlock clippers have also advanced 15c per pair, and are quoted at 85c per pair.

Snow Shovels Up; Saws In Good Demand

London.

SNOW SHOVELS AND CROSSCUT SAWS.—Higher prices have been made effective on wooden snow shovels; the new price of No. 118 is now $5.75 per dozen. Steel snow shovels hold unchanged in price, the discount being 12½ per cent. off list. Crosscut saws are having a good sale in Western Ontario, which is caused in all probability through the shortage of coal and the desire of householders to heat with wood fires. Following prices apply to Maple Leaf Lance, Maple Leaf Pacer, Premier, Pangburn, Leader, Arrowhead: 5-foot, $4.50 each; 5½-foot, $5.30 each; 6-foot, $6 each. Handles for crosscut saws are quoted as follows: No. 3, $4.10 per dozen pairs; No. 6, $3.75 dozen pairs; No. 6½, $3.75 dozen pairs; No. 5, $5.60 dozen pairs.

Wood Tubs And Clothes Racks Advance In Price

London.

TUBS, RACKS.—Wooden wash tubs have registered an advance in price, No. 0 now being quoted at $16.50 per dozen, No. 1 at $14.25 per dozen, No. 2 at $12 per dozen, and No. 3 at $10.50 per dozen. Gem wood clothes racks are also higher in price. Four-bar size rack is quoted at $5 per dozen, 5-bar at $6.30, and 6-bar at $9 per dozen.

Bit Braces, Mallets, Planes, Levels Up

London.

BRACES, PLANES, LEVELS.—Goods made by the Stanley Rule and Level Company have been moved upward in price, the advance in bit braces amounting to approximately 5 per cent.; in metal gauges an advance of approximately 10 per cent.; carpenters' mallets,

Lanterns Advance 50c Per Dozen

London.

LANTERNS, GLOBES.—An advance of 50c per dozen has been announced as effective on lanterns, which now makes the price of short and long pattern $12.50 per dozen; japanned dash, $15 per dozen; searchlight X-ray, $15.75 per dozen, and copper well japanned $18.25 per dozen. Lantern globes hold unchanged in price at $1 per dozen in single dozens, 90c per dozen in cases of three dozen, and 85c per dozen in cases of six dozen.

White Lead Declines; Putty Makes Advance

London.

WHITE LEAD IN OIL, PUTTY.—A decline of $1 per hundred pounds has been announced on the price of white lead in oil, which makes the price in ton lots $15.20 per 100 pounds, and $15.55 in less than ton lots. Elephant genuine is quoted at $15.75 per 100 pounds in ton lots and at $16.05 in less than ton lots.

Putty, on the other hand, was in firmer market, and an advance of 50c was recorded. Standard grade in 25-lb., 50-lb., and 100-lb. drums is now being quoted at $5.15 per 100 pounds. Pure putty is sold at $1.75 higher than standard, which makes an increase of $1 per hundred pounds on this grade.

WINNIPEG MARKETS

WINNIPEG, Jan. 10.—With the passing of 1917, the trade in general is getting straightened away for the coming year's business, and from reports received it is expected that this year's business will also show a substantial increase over the preceding year, as has been the case for the past three.

Prices On Screws Continue In Firm Tone

Winnipeg.

SCREWS.—Prices on all lines of wood screws also coach screws continue firm with no indications of any immediate change. Prices on the above line is herewith confirmed. Flat head, bright, 65 per cent.; round head, bright, 60 per cent.; flat head, brass, 30 per cent.; round head, brass, 25 per cent.; coach screws, 20 per cent.

Rope Halters Go Higher By 10 Per Cent.

Winnipeg.

HALTERS. — High prices ruling on all lines of cotton, coupled with increased costs of hardware, has had the effect of increasing the price of Johnson rope halters which show an advance of Approximately 10 per cent., taking effect at once. Present prices are quoted herewith: No. 1, $11.70 doz.; No. 2, $10.92 doz.; No. 3, $9.75 doz.

Cobblers' Sets Higher By 7½%

Winnipeg.

COBBLERS' SETS.—Prices on cobblers sets which have remained firm for some time past show another small advance of approximately 7½ per cent. over former prices and are quoted today at $21 doz. for No. 1, and $14.50 doz. for No. 2.

Lampwick May Go To Still Higher Price

Winnipeg.

LAMP WICK.—Lamp wick prices probably have shown more advances than any of the cotton lines handled by the hardware jobbers. Advances in this community have taken place several times during the past year and advice from the manufacturers predicts another advance in the near future. Prices in the meantime remain as formerly quoted viz.:

Lamp wick—No. 0, 63c gross; No. A, 79c gross; No. B, $1.15 gross; No. D, $1.83 gross.

Rochester lamp wick—No. 1, 35c doz.; No. 2, 50c doz.; No. 3, $1.65 doz.

Flat stove wick—3 in., 43c doz.; 3½ in., 50c doz.; 4 in., 57c doz.; 4½ in., 65c doz.; 5 in., 70c doz.

Shovel Handles Likely To Advance

Winnipeg.

HANDLES.—Market prices have remained very steady for some time past on shovel and scoop handles; hodever, owing to shortage of labor and increased costs an early advance is expected, prices quoted to-day being $4.25 doz.

Brooms Continue In Upward Direction

Winnipeg.

BROOMS.—Brooms which have soared in price since the commencement of the war continue to advance, and conditions at present show no improvement, in fact, transportation in the United States to-day is at a premium and only a limited quantity of broom corn is obtainable for this reason. Owing to the unlimited grades and makes of brooms it is impossible to quote prices except to mention that prices range approximately from $8 doz. on kitchen brooms to $12.50 doz. on warehouse brooms.

Hinges and Ice Saw Tillers Advance

Winnipeg.

HINGES, ICE SAW TILLERS. — A small advance has been found necessary on Stanley's ornamental hinges and this shows an increase of about 5 per cent. over former prices. To-day's prices are quoted herewith:

1430 A, 1430 D2, 1430 F, $5.50 doz. pr.; 1430 N, $6 doz. pair; 1413 D2, 1413 F, $7.20 doz. pair; 1417 D2, 1417 F, $7 doz. pair.

New prices issued some time ago by the manufacturers on ice saw tillers complete have just been put into force by the Winnipeg jobbers and shows an increase of 27½ per cent. over the former price. To-day's price is $1.40 each.

Linseed Oil And Turpentine Quiet

Winnipeg.

LINSEED OIL, TURPENTINE. — There is very little movement reported on turpentine, the market remaining quiet while prices as formerly quoted still remain in force. Barrels 80c gal.; ½ barrels, 80c gal.; 5 gal. lots, 85c gal., 1 gal. lots, 85c gal. Linseed oil prices are unchanged.

WEEKLY PAINT DEPARTMENT

Paints Also Auto Accessories

Overhauling Car Now Done in Comfort — Playing up the Distinctive Element in Paints—The Car Owner as the Painter—Keep Before Customers

THERE are many owners of automobiles who drive their cars steadily up until the end of the year, and until the new year comes will not consider laying up their cars to be painted and varnished. Now then is the time to get after those whose cars need decorating and suggesting that your store is headquarters for automobile paints and varnishes.

With the improved garages which many are building, so that they can be heated, the difficulties formerly experienced in undertaking this work in cold surroundings are largely eliminated. Autoists will be tempted to undertake the work themselves if it is only explained to them how easily the work may be done, for practically all owners like to put in some time around their cars even when stored away for the winter.

The service given the average car during the summer is by no means light, and if the owner has used same up until the end of the year there is no doubt but that a coat of varnish at least will add materially to the car's appearance, apart from the protective element which it affords.

Playing Up the Distinctive Element

Another point which could be mentioned is the distinctive element which many owners would like engendered in the appearance of their autos. When the purchase is made, it is usually a standard car as regards color, and there are those who prefer red or green or blue bodies to plain black. Perhaps the addition of a little trimming color on the wheels is all that is wanted, and the paint mer chant should be prepared to make suggestions which will meet his customer's wishes in this respect.

Finishes are sold which will brighten up all parts of a car. If only the lamps need retouching, there's a finish for them; if it's the wheels which need decorating, that need can be fulfilled; if the top has become soiled, it can be renewed. The sale of auto accessories is by no means complete unless paint is included. True it is that paint won't be sold as often as gasoline, but it should be sold about as often as tires. Giving the entire car a new coat of paint and varnish at least once a year should be strongly advocated. Another coat of varnish six months later would be that much better.

Prospects for Development Good

The hardwareman is usually conversant with his line of house paint, wall paint, floor paint, or barn paint, and he should familiarize himself with the various auto finishes which go to make old cars new. When it is remembered that practically 200,000 cars are owned in Canada, and that each district has its quota, the question of paint looms up as a most important one.

The Car Owner as the Painter

Manufacturers of automobile finishes have borne in mind that many owners would undoubtedly want to refinish their own cars if at all possible. For this reason it will be found on careful analysis that the amateur painter has been catered to; instructions are given so complete that by carefully following same he can secure excellent results. This is a fact which, with the shortage of available labor to take care of this work, can be played up strongly by the merchant.

The Farmer's Trade a Big One

In those towns which supply a large farming community the entrance of the farmer into the class of the car owner should be carefully watched. It is during the winter months that the farmer has the most time to spare, and when he knows that he need not necessarily bring his car to the town paint shop he will investigate your line and sales will result.

Appearance counts for a great deal with the autoist. The number of those who are content to travel around in a mud-stained, dilapidated-looking automobile represents a mighty small percentage. The appeal to the pride of the car owner then counts for much, whether he belongs to the town or country, and when the first sale is made the others follow along much more easily.

Following Instructions

Points to be observed by all who would secure the best results are given clearly and completely in the literature supplied by manufacturers. The merchant selling the paint and varnish should not be content to make the sale until he has impressed on the prospective user the importance of following each detailed instruction carefully. It should be clear to all that applying paint to a surface which is oily or greasy will not result satisfactorily. However, unless this is emphasized and methods outlined for cleaning the car thoroughly, many there are whose procedure would not be correct, and when unsatisfactory service resulted the paint and the merchant would get the blame.

Getting the Business

The methods of sale adopted with the other lines of paint should, if aggressive, bring results. Does the car owner know that you sell automobile paint; does he realize that for a fraction of the cost and the expenditure of a little of his own energy he can take care of this painting job himself, or is he under the impression that he has to employ a regular painter to do the work? A little newspaper publicity in this respect would enlighten him and undoubtedly elicit inquiries which the merchant can turn into sales.

It should not be thought that in advocating the sale of paint to the car owner it is desirable to put the regular painter out of business. There are very few towns which have a large enough supply of these men to take care of all this work, even if they had it to do, and it must be remembered that many car owners would not have their cars refinished as often as they should if they had to depend on outside sources. It can be said that the merchant's appeal should extend to the painter as well, and it will be found that cultivating this source of revenue is profitable.

Keeping Goods Before Customers

Interior displays should be so arranged that at all times the paint auto accessories are before those who enter the store. It is good displays which encourage people to ask about the lines, and once the opening is made, the salesmanship of the merchant or his clerks can be brought to bear in the closing of the sale.

A careful study of the auto painting finishes which will enable the salesmen to talk confidently and knowingly of the line should be encouraged. Knowing the goods is essential, recommending only those items which the customer needs to get results creates a feeling of confidence which brings him back for other lines. Part of the store service, then, should embrace a clear understanding of the goods you are trying to sell. It is such knowledge which makes for the come-back-again customer, and those are the kind which every merchant wishes to have on his list.

The Ramsay Line

The Ramsay Line consists of a paint, varnish or finish for every conceivable purpose. The line is absolutely complete. In fact *"If it's for painting or varnishing, Ramsay makes it."*

A word as to quality—for over 75 years the Ramsay Line has not varied in quality or uniformity—it's as good as pure materials and human skill can make it—no product is allowed to reach the shipping department unless it is proved by test to be up to the Ramsay standard.

Now is the time to investigate The Ramsay Proposition. The best for you and the best for your customers.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Jan. 9.—There has been quite a stir in the paint market this week, several changes being made. White lead in oil has registered a decline of $1 per 100 pounds all around. This is due to the heavy stocks that some dealers have, and particularly a number of the large manufacturers in the United States, who have decided to lower stocks by making a more interesting quotation. Linseed oil, due to the transportation situation, has moved upward 4c a gallon. Putty has gone up to the extent of 50c per 100 pounds, and the differential on pure putty is also higher and is now $1.75 over the price of ordinary. Paint bookings are coming to hand very well. Some uneasiness is expressed regarding one or two sizes of tins for holding the product.

Linseed Oil Advances 4c; Spot Stocks Seed Light

Montreal.

LINSEED OIL.—A marked firmness of tone characterizes the linseed oil market this week, and the net result of the situation is a 4c advance in the price of oil. Even at this advance there is a decided firmness of tone, and it has been expressed on several sides that there is every likelihood of prices being maintained, with a tendency to higher levels. Seed deliveries are poor indeed; very much shorter than they have yet been for the season. It is doubtful if there will be much seed available for the next few weeks. Crushers have plenty of seed bought; it is simply a matter of delivery. It is further stated that barrels are becoming scarce, and that it behooves the crusher to conserve his supplies of these as carefully as possible. One large crusher said: "Deliveries of seed from the West are not satisfactory. The situation is even more acute than it has been, and there is little likelihood of improvement." One feature that is worthy of noting is that of the disinclination of jobbers to accept orders for other than limited lots. They would rather supply two to five barrels at a time these days than supply more, and in some cases no orders are being filled for quantities exceeding ten barrels. One firm has withdrawn its usual quotation on 10 to 25 barrels. Oil in the hands of jobbers here is reported as confined to limited quantities. One large paint dealer says: "The taking over of the United States railroads by the Government, thus curtailing the operation of trains, has had some bearing on the present conditions as affecting oil."

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
1 to 4 barrels	$1.48	$1.50½
5 to 9 barrels	1.47	1.49½
10 to 25 barrels	1.46	1.48½

Turpentine Held Well; Sales Are Very Light

Montreal.

TURPENTINE.—There is a steadiness in the turpentine market, both locally and outside, at primary centre. No price changes have been effected. Sales are confined to a small compass, with few large quantities going out. Much of the business being received is that for delivery with other spring goods. The following quotations are effective here:

Turpentine—	Per Imp. gallon
5 bbls. and over	$0.69-$0.71
1 barrel lots	0.70- 0.72
Small quantities	0.83

Still Good Receipts; Spring Paint Bookings

Montreal.

MIXED PAINT.—The present demand for mixed paint is small, although the situation is normal for this time of the year. Most dealers and paint makers are quite cheerful regarding the outlook for spring business; and while there is a desire upon the part of retailers to measure their wants with caution, there is nevertheless a very good feeling as evidenced in the orders coming to hand. It is probable that some of the special sizes of containers will have to go owing to the shortage of tin for making them, and the general expression is that this will be applied to the elimination of one or two of the smaller sizes. For the time being there is just the usual sorting.

White Lead In Oil Declines One Dollar

Montreal.

WHITE LEAD IN OIL.—The interesting event recorded for the week is that of a decline of $1 per 100 lbs. The reasons for this slump are variously given. Some maintain that the prices heretofore obtaining are as low as the product can be sold to make any margin. As one important reason, one paint dealer states that several of the large United States manufacturers have large stocks of dry lead, and that they are desirous of reducing these by making a more favorable price to their trade. Pig lead is firm in primary centres, and this, therefore, cannot be assigned as responsible for the decline. Summing the situation up, it would seem that the most responsible reason is that of the entry of United States lead into the Canadian market. The following quotations apply here:—Five-ton lots, $14.50 per 100 lbs.; ton lots, $15 per 100 lbs., and smaller quantities, $15.35 per 100 lbs. Dry white lead manufacturers have, of course, made a lower price on the dry lead, but state that it is but a temporary measure on their part, and that the price may be withdrawn at any time.

Putty To Higher Levels; Advance Of Fifty Cents

Montreal.

PUTTY.—There has been a straight advance of 50c per 100 lbs. in putty. This follows as a result of higher costs for whiting and linseed oil, and also the higher quotations for containers have been an added reason for the increase. Now that it has been decided to eliminate the 50-lb. drum, there will be a larger call for the 25 and probably for the 100-lb. sizes. The new prices now prevailing are on the following basis:—Bulk, in casks, $4.10 per 100 lbs.; 25 and 100-lb. drums, $4.95 per 100 lbs.; and bladder putty in barrels, $5.20 per 100 lbs.

Pure Putty Differential Is Now One Seventy-Five

Montreal.

PURE PUTTY.—In sympathy with the advances made in the prices of ordinary putty, an advance of 50c per 100 lbs. has been added to the differential price, which make it now $1.75, as related to the previous advance named of $1.25. Increased price for whiting, containers and labor are assigned as the reasons for the higher quotation.

TORONTO

TORONTO, Jan. 10.—Of prime interest in the paint and oil market during the week has been the decline in the price of white lead in oil to the extent of $1 per 100 pounds. Putty, on the other hand, has been increased in price to the extent of 50c per 100 pounds, and the differential between standard and pure putty has been increased. Linseed oil is in strong market, with advances recorded in some quarters. Turpentine is holding steady, due to a similar condition in the primary market. Travellers for paint manufacturers and

The Farmer as a Customer for the Paint Dealer

THE business of the Canadian Farmer is becoming increasingly valuable to stores situated in agricultural centres. While the "purely local" business is most desirable, yet from the dealer's standpoint, the farm trade represents the cream of his business.

Farmers Increased Crop Yield in 1917

Agriculture is truly the basis of Canada's prosperity. Last Fall, for instance, the crop yield from Manitoba, Saskatchewan and Alberta alone amounted to $750,000,000. This was a decided increase over any former year. And the West was not the only district to make a great showing; every province reported that the tillers of the soil had a bigger year than ever before. Crops were large but prices were extraordinary. So while the total crop was not as large as the rural year of 1916—the prices paid were much larger and represented a greater profit for the farmer.

U.S. Manufacturers Advised to Cultivate the Farm Field

Such conditions as these are causing greater efforts to be devoted each year to captivating the farm trade. United States Manufacturers, who sell their goods in Canada, and have a Canadian business, are being advised by authorities on the subject to make their strongest appeal to the Farmer, on the theory that they should strike where the money is **now** and where it will continue to be.

The conclusion is this: wherever there is prosperity, there is a greater leaning toward the establishment of better methods, the employment of new materials—progress. And Canadian farms are becoming more prosperous and progressive.

Hardware dealers know the value of being located in a progressive farming district; for their stores are the headquarters for much of the material that follows in the wake of progress. The farm trade for their stores is a very valuable asset.

Brandram-Henderson have made an especial appeal to farmers for years. Over 200 small-town papers, with circulations among the farmers' homes, carry Brandram-Henderson Paint advertising—and in every advertisement the nearest B-H dealer's name appears. Then, in addition, the principal farm papers contain large B-H Paint ads frequently. This advertising all appears at the time of year when it will have the greatest effect, namely, from January to May. Among the farm papers used are the "Family Herald and Weekly Star," "The Grain Growers' Guide," "Farmer's Advocate," "Farm and Ranch Review," "Journal of Agriculture," etc., etc.

This comprehensive farm campaign carried out year after year cannot fail to carry home the B-H Paint message to Canadian Farmers. The farmers have come to know that B-H "English" Paint is the best paint for exterior use in Canada's changing climate. They know that each can of B-H "English" contains 70% Brandram's Genuine B.B. White Lead and 30% Pure White Zinc—for the guarantee that goes with each can says so.

No matter what the farmer's paint need is—he can get a B-H product to suit his purpose.

Brandram - Henderson agents state that the campaigns have been uniformly successful. They appreciate the valuable farm trade they have been getting as a result of the aggressive advertising, and, after all, it's results that count.

Such plans as these are making the B-H Agency profitable. No paint-buying class is overlooked—each is specially appealed to in a manner similar to the way the farmer is reached, and each paint buyers is told where he can buy B-H Paints and Varnishes.

When a Hardware Man decides that he wishes to become the B-H Dealer for his community, he is working along the avenue to eventual prosperity—and incidentally, too, along the line of least resistance.

Only a Few Unrepresented Territories

There are a few territories wherein the B-H Agency may be secured by progressive Hardware Merchants. Let us submit the B-H Proposition to you. BRANDRAM-HENDERSON, Limited, Montreal, Halifax, St. John, Toronto, Winnipeg, Edmonton, Calgary, Vancouver.

wholesale houses are again making their rounds. A preliminary survey of the situation during the opening days of the year would seem to indicate a promising year so far as trade is concerned.

Linseed Oil Goes Still Higher In Price

Toronto.

LINSEED OIL.—The market for linseed oil continued in a strong position during the week, with advances recorded all along the line. Range of quotations were increased 4c over the low level of last week, while the high quotation was 5c in advance of last week, making the range now $1.44 to $1.55 for raw linseed oil in single barrel lots. There was a net increase in the price of cash flaxseed in the Winnipeg market of 3½c per bushel and in the May option of 2c per bushel. Supplies of seed reaching the Eastern market are very light, and there does not seem much prospect of improvement in the near future. Demand for linseed oil and oil cake from the crushers is reported good. Following is the range of prices prevailing:

	Raw, Imp. Gal.	Boiled, Imp. Gal.
1 to 2 bbls.	$1.48-$1.55	$1.50½-$1.58
3 to 5 bbls.	1.48- 1.54	1.50½- 1.57
6 to 9 bbls.	1.47- 1.52	1.49½- 1.55

Less than barrel lots 10c per gallon higher than single barrel price.

Turpentine Holds In Steady Market

Toronto.

TURPENTINE.—There was a steadiness in the market for turpentine during the week and prices held unchanged on the basis of 70c to 71½c in single barrel lots. Demand for this commodity is light at this season of the year. Stocks in the local market are light, and with the development of any considerable demand prices would in all probability move in the upward direction. The primary market held remarkably steady during the week, but on Wednesday was quoted down ¼c from the price prevailing for the previous six days of the week.

	Imp. gal.
1 barrel	$0.70-$0.71½
2 to 4 barrels	0.69- 0.70½
5 gallon lots	0.77- 0.78½

White Lead In Oil Declines $1 Hundred

Toronto.

WHITE LEAD IN OIL.—A decline of $1 per 100 pounds was made effective in the price of white lead in oil during the week, which now makes the price $15.20 per 100 pounds in ton lots and $15.55 in less than ton lots. Elephant genuine is quoted at $15.70 per 100 pounds in ton lots, and B.B. genuine at $16.80 per 100 pounds in less than ton lots. In some quarters the decline came as a slight surprise. There has been no weakening in the pig lead market within recent weeks, and the linseed oil market is in a firm and advancing position. However, there has been very light trade in white lead in oil within recent weeks, and there was an evident desire on the part of some concerns to start a buying movement, as stocks were accumulating. Intimations have been made that the price is likely to advance soon again when some of the existing stocks have been cleared out. Whether or not this will materialize remains to be seen.

Putty Goes Higher By 50c Per Hundred

Toronto.

PUTTY.—An advance of 50c per 100 pounds has been recorded in the price of putty, which now makes the selling price as follows:—Bulk in casks, $4.30 per 100 lbs.; 100-lb. drums, $5.05 to $5.15 per 100 pounds; 25-lb. and 50-lb. drums, $5.15 per 100 pounds; bulk in 12½-lb. irons and bladder putty in barrels, $5.40 per 100 pounds. The differential between standard putty and pure putty has been advanced 50c also, which makes pure putty now $1.75 per 100 pounds higher than standard putty. There is a scarcity of whiting at the present time owing to the shipping situation, and this fact, together with the higher cost of containers, has operated to cause the advance in this commodity.

Glass Stocks In United States Light

Toronto.

GLASS.—There is an evident shortage of glass stocks in the United States at the present time, as shown by returns made by five of the leading dealers in that commodity, and which have been forwarded to some of the local dealers for their reference. These stock sheets show that there are very few stocks of the sizes that are in demand. Some glass dealers in the United States will not take orders until they see the specifications. If they have not the sizes in stock they are unable to fill the order. Local dealers assert that if any demand develops for glass in the spring there will in all probability be an advance in price. Quotations are still made on the basis of 40 and 10 per cent. for single and double diamond and 33 1/3 per cent. for cut lights.

Booking Business On Paint Promising

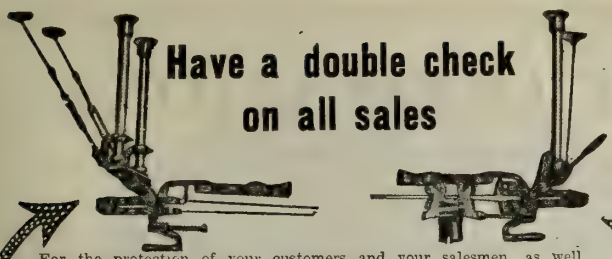
Toronto.

MIXED PAINTS.—Now that travellers have been on the road since the first of the new year in an endeavor to round up business for spring shipment, some indication is at hand of the trend in buying. Manufacturers state booking so far has been quite satisfactory, and everything seems to point to a favorable year. Linseed oil is in strong market, and while a decline has been announced in the price of white lead in oil, intimation is made that an advance may soon be made.

IMPORTANT BRITISH MEASURE RESPECTING TRADE MARKS

A bill pending in the British Parliament provides that if the proprietor of a word trade mark uses his mark so as to lead the public to regard it as the name of an article, it shall be removed from the register of trade marks. Representatives of American manufacturers in England are much alarmed over the situation for the bill, if passed, will seriously injure a number of American articles which have become popularized through name trade marks. It is also probable that such names would be imitated under the same name and there would be no redress. It is quite evident that this condition of affairs would entail untold loss to some manufacturers and might in some cases ruin their business in Britain. Owing to the restricted cargo space in ocean tonnage, it is further feared that English manufacturers might get a firm hold on the English market before cargo space is increased and normal conditions resumed.

Robert P. Skinner, American Consul-General in Britain, has been watching the situation closely and it is stated that if his efforts are unavailing Washington will probably be asked to intercede with the British Government for the removal of some objectionable features of the bill.



OUTPUT OF STEEL CO. PLANT CURTAILED

Operations at the Steel Company of Canada's Hamilton plant are being affected by the shortage of coke. One blast furnace has been banked but the other is still producing basic pig-iron for making steel. The furnace which has been banked was producing foundry pig-iron, so the supply of this material is limited, stocks on hand only being utilized to meet contracts. The embargo which has been placed by the Dominion Government on the export to foreign countries of iron and steel products has affected the company's export business by cutting off certain of its markets. This, however, will relieve the domestic situation to some extent by diverting supplies of these materials for consumption in Canada, so the company will not suffer to any appreciable extent in regard to its earnings on this account. The acute coke situation further justifies the company's policy in building its own coke ovens and by this means ensuring sufficient supplies. The construction of these ovens, however, will not be finished in time to relieve the present pressing situation but will be in operation probably in the early summer.

AUTO INDUSTRY RANKS NEXT TO SHIPBUILDING

(Continued on page 57.)

business dealers ought to stock up for a full normal business. If there are fewer passenger cars made those already in commission will be used all the harder to do transportation work required. At the end of 1917 there were about four million and a half passenger cars in service and if to these only a million new cars are added, the total will reach nearly six million, requiring a tremendous volume of accessories. Figuring five tires to the car, there will be needed over 30 million tires for the year 1918. Certainly the outlook for automobile accessory sales is encouraging to say the least.

Have a double check on all sales

For the protection of your customers and your salesmen, as well as for yourself, there is nothing to equal a Cash Carrier. The system not only obviates running, but gives salesmen more time to sell goods. It also insures a double check against errors, from the fact that there are two persons in every transaction, each checking the other.

We have a four-page leaflet that tells crisply a good many facts about it. Will you write for one to-day?

Level, Grade and Perpendicular Wire Cash Carriers, Parcel Carriers, Cable Carriers and Pneumatic Tubes.

"RETAIL ADVERTISING—COMPLETE"

By

Frank Farrington

Here's the book that you have been looking for to help you solve your advertising problems. No retailer should be without a copy.

It contains lively and instructive chapters on window dressing, sample advertisements, interior advertising, outdoor advertising, business making propositions, advertising special sales, newspaper advertising and many other ideas and suggestions that you can turn into money.

"Retail Advertising—Complete" contains much information and many ideas.

Start to-day to solve your advertising problems by sending $1.00 for your copy of this book.

MacLean Publishing Co., Ltd.
(*Technical Book Dept.*)
143-153 University Ave. - Toronto, Ont.

Salesmen Wanted

Men who have worked up a connection with the trade are far more valuable to you than inexperienced men. The way to locate them is through your trade paper because wide-awake salesmen read it. When in need of salesmen use the Want Ad Page; the rates are 2 cents per word first insertion and one cent per word for each subsequent insertion, a charge of 5 cents extra is made for Box Number to cover cost of forwarding replies.

THE great demand for Berry Brothers' Varnishes, Enamels and Stains grows steadily greater as consumers realize their value from the double standpoint of beauty and economy.

The enduring quality of the finish produced with "Berry" products is a money saving feature that makes a special appeal to the buyer at this time when labor costs are so high.

Liquid Granite Floor Varnish, Luxeberry Enamels (white, ivory and three shades of gray), Luxeberry Wood Finish, Luxeberry Wall Finishes and Luxeberry Spar varnish are among the celebrated "Berry" brands that are easy to sell because of their national reputation for beauty, durability and economy.

Write for descriptive catalogue and interesting dealers proposition.

"The Bristles Can't Come Out"

BOECKH'S STEEL (RUBBER SET) GRIP BRUSHES

THERE'S a double-barrelled sales argument in that name—"Boeckh's **Steel Grip Rubber Set** Brushes." The "bristles **can't** come out," because they are first set in hard rubber and then bound tightly and firmly with compressed steel Ferrules.

Master Painters, as well as amateur painters, appreciate the "Painting satisfaction" that is assured by "Steel Grip-Rubber-Set."

JAMIESON'S
PURE PREPARED PAINTS

Now is the time to consider your paint and varnish policy for 1918

Are you satisfied with your present arrangements? Have your sales been as large as your efforts deserve? Have your customers been satisfied with the goods supplied? Could you not do a better and bigger business with Jamieson's high quality paints and varnishes?

For many years Jamieson's paints and varnishes have given entire satisfaction wherever used. Made with only purest materials, from tried and tested formulas, they withstand extreme weather conditions and prove themselves to be the best investment for the property owner.

Dealers who handle the Jamieson line are making good profits and building up a steady connection of satisfied customers. There is no better paint or varnish than Jamieson's and prices are moderate.

It places you under no obligation to enquire as to our proposition and we will gladly furnish you with details on request.

There may be gallons trailing those little half-pints

The half-pints and pints of paint for which you are asked during the Winter are little opportunities to spread the "Moore" propaganda. A few judicious words in regard to the covering capacity, durability or general high quality of Moore's House Colors as you hand out the little can may result in the sale of gallons when the Spring painting season arrives. Keep in mind that the householder who does a little painting in the Winter is always the best prospect for a big order in the Spring.

Spread the good news whenever opportunity offers. You'll reap your reward when the warmer weather sets in.

Benjamin Moore & Company, Limited
WEST TORONTO

Big Market for Brushes

Will you let us say to you that there is a much larger market in every community than is generally perceived. We make a hundred or more different kinds of brushes. For example, there are **Meakins Brushes** for horse stables and carriage cleaning; for garages and automobile needs, for butchers, barmen, stove-makers; for walls, radiators, floors, bannisters, cornices; for kitchens, parlors, schools; for cream separators, gun barrels, bottles.

We do not suggest that you carry stocks or even a sample of every variety of brush, but we do suggest that you have our catalogue and familiarize yourself with our various brushes in order to be able to suggest the right brush to the right person for the right need.

Sell from our Catalogue—Just a last word: Meakins Brushes are good brushes—and our catalogue will tell you why. Our catalogue is valuable. Have you a copy?

TAKE CARE

of Your Customers' Requirements

YOUR business and its success depends on the good-will and faith your customers have in the goods you handle. Your customers appreciate the fact that you are able to supply them with what they need —they will need Insecticides this season to protect their crop.

The demand for Insecticides this year will be greater than the supply, and the only way to be sure that you can take care of your customers' needs is to see that your order for the following Insecticides is placed now:

CANADA PAINT COMPANY'S INSECTICIDES

C.P. ARSENATE OF LEAD DRY

Is an absolutely neutral Arsenate of Lead, of great fluffiness, which mixes readily with water and other mixtures, enabling spraying to be done with the greatest ease. C.P. Arsenate of Lead Dry eliminates foliage burning, deterioration and evaporation when not in use, and loss by packages bursting with the frost. One pound will do the work of two pounds of paste.

C.P. ARSENATE OF LEAD PASTE

For those who prefer the paste goods, C.P. Arsenate of Lead Paste will produce the best results. It is an absolutely neutral lead which can be used without any fear of foliage burning.

C.P. KALCIKILL

Is an arsenate of calcium or an arsenate of lime, which makes a perfect mixture with Lime Sulphur or Bordeaux Mixture. It is the most successful combination spray on the market to-day.

C.P. BUG-O-CIDE

Contains a large amount of Paris Green, making it a successful insecticide to combat potato bugs, and is known as the Potato Growers' Friend.

C.P. DRY LIME SULPHUR

Is Lime Sluphur in the dry powdered form. Light in gravity, mixes easily with water, and has greater adhesiveness and killing powers than the Lime Sulphur solutions on the market to-day,

You'll be as well satisfied as your customers if you push

Stephens'

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Every householder whom you persuade to use Silkstone instead of Kalsomine and other distemper colours will gain an enhanced opinion of your ability and knowledge. For Silkstone does so much better work—lasts longer—is more sanitary—won't rub off. In fact the advantages of Silkstone over other wall finishes are so many and so decided that one sale always means more to follow. So by persuading your customers to do the best for themselves you have really done the best for your own business.

There can be not the slightest doubt that your customers will be completely satisfied with Silkstone. They'll appreciate the ease with which it is laid, they'll admire its rich, soft tones, and they'll be pleased with its wearing and sanitary qualities. Pushing Silkstone is both profitable and pleasant.

There should be a "Stephen's" Agency in every locality. If there is not one in your district get after this exclusive agency right away. We've a paying proposition for the right man.

WANTED — THOROUGHLY COMPETENT foreman for tinshop in Maritime Provinces. Man with some knowledge of cornice work preferred. No boozer need apply. Apply A. B. C., care of Hardware and Metal, Toronto.

WANTED—FIRST-CLASS SALESMAN CALLing on hardware stores in eastern Toronto, to carry regular lines on commission. Box 723, Hardware and Metal.

FIRST-CLASS HARDWARE SALESMAN — state experience, salary wanted, whether married or single, and if exempt from military service. Do not apply if you cannot sell goods. Apply to D. A. Thomson, Coronation, Alta.

SITUATIONS WANTED

RETAIL HARDWARE CLERK WITH EIGHT years' city and two years' country experience in Saskatchewan is open for position as travelling salesman. Preferably in Saskatchewan. Age, twenty-five. Box, 510, Hardware & Metal.

HARDWARE SALESMAN, AGE 30, OVER 14 years' retail experience, open for engagement February first. Wholesale preferred. Box 724, Hardware and Metal, Toronto.

FOR SALE

FOR SALE—BUILDING AND STOCK OF THE Fraser Hardware Co., 1043 Granville Street, Vancouver, B.C.; good terms can be arranged; stock amounts to about $15,000. Fraser Hardware Co.

MISCELLANEOUS

STOVE REPAIRS FOR ACMES, CROWN Hurons, Jewels, Garlands, Pen Esther, Colonials, Peninsulars, and all kinds of stoves. Write for list and prices. Grundy Bros., Strathroy.

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada (tf)

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Toronto.

THE SUREST WAY FOR THE MANUFACturers' agent to connect with good live firms is to tell the manufacturers who read Hardware and Metal, all about his ability to sell their goods. Try an advertisement on the Condensed Ad. Page of Hardware and Metal, under this heading.

MISCELLANEOUS

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

IF YOUR HARDWARE BUSINESS IS FOR sale, who is more likely to buy it than a hardware man, be he merchant, clerk, or traveller? It is only hardware men who read Hardware and Metal, and a condensed advertisement in this paper offering your business for sale, will put you in touch only with the people who will be most interested.

FIRST AID IN THE KITCHEN +

A Good War Time Specialty

For mending holes in all kinds of Pots, Pans, etc. Graniteware, Aluminum and other kinds. Easily applied with the finger and ready for use in two minutes. Sells well at a good profit; put up in attractive display stands.

From your Wholesaler, or write us direct.

H. NAGLE & CO., BOX 2024, MONTREAL

VOL-PEEK

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

THE BUYERS' GUIDE

Cultivators
J. E. Gilson Mfg. Co., Port Washington, Ill.
C. S. Norcross & Sons, Bushnell, Ill.

Cutlery
Geo. Butler & Co., Ltd., Sheffield, Eng.
Caverhill, Learmont & Co., Montreal.
Goodell-Pratt Co., Greenfield, Mass.
James Hutton & Co., Montreal.
Canadian Wm. A. Rogers, Ltd., Toronto.
John Chatillon & Sons, New York, N.Y.
Jonathan Crookes & Son, Ltd., Sheffield, Eng.
Lewis Bros. Ltd., Montreal.
Landers, Frary & Clark, New Britain, Conn.

Cutters
Butterfield & Co., Inc., Rock Island, Que.
Trimont Mfg. Co., Roxbury (Boston, Mass.).

Culverts, Corrugated Metal
Winnipeg Ceiling & Roofing Co., Winnipeg.

Cuspidors
Thos. Davidson Mfg. Co., Ltd., Montreal.

Dairy Pails
Thos. Davidson Mfg. Co., Ltd., Montreal.

Dampers, Stove Pipe
Canada Foundries & Forgings, Brockville.

Dampers, Fire Place
Toronto Lock Mfg. Co., Toronto.

Dies, Stocks, Etc.
Butterfield & Co., Rock Island, Que.
Canadian Fairbanks-Morse Co., Montreal.
Pratt & Whitney Co., Ltd., Dundas, Ont.
Wells Bros. Co. of Canada, Galt.

Display Racks and Stands
Cameron & Cameron, Toronto.

Doors, Metal
Metallic Roofing Co., Toronto and Winnipeg.

Door Bolts
The Stanley Works, New Britain, Conn.

Door Checks
Canadian Yale & Towne, St. Catharines.
Wm. Newman & Sons, Birmingham, Eng.
Toronto Lock Mfg. Co., Toronto.

Door Hangers
Canada Steel Goods Co., Hamilton, Ont.
Taylor-Forbes Co., Guelph, Ont.
National Mfg. Co., Sterling, Ill.
Toronto Lock Mfg. Co., Toronto.

Door Springs
Jas. Cartland & Son, Ltd., Birmingham, Eng.
G. W. Mallory, Blenheim, Ont.
Wm. Newman & Sons, Birmingham, Eng.

Drills, Breast
Goodell-Pratt Co., Greenfield, Mass.
Stanley Rule & Level Co., New Britain, Conn.
North Bros. Mfg. Co., Philadelphia, Pa.

Drill Chucks
Goodell-Pratt Co., Greenfield, Mass.

Drills, Blacksmiths'
Canada Foundries & Forgings, Brockville.

Drills
Canadian Fairbanks-Morse Co., Ltd., Montreal.
Butterfield & Co., Inc., Rock Island, Que.
Goodell-Pratt Co., Greenfield, Mass.
North Bros. Mfg. Co., Philadelphia, Pa.
Stanley Rule & Level Co., New Britain, Conn.
Wilkinson & Kompass, Hamilton, Ont.

Dry Colors
Brandram-Henderson, Montreal.
Canada Paint Co., Ltd., Montreal.
R. C. Jamieson & Co., Ltd., Montreal.
Sherwin-Williams Co., Ltd., Montreal.
Ottawa Paint Works, Ottawa.
A. Ramsay & Son Co., Montreal.

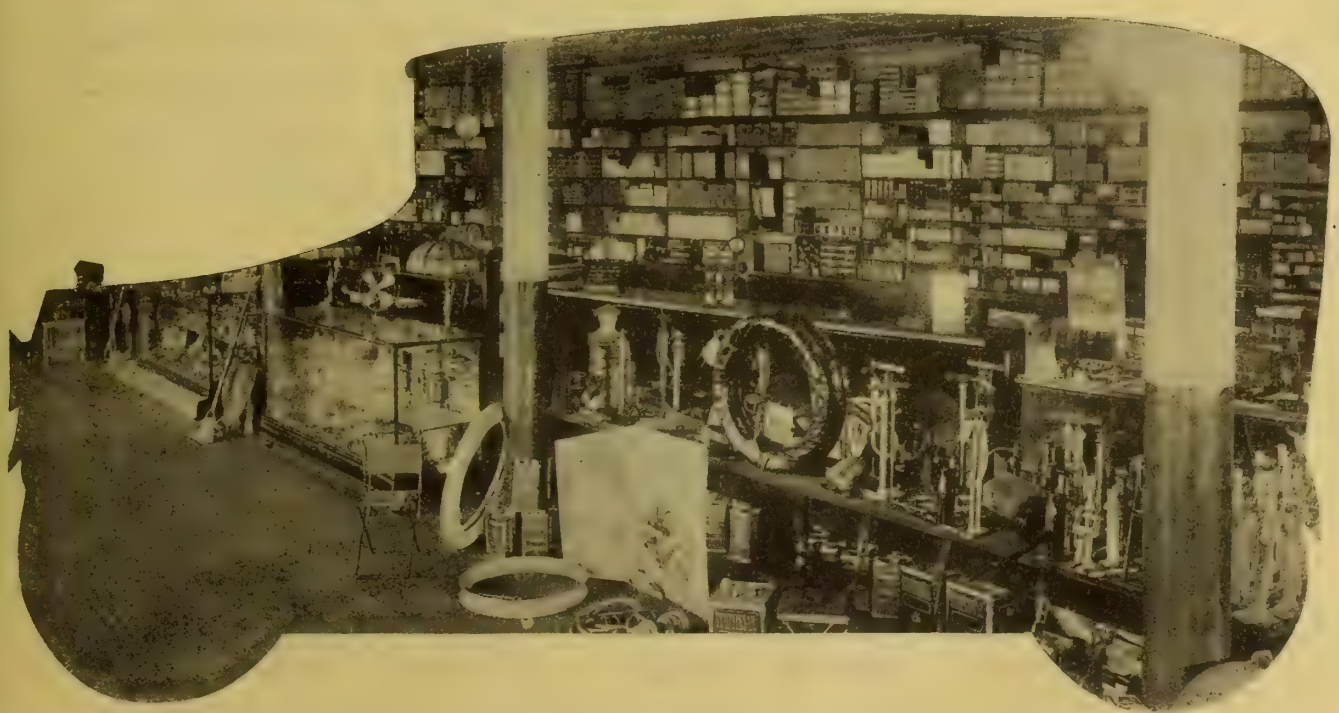
MAKING RAPID PROGRESS

THE *hardware trade of Canada is preparing for a BIG BUSINESS in automobile accessories for* 1918.

Elsewhere in this issue a new motor accessory department in a retail hardware store is described and illustrated. This department is being opened in time to take care of 1918 *business.*

A large hardware jobbing house is sending out three extra salesmen to specialize on motor accessories.



Another large hardware jobbing house is sending out two special salesmen to take care of their automobile accessory trade.

Hundreds of new motor accessory departments will be opened in retail hardware stores during the next four months.

Many already well-established motor accessory departments will be enlarged during 1918.

The hardware trade has practically gained control of the distribution and sale of motor accessories in Canada within a period of three years.

Actual investigations have proven beyond all doubt that the year 1918 *will witness even more rapid developments than previous years. There never was a time in the history of the Canadian hardware trade when wholesalers and retailers were more interested in any line than in motor accessories at the present time.*

View in retail Motor Accessories Department of J. H. Ashdown Hardware Co., Winnipeg, Man.

Fairbanks-Morse

AUTOMOBILE ACCESSORIES

Satisfaction, quick sales, repeat orders, rapid turnover, good profits. That's the story of a full stock of Fairbanks-Morse Winter Automobile Accessories.

WINTER BUSINESS

SPRING BUSINESS

A similar story of successful spring business will begin with having the goods. You should place your spring orders sooner than usual in order to make allowance for unsettled transportation conditions.

Get your name on our mailing list for a copy of our 1918 catalogue.

SHARP SPARKS

The Kopper King—rust-proof and anti-fouling, illustrating ½" regular thread.

The Goliath—a massive, heavy duty plug, illustrated in ⅞" x 18 regular thread.

Kopper King

A protection for the body of the plug, a heavy coating of copper, eliminates rust troubles, preventing absolutely the temper-trying exasperation of a spark plug rusted fast into the cylinder head.

But the copper surface does more, it prevents carbon deposits; carbon will not adhere to copper, consequently spark plug short-circuiting, the trouble-maker of smooth-running engine operation, is eliminated and the motor is at its best in pick-up, in ready response to the accelerator at all times, and in economical operation.

Coppered-covered asbestos gaskets cushion the porcelain, protecting it from the smashing, hammer-like blows of the exploding gas mixture.

A spark plug is more than a chunk of metal and insulator—it's the all-important transmitter of electric energy—it determines to a large extent whether the power ratio to gasoline consumption figures out as power-plus or power-minus.

Goliath

The shells are of heavy blued steel; firing points are of meter wire—a tough, non-fusible metal composed of nickel, steel, iron, copper and iridium.

Porcelains designed for super-strength at points of greatest strain are made of Cornish Kaolin mixtures hardened into insulators of rock-like strength, insure greatest possible freedom from insulation troubles.

Batteries Register Low Amperage When Extremely Cold

When receiving shipments of batteries these cold winter days do not be alarmed to find that they read low in amperage.

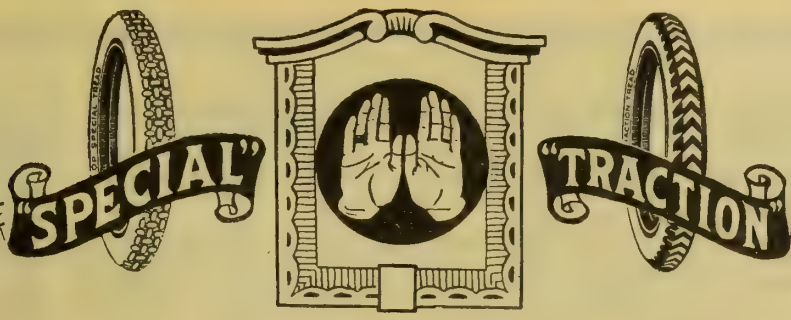
* * *

Naturally they will be chilled in transit or standing in freight sheds. Cold weather does not cause damage, but simply produces temporary reduction in amperage.

* * *

To get a true reading allow the batteries to stand in a room of normal temperature for twenty-four hours before selling them. They will soon come back to normal.

* * *



Order your stock of Master Batteries often to give your customers the best satisfaction.

DUNLOP AUTO TIRES

With so many low-priced so-called anti-skids obtainable, would that great host of motorists pay more for

"Dunlop Traction Tread"

if they could get its merits elsewhere?

Also, would that other large list of car owners buy

"SPECIAL"

if tires which somewhat resemble it in appearance resembled it in efficiency?

Dunlop Auto Tubes

Every Dunlop Tube is seamless—therefore, perfectly air-tight. The method of making them is automatic—cannot go wrong. Elasticity stays with Dunlop—so do countless motorists.

Dunlop Tire Accessories

Like Dunlop Tires and Tubes Dunlop Accessories are thoroughly dependable.

Besides being practical and readily adaptable, the range is wide to cover every need at prices no higher than what Auto owners have to pay for other kinds.

Ally yourself with the Dunlop Line

Dunlop Tire & Rubber Goods Co., Limited

HEAD OFFICES AND FACTORIES: TORONTO

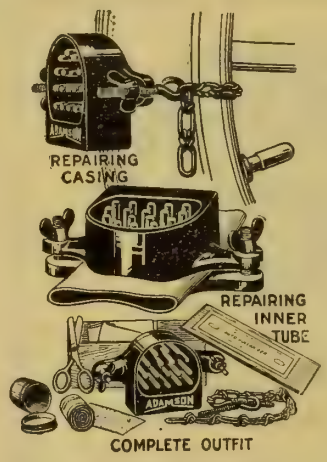
Branches: Victoria, Vancouver, Edmonton, Calgary, Saskatoon, Regina, Winnipeg, London, Hamilton, Toronto, Ottawa, Montreal, St. John, Halifax.

Makers of High-Grade Tires for Automobiles, Motor Trucks, Bicycles, Motorcycles and Carriages; and High-Grade Rubber Belting, Packing Fire Hose and General Hose, Dredge Sleeves, Military Equipment, Mats, Tiling, Heels and Soles, Cements, Horse Shoe Pads and General Rubber Specialties.

Where heavy service is demanded

North Star Multiples specially adapted for lighting and ignition service.

Selected cells put up in an attractive, blue, moisture-proof case. Every cell is insulated from the case and from the other cells. Heavy copper ribbon soldered to the terminals is used for connecting the cells, which are surrounded by a waterproof insulating compound. Just connect two wires to the binding posts and the battery is then ready to operate. A convenient handle is provided for carrying.



Made in several sizes to give various voltages and capacities.

If you wish to supply your customers with an ideal ignition battery for autos, motorboats, gas engines, tractors, blasting, barn lighting, etc., be sure and tell your jobber "North Star."

Adamson Repair Gum.

SHALER

5 Minute Vulcanizer

Mends Tubes in 5 Minutes

EASY TO USE---EASY TO SELL

Every buyer of a SHALER 5-Minute Vulcanizer becomes a booster! Every motorist who buys one shows it to his friends—gives them a demonstration—because it is such a wonderful thing.

This means big sales for you. As soon as you start selling the SHALER 5-Minute Vulcanizer, your customers will spread the news. You will quickly notice new faces in your store—new customers passing their money across your counters.

Complete Outfit With 6 Round and 6 Oblong Patch Units $2.00 in Canada

The dozen patches and combustible discs that go with the vulcanizer are soon used up—and the motorist comes back to you for more. He pays you 75 cents for every dozen of these units. You make a good profit.

Can you realize what a big repeat business this means for you? Can't you see how it will bring car owners into your place for additional "ammunition"—who will also buy other goods? And that is what you need to build up your business.

Place Your Order With Your Jobber NOW!

Don't delay! The enormous demand for SHALER 5-Minute Vulcanizers has exceeded our factory capacity to make deliveries. We are building a large 3-story addition to our plant. But—to make sure of prompt shipments—place your order with your jobber now—specifying date of shipment desired.

Complete catalog of full line of SHALER Vulcanizers for Motorists, Garages and Repair Shops mailed on request

VITAGAS
TRADE MARK

—"a wonder in the Automobile World"

ONCE TRIED—ALWAYS USED. 50% MORE POWER

Gives a big increase in mileage from gasoline and removes carbon troubles and the wear and tear in the operation of having carbon removed.

Vitagas has been endorsed by the most critical, so much so that one of Pittsburgh's automobile experts has pronounced it to be "a wonder in the automobile world."

A Gasoline Tonic.

Just as a tonic will build up and strengthen the blood of man, so Vitagas purifies and strengthens the elements of gasoline, giving it 25% to 75% MORE EFFICIENCY.

Add this live seller to your auto accessory department. The profit is big, and satisfaction doublesure.

McGRAW PRODUCTS

Pneumatic Tires ✓ Motor Cycle Tires ✓ Inner Tubes

Value

THE foundations of McGraw value are: 1. Large output, enabling economical production. 2. A high grade tire at a reasonable price. 3. Warranted mileage. 4. Widespread service.

These fundamentals have made the McGraw Plant one of the largest tire factories in America and have built a permanent, profitable business for wholesale distributors through whom McGraw, Imperial, Pullman and Congress Tires and Tubes are sold.

There are other factors also, which emphasize the value of McGraw Products and Policies to the distributor, dealer and user. Let us tell you more about them.

Helping Dealers to Sell

This year the consumer demand for Champions will undoubtedly be greater than ever.

The number of automobiles in Canada has increased over fifty per cent. —replacements must be in the same ratio.

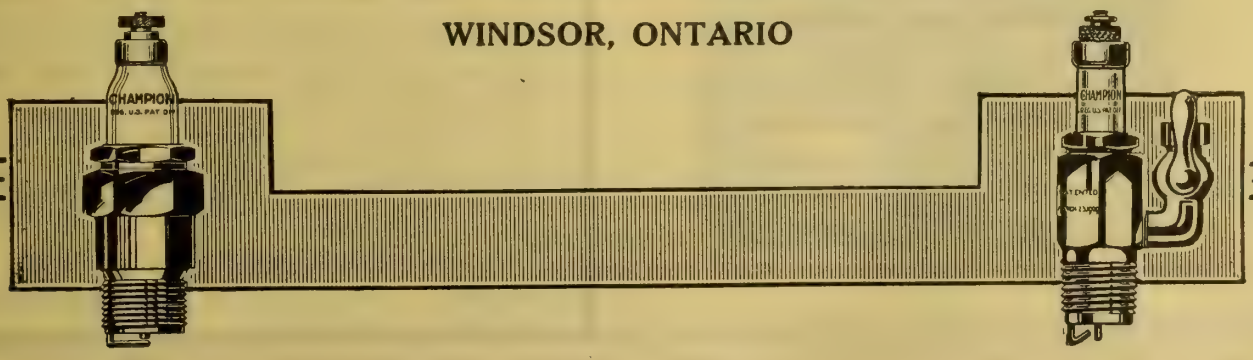
Champions are equipment on an overwhelming majority of all Canadian cars—new and old. Dealers who have the foresight to stock the full line are bound to cash in on

Champion

Dependable Spark Plugs

Our advertising campaign is even more extensive than last year and will blanket Canada from coast to coast during the driving season. Our Advertising Service Cars will visit every possible dealer with new selling helps.

Our production capacity has been almost doubled so that there will be no delays in deliveries.



All Champion Spark Plugs are guaranteed to give absolute satisfaction to the user, or full repairs or replacement will be made.

Place your order for Champions now with any jobber in auto supplies that you may get all the possible profits when the driving season opens.

We shall be pleased to have you visit our exhibit at the Montreal Motor Show.

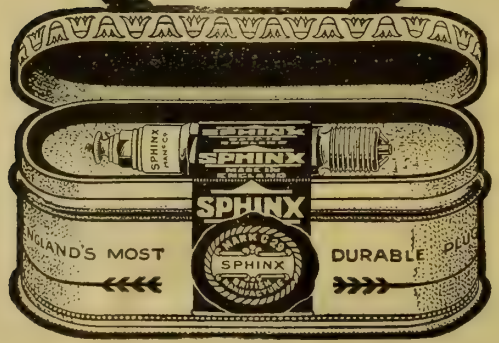
The Originality

which has secured for Sphinx Plugs their position of honour throughout the world also finds expression in the mode of their packing.



The arrangement is such that without breaking the seal which holds the

"SPHINX"

plug in the box, the lid may be lifted, revealing a removable card fully descriptive of the type of plug. Thus the obvious merit of sealing is coupled with the equally essential advantage of knowing precisely whether the plug under the seal is the pattern suitable for the purpose in view.

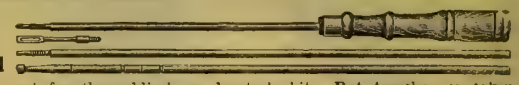
MONTREAL

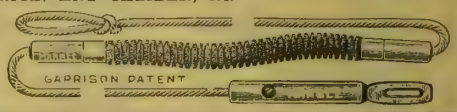


Now There's A Double Demand For MARBLE'S TRADE MARK Specialties

In addition to the regular sportsmen's and hunters' demand for Marble's outdoor specialties, there's a big military demand for Marble's rifle rods, cleaners, oil, ropes, broken shell extractors, waterproof match-boxes, and other specialties. The Marble gun "tools" are particularly popular with "the boys" because they make it possible to keep a rifle clean with the very minimum of time and effort.

The few items shown here are all-winter sellers. Prices quoted are list—you get worth-while discounts.

Marble's Jointed Rifle Rod



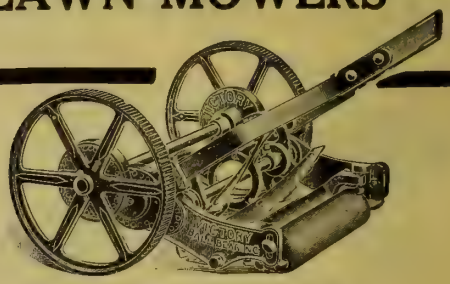
is the ideal rod for the soldier's or hunter's kit. Put together or taken apart in a minute. Require little space—weighs but a trifle. Made of brass it will not rust. Can't wobble, bend or break. And won't unscrew at joints when following the rifling in barrel. Cleans THOROUGHLY. all sporting and military rifles. All calibers. Lengths 26 to 34 inches. PRICE, $1.00, complete with cloth bag, any caliber, any length.

Marble's Rifle Cleaner

In big demand right now for sporting and military arms. Fits Marble's Jointed Rifle Rod or any other standard rod. Made on right principle for thorough cleaning without slightest injury to gun. Removes all lead, copper, rust and powder residue. Made for all sporting and military rifles and revolvers. PRICE, ANY CALIBER, 50c.

Marble's Field Cleaner

Marble's Field Cleaner is a Marble's Rifle Cleaner equipped for cleaning guns when in the field. Cord has loop at one end—weight at other, as shown. Loop fastens to twig, weight is dropped through barrel and gun is moved back and forth to clean, saving labor. Gets at the bad spots. Easily carried in pocket. All calibers, PRICE 75c. Pull-Thru for Shotguns, $1.00.



SEE YOUR JOBBER—WRITE FOR CATALOG.

If you aren't a Marble Dealer, send TO-DAY for Catalog No. 18 and Dealer's Proposition. If you are a Marble dealer, send for Marble's Dealer Helps and boost your sales.

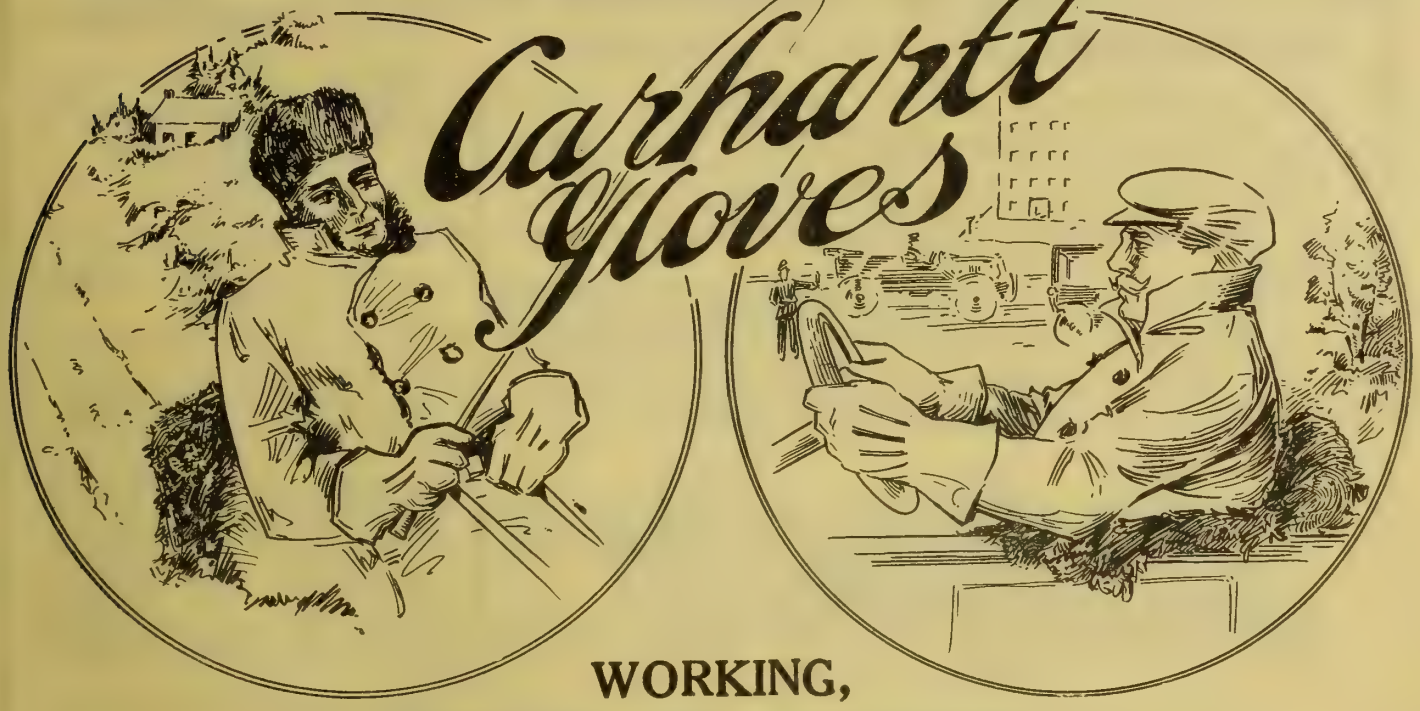
TOWNSEND'S

LAWN MOWERS

BUILT LIKE A WATCH

TOWNSEND MOWERS are superior in every feature of design and construction. In strength, durability and high character of work they do, they have no rivals.



No Noise but the Swish of the Blades

All Blades are of crucible steel, oil tempered. Ball Bearings originally adapted to lawn mowers by Mr. Townsend, insure easy, quiet operation. Triple Compound Gears permit of maximum strength with minimum weight. They are entirely enclosed and prevent dirt or grass clogging the pinions. Handsomely finished in colors and gold.

We manufacture a full line of mowers for use on Golf Courses. Send for complete illustrated catalogue and trade terms.

TORONTO UNIT

TORONTO MONTREAL WIINNIPEG VANCOUVER LIVERPOOL (ENG.)

Mr. Bruce's Counsel

SPECIFICALLY APPLIED, MR. BRUCE'S COUNSEL may be said to recommend that business men should read every week THE FINANCIAL POST OF CANADA, to inform themselves concerning current events in the realm of Canadian business and public affairs.

Frank E. Mutton, Vice-President of the International Time Recording Company, of Canada, wrote the following letter to the publishers of THE POST:

Attention, Editor:

Recently we sent you a subscription covering the delivery of THE FINANCIAL POST to each of our Sales Agents and Salesmen throughout Canada. This was prompted by the fact that, in our opinion, your paper is the best barometer in Canada of what is going on in the different industries from one ocean to the other in this country. Your paper contains information invaluable to any traveling representative of any firm.

(Signed) F. E. MUTTON.

Dated Oct. 12, 1917.

IN effect, THE FINANCIAL POST represents a Current Events Club, met weekly for the consideration and study of current affairs in Canada in relation to itself and the world at large. It represents the assembly of many, many surpassingly well-informed contributors who discuss intelligently, lucidly and proportionately, Canada's public and business affairs. No more stimulating and worth-while paper is published in Canada for the man who wants to be able to talk confidently, at the club, luncheon, board meeting, business council, public meetings, about Canadian public affairs.

THE price, $3, is nothing to the man who really wants to know. Three dollars spent for knowledge that multiplies a man's power and pleasure and satisfaction is a small, small sum to pay. We make our appeal for subscriptions to men who really want to know and who will take time each week-end to read profitably.

If you are willing to give this time, prove it by signing and mailing the coupon below

The Financial Post
of Canada

.....1917

THE MACLEAN PUBLISHING CO., LIMITED,

Talk Current Events

A Talk by H. Addington Bruce, Author of "The Riddle of Personality," "Psychology and Parenthood," Etc.

WHAT do you know about the doings in this great world wherein we live?

Do you try to form a really intelligent and well-considered opinion regarding events the world over?

Do you ever discuss their significance with friends and neighbors?

If asked what you think of any particular event, you are perhaps ready with an answer. Is your answer anything but a snap judgment, determined by prejudice rather than by reasoning analysis?

I put these questions not to be disagreeable, but because, if necessary, I want to spur you to appreciate the value that there is in discussion of current events.

Many people, fortunately, appreciate its value instinctively. Perhaps you are one of these. Many others are beginning to appreciate it.

This is shown by the growing popularity of clubs and classes on current events.

Only a few years ago such clubs and classes were almost unheard of. To-day most of our bigger cities have half a dozen of them or more.

In one city—Boston—a talented woman of my acquaintance draws an income of thousands of dollars a year from her leadership of current events classes.

Other men and women have similarly discovered that interest in current events is increasing so rapidly that they can well afford to organize classes like those conducted by the Boston woman.

Still, there remain many people—thousands of people—who never discuss current events. Many thousands more discuss only such events as come under the headings of "crime," "the theatre," and "sports."

These are the people I want to reach. They are the people I want to rouse to recognition of the practical helpfulness they will find in discussion of current events in general.

Current events clubs and classes might well be organized in every neighborhood, with weekly meetings to take up the outstanding happenings in international affairs, national politics, literature, art, music, science and industry.

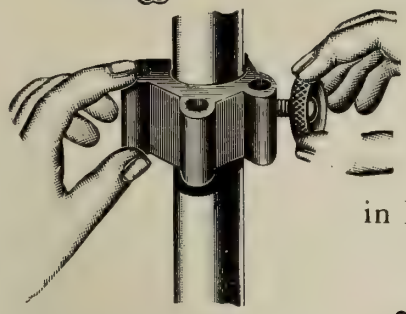
Regular attendance at, and active participation in, these meetings will prove to be an education in itself.

It will enlarge the mental horizon and broaden the moral sympathies. By disciplining the mind to active thought it will raise the level of workaday efficiency.

It will make for a more alert, a more conscientious citizenship. It will give zest and color to a life which perhaps has hitherto been pathetically drab.

Unsuspected powers will be awakened. With a better grasp on the realities of life, the whole personality will expand.

One evening a week is certainly not too much to give to a discussion of the day-to-day developments in our wonderful world.



It may mean doing without an evening at cards or at the musical comedy, or at the dance hall. But this, after all, is not a terrible sacrifice.

And from the occasional talk over current events will come more profit than could possibly come from any number of evenings spent in card-playing, dancing, or listening to musical comedies.—Reprinted from the Toronto Daily Star.

Hack Saw Mileage

Just as some tires puncture and some wear out, some hack saws break, others dull quickly.

The utmost in hack saw mileage requires a saw that is hard enough to cut keenly, yet not too brittle.

Starrett Hack-Saws

give the utmost mileage—they are of the highest quality just as Starrett Tools are of the highest quality. Tungsten steel to start with, milled teeth, the right set, and hardened just right for the metal it is intended to cut. And this hardening is important—combined with the right shape of teeth and the best number per inch it insures quickest cutting, thereby saving mechanics' time—the greatest possible saving. But to get most mileage from a hack saw, even a Starrett, the right saw must be used. It's easy to find out what is the right saw for the metal or shape—from page 208 of the Starrett Catalog No. 21MA.

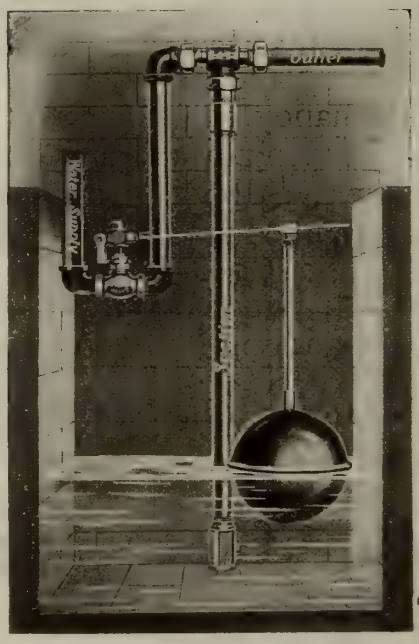
To-day—write our Hanger Dept. for particulars of how we can help you sell more Hangers.

Canada Steel Goods Co., Limited, Hamilton, Canada



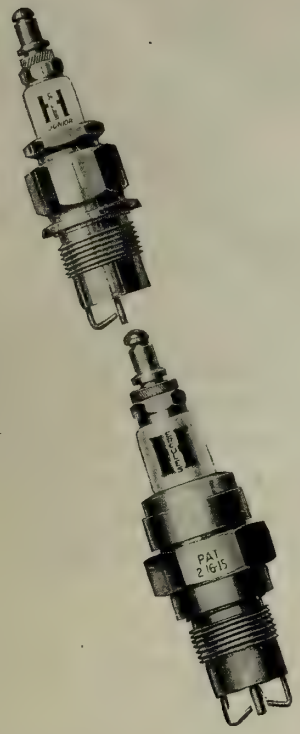
THE "MORRISON"

Automatic Cellar Drainer

For ease of operation and simplicity of construction, this cellar drainer has no equal. It can be installed easily and takes up very little space. No complicated cams or levers to get out of order, and all working parts are placed above water.

This is a very important feature in cellar drainers, because when such an appliance is submerged, it is liable to get dirt into the moving parts.

No such trouble for you if you instal a "Morrison."



No part of a sanitary system can cause so much damage as can a poorly constructed cellar drainer. The whole contents of a basement are liable to damage.

Building foundations are protected and all other assets below the ground floor when a Morrison cellar drainer is installed. We have been established over 50 years, and all our experience stands behind the "Morrison." Let us furnish you with full particulars and prices before you decide to buy your next lot of cellar drainers.

There are no "come backs" to Reliable Churn Sales

The only time an owner of a "Reliable" Churn comes back at the dealer who sold it is when she comes back with a friend who wishes to own a "Reliable" also. The "Reliable" is so simple in construction, so easy of operation, so clean, so sanitary, that it never gives trouble, gets out of order or smells musty. Cannot dry up and fall to pieces when not in use and allows of no possibility of loss of cream through leaving plug out or latch unfastened.

The "Reliable" ensures clean butter-making and perfect results with a minimum of labor, and it can be worked with a far greater quantity of cream than any other churn of its size.

Many Hardware Dealers are finding it profitable to supply "Reliable" Churns. It can be made profitable for you.

To meet the new demand for Florist Tools

The added impetus given to gardening by the Greater Production Campaign has revived interest also in flower gardening. There will be more people planting and transplanting flowers this season than ever before. Here is a new demand that will be well worth meeting.

Besides the styles of trowels shown here we have a few English patterns which should prove very popular. We have twelve styles in addition to Transplanting Trowels, Ladies' Spades and Spades suitable for carrying in an automobile. We have also six styles in Forks, twisted and straight handles. We are constantly adding to our lines in order to offer as comprehensive a range as can be obtained anywhere.

These goods are of high grade material and are nicely finished. You can sell them at a good profit. Write to-day for particulars.

Kills The Losses

Why should housewives take **all** the risk in regard to honest mistakes in weighing? It certainly is easy to convince her she shouldn't, and that a Renfrew scale will save not only risk but many actual losses. That builds up sales for **you.**

An ordinary, doubtful scale would only add useless disputes. The Renfrew is accurate for every weight from ½ oz. to 30 lbs., and its owner can prove her weights every time by means of the Government Inspector's Certificate which goes with every Renfrew.

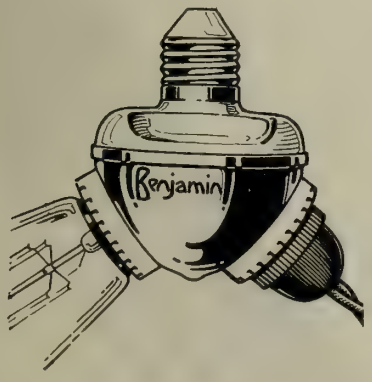
The Renfrew is made in black finish, or in all-nickel finish suitable for candy stores or homes desiring something a little bit better. Write for literature and attractive selling proposition.

The Renfrew Household Scale

Guaranteed to weigh accurately Capacity: ½ oz. to 30 lbs.

The Renfrew Machinery Co., Limited

Head Office and Works, Renfrew, Ont.



Eastern Branch: Sussex, N.B.

Western Representatives:

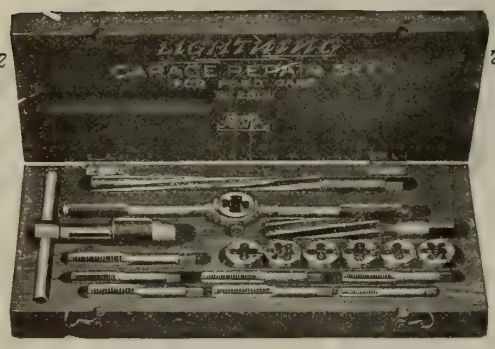
Foundry Products, Ltd., Calgary, Alta.; Crandall Co., Ltd., Vancouver, B. C.

Our other lines: "Renfrew" Cream Separators; 2,000-lb. farmer's truck scale, tractors, wood-saws, grain grinders, etc.

In every house that's wired

there is need for at least one of these convenient two-way plugs

In nearly every home wired for electricity will be found some device which is heated or driven by power obtained through an ordinary lamp socket. Every time the device is used a lamp must be unscrewed, and the extension from the device attached. The housewife who has to repeat this performance every time she wishes to use iron, fan, toaster, etc., is only too pleased to meet up with Benjamin Two-Way Plug. The Benjamin Two-Way Plug gives an always-accessible outlet for power without in any way interfering with lighting arrangements.



If electricity is used in your locality you should make a sale to every home. Stock up. They're profitable. Standard finish in brushed brass.

The firm who inserted the above advertisement in HARDWARE AND METAL showed good judgment.

Naturally, replies would only come from clerks who were in the habit of reading HARDWARE AND METAL—and every hardware merchant realizes that a clerk who reads HARDWARE AND METAL is the kind of clerk he wants, because he will be thoroughly informed on market conditions, new selling plans and the best methods of window display and advertising. The above advertisement brought in 23 replies. It cost only 67 cents.

USE THE WANT AD. PAGE.

Stanley Works

Products are made-to-order

THERE is nothing quite so satisfactory as to make for yourself whatever you want, exactly the way you know you want it. That is the way THE STANLEY WORKS products are made.

The steel used in STANLEY products is manufactured by THE STANLEY WORKS in its own steel mills. THE STANLEY Steel Plant is one of the best equipped Cold Rolling Steel Mills in the United States.

Depending upon the use to which it is to be put, there is considerable difference in the composition of the steel from which the great variety of STANLEY products are made. A STANLEY plated butt is manufactured from one kind of steel; a STANLEY japanned barrel bolt from another.

Tireless experimenting and seventy-three years of experience has shown THE STANLEY WORKS just what kind of steel is best for each and every item it produces. Having once found what kind is best, it is made to order by skillful workmen in THE STANLEY WORKS' own steel mills.

STANLEY products are superior because the material from which they are made is scientifically prescribed in each case, and then carefully manufactured by THE STANLEY WORKS itself to meet the requirements of your trade.

Next time you order shelf or builders' hardware be sure to specify STANLEY products by name and number. If you have not a copy of THE STANLEY WORKS catalog write for it to-day.

Canada's National Hardware Weekly

HARDWARE AND METAL

Published Every Saturday Since 1888

Vol. 30 TORONTO, JANUARY 19, 1918 No. 3

Shortage of Merchandise Threatens

Production Suffering Through Want of Coke — Manufacturers of Finished Article Feeling the Pinch—War Industries to Get Preference — Business Outlook Good if Merchandise Available

CONDITIONS in the manufacturing centres in the United States have reached an acute stage. Production of pig iron and steel has been greatly curtailed, and already those steel plants which are not working on government contracts are experiencing considerable difficulty in securing the necessary supplies to keep their plants running. This has, of course, been accentuated by transportation difficulties which the recent storms, in addition to the coal shortage, have greatly enlarged.

In talking to HARDWARE AND METAL, a representative of one of the biggest steel manufacturing plants in the United States, which supply a large proportion of the hardware trade in Canada with their merchandise, stated that they hardly knew where they stood. They had been given to understand that no discrimination against what might be termed non-essential industries would be exercised for some time at least, but the fact remains that this concern is not getting the supplies of steel necessary to carry out their 1918 manufacturing program, and other plants are similarly placed.

Whether relief can be looked for when conditions have reached a state nearer normal is decidedly uncertain. Most assuredly every effort to speed up the production of materials needed in the conduct of the war will be made, and it would appear that all industries not actually engaged in war work must take second place in the matter of materials.

From the States comes the news that blast furnace and steel works' operation are verging on complete demoralization. Conditions are reported to be the worst in the history of the industry. This is bound to have a far-reaching effect on products which can be done without, as it will take weeks, and even months, to overcome the present production shortage and supply those mills which are being held up on their government contracts.

Manufacturers of steel products in Canada depend largely on their supplies coming in from the United States, and embargoes which have been placed on shipments from our neighbors increase the difficulties now being experienced in turning out goods for the regular channels of trade. Only where it is shown that war work is contemplated will shipments be released to Canadian plants at the present time.

EXTRACTS FROM RULES GOVERNING WAR TRADE BOARD'S ACTIVITIES

The War Trade Board, to which all applications for licenses to export must be sent, has, as the basis of its duties, the proclamations issued by the President on June 15 and August 27, 1917, with the list of goods then issued having been added to materially. In part the proclamation reads: "Now therefore, I, Woodrow Wilson, President of the United States of America, do hereby proclaim to all whom it may concern that the public safety requires that, except at such time or times, and under such regulations and orders, and subject to such limitations and exceptions as the President shall prescribe, until otherwise ordered by the President or by Congress, the following articles, namely: Fuel oils, lubricating oils, kerosene, gasoline; pig iron; steel ingots, etc.; tool steel, high speed steel and alloy steels, and machine tools; arms and ammunition, all explosives; turpentine; leather belting; copper; lead and white lead; tin, tin plate; nickel, aluminum, zinc; shall not be exported from the United States."

Following this proclamation additions and reservations have been made which show the following items on the conservation list and subject to approval by the War Trade Board before shipment will be allowed: Articles of bronze (unless containing less than 10 per cent. copper); nickel (more than 5 per cent.); finished articles of hardware containing not more than 10 per cent. of copper; aluminum, and articles made entirely thereof; copper and articles made entirely thereof; silver plated ware; all articles containing tin.

From this list it will be found that many of the manufactured hardware goods will be covered, and delays are bound to occur in securing licenses to ship with a possibility that applications may not be granted. The developments of the future can not be predicted safely—it is to be hoped that no serious curtailment of goods coming into Canada will result.

Another large manufacturer of cutlery and household appliances states that it is now necessary to secure a permit to ship any goods which contain more than ten per cent. of steel, brass, copper, zinc or aluminum out of the country. It may be true that a great deal of red tape has been eliminated from the war machine as now constituted in Washington, but most assuredly delays are bound to occur in making shipments of this firm's product, with a possibility that permission will not be granted when the request is made.

It is being brought home to all manufacturers that the first consideration is war—all other matters are decidedly secondary, and without assuming a pessimistic attitude, it is necessary that the situation be faced fairly and a consideration of possibilities given. There are none who are willing to come out and make a straight prediction as to what is going to happen—those who will even attempt to outline what may happen are few, there are too many angles to the question—all admit, however, that the future is serious, but are hoping for developments of a reasonably satisfactory nature. Six months hence may show improved manufacturing conditions, but it is also probable that the "short lists" will grow longer. Hardwaremen will make the best of the situation, undoubtedly, and push the sale of those goods which are procurable.

In the meantime, reports from practically all sources indicate that business for this time of the year is excellent. It was stated to HARDWARE AND METAL by the representative of one large jobbing concern that the past week's booking business represented a greater volume and greater variety of goods than they had secured during the entire month of January last year. This would indicate a willingness on the part of retailers to take advantage of all opportunities given them to place orders so that they will stand the best opportunity of securing the merchandise.

It is understood that jobbers feel reasonably sure that they will be able to secure the goods on which bookings are solicited, but they are in a rather peculiar position, too, as manufacturers will not guarantee delivery of orders placed with them. However, the system now in vogue has worked out so successfully that it is considered best not only from the retailers' but from the jobbers' standpoint as well. Being covered for the next few months would appear to be good merchandising on the part of all retailers.

Convention Program Taking Shape

Proposed Program For O.R.H. & S.D. Association Convention Announced—Trend of the Markets, Cost of Doing Business, Advertising, Salesmanship, Mail Order House Methods, Will All be Covered

ON the opposite page appears the partially completed program of the Ontario Retail Hardware and Stove Dealers' Association for the fourteenth annual convention to be held at Hamilton Feb. 19, 20, 21. Several prominent figures in trade circles have been asked by the officers of the Association to be present and address the convention on topics of interest to the trade at this time. The officers are determined to institute several features in connection with the coming convention, which were lacking at the last meeting.

The meetings will be called on schedule time—will be run on time—and addresses will be kept within the time allowance. Members of the retail association, only, will be admitted to the closed meetings. Badges will be provided for members and visitors. Several meetings will be open to members, associate members and visitors.

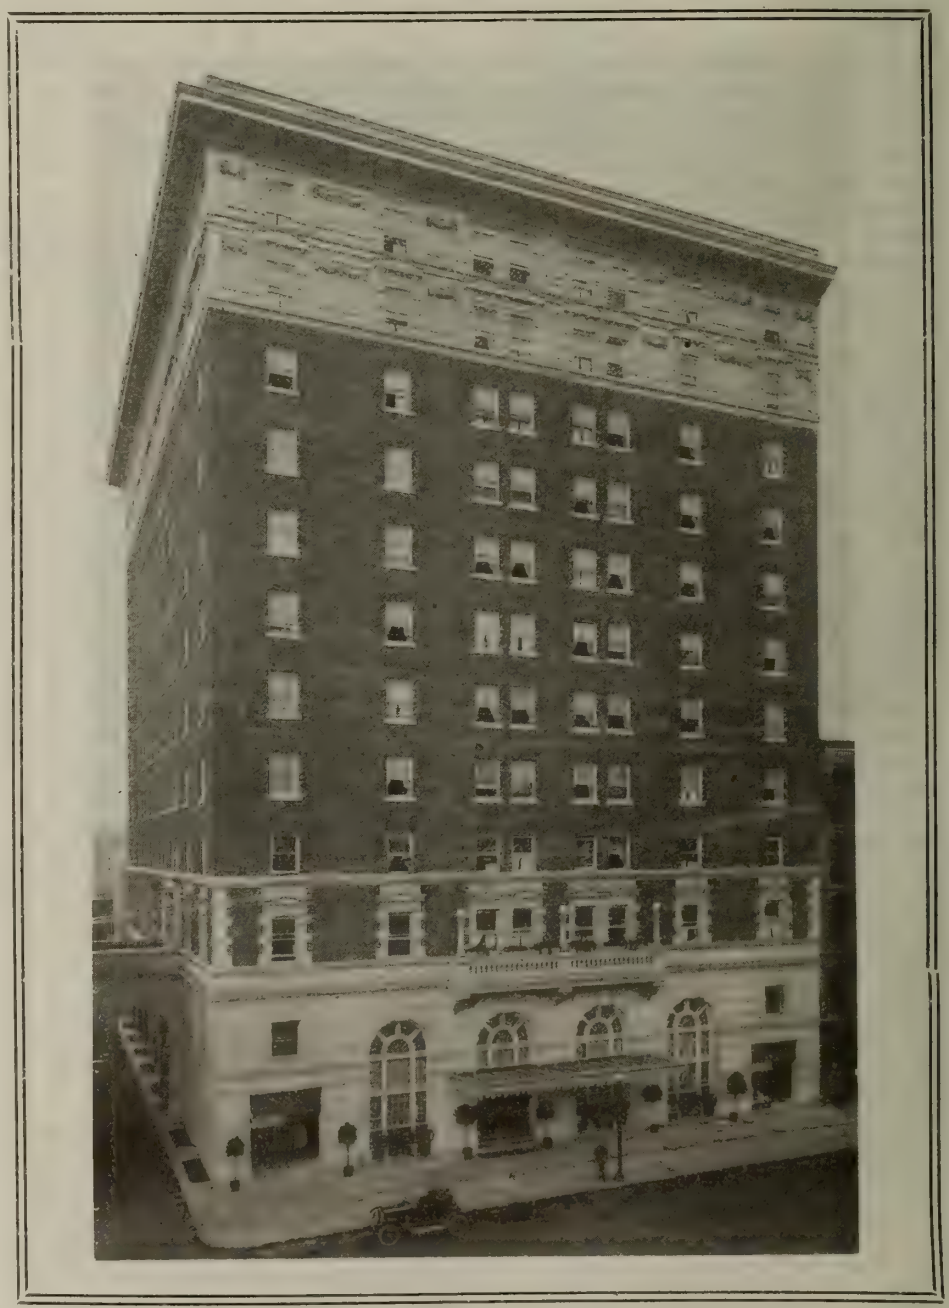
The Markets

Several prominent manufacturers have been asked to address the convention on the market situation and the future outlook. These addresses alone will be well worth the time spent in attendance at the convention.

Unusual market and business conditions have had to be met and dealt with by retail merchants during the past three years of war. The present year presents even greater uncertainties and possibilities. The 10 minutes' addresses which have been arranged will undoubtedly give the merchant a broader outlook on the subjects dealt with. These talks will be given by prominent manufacturers and wholesalers who make a careful study of the primary markets, whose policy it is to study all the elements which may have a favorable or unfavorable influence on their business. The information which they will impart should be of direct interest and advantage to all retail merchants in the successful conduct of their business.

Business Problem

There are many angles to subjects relating to the "Cost of Doing Business" and other business problems that many merchants are not clear as to what is really the correct method of arriving at cost and sales figures. The address to be given by John C. Kirkwood, business counsel, who has made a profound study of the whole subject, will undoubtedly cover the field thoroughly. At the conclusion of the address, members will be given an opportunity for discussion; any point on which they are not quite clear can be brought up and will be answered by Mr. Kirkwood. Several phases touching business problems will be taken up by Mr. Kirkwood, and judging by the manner in which he has handled retailers' meetings on other occasions, this session should be one of the most practical and beneficial of the convention.



An address and discussion on salesmanship by a prominent speaker, whose name will be announced later, is also a feature of the convention program.

Advertising From All Angles

A. A. Briggs, advertising manager Dunlop Tire & Rubber Goods Co., who has had an unusually wide experience in all branches of advertising, has been invited by the Association officers and has consented to deliver an address on advertising. Mr. Briggs's ability as an advertising manager and public speaker is well known to some members of the trade, and his address will undoubtedly prove of great interest to those in attendance at the convention.

Mail Order Houses

An address on "Methods and activities of mail order houses and department

Royal Connaught Hotel, which will be headquarters for Retail Hardware and Stove Dealers' Association Convention, at Hamilton, Ont., next month.

stores" will be delivered by G. D. Davis, manager HARDWARE AND METAL.

Question Box Sessions

The question box sessions promise to afford solutions to many problems confronting the retail merchant. It has been intimated that these discussions will be in charge of those qualified to speak on subjects which may arise and it is hoped members will avail themselves of the opportunity to secure an outside viewpoint which may assist them in the conduct of their stores. As a matter of fact one of the outstanding features of the convention this year will be the many opportunities for discussion on all subjects brought up. It is often from the questions asked and answers given that the greatest value from many of the subjects taken up is derived.

Manufacturers Will Exhibit

Other details in connection with the program are covered in the panel on this page. It is intimated further that a number of manufacturers have already signified their intention of having displays of their products, and members will be afforded an opportnuity of visiting these to look over any new lines being offered.

Good Attendance Looked For

Altogether it would appear from the program as now proposed that much real good can be derived by all members attending. The subjects to be covered are live and up-to-the-minute subjects which all retailers like to hear discussed and the keynote of the advisory committee's endeavors has been to offer something really worth while—to have a convention which no merchant would want to miss.

Laying the foundation for a bigger and better association has been the basis sought in arranging the program for this year's convention and it is hoped that merchants throughout Ontario will make it a point to be in attendance next month.

A more complete outline of the program and the part to be taken by each speaker will appear in next week's issue, along with the complete program.

Proposed Convention Programme

For Ontario Retail Hardware and Stove Dealers' Association

Tuesday, 19th February—

10.30 a.m.—Meeting of Executive, appointment of Convention committees. Reports of Officers for approval by Executive.

2.00 p.m.—Open Session.

Reception by Mayor and Trade Association representatives.

3.00 p.m.—Business Session for members

President's Address.
Secretary's Report.
Treasurer's Report.
Report of Executive and Advisory Committees.
New Business.

Evening—Open for entertainment.

Wednesday, 20th February—

9.30 a.m.—10 minute addresses on "Outlook for 1918," by following speakers:—

"The Linseed Oil and White Lead Situation," by H. M. Ashby, Esq., Managing Director Sherwin, Williams Co.

"A Forecast on Sheet Metal," A. T. Enlow, Esq., President Dominion Sheet Metal Co.

"Saws and Tool Situation," by H. P. Hubbard, Esq., General Manager E. G. Atkins & Co.

"Shovel Situation, Present and Future, As We See It," by W. E. Skelton, Esq., Superintendent Canadian Shovel & Tool Co.

"Hinges and Wrought Hardware," by A. F. Hatch, Esq., Manager Canada Steel Goods Co.

"Ready Mixed Paint Outlook," by F. J. Penberthy, Esq., Manager Lowe Bros, Ltd.

"The Metal Market," by W. G. Harris, Sr., President Canada Metal Co., Ltd.
Queries from members and consideration of forecasts.

Wednesday Afternoon—

1.30 p.m. Address on "Cost of Doing Business, and Other Trade Problems," by John C. Kirkwood, Esq., Business Counsel.

3.00 p.m. Address on "Advertising," by A A. Briggs, Advertising Manager Dunlop Tire and Rubber Goods Co.
Queries and discussion on above subjects by members.
Question box.

Wednesday Evening—

"Department Store and Mail Order House Methods," by Geo. D. Davis, Manager "Hardware & Metal."
Closed meeting for members.
Question box—in charge of Messrs. Davis and Kirkwood.

Thursday Morning—

Closed Session.

9.30-10.30—Election of Officers and General Business.

10.30 a.m.—Address and Discussion on Salesmanship.
"Mock Sales."
"Demonstration of Actual Salesmanship."

Thursday Afternoon—

New lines for the hardware store.

Above is program so far as completed. Additions will be made during the next two weeks.

Seeds Will Reach High Figures

Late and Short Harvests Produce a Trying Situation — Red Clover Abnormally Scarce—Foreign Seeds in Some Instances Almost Unprocurable

It too early as yet to get definite information on the prices that will prevail during the coming year. There is a certainty however that many of the varieties of seed will reach new records. At present there is such an uncertainty in the market that it is impossible to even get an approximate idea of what the situation will be. For one thing, threshing the seed has been greatly delayed by the severe weather of recent weeks and the freight congestion has added to the difficulty so that seed will not be obtainable for some few weeks, and it may be March before stocks will be available. In that event there is a possibility that panicky buying in order to assure early delivery may still further influence the situation.

As matters stand at present there is the possibility of reasonable prices for timothy and alsike, there having been a good crop of these in Canada during the past year. Red clover, however, was a failure, and the bulk of the supplies must be drawn from the United States, and the figures will unquestionably be high.

In vegetable seeds the same conditions prevail. Turnip seed has sold on the United States market recently for $1.25 a pound. This gives some indication of what may be expected. As a great percentage of both vegetable and garden seed come from France, Belgium and Holland, countries whose labor conditions are becoming more serious every day, there is also this fact to be reckoned with. There is also the difficulty of getting transportation, and the matter of high freight rates. All circumstances seem to be conspiring together to assure high seed prices during the coming season.

NO SHORTAGE OF GASOLINE FOR ALLIES.

There is no shortage in gasoline in the United States, and the armies and navies of the allies are being supplied as fully as shipping facilities permit, according to a statement issued by the United States Petroleum War Service Committee, of which A. C. Bedford, of the Standard Oil Company, is chairman. So long as there is a heavy demand for fuel oil there will be an adequate supply of gasoline, the statement said, as gasoline is obtained in the process of refining fuel oil from crude oil. "As a matter of fact," the statement said, "as a result of the light domestic demand incident to the winter weather, the stocks of gasoline are increasing, and will further increase before the heavy summer demand is encountered."

Use of Wine Measure Prohibited

New Ruling on the Regulation Regarding Liquid Measure—Activity That Will Affect Many Merchants—Dealers Should Examine Stocks to See They Meet This Regulation

FOR a good many years past there has been a certain amount of confusion in the fluid measurements of Canada owing to the use of the wine measure as well as the regular standard Canadian gallon. This wine measure generally used in the United States is approximately 20 per cent short of the regular Canadian measure. Many products imported from the United States have been marketed under this measure, and the uninitiated have been deluded into thinking that they were receiving the full standard quantity. As its use was winked at in Canada many products were put up under this standard. Notably was this the case in the sale of maple syrup in gallon tins, which in many instances were the American gallon. This double standard has caused much confusion in the past and has worked a disadvantage to the merchant anxious to use the standard Canadian measure. The days of this double standard are now over. The inspectors of weights and measures have been notified by J. W. Vincent, Deputy Minister of Inland Revenue, that hereafter whenever any reference is made to the measure, the standard must be the official Canadian standard, and any deviation from this standard, and any marking of quantities in wine measure, the United States standard, shall render the seller liable to a fine not exceeding $20 for every such sale.

As there are probably many articles on the grocers' shelves that come under the condemnation of this new ruling it behoves the merchant to study this matter carefully.

The letter addressed to the inspectors reads as follows:

Department of Inland Revenue.

Wine Measure

Sir,—For many years complaints have been made as to the sale in Canada by wine measure of bottled and tinned goods—e.g., ink, essences, extracts for cold drinks, etc., pickles, olives, condiments, oils, paints, varnish, etc., the same being put up by American houses on the United States Wine Measure Unit.

The United States Unit Gallon is roughly 20 per cent. smaller than the Dominion Unit Gallon, so that United States houses quoting on a basis of pints, quarts, etc., have an improper advantage over Canadian houses engaged in the same business.

Inspectors, dealers, manufacturers and all others concerned are, therefore, advised:—

That the sale of anything in Canada by Wine Measure is illegal.

That the offering for sale of any goods of which the contents are clearly marked in some unit of United States Measure is illegal, e.g., "1 Pint U.S.A. Standard."

That representing unmarked container goods as pints, quarts, etc., when their contents are actually United States Measure (Wine Measure) is illegal.

Packages and container goods may be put up and sold without any reference to the measure of the contents, or the contents may be indicated by weight in pounds or in ounces, but if any reference whatsoever is made to the contents by Measure IT MUST BE IN DOMINION MEASURE only.

Penalties

Secs. 24 and 60 of chap. 52, R.S. 1906, "Weights and Measures Act" provide as follows:—

24. Every contract, bargain, sale or dealing made or had in Canada in respect of any work, goods, wares, or merchandise, or other thing which has been or is to be done, sold, delivered, carried or agreed for by Weight or Measure, SHALL BE deemed to be MADE and had ACCORDING to one of the DOMINION WEIGHTS OR MEASURES ascertained by this Act, or to some multiple or part thereof, and if not made or had, shall be void, except when made according to the Metric System.

60. Every person who sells by any denomination of weight or measure other than one of the Dominion Weights or Measures, or some multiple or part thereof.....shall be liable to a penalty not exceeding TWENTY DOLLARS FOR EVERY SUCH SALE.

Inspectors will distribute this circular to all dealers, importers, and other parties concerned.

Steel Output Suffers from Underproduction

Production Field Engaging Entire Attention of Trade—Coke Shortage Due to Inadequate Transportation Facilities Having Serious Effects

THE entire attention of the trade trade in the United States is devoted to production, and from latest reports the outlook is far from satisfactory. An increasing number of furnaces have been banked and gone out of blast for repairs, which naturally means a decided reduction in output. This comes at a time when the demand was never more urgent, and will be severely felt. Contracts cannot be filled on time and the only answer given to questions asked as to when deliveries will be made is that they are doing their best. The best, of course, depends on the quantity of coke obtainable, and this is largely contingent upon the ability of the Government-controlled railways to transport the fuel from the ovens to the furnaces.

The tremendous shortage of coal in all directions for manufacturing purposes, and the efforts made to alleviate the distress apparent from it has acted against the railroads being able to give the much-needed assistance to the coke ovens and iron furnaces. Until this is done, however, little hope can be held out of improvement in the iron and steel situation.

All the iron that can be sold with safety has been contracted for up to next July, and beyond that producers evidence a reluctance to sell, though consumers are willing to buy. The situation is too uncertain to warrant contract obligations so far ahead; the experience of the present is enough to deter any furnace from speculating on possible production..

Railroad congestion still exists, and this with the shortage of fuel due to the extended inclement weather and confusion of traffic as the result of changes in road administration keep the steel trade in a state of uncertainty. From steel producing sections the consensus of opinion is that conditions may grow worse before improvement will be shown. The new plans for transportation and the production and distribution of fuel will, it is felt, eventually work out to the ultimate good. However, the situation now is most unfortunate and really serious in view of present pressing necessities of the nation. Never in the history of the industry has the situation been paralleled. It is estimated in some districts that mills are working at even less than 75 per cent. of their normal capacity. In view of the fact that many of these mills are already far behind on their contracts, the loss of production is particularly severe. Private consumers of steel who are not working on Government contracts will feel the effects first, as the loss will fall on them first. It is thought the substantial increase in the unfilled tonnage on the books of the United States Steel Corporation for December was due in a large measure to a falling off in the output of their several plants.

Uncertainty as to price changes, which may be made after April 1, is resulting in buyers and sellers showing a tendency to keep away from signed contracts which may be revised from without. Assurance from Washington has been given that no price changes are contemplated which might reduce steel production, but it would appear that

(Continued on page 35.)

Proprietor Should Pay Himself a Salary

Few Retailers Pay Themselves an Adequate Salary—The Clumsy, Loose and Dangerous Methods of Many Retailers—The Matter of Partnerships—The Right Salary the Retailer Should Collect.

By John C. Kirkwood

NOT long ago I addressed a body of fifty retailers on the question of the cost of doing business. I asked for a show of hands from those who kept a record of their business costs, and about half a dozen indicated that they knew what it cost them to run their business. Then I asked for a similar indication by those who paid themselves a salary, and the same men held up their hands. Then I asked, "How many of you who pay yourselves a salary limit your living expense to the amount of this salary?" And not a single hand went up!

One could preach a forceful sermon on this theme of the retailer's neglect to pay himself an adequate salary and to limit his living expense to this salary, but this is not the time for delivering this sermon. I must content myself here and now with urging every earnest retailer to put himself, in regard to his own business, in the position of a salaried employee, and to pay himself each week or month a set sum—probably twice the amount he pays his highest salaried employee—and to live on this salary. Any other plan of remuneration is unsafe and unsound, and upsets all calculations. It takes real backbone to pay oneself a salary, and to live within its limits.

Thieving From One's Own Business

Right here is where 90 per cent. of the men baulk; more probably 97 per cent. of them: they won't do the thing they admit is right and business-like. And why, forsooth? Just because it is uncomfortable, and involves sacrifices.

The average retailer in business is a thief: he robs his own business. He takes goods and does not pay for them. Many retailers do not even make a debit entry of the goods they and their families take from their own store; and it is the rarest thing to find a retailer settling his account with cash in the same way that he requires the other employees of his business to settle for their purchases.

Also, many retailers run contra accounts with local firms, and never charge up against themselves the amounts of these contra accounts, and very rarely settle with cash charges of this nature against their own accounts.

A Retailer Must Be Courageous

All retailers know that they should pay for such accounts, and that their own and family's living expense should be limited to the amount of salary drawn. But where will you find a retailer with the courage to run his business, as it affects his own income, in this way? He simply won't do it, just because to do so will put uncomfortable handcuffs on his wrists and shackles on his ankles, and he does not like fetters.

The average retailer very much prefers to take out of his own store what he wants from it for himself and family, and to take what cash he requires for himself and family, and let things go hang! And he does things this way because he lacks courage to run his business the right and better way. Which means that the average retailer has a yellow streak in him: his grit fails him in this particular matter. He prefers to shut his eyes just at this point, and to go it blind, hoping that he'll come out all right, by the help of God or of the Devil. But to stand up to the matter of paying himself a definite, fair and sufficient salary, and of paying in cash for his own and his family's purchases from his own store and from other stores, and to keep down the living expense of himself and family to the limits of his salary; —to stand up, I say, to this matter, and look it squarely in the face, well, where is the retailer willing to do this?

The Retailer Can Do The Right Thing

Yet this same man, if his business were formed into a limited liability company, or if it were formed into a partnership, or if it became one in a system of chain stores with him as general manager, would have to live on a stated salary; would have to receive this salary at regular times; would have to charge against himself all purchases, and settle for them in cash. All of which means that this man, under outer compulsion, can and will do things which he will not do when the compulsion is self-imposed. It means that most of us have rather flabby wills, unequal to the performance of the commands of our conscience and convictions. It means that when right conduct is left solely to ourselves, when we can do the sneak act, we'll funk duty and become thieves.

Letters Wanted, Please!

Where is the retailer who will write me, saying: "Consarn ye, Kirkwood, you're a sanguinary liar when you tell me I haven't the grit to pay myself a salary **and live on it**; that I am a sneak thief, afraid to charge the goods I take from my own store for myself and family; that I haven't the courage to pay for any purchases with cold cash; that I am afraid to pay cash for purchases made on contra accounts; that I make my employees do what I won't do myself. You're a brute and a liar, and I am goin to prove it to you, to myself and to all the world"?

If any retailer is prepared to say this thing to me, I'll apologise to him publicly, if he will send me his name and address, with the message—"Kirkwood, you're a liar, and I am ready to prove it to you twelve months from date."

Profit a Thing Apart

The salary a man should pay himself should not be confused with the net profits which every retailer should aim to obtain over and above the costs of doing business. The proprietor's salary should be regarded in the same way as the salaries or wages of employees—a charge on the business.

The amount of the salary which the proprietor should draw ought at least to be equal to his own legitimate personal requirements and those of his family, and living expenses ought to be limited to the amount of the salary. But beyond this sum collected from the business weekly or monthly—actually withdrawn from it—the retailer should aim to make a net profit—a profit over and above all expenses. The amount of this profit will have relation to turnover—and may be a percentage of the turnover or of the capital invested; or it may be put down arbitrarily—$1,000, $2,000, $5,000—whatever is a reasonable sum.

What Constitutes The Cost of Doing Business

Here again one must be careful to distinguish between net profit and interest on capital invested. Perhaps it will be made clearer if we put down, in a group way, the several classes of items which aggregated go to make up the cost of doing business.

These are:

1. Interest on capital invested (say 6 per cent. to 8 per cent.)
2. Rent (if you own the premises you occupy, charge as rent the sum another would pay if he occupied your premises instead of you).
3. Freight on incoming goods (including packing, drayage, duty).
4. Salaries (including an adequate one for yourself).
5. Fixed expense (insurance, light, fuel, taxes, water rates, telephone, etc.).
6. Interest (on borrowed money).
7. Incidentals (stationery, postage, cleaning and all miscellaneous items).
8. Delivery (including horse, wagon, stable, motor car, garage, repairs, supplies, twine, paper, etc.).
9. Advertising (including all forms of publicity endeavor).
10. Losses (including bad debts, shrinkage, spoilage, leakage, donations and subscriptions, thefts, etc.)
11. Depreciation (on furniture, fixtures, horse, car, premises, stock, etc.).

These several classes of expenditure, when added, constitute the cost of doing business; but unless all items are charged the cost records are faulty.

From the foregoing it will be seen that no provision has been made for a profit over all expenses. This desired profit

can and should be made a distinct charge, and will become a 12th item in the afore-named groups of cost items, in which case the list of cost groups becomes:

1. Interest on capital.
2. Rent.
3. Freight on incoming goods.
4. Salaries.
5. Fixed expense.
6. Interest on borrowed money.
7. Incidentals.
8. Delivery.
9. Advertising.
10. Losses.
11. Depreciation.
12. Desired year's profit.

These 12 groups of cost items may total $5,000 or $6,000, or $10,000 or any larger sum; it all depends on the magnitude of one's business; but whatever the total may be, it represents the cost of doing business, with a desired trading profit for the year ($1,000, $2,000, $5,000, etc.) figured on. Knowing these costs of doing business enables one to calculate the percentage cost of doing business, and informs the retailer how much goods he must sell in the year to recover all costs, plus the desired trading profit.

A Salary For The Proprietor

But if a retailer omits from his items of expense of doing business a proper salary for himself he throws out of true his calculations, and the error made may be serious. The correct calculation calls for the inclusion of an adequate salary for the proprietor which he will draw out in cash each week or month, and which he will use to pay his own store account, and all contra accounts; and these accounts will represent goods charged at regular retail prices.

The common way on the part of many who are really trying to do business hanestly is to charge all goods used by self or family, and all personal or family contra accounts, into one's personal account, and to charge also all cash taken from the business for personal and family needs, and many good men, and particularly the older men engaged in business, handle their merchandise and cash accounts this way; and some will contend that this is a perfectly proper procedure. And some will say—"It's as broad as it's long. I own this business. What's the use, therefore, of all that nonsensical method of paying cash for goods." I do not propose to argue with these older men, or with the man who insists on doing his business in his own way, defiant of right methods. My message is addressed to that growing class of merchants who really want to know the right way of doing business, and who are ready to do business the right way. Now the right way, in respect of the item of his own affairs, is to pay oneself a sufficient salary—adequate for one's own and one's family needs, and to regard oneself as a salaried employee who must pay cash for all goods purchased, and who must confine his living expenses to the limits of the salary received.

Let the retailer, therefore, withdraw in cold cash, as his own salary $30, $40, $50, $60, $75, $100 a week—whatever sum is right and sufficient for his own and his family's requirements—and let him limit his living expense to this sum, and pay cash for goods purchased from his own store the same as any other customer does. If the retailer will do this he will be a happier man, a better business man, and probably will learn to make a profit on his year's trading—something which 9 men out of 10 in Canada and the United States are not doing.

It is both wrong and fallacious to charge into one's personal account what goods one buys and what cash one withdraws, and to let this account stand unsettled, a charge against one's profit interest; for thus one's cost of living is not fixed or regulated. If you ask 100 retailers, taking them as they come,—"What is it going to cost you this year to maintain yourself and family?" 99 of them will probably say—"I can't answer that question until the year's up." But if these 100 retailers were doing business according to the right method, every one of them would say instantly, "I am limiting my family's living expense to ——" (namely the sum), which sum will be withdrawn, in cold cash, weekly from the business.

A Separate Personal Bank Account.

When I say cold cash, I mean it. The sum may be taken out of the cash drawer on Saturday in the same way that the wages of Smith, Brown and Jones, employees, receive their pay; or the proprietor may draw a cheque against his trading account, payable to himself, and deposit this cheque to the credit of a private or personal account, absolutely distinct from his business account; and all money used by him or his family will come from this private account; and if there's a balance left at the end of the year, good and well.

Finding Out The Profit or Loss

The point I am making is that by the method outlined one can tell absolutely at the end of the year's trading whether or not a profit has been made and how much; and this calculation will not be cluttered up with the confusing items of an unbalanced personal account. One will take his inventory and his total annul sales. The difference will represent the year's trading gain over the invoice cost of goods. Then one can place along side this trading gain the year's cost of doing business (including the desired net profit over all costs). Instantly one will be able to see whether or not these costs have been fully recovered; and the revelation will satisfy or accuse, as the case may be. For example:—

Your costs of doing business (including your own salary and a desired year's profit over all costs) total, let us say, $6.872. Sales are, let us say, $36,856. Invoice cost of goods sold is, let us say, $29,414. Then the record is:—

Invoice cost of goods.—$29.414	
Gross sales 36,856	
Gain over costs	7.442
Costs of doing business.	6.872
Excess profit made.....	$570

By excess profit is meant a profit in addition to the sum figured into the cost of doing business (as set forth in the summary of 12 group items above). We'll suppose that you have figured into your costs of doing business the sum of $1,800—$150 a month. In the illustration above, this desired year's profit of $1,800 has been exceeded by $570, giving you a net trading profit of $2,370—or almost $200 a month. And you have the satisfaction of knowing that this is clear profit over and above your own salary, and is not subject to reduction by unsettled personal and family accounts.

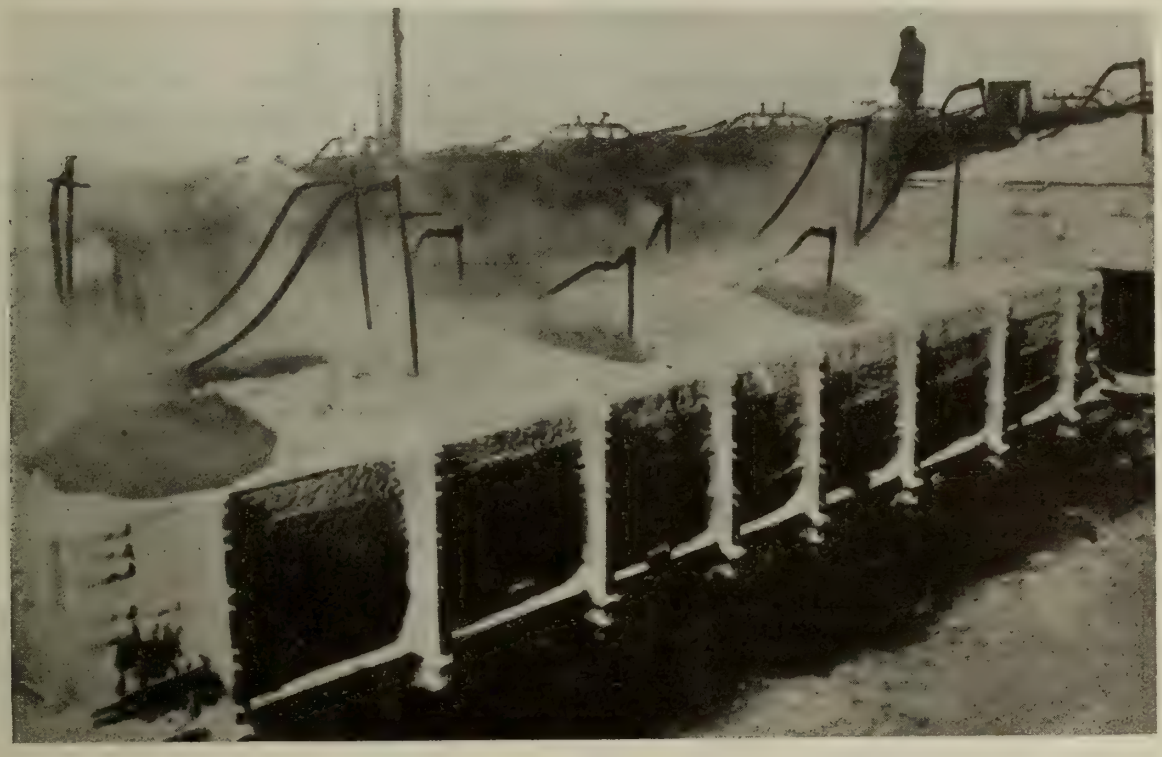
What Is a Right Salary?

The question arises—"What is a right salary to pay oneself?" This is a difficult question to answer definitely, for so many factors have to be taken into account. Some have said—"I will take the sum I pay my highest paid employee." This is arbitrary, and may not be a safe guide.

Again, if one is a single man, without a family to maintain, what should he pay himself? And if the proprietor has a large family, should he draw out more than he would require if his family were smaller? Also the question becomes more complex when the business is owned by partners, each of whom is actively engaged in the business, and one of whom may be a single man, and the other a married man with a family.

In a general way, it may be said that the proprietor should pay himself a salary at least equal to his worth as a manager—the salary he is able to command in the open market, or the salary he would have to pay another to perform equal service; and this applies to the case of partners.

And yet the salary so determined is scarcely sufficient. The principal or proprietor should draw more as salary than an employee should draw, the extra sum taken representing payment for greater initiative and greater responsibility.



It is probably this view of the question that has led some to say that the proprietor should draw twice as much, in the way of salary, as his highest paid employee. This may or may not be excessive. Certainly one should not draw less than he can earn as an employee with another firm, or than he would require to pay an equally capable man to take his place to perform equal work.

These general suggestions may help the man who asks the question, "What salary should I pay myself?" to get a good working answer.

Turning Salary Back Into The Business

It is the habit of some men in business, especially when capital is very limited, and where every cent is required to finance the operations of business, to pay themselves a salary very much less than their open market value. This practice is scarcely just, for it gives an artificially lowered cost of doing business—one unfairly low. If a man (or partner) is ready to deny himself, to allow a larger sum to remain in the business, as working capital, he can accomplish his objectives by this simple method: (1) Pay himself a salary equal to his open-market

Current Events in Photograph—No. 3

Helping to Relieve the Coal Crisis

IN addition to the difficulties of transporting fuel on account of the rail congestion intensified by the recent snow and very cold weather, the fuel administrators have to contend with frozen coal which must be thawed out before it can be dumped from the cars. A plan to thaw out the coal lying in the yards has been devised, that of thawing with live steam which is forced by means of pipe and hose, into the heart of the frozen "black diamonds."

worth; and (2) re-loan to his business the sum in excess of his personal requirements, thus making himself a creditor of his own business. This is the better procedure—one which will prevent the error of an artificially lowered cost of doing business; and which will commend itself to one's banker. Also, it shows on the books just how much the business is indebted to its proprietor for money loaned it. So may a retailer give his business the assistance it may require; and so may his self-denial be treated in a business-like way.

A Partners' Problem

Recently there came a letter to me from a firm made up of two partners asking what should be the weekly salary withdrawal of each. One had a two-thirds interest in the business; the other one third. One took to the business an experience five times longer than that of his partner. One's personal sales for the past two years were 50 per cent greater than that of the other. With such slender and efficient data, I was asked to say what sum each should draw out as wages. With the data provided it was quite impossible to provide any helpful or definite answer. I mention the case to show how very real is the problem of the right salary one should pay himself.

Two men I know have a business in which they share equally—have an equal capital interest and draw out weekly equal sums, and share equally in the profits and losses of their enterprise. But one man is ten times as valuable to the business as the other who is unimaginative, without initiative, and a dull salesman. Dissatisfaction and eventual dissolution are the sure consequence of such a partnership.

A Day of Better Retailers

This is the day of better business methods, and, I should like to think, of better business men. Retailers everywhere are enquiring into the problems of how to do business better. Two major problems are: (1) How to increase sales and customers, and (2) how to know and recover the costs of doing business which should include an adequate salary to the proprietor and a desired net profit from the year's effort and risk of capital. A minor but most important problem is the question under consideration, the proprietor's own salary—how it should be collected, and its amount. I trust that the answers to the questions contained in this contribution to HARDWARE AND METAL are clear, and will help some retailers to deal with a perplexing problem in a way satisfactory and advantageous to themselves.

EDITORIAL COMMENT

DEMOCRATIC Canada respects only those decorations earned by merit and service. Toronto's second Victoria Cross has been won by a young teamster.

* * *

FROM the Militia Department comes the announcement that it is worse than useless to try to exercise a "pull" at headquarters. Surely a revolution that will be welcomed.

A CANADIAN General has received the Russian decoration of the White Eagle, the dove of peace probably in disguise.

* * *

UNITED STATES business men who talk of boycotting Germany unless she renounces autocracy are at least using language Germans understand.

* * *

THE Crown Prince of Germany wishes to know whether he would be stoned if he came to Canada after the war. Nothing so crude. He would be treated merely like a case of smallpox.

* * *

AND now the price of the 2½ per cent. has increased. It would seem as though the whole world were conspiring against those thirsty johnnies who have to make that 2½ feel as though it had a real kick in it.

* * *

FIRST Russia lost her vodka, then she lost her punch, remarks the Rochester *Post-Express*. Hope she doesn't let Germany liquor, adds the Kingston *Whig*, which does not want to see the Bolsheviki snared in the gin of the Teuton.

* * *

CO-OPERATION has been exemplified by the nations fighting for the cause of civilization on more than one occasion. One of the latest examples has been given by the United States in the release of ninety million bushels of wheat for the allies in Europe. The people at home are being asked to prevent shortage by lessening home consumption.

* * *

OFFICERS of the Ontario Retail Hardware and Stove Dealers' Association are working along practical lines, and when the program for the 1918 convention is complete it will probably be the best in the history of the association. Retailers attend conventions for the good they can get out of them, and if the association will produce the goods they will get the support of the retail hardware merchants.

IT is rather interesting to note that the despatch stating that the Food Controller will not allow the price of potatoes to go higher also observes that there are large supplies and that prices are naturally tending downward. Still the Controller is hardly to be blamed for taking a little credit if he can get it; he has been made to shoulder the responsibility for many advances over which he had no means of exercising control.

* * *

THE conservation of coal movement is hitting some of the Ontario towns. St. Mary's has passed an ordinance restricting the hours at which stores may be open to from 8.30 a.m. to 5 p.m. and 9.30 p.m. Saturdays. Some Lindsay stores have also decided to adopt the same measure and will open at 9 a.m. and close at 5.00, except on Saturdays. This will continue for a period of two months. Won't that be Heaven for the junior clerk.

* * *

PRESENT conditions make imperative some reforms in delivery systems operated by retailers. War-time conditions, with their need for retrenchments, have forced this matter more and more upon the attention of the merchants and the general public. There are very few towns and cities in which improvements could not be made in delivery systems and considerable waste eliminated. It is not improbable that Government legislation will be put through in an effort to eliminate much of this waste.

* * *

DRASTIC action has been taken by Fuel Administrator Garfield in the United States to relieve the fuel situation. Starting Friday, practically all manufacturing plants will close for a period of five days and for ten weeks following, Monday's have been declared holidays. It is hoped that railroad congestion will in this way be relieved and coal moved to those centres now suffering from shortage. What effect this will have on the nation as a whole is hard to determine. The order authorizing this move has come as a complete surprise and comments are being withheld until a closer study of the situation can be made.

CANADA'S FAVORABLE BALANCE.

DURING November, 1917, probably for the first time, and certainly for the first time in the war period, Canadian exports to the United States exceeded imports from the latter country. This is revealed in statistics for November just issued from

Washington by the representatives of the *Financial Post*. For the month of November, 1917, Canada has a favorable balance approaching $13,000,000. This has pulled Canada's unfavorable trade balance in these markets down to $330,473,580. At the end of the United States fiscal year, on June 30, 1917, Canada's unfavorable balance in the United States had a record total of $486,842,912. In five months' time Canada's unfavorable balance was reduced to $156,369,332.

It has been intimated in the past that the immense war orders which the United States has been sending to Canada have the ultimate result of correcting Canada's trade position. These statistics for November offer the first definite indication of this. The November buying of the United States in Canada was the most important on record. The monthly total of approximately $49,000,000 exceeds by $6,000,000 the previous best month Canada has ever known of United States purchases. Previous record was the month of May, 1917, when the total United States purchases in Canada amounted to $43,244,201.

The United States embargoes on many lines are no doubt responsible to a great extent for a big decline in Canadian imports from the United States for the month of November. Imports from United States in the month of November, 1916, amounted to $62,922,200. During the corresponding month of 1917 total amounted to $36,156,249.

Canada's exports to the United States for November, 1916, amounted to $26,814,240, as against $49,122,505 in November of 1917.

It is becoming increasingly evident that there will be an excessive demand for many raw materials for the home needs in the United States, and while it is generally admitted that Washington will be lenient towards Canada, it is not unlikely that there will be a great dearth of supplies of many lines which Canadian manufacturers need from now on.

Canada, however, has not suffered alone in the matter of embargoes, as it is found that the foreign trade of the United States has been greatly curtailed.

Government restrictions, regulations, and other conditions created by the war, will undoubtedly create many unprecedented situations in trade circles during 1918.

RAILROAD CONGESTION DISAPPEARING

IT IS encouraging to note that under the direction of the Director-General of Railroads in the United States that the serious railroad congestion is disappearing. Since the new arrangement went into effect, Canadian railroads have made a strenuous effort towards having cars belonging to Canadian lines returned to this country. Appeals have received consideration, and every effort is being made to return cars as promptly as possible. It is stated, however, that the congestion on the railroads is of such large proportions that many cars will not reach their home lines for several months. Separation of Canadian cars is also a difficult task, but it is expected that some co-operative agreement will be reached so that Canadian railroads will not be in the least embarrassed by Government operation of American railroads.

The latest prediction is that of Government control of express companies. The Director-General of Railroads has been in conference with the heads of the vaious express companies operating in the United States, and it is said that plans have been discussed for the Government operation of these companies.

It is also pointed out that expansion of industry which is not essential to the war will be provided against by legislation, and it is even proposed that legislation be laid before Congress which will make it necessary for private concerns to apply to the Secretary of the Treasury before issuing securities.

United States industrial resources are now under a single body for war control, but this co-ordination of raw material will not likely affect the purchases of private manufacturers except in so far as the private needs interfere with Government needs.

NEW MINISTER NEEDED

A CONTEMPORARY points out that every new problem in relation to the country's trade or industries which arises at Ottawa brings to the mind of those who are in touch with the practical side of the situation the question: How long will we have to wait for the appointment of an efficient Minister of Trade and Commerce?

Recently the problems have been so many and so vital to the nation's business that the demand for a change has been growing more and more insistent. The recent visit of the deputation from the Canadian Manufacturers' Association to the capital signified that that body had looked in vain to the department for efficient action and had decided to appeal to the Government as a whole in an endeavor to get action along practical lines with regard to needed raw materials from the States. The question is too serious to be bound up in the usual red tape of any inefficiently administered department.

The present Minister of Trade and Commerce is a man of strong personality and is endowed with striking natural gifts and ability. He is an important figure in the administration and he undoubtedly has a proper place in the Cabinet—but not as Minisited of Trade and Commerce. In that portfolio Sir George is a square plug in a round hole.

WANTED—

HUNDRED POINT MEN

By

GEORGE A. SIMPSON

ALL over this great Continent, geographically known as the United States of America and Canada, there are to-day many prosperous industries which were, a few short years ago, facing serious financial embarrassment and failure. ¶ These industries in many instances had been grossly mismanaged, while in others, lack of capital and kindred ills contributed to their condition; but it matters not now what was the cause; it is Results and not explanations we are interested in, as results count and the facts are, these conditions did exist. ¶ Then came the War, and as if by magic all was changed; from Adversity to Prosperity was a short shift and even Industries that were wavering on the ragged edge of failure took on a new lease of life and assumed a prosperous air. The stupendous demand for products of every description was, and is, such that extension of plant and increased production became the order of the day and under these unprecedented conditions, business to-day is pushing the man who, under normal conditions, could not push business. ¶ The whole structure---Agricultural, Industrial, Commercial and Economic---has been undergoing the most drastic change the World has ever known. But how about the man? And how about business, with its increased facilities for production and its corresponding overhead expense, when this demand ceases and Competition sets in? ¶ 'Tis said the leopard changeth not his spots, and this, in a measure, applies to business management. The test of fitness will come when the Commercial War begins and a new order of things exists, to which we must adjust ourselves. A tremendous momentum has been started and maintained on business we did not seek, and the Wheels of Industry have been greased with prices exceeding our wildest dreams. We have been floated into position, on a tidal wave of business, far and above the jagged rocks of competition, which await us when the tide recedes. What then?---is a question worthy of sincere consideration NOW. ¶ To successfully cope with the new conditions and maintain our progress will create a demand for Hundred Point Men. Men who are well balanced---men who are not one-sided in their development, whose energies do not seep into narrow channels, while the main streams of ability are allowed to run dry---men who are broad, who do not take half views of things---men whose education has been received in the school of hard knocks, whose capital is Knowledge acquired through experience, who mix common sense with theory and do not permit the technical to distort their practical viewpoint of everyday life---men who have studied men and mastered conditions, whose love of humanity knows no bounds, who despise pretence and worship a good name---men who can decide and whose decisions are intelligent and just, who see education and development, discipline and character in their occupation---men who can co-operate more successfully than they can compete---men who can honorably and persistently produce results---such men as these are the Executives of the future---HUNDRED POINT MEN.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

BOKO BUCKET AND DEFIANCE FOLDING CAMP STOOL

The Boko Bucket now being marketed by the Defiance Welding Co. of Defiance, Ohio, will, it is claimed, carry either water or gasoline without leaking and it takes up practically no room when not in use. Points emphasized by the manufacturer as important are that

Boko Bucket Open.

it is made of high grade water and gasoline proof fabric, double sewed and tightly cemented; capacity of two gallons—size folded, 10 inches in diameter

Boko Bucket Folded.

by ¾ inch thick; open, 10 inches deep.

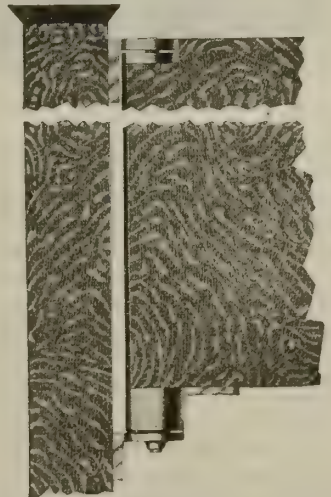
A flexible tube at the side fastens over the top when the bucket is full of fluid. This tube it is stated not only takes the place of a funnel, but also eliminates the use of any valves; simply unhook the tube, place it in the opening in the gasoline or water tank, and a slight pressure with the finger on the tube gives perfect control of the flow.

The Defiance folding steel camp stool is recommended by the makers for com-

Defiance Folding Camp Stool.

fort on fishing, autoing, boating or camping trips, etc. The frame of the Defiance camp stool is all steel, 15 inches high; the seat is army khaki. When folded the stool lies flat in a space 7½x 10 inches; the weight is two pounds.

WHITE ENAMEL BATH ROOM FIXTURES



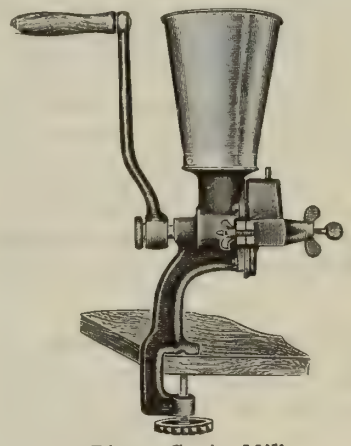
A new line of bathroom fixtures is being placed before the Canadian trade by Messrs. A. MacFarlane & Son, Ltd., Montreal, Canadian agents for Landers, Frary & Clark, Ltd., New Britain, Conn. The new line comes in all the various styles of soap holders, sponge holders, glass and tooth-brush holders, etc., and is of steel with a heavy coating of white enamel. Messrs. A. MacFarlane & Son, Ltd., Montreal, will cheerfully furnish particulars to anyone interested.

CHICAGO "SAGLESS" GATE SPRING PIVOT-HINGE

The Chicago Spring Butt Company of Chicago, Ill., are placing on the market the Chicago Sagless Gate Spring Pivot Hinge for which they enumerate the following as points of advantage in its use. Ease of application, the only tools necessary being a screw driver and bit brace, or if top pivot is applied to the top of the gate, the screw driver only is necessary. The top pivots are round and it is not necessary to mortise these in.

The hinge being of the pivot type, it is claimed that it is impossible for the gate to sag and strike the opposite casing. For the same reason it is not necessary that heavy tension be applied to the spring so that the gate has a very easy action.

It is stated the hinge is noiseless and



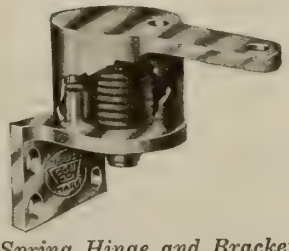
Chicago Spring Pivot Hinge Applied.

it is very neat and compact, and being round there is nothing to catch the clothes.

RIMCO GRAIN MILL

At the present time a great deal is being written about whole wheat flour and it has been proven by authorities that bread made from whole wheat has a tendency to aid digestion.

With the idea of assisting towards household economy, the Rock Island



Rimco Grain Mill.

Mfg. Co., of Rock Island, Ill., has endeavored to produce a hand powered mill for grinding wheat into flour. It is claimed its adjustable feature is such that it may be made to grind either into a pulverized or a granulated form—therefore making it suitable for grinding corn into corn meal and coffee and other grains. It is stated the construc-

Spring Hinge and Bracket.

tion is simple—using a crusher and combining a grinding feature to pulverize the grain after it is crushed.

EVENTS IN THE TRADE

BUSINESS CHANGES.

Sarnia, Ont.—Martin Bros., hardware, have disposed of their business to H. A. Couse, who will continue under another name. Mr. Couse is a well-known business man locally.

Creelman, Sask.—J. E. Wright has purchased the stock of hardware carried by S. M. Stone and Wm. Ferguson. The stock has been moved into Mr. Wright's hardware store, and in future J. E. Wright will run the exclusive hardware, paint, oil and stove store. S. M. Stone will conduct an implement and pump business, and W. C. Ferguson will run a harness shop and tin shop.

TRADE NOTES.

Bradford, Ont.—Bradford Hardware Co. is selling out stock and fixtures.

FIRE LOSS

Chatham, Ont.—Can. Des Moines Steel Co., Ltd., suffered fire loss.

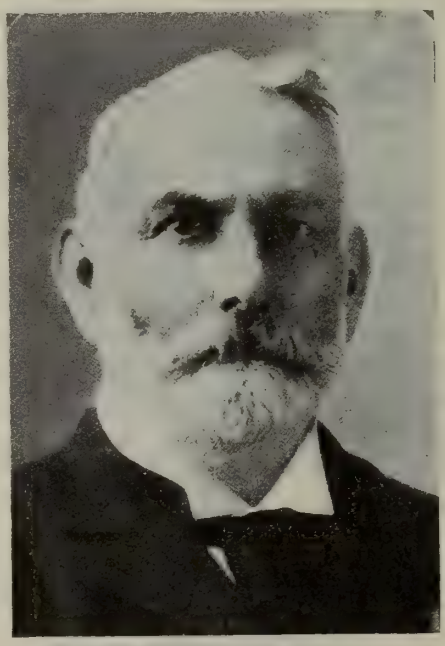
Gananoque, Ont.—The hammer shop in the axle department of the plant of the Ontario Steel Products Co. here was damaged to the extent of several thousand dollars on Monday morning. The company expects to be in full operation again in about ten days, as reconstruction necessary will be undertaken immediately.

OBITUARY.

Robert Wyatt, pioneer hardware merchant of Winnipeg, and an ex-alderman, died recently.

Thomas W. Breen, for many years in the employ of T. McAvity & Sons, Ltd., St. John, died recently at the age of eighty-four years.

Windsor, Ont.—A. E. Lech, managing director of Nelson Hardware Company, is dead. Deceased was well known in business here and was 57 years of age. He came to Windsor from Peterboro twelve years ago.



HARRY CUNNINGHAM WITH McKINNON INDUSTRIES, LTD.

The McKinnon Industries, Ltd., and the McKinnon Columbus Chain Company (head office at St. Catharines, Ont.), announce the appointment of Harry Cunningham, formerly manager of Brandram-Henderson, Ltd., Winnipeg, Manitoba, and for many years representing Marshall Wells Company of Winnipeg throughout the entire Canadian West, as their Western Canadian representative. Mr. Cunningham takes charge of all territory west of Winnipeg as far as Calgary, commencing on the 15th of January, and is permanently located at the Canadian Pacific Railway Hotel, Royal Alexandra, Room No. 222, at Winnipeg, Man.

DEATH OF SAMUEL TREES

Samuel Trees, President of Samuel Trees & Co., Ltd., Toronto, wholesale saddlery, died on Sunday last at the Wellesley Hospital in Toronto. Mr. Trees was nearly 80 years of age, and was actively engaged in the conduct of the business until a couple of weeks prior to his demise.

The late Mr. Trees came to Toronto from England in 1866, entering into business at once as an importer of saddlery and trunks. In addition to the Toronto plant, there is a large collar and blanket factory at Whitby, Ont., as well as a distributing warehouse at Winnipeg.

THE LATE SAMUEL TREES.

Apart from business interests, a great deal of his attention was directed to outside interests, financial and philanthropic.

For a period of forty years prior to his death Mr. Trees was treasurer of the St. George's Society and took a very great interest in the work of the society. He leaves four sons: Jas. D. Trees, vice-president and general manager of Samuel Trees & Co., Limited; Samuel L. Trees, manager of the factory at Whitby, and Lieut. C. F. Trees and Lieut. A. G. Trees, both of the 198th Battalion (Canadian Buffs), now at Witley Camp, England, and three daughters at home, Charlotte E., Edith J. and Ethel.

PERSONAL

A. MacFarlane of Montreal was in Toronto on Tuesday of this week on his way to Hamilton, Ont.

Wilfred Aikenhead, of the Aikenhead Hardware Ltd., Toronto, Ont., is confined to his home through illness.

Mr. Miller, representing A. MacFarlane & Co. of Montreal, spent Tuesday in Toronto on his way to Hamilton, Ont.

Morris Wheeler, representing Sargent & Co., New Haven, Con., visited the Toronto wholesalers during the week.

D. George Clarke, advertising manager, McClary Mfg. Co., London, Ont., has been at Camp Travis, San Antonio, Texas, attending the official field kitchen test which is being held by the United States war board.

E. C. Greenwood, late salesman for D. Donaldson & Son, has been appointed manager of the new Sarnia branch of the Auto Sales Co. of Canada, Ltd., with head offices in Quebec City. This company is opening branches in all parts of Canada, and will carry a complete stock of accessories in additon to selling a number of leading lines of automobiles.

MONTREAL NEWS

Robert W. Pain of the American Ring Co., Waterbury, Conn., is in Montreal this week.

T. H. Jordan, vice-president of A. C. Leslie & Co., Montreal is on a business trip to New York.

Mr. Griffith, of Sudpless Dunn & Co., manufacturers' agents, New York, is calling on the Montreal jobbers.

Raymond A. Catlin of the Corbin Lock Co., New Britain, Conn., was a Montreal visiter this week.

J. A. Painchaud is opening a sample room in Montreal and will represent the Springer Lock Co. of Belleville, Ontario.

Mr. Reid of Horrock-Ibbotson Co., manufacturers of fishing tackle, Ithaca, N.Y., was a visitor to Montreal this week.

Morris Wheeler, representing Sargent & Co., of New Haven, Conn., was a business visitor in Montreal during the week.

F. B. Hinchman, representing John H. Graham & Coy., New York, manufacturers' agents in Montreal this week.

W. R. Maxwell, manager of the auto accessory department of the Jas. Walker Hardware Co., Montreal, was a visitor at the New York Motor Show last week and returned to Montreal on Monday.

Mr. Joseph Dowling, President of the Canadian Wholesale Hardware Association is able to attend again to his duties after a period of confinement through illness.

ST. JOHN, N.B., NEWS

Rolley C. Reicker, employed with the Maritime Nail Co. before enlisting, has been awarded the Military Medal for conspicuous bravery at Passchendaele. He is a member of a N.B. infantry unit.

Major Gordon Johnston, sales manager of the James Pender Co., has been elected president of the St. John branch of the Great War Veterans' Association, an organization of upwards of 400 members.

T. N. Bullock, who has been St. John manager of the Imperial Oil Company for many years, and John Thornton, engaged in the cordage business, have announced that they will be among the candidates for the two vacancies in the civic commission in April.

James S. Neill retired from the presidency of the Fredericton Board of Trade at the annual meeting held recently. The new officers are as follows: President, H. S. Campbell; vice-president, J. A. Reid; treasurer, J. M. Lemont; secretary, R. H. Simonds; directors, W. G. Clark, C. F. Chestnut, G. Y. Dibblee, F. B. Edgecombe, Archibald Fraser, G. W. Hodge, W. S. Hooper, J. T. Jennings, J. S. Neill, J. P. Palmer and others.

The St. John Iron and Hardware Association met recently in the Board of Trade rooms for their annual meeting. Informal reports agreed in showing that 1917 had proved a very successful year for the trade. Officers for 1918 were chosen as follows: President, A. M. Rowan; vice-president, S. E. Fisher; secretary-treasurer, W. S. Clark; directors, W. H. Thorne, J. A. McAvity, J. P. McIntyre; executive committee, A. M. Rowan, J. A. McAvity, J. P. McIntyre, W. H. Thorne, S. E. Fisher and W. S. Clark.

Wholesale committee: Emerson and Fisher, W. H. Thorne & Co., The S. Haywood Co., M. E. Agar, Jas. Robertson Co., T. McAvity & Sons, J. & E. R. Burpee, the McClary Mfg. Co., Robertson, Foster & Smith, Jas. Pender & Co., Maritime Nail Co.

Manufacturers' committee: R. T. Sturdee, George McAvity, G. W. Ketchum, R. B. Emerson, John Keeffe, S. E. Elkin and G. S. Bishop.

Pricing committee: J. A. McAvity, H. C. Chase, S. E. Fisher, S. E. White, J. P. McIntyre and A. M. Rowan.

INCORPORATION

Montreal.—Pyrene Mfg. Co. of Canada has been incorporated. The capital stock is $100,000.

Montreal.—The Structural Steel Co. has been incorporated with a capital stock of $5,000 to carry on business of bridge building in all its departments and all classes of steel work.

Windsor, Ont.—The Ripley, Peck Hardware Co., Ltd., has been incorporated with a capital stock of $60,000 to take over the co-partnership business formerly known as the Ripley, Peck Hardware Co.

Montreal.—O'Connors Ltd. have been incorporated at Ottawa with a capital of $100,000 to carry on business as steel and iron founders, tool makers and engineers. The incorporators are Andrew P. O'Connor, Walter P. O'Connor, both of Sorel, Que., and Edward A. D. Morgan of Montreal.

INDUSTRIAL NOTES.

Owen Sound, Ont.—The Nut and Bolt Works was temporarily held up recently owing to the freezing of the water system of the plant during the cold weather.

Tillsonburg, Ont.—At the recent elections, the by-law to grant a fixed assessment of $25,000 to the Maple Leaf Harvest Tool Co. was carried by 312 majority.

Halifax, N.S.—L. M. Trask of this city, who recently purchased the Milton Foundry at Yarmouth, has purchased the Bridgetown Foundry, which is located in the centre of the town near the river front. With his foundries and machine shops connected therewith, Mr. Trask expects to manufacture stoves, ships' castings, hoists and winches, and a complete line of fuel oil engines up to 200 h.p. suitable for vessels of all kinds. He will also make a specialty of traction engines.

NEW FIRM TO SELL SMALL TOOLS

J. A. M. Taylor, who for the past nine years has been manager of the small tool department of the Canadian-Fairbanks Morse Company, has severed his connection with that company and has started in business for himself. Mr. Taylor intends carrying a complete stock of drills, reamers, cutters, chasers, thread milling hobs, files and grinding wheels. Mr. Taylor intends to specialize on Canadian-made goods as far as practicable. His office will be at 318 Stair Building, corner Bay and Adelaide Streets, Toronto.

PLANT IN OPERATION

Mr. George Henderson, President Brandram-Henderson, Ltd., has just returned from Halifax where he reports his company to be again actively engaged in manufacturing on almost a complete operation of this plant. Thus, have they made a record in the matter of rebuilding the large factory there occupied and this will enable them to take care of the present and future business, particularly that for export, and the marine lines will also be handled extensively here. The new changes and improvements will soon be completed.

IMPERIAL OIL SALES CONVENTION

The managers and assistant managers of the various branches from Vancouver to Newfoundland of Imperial Oil, Ltd., are in convention this week at the Imperial Oil Building, Toronto. The meeting, which is being conducted by G. W. Mayer, vice-president, opened on Monday, and will continue until Saturday afternoon. Marketing problems and sales policies are discussed at these meetings, which have become an annual feature of the company's work. The following representatives are present:—R. M. Pidgeon, district manager, St. John's, Nfld.; S. S. Shatford, district manager, Halifax, N.S.; A. W. Oldfield, assistant manager, Halifax, N.S.; James McTavish, district manager, St. John, N.B.; W. W. Oswald, district manager, Montreal, P.Q.; E. A. Hewitt, assistant manager, Montreal, P.Q.; J. F. Donohue, assistant manager, Montreal, P.Q.; J. F. Shatford, district manager, Toronto, Ont.; F. J. Wolfe, assistant manager, Toronto, Ont.; G. I. Hambly, assistant manager, Toronto, Ont.; A. J. Wolcott, district manager, Winnipeg, Man.; Paul August, assistant manager, Winnipeg, Man.; E. C. Halsey, district manager, Regina, Sask.; F. Turley, assistant manager, Regina, Sask.; P. W. Gordon, district manager, Saskatoon, Sask.; M. B. Green, district manager, Calgary, Alta.; J. A. Boyd, assistant manager, Calgary, Alta.; C. M. Rolston, district manager, Vancouver, B.C.; M. A. McDowell, assistant manager, Vancouver, B.C.

NEW PLANT FOR CANADA

It is said that S. C. Johnson & Son, Racine, Wis., manufacturers of floor waxes, motor specialties, ets., are contemplating opening a Canadian plant and that a representative of the company visited Toronto this week in connection with the matter.

CORRECTION

In last week's issue it was inadvertently stated that Geo. B. Haynes and Jas. Donevan of Gananoque had been elected Town Councillors.

STEEL OUTPUT SUFFERS FROM UNDER-PRODUCTION

(Continued from page 26.)

a reduction in prices secured by some companies is planned. Government control is aimed at, which will take over all output though at different prices to different producers. This would mean an average market price and not a level fixed by the cost of high-cost plants. This proposal has resulted in the steel trade modifying its first feeling of satisfaction with the recent official action on present prices.

It is stated that at eastern ports awaiting shipment there are hundreds of thousands of tons of export steel piled up. Sales for export could be greatly increased if bottoms for transportation were available.

THE CLERKS DEPARTMENT

U. S. AIR SERVICE CHIEF TAKES DIRECT ROUTE

Man at Head of Air Preparations is Believer in Efficient Methods—George O. Squier is a Remarkable Machine and a Tremendous Worker

A MAN of galvanic force has been put in charge of everything pertaining to air preparations by the U. S. Government—George O. Squier. He was born on a farm but early graduated into the military service and he has become one of the most efficient men that Uncle Sam has. His career as told by William H. Crawford in *Leslie's Weekly* is a lesson in efficiency in fact:

General Squier is the most perfect specimen of boundless, nervous energy, properly directed and regulated, that I know. He goes at top speed all the time. His mental engines are always at high gear, and can take the steepest grade without a flicker. What impressed me about the General was his directness. He wishes to arrive at definite results by the most direct route. He hates circumlocution and red tape. He would have been a poor judge; he has too little respect for established precedents and former opinions, and would have decided most of his cases by equity, rather than by the learned opinions handed down by former occupants of the woolsack. He has thoroughly mastered geometric problems and knows that a straight line is the shortest distance between two points, and he travels that line. Neither is there any circumlocution in his conversation. He comes directly to the point, hits straight from the shoulder and usually with telling effect. He can avoid more unnecessary conversation than any man I ever knew. In that he is like Von Moltke, of whom some one has said that he could be silent in seventeen languages. He is entirely practical. His duties may be in the clouds, but his feet are firmly planted on the ground. In this he differs from most great inventors, who are commonly supposed to be visionary. His mind works with machine-like regularity, and with such absolute precision that you can almost hear the click of the mental engine.

General Squier's detestation of red tape is exemplified by his work in coordinating the various departments of the Government that use airplanes. The ordinary routine method of communicating between the various departments has been for the man in charge to send a written communication to the chief of his bureau, who sent it to the secretary of the department, who viseed it, and respectfully submitted it to the secretary of the department from which information was desired. It was then forwarded to the chief of the bureau whose co-operation was required, and by the chief to the particular section of his bureau which had charge of the subject matter. Usually not less than a week was taken up by this process. This method got on General Squier's nerves; he wanted his information at once. Now, if he wants to know something of aerial affairs in the Navy, he goes to the telephone and talks to the man from whom he desires information. Time consumed two minutes.

Co-operation is one of the hobbies of General Squier, and the triumvirate which heads the Aviation Board, composed of Howard E. Coffin of the National Council of Defense, Rear-Admiral Taylor of the Navy, and General George O. Squier of the Army, works in perfect unison. Each man fits perfectly into his particular niche. Mr. Coffin is an engineer, financier and organizer. General Squier is an expert in airplanes and in all signal service (the particular field in which airplanes will be most used) and Admiral Taylor is a cautious, careful mathematician, the balance wheel to the other two enthusiasts. Their duties dovetail with perfection. Mr. Coffin as the executive head of the Air Production Board has to handle the finance, to find the material and the places to build the airplanes. General Squier has to draw the plans for the machines that are to be constructed, to determine on the kind and number of machines and to train the men to fly them. The United States Government looks to Squier to have a definite number of air machines and trained operators in France at a definite time, and General Squier looks to Mr. Coffin to supply him with the material, and the planes such as he needs, and the camps in which to maintain and train the fliers, and Admiral Taylor is the wise counselor for both.

General Squier is especially well fitted for the duty assigned him, because he is a brilliant, scientific engineer, having spent five years at Johns Hopkins, under Remsen, preparing for this particular work, and because he knows from actual observation the necessities of aviation in wartime, having spent many months abroad since the beginning of the war as military observer, watching the work of the airplanes, observing their weaknesses and determining where the service might be improved. He can intelligently direct the building of airplanes because he understands their mechanism. He understands the relative significance of tensile strength, wind velocity and air support. The plans of any machine accepted by him will be constructed along scientific lines, no weak points overlooked. No amount of academic or scientific training will ever fit a man so completely for this work as having seen the airplanes in actual operation. Fortunately General Squier possesses both scientific information and actual experience on the field of battle.

General Squier is not a friendly man, not jovial nor jolly; he has not had time to make many friends, but has admirers by the thousands, men who respect his brilliant achievements and his sterling qualities. He has the ability to inspire his fellow workers, and makes them feel that every task must be accomplished at a given time. He has the happy faculty of transmitting to his associates his enthusiasm, and determination to succeed, and to instill in their minds not loyalty to him but to the Government.

Few people appreciate the extreme importance of the task which General Squier has undertaken. It is now universally accepted by military men that airplanes will play an important part in bringing about peace. General Squier is of the opinion that the side that can obtain complete air supremacy will win. Says he: "Wars are usually won by the adaptation of some new device. Frederick the Great owed his wonderful success to the introduction of the drill, the subjugation of the men to the direct control of their officers, and Napoleon became emperor of France because of his introduction of massed artillery attack, and this is the day of airplanes."

The airplane has almost completely supplanted all other forms of scouting. It is the most accurate in securing information, it enables a commander to know the plans of his enemy, to avoid surprise attacks and to discover his enemies' weaknesses. It has become the supreme cavalry of the world. It is more accurate, has a wider field of vision over a larger territory, and can do its work more quickly. In addition to this it has potentialities as an offensive weapon, that so far neither side has been completely able to utilize.

At the beginning of the war the Germans had a decided advantage in the air which accounted largely for their earlier successes. Great Britain and France recognized this, began stupentime the opposing air forces have been dous airplane building, and for some nearly equal. However, when America joined the Allies, another Richmond entered the field. America has the money, the mechanical skill and the men to turn the scales in favor of the Allies. She has entrusted this task to the Aviation Board. General Squier is the representative of the Army on this board, and he is the man who will have direct charge of our Aviation Corps during the war. He will direct the men who are flying in France and will be responsible for the success of our aviation campaign.

The building of the planes and the training of the fliers are the preliminary tasks for our aviation campaign in France, and they are stupendous ones. America expects thirty thousand planes within the year. Some authorities have suggested one hundred thousand planes as the number necessary to secure complete air supremacy. While this number seems remarkably large, it must be

remembered that the average life of the airplane is only about two months; consequently, such a number would give us only five or six thousand planes at any one time in active operation. Another reason why so many airplanes will be required is because Germany is on the defensive. In order to attack her airplanes, it will be necessary to fly over her battle-lines, and our airplanes will be subjected to the attack of her anti-aircraft guns.

Airplane building is practically a new industry with us; while the airplane is an American invention, it has seen little development under American auspices. America, having always been a peaceful nation, has neglected building a requisite number of military planes for war service. In American civil life aviation has never become a popular sport like automobiling, and there consequently has been very little demand for airplanes. Only one or two factories engaged in their manufacture on a small scale.

The first task of General Squier was to find plants that could be quickly and easily converted to the building of airplanes, and to secure a satisfactory motor. Automobile factories produced more motors than any other line of business, therefore they were turned to for the building of motors for this purpose. However, automobile motors are not suited for airplanes. Air fights are taking place higher and higher every day. Major William Bishop of the British aeroplane forces says that it is not unusual for battles to be fought 22,000 feet in the air, and that you cannot then be sure that your enemy will not attack you from above. It must be remembered that the air becomes rarefied and loses its supporting power at high altitude. The higher you fly the less load will be supported by a given amount of wing, and for that reason as little weight as possible must be carried. The motor must be exceedingly light and still very strong. Automobile motors built for running on the ground do not meet the requirements of aeroplaning. The Liberty Motor, built especially for flying machines, has met the requirements, but certain changes are necessary in the automobile factories to produce the Liberty Motors. It is General Squier's duty, as a scientific member of the board and as a representative of the Army, to see that these motors are properly constructed by the various automobile factories. His task is complicated by the difficulty of securing the requisite amount of spruce that is needed for making airplane wings. The demand for spruce has more than tripled since the war because of the necessity for this particular wood in the manufacture of airplanes.

Experiments are being made under the direction of General Squier as to the use of steel tubing, specially prepared, to take the place of the almost unobtainable spruce. Another drawback is the inability to secure the necessary delicate instruments used in air machines, which were formerly imported from Germany. There are a thousand and one things of seemingly minor importance that must be looked after in order to thoroughly outfit the airplane for active service. In addition, however, to getting the planes ready, it is necessary to train men to operate them. Since we entered the war aviation schools have been established for this purpose and thousands of young men are learning to fly. Other thousands are learning the mechanical duties, still others are learning to be observers, topographers, wireless operators and photographers. By the time the airplanes are completed, General Squier will have a trained force to operate them.

In the organization of the Aviation Corps, General Squier has adopted a company as a unit. It has the following personnel: One captain, five first lieutenants, one master signal electrician, one first-class sergeant, five sergeants, nine corporals, two first-class privates, six privates—an organization which a civilian would consider top heavy with officers. The reason for this, however, is apparent to the initiated. In the regular army, officers and soldiers are subject to the command of their superior officers at all times, whereas, in the air the man is master of his own destiny. He must be a man capable of directing his own energies, using his own initiative, meeting the emergencies as they arise without direction.

Possibilities for After-War Trade

The possibilities of trade with the West Indies and South America have been outlined in the article which follows by a hardware buyer of Georgetown, Demerara, who is at present in Canada.

This buyer claims there is a good field for Canadian manufacturers who go after this trade.

BEFORE the war ends, Canada will have a national debt of a billion and more dollars on which to pay interest. Added to this, she must provide for a heavy pension bill, and be able not only to absorb the number of unwounded soldiers into her industrial life, but also to provide work for a large number of wounded returned soldiers of varying degrees of health.

The advent of peace will stop the munition business, which is one of the principal items of manufacture to-day. This can be offset by developing export business for which Canada's industries are well equipped.

A big market for export exists in South America. In area South America stands in proportion to the North American continent as seven to nine. The population is about sixty millions. She is wealthy, and does not need much of our wheat, etc.; but is lacking in the essentials of modern civilization—iron and steel—and is compelled to buy large quantities of manufactured products abroad.

Exclusive of the West Indies and Central America, whose imports amount to over $305,000,000 annually, South America imports are $1,020,000,000 a year, a large percentage of which Canada can supply. The principal items are machinery, manufactured products and textiles.

Canada can improve her industrial position, both during the transitional period and after, by cultivating this market.

The United States manufacturers are sending their own travellers down, as well as appointing representatives in all the principal South American centres. They are also spending a considerable amount of money to get the business, both individually and through their organizations, and have gone so far as to compel their clerks to learn the Spanish language and make a study of export trade, at the expense of the principals.

Banking.—Shipping value and importance of these markets is shown by the rapid extension of the Royal Bank of Canada in Central America, the West Indies and the Northern Coast of South America. The International Banking Corporation, founded expressly for this trade, is also established throughout South America.

Shipping.—Shipping facilities to all these points are still good; several lines maintaining regular sailings both from New York and Halifax. The steamers now being built for the Canadian Government could not be better utilized than in this important trade, as they have already subsidized a line to the West Indies.

This century belongs to Canada and South America. The South American countries are developing rapidly and taking good care of themselves under stable government. Canada in this century must not only develop her enormous untilled acres, but must also develop her manufacturing industries to maintain the favorable trade balance of the last couple of years.

CANADIAN BICYCLE DEALERS' ASSOCIATION FORMED

Hamilton, Ontario.—The Canadian Bicycle Dealers' Association sprang into being at a gathering of the retail and wholesale trades of the Dominion in Hamilton, Ontario, on Wednesday and Thursday, January 9 and 10. On the second day of the congress it was unanimously decided to proceed with the organization of the Ontario section of the national organization, although the retailers of other portions of the country are known to be strongly in favor of organized co-operation. The following officers for this Ontario section were chosen: President, J. R. Dixon, Hamilton; vice-president, A. E. Treadgold, Kingston; secretary-treasurer, G. A. Wenige, Bicycle & Motor Sales Company, London; executive committee, Percy A. McBride, Toronto; N. S. Ferries, Hamilton; W. L. Isaac, Hawthorne Bicycle Company, Brantford, and H. Howe. Ottawa; advertising chairman, W. M. Gladish, Toronto; auditors, Bert F. Brown, Chatham, and C. R. Banks, Peterboro.

Another meeting of the executive may be held in Hamilton at the time of the hardware dealers' convention here in February. The suggestion has also been made that the second annual meeting of the association be held in Toronto at the time of the Canadian National Exhibition next August, when reduced railway rates will be effective and many bicycle exhibits will be seen at the fair.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

ADVICES from Ottawa during the week intimate that the steel production of the Dominion is likely to be increased 20 per cent. as the result of a conference between the War Committee of the Cabinet and the Canadian steel manufacturers. Intimations have been made in some quarters that there is the possibility of establishment of mills for rolling of ship plate by three Canadian producers. If this project is carried through the steel output will no doubt be increased considerably and will place Canada in a much better position in the building of steel ships. At the present time all the ship plate is imported from the United States.

Conditions in the hardware trade give promise of a good year, especially in the trade coming from the farming communities. The farmer has been getting good prices for all his produce and through his somewhat isolated location has perhaps not had the calls upon his purse for Victory Loan, Red Cross and other patriotic purposes that dwellers in the large centres have experienced. Wholesalers anticipate there should be an excellent trade from the rural communities during the coming year.

Price changes, while not as numerous as in some recent weeks, nevertheless include important changes. Table cutlery, cotton twine, skinning knives, butcher knives, bread mixers, food choppers, stove pipes are among the lines to record advances. Some stocks of Canada plate are now available as shipments have reached the Canadian market during the week. Linseed oil is in firm market. White lead in oil holds unchanged at the decline recorded last week.. Business was greatly hampered during the first part of the week through the tie-up of transportation occasioned by recent storms.

MONTREAL MARKETS

MONTREAL, Jan. 16.—Hardware markets are characterized more by the arrival of new lines than by drastic and sweeping price changes. There have been a few changes of a more or less minor nature. Among these are iron pipe. This change is very small and affects only ⅛ inch, ¼ inch and ⅜ inch in both the black and galvanized. Cotton twine is very firm, some asking as high as 63c for the three-ply. Candle wick is selling at 62c and Taylor-Forbes barn door latches No. 9 have advanced from $3.65 to $4.45 per dozen sets. Wood handles are due, say jobbers, for an advance. Remington guns also will be advanced in the very near future. A fair amount of business is passing and dealers are now more ready to accept bookings for delivery later. Canada plate bookings will now be accepted.

Coal Oil And Gasoline Are Both Held Firmly

Montreal.

COAL OIL AND GASOLINE.—This bad weather has had something to do with making stocks appreciably lighter, but there is no real shortage reported. A fair amount of business is being done and the prices are maintained as follows: Gasoline, 32½c per gallon; coal oil, Royalite, at 17c; Palacine at 20c and Electroline at 20c.

Jobbers Now Accepting Canada Plate Bookings

Montreal.

CANADA PLATE.—Some jobbers are now open to accept bookings for Canada plate for next season's delivery, that is, next fall. Supplies will probably not be plentiful and those who will require quantities would do well to anticipate their needs early. The price at which the trade can buy will probably be around $9 to $9.50 per box for the 18 x 24 case of 52 sheets, ordinary grade.

New List Prices Are Out For Made-Up Stove Pipes

Montreal.

STOVE PIPES.—The nested variety of stove pipes have been selling on the basis of plus 40 per cent. on the list. In view of increased difficulties in securing supplies and also in view of the fact that prices have been based on stocks which are now much, if not altogether, depleted, the manufacturers have had to raise this discount to 60 per cent. over list and to be effective immediately. Manufacturers will book certain quantities on this basis, but will not say to what extent they will accept these bookings.

Wire And Cut Nails Are Selling, But Slowly

Montreal.

WIRE, CUT NAILS.—The business passing in nails these days is confined to a small compass and with the exception of a few sorting orders there is very little to report of an interesting nature. There are some nice orders still coming to hand for later delivery and jobbers seem to be reasonably well satisfied with the outlook. Wire nails are still based at $5.50 for the standard and cut at $5.75. There is a possibility of the cut nails soon being quoted lower and next week may see a change put into effect, says one large jobber. Standard steel wire is based at $6.50 per 100 lbs.

Cast Steel Advanced To 21c During Week

Montreal.

IRON AND STEEL.—There is a firm tone to the prices asked for iron and steel products. Only one change is reported in prices which applies to Black Diamond cast steel, now quoted at 20c-21c against the old price of 18c-19c. It is stated that there is likely to be an advance also in the ordinary grades of cast steel, but no new prices are obtainable for the week excepting on the one line above mentioned. A fair business is being done in iron and steel.

MONTREAL—	
Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80

Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 20-0 21

Sheets And Plates Can Be Bought Favorably

Montreal.

SHEETS AND PLATES.—Those who require any sheets for manufacturing purposes are now offered somewhat more

favorable quotations and in view of all the circumstances as to tie-ups and probable slow deliveries there would seem to be a better opportunity of buying now for immediate needs than has been afforded for some time. The amount of business being turned is fair, although the season is not one in which heavy deliveries are expected to retail consumers. The following quotations obtain here:

MONTREAL—		
BLACK SHEETS—		100 lbs.

Old Metals And Rubbers Not Moving Actively Yet

Montreal.

OLD MATERIALS—There is very little movement of the old metal products, and with so much stormy weather and a consequent shortage of cars for moving supplies it is doubtful if there will be any movement of consequence for some time. Prices are holding in a dull market and dealers report the usual conditions as obtaining at this season of the year.

MONTREAL—		
Tea lead	$ 0 04	....

Pig Lead Is Firmer; Ingot Tin Also Firm

Montreal.

INGOT METALS.—A stronger situation prevails with regard to pig lead and tin is also very strong. Trading in ingots is just fair, the greatest activity reported being in lead.

COPPER.—There is some talk of the government fixing a price of 25c on ingot copper, but nothing definite has been reached. On the other hand it is stated that the present government price has been extended to the end of March. Trading continues to be done on the basis of 33c to 34c per lb.

LEAD.—There is a strong and firming tendency to the pig lead market. Fair sales are being made andthe prices obtaining range from 9½c to 10c per lb.

TIN.—The situation on tin in London exhibits much strength. The market here is strong and trading is being done at 81½c to 82c per lb.

SPELTER.—Spelter is still holding firm, but without change and is selling at 10½c to 11c per lb.

ALUMINUM.—This metal is meeting with but small request for immediate delivery and the price remains at 58c to 60c per lb.

ANTIMONY.—Slow and commanding little interest. The prices hold around 18 cents per lb.

Lead Pipe, Sheets Hold In Firm Market

Montreal.

LEAD PRODUCTS.—There is a firm tendency in manufactured lines of lead, such as sheets, bends, traps and so on. There is but a limited amount of trading and most orders are for small lots. With the outlook for lead so strong there will probably be a maintained price list, although no mention of higher tendencies is made. The following quotations are ruling:

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....
Lead traps and bends	Net list	
Lead wool, lb.	0 14	
Lead sheets, 3 to 3½ lbs. sq. ft., lb.	0 12½	0 13
Lead sheets, 4 to 8 lbs. sq. ft.	0 11½	0 12½
Cut sheets, ¾c lb. extra, and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb.	0 42½	....
Solder, strictly, lb.	0 39½	....
Solder, commercial, lb.	0 36¼	....
Solder, wiping, lb.	0 38½	....
Solder, wire, lb.	0 45	....
Zinc sheets, per lb.	0 26	....

Rope Market Is Steady

Montreal.

ROPE AND CORDAGE.—There is a small movement of rope and cordage here and the feature of the week is characterized by firmness, due to the continued firming of hemp prices. Importers state that there will probably be an advance in the near future, but will not state when this is likely. Transportation has been so poor as to hold back delivery of what they had hoped to receive weeks ago. Stocks are reasonably good, although not excessive.

Prices Are Firmly Held On Stoves And Ranges

Montreal.

STOVES AND RANGES.—Small sales are reported for stoves and ranges. Dealers selling ranges will probably reorder to cover their immediate needs only and such sales are being made on the basis of firmly maintained prices. It is stated by one large manufacturer that retail merchants would do well to anticipate their needs as early as possible for next fall. They state that the prices are likely to hold and that if prompt delivery is desired, the earlier goods are ordered, the better and more prompt delivery will be. Some stoves are now selling for delivery as late as May.

TORONTO MARKETS

Toronto, Jan. 17.—Business has been greatly curtailed during the past week owing to the tie-up on the railways. The roads have not been accepting any freight so far during the present week. Storms during the week have had the effect of paralyzing traffic. Travelers are on the road but are no doubt greatly handicapped in making their calls. Advances have been made in butcher knives, skinning knives, dessert and table knives, brea mixers, farm bells, saw sets, food choppers, cotton twine, waste, sheet iron sap boilers, razors, candlewick. Business has been largely confined to the city trade during the week as a result of the storm conditions prevailing in the country.

New Prices on Spark Plugs Issued

Toronto.

SPARK PLUGS.—New prices for spring shipment have been isued on Champion spark plugs which in some instances provide for an increase in price. Motorcycle mica spark plugs in lots of, less than 100 are quoted at 77c each, in lots of 100 to 500 at 75c each and in lots of 500 and over at 72c each. Heavy duty spark plugs, O spark plug, plugs for Maxwell, Buick or extra heavy long together with the regular spark plug are quoted at 61c each in lots of less than 100, at 59c in lots of 100 to 500 and at 57c in lots of 500 and over. X spark plugs are quoted at 54c in lots of less than 100, 52c in lots of 100 to 500 and at 50c in lots of 500 and over. Following are the prices on the cores for above spark plugs:

	Lots 10-99	Lots of 100	Lots of 500
Priming plug cores, each	50c	45c	43c
Sparks in water cores	55	50	48
Heavy stone cores	52	48	45
Regular cores; cores for Maxwell, Buick or extra long cores	35	33	30
X cores	30	28	27

Cutlery Advances 12½ Per Cent. in Week

Toronto.

CUTLERY.—The Joseph Rodgers line of cutlery has been advanced approximately 12½ per cent. and includes such lines as butcher knives, skinning knives, dessert knives. Following are the prices on the butcher knives: No. 1707 by 5-in., $4.75 dozen; 6-in., $5.55 dozen; 7-in., $6.95, dozen; 8-in., $8.30 dozen; 9-in., $10.30 dozen; 10-in., $11.90 dozen; 12-in., $18.95 dozen; 14-in., $28.90 dozen. Skinning knives are quoted as follows: 5-in., $4.95 dozen; 5½-in., $5.55 dozen; 6-in., $5.80 dozen. Dessert knives No. 3744 $7.65 dozen, table knives No. 3744, $9.70 dozen, dessert No. 3499, $6.45 dozen; table knives No. 3499, $8.55 dozen.

Bread Mixers and Farm Bells Higher

Toronto.

BREAD MIXERS, FARM BELLS.—A considerable increase has been made effective in the price of Universal and Canuck bread mixers. No. 4 Canuck mixer is now quoted at $2.25 each and No.

8 at $2.60 each. Universal bread mixers are quoted No. 4 at $29.50 per dozen and No. 8 at $34 per dozen. Farm bells have been advanced approximately 25 per cent. No. 1 40-lb. is quoted at $4, No. 2 50-lb. is quoted at $5, No. 3 75-lb. is quoted at $7.50 and No. 4 100-lb at $10 each.

Saw Sets and Food Choppers Higher

Toronto.

SAWS SETS, FOOD CHOPPERS.—An increase of approximately 10 per cent. has been put into effect on Taintor saw sets which now makes the price $13.80 per dozen. Russwin food choppers are also quoted at higher prices as follows: No. 0, $17.70 dozen; No. 1, $21.70 dozen; No. 2, $24.95 dozen; No. 3, $34.60 dozen.

Wrapping Twine and Candlewick Go Up

Toronto.

TWINE, CANDLEWICK.—Following the recent advance in all kinds of cotton products a further advance is now made effective on cotton wrapping twine. Range of prices on three-ply cotton twine is now from 52½c to 65½c per pound while four-ply is quoted from 56c to 72½c per pound. No. 4 variegated is quoted at 60½c per pound. Candlewick has also advanced and is quoted from 61¾c to 63c per pound. Sashcord had not advanced at the time of writing but is in very firm market.

Booking Cow Chains; Razors Higher in Price

Toronto.

COW CHAINS, RAZORS, SAP BOILERS.—Wholesalers are now booking orders on cow chains for delivery next fall at the previous discount of 15 per cent. off list. Peerless razors have advanced considerably and are quoted at $21 per dozen. Sheet iron sap boilers are being quoted at $21.60 per dozen, which represents an advance of 20 per cent over the prices prevailing for these articles at this time last year.

Cotton Waste Higher by ¼c to 1c Per Pound

Toronto.

WASTE.—Following the prediction made in these columns within recent weeks higher prices have been announced on cotton waste, increases amounting to ¼c to 1c per pound. Following are prices now prevailing on some of the lines: White wiping—XXX Extra, 21c lb.; X Grand, 19¾c lb.; XLCR, 18½c per pound; X Empire, 17¼c lb.; X Press remains unchanged at 16c per pound. Colored Wiping Waste—Fancy, 16½c lb.; Lion, 15c lb.; Standard, 13½c lb.; Popular, 12c lb.; Keen, 10½c lb.

Booking on Binder Twine Has Been Heavy

Toronto.

BINDER TWINE, CORDAGE.—Manufacturers of binder twine have now about completed their booking orders for delivery in time to take care of the present year's harvest. Reports are made to the effect that booking business has been heavier than ever before. Such a condition indicates that the farmers are likely to raise considerably more grain this year than at any time in the past. The representative of one manufacturer is of the opinion that prices this year will be several cents per pound higher than the price of last season. A recent bulletin from the department of Food Control stated that binder twine for the Canadian market would be available at reasonable prices as an agreement between the United States Food Administrator and the Mexican sisal growers of Yucatan had been reached. Intimation is made by the Department of Food Control that there will be only a slight advance over the prices of last year. The representative of the manufacturing concern in question was pronounced in the opinion that prices would be several cents per pound higher than last year. Prices on rope were maintained at the figures given in current quotations. There is still a strong situation in rope with higher prices anticipated in some quarters. It is understood an embargo has been placed on the shipment of hemp by the New Zealand Government.

Nails and Wire Hold in Firm Market

Toronto.

NAILS, WIRE.—Conditions for the manufacture of wire nails show no improvement within recent weeks. Manufacturers have difficulty in obtaining wire rods in the United States market and when they are secured transportation is so uncertain that delivery can never be counted on. Quotations are still made on the basis of $5.45 per hundred pounds for standard steel wire nails and cut nails at $5.65 per hundred pounds base. Wire products hold unchanged in firm market.

Wood Stoves Again in Good Demand

Toronto.

STOVES, ENAMELWARE.—With the serious coal situation and inability to secure same in numerous small towns there has been a heavier demand for wood heaters. In some districts where wood is available the price has been placed at such an exorbitant figure by the farmers that consumers wonder where the limit is going to be . It is a question of take it at any price, however. Coal stoves are naturally not in big demand at this season of the year. Enamelware is in steady sale and booking is being done fairly free.

No Improvement in Iron and Steel Trade

Toronto.

IRON AND STEEL.— Canadian dealers who are depending upon the United States steel and iron mills for their supplies have received no encouragement recently that conditions are likely to improve. Production is still seriously handicapped through the lack of coke and the congestion of freight. The recent storm has helped further to delay shipments. Furnaces in the United States have declined to take further business. Trade in this market has been fairly good. Prices hold unchanged.

Sheets Are Lower; Canada Plate Now In

Toronto.

SHEETS, PLATES.—In some quarters there was a movement toward lower levels on both black and galvanized sheets. Low quotations as given last week were maintained but some of the intermediate quotations on gauges Nos. 14 to 28 inclusive declined 50c per hundred pounds. Premier galvanized sheets declined 50c per hundred pounds and are now on the same basis as Apollo, 10¾-oz. being now quoted at $9.50 and other gauges in proportion. Heavier gauges have not yet been changed in price but intimations are made in some quarters that No. 10 gauge and heavier may be lower. Some stocks of Canada plate came into the market during the week. Ordinary plate 52 sheets to box is quoted at $8.50 and 60 sheets to box is quoted at $8.65. All bright Canada plate 52 sheets is quoted at $10 while 60 sheets to box are quoted at $10.15. There are now fairly good stocks in some quarters.

Shipments of Sheets Are Long Delayed

Toronto.

CORRUGATED SHEETS.—Manufacturers of corrugated sheets in some instances have been waiting for a considerable time for the arrival of sheet stock. In one instance one carload has been on the way for over a month while a second carload has been on the way for an even greater length of time. Demand is light at the present time and this is having a steadying effect on the market.

Stovepipes Make Considerable Advance

Toronto.

STOVEPIPES.—A considerable advance has been announced in the price of stovepipes through the changing of percentage to be added to list. Where formerly they were sold at list plus 40 per cent. they are now quoted at list plus 60 per cent. Above is price on nested stovepipes. Other lines of tinware, enamelware, and galvanized ware hold unchanged in price.

Agitation For Higher Copper Price

Toronto.

INGOT METALS.—Conditions in the ingot metal market for the most part held unchanged during the week. There is an agitation on foot on the part of United States producers of copper, especially the independent concerns, to have the Government revise the price upward but nothing has materialized in this respect as yet.

COPPER.—The copper trade in the United States has been concerned during the past week over the fixing of a price for the ensuing three months. There has been an insistent agitation on the part of some of the independent producers for an increased price, as they claim the present basis does not give any margin. While no announcement has been made with respect to the new price for the first quarter of this year it is accepted by some authorities closely in touch with the situation that the present basis of 23½c per pound will in all probability be maintained for the ensuing three months. In the local market prices were unchanged at 30c to 32c per pound, with a fair demand reported.

TIN.—There is a steadiness in the market for tin, as the situation in the primary market shows but little improvement during the week. Supplies in the United States market are very light and there seems small possibility of replenishing stocks for at least three months hence through purchases in Singapore or the Straits. Stocks may be released by the British Government in the meantime but there is no assurance that such will be done. In the local market prices held unchanged at 78c to 80c per pound.

SPELTER.—There is a steadiness in the market for spelter, the primary market apparently having reached the low level. Until a heavier demand develops to cause more activity there seems little chance of any change in the situation. Locally quotations were made on the basis of 9¾c to 10½c per pound.

LEAD.—Movement of lead from the Western producing sections has been somewhat restricted due to the recent serious transportation troubles. This has caused lead on spot in Eastern centres to be slightly firmer although no change in price has been registered. In the local market there is a fair demand with quotations made on the basis of 8¾c to 9c per pound.

ANTIMONY.—Demand for antimony is light and prices hold unchanged at 16c to 18c per pound.

ALUMINUM.—The market is quiet with no intimation of a probable change in the price in the near future. Quotations are made on the basis of 60c per pound.

PIG IRON.—The market holds steady on the basis of $50 per ton for foundry iron. Manufacturers still view the future with a questioning attitude as to the possibility of being able to secure supplies of coke. This is the disturbing factor in the market at the present time.

LONDON MARKETS

LONDON, Jan. 17.—Some important changes have been recorded in hardware commodities during the week, including advances in cotton wrapping twine, iron pipe, plaster of Paris, canvas belting, sledge hammer handles. Bar iron and steel and roofing nails are easier in price, with slightly lower prices recorded. Business in this district continues seasonably good. Many lines are hard to get at the present time, while deliveries to the jobbers are very slow. The majority of merchants in this district have now completed their stock-taking, and will soon prepare for spring trade by taking their heavy shipments of spring goods into stock.

Cotton Twine Up 5%; Wro't Iron Pipe Changed

London.

TWINE, IRON PIPE.—A further advance of 5 per cent. has been made effective in cotton wrapping twine, which now makes the price of three-ply in balls or cones 63c per pound and four-ply 67c per pound. As shown in HARDWARE AND METAL last week, a change has been made effective in wrought iron pipe. The principal change of interest was an advance of $1 per hundred feet on black ⅛-inch buttweld and $1.50 on standard galvanized buttweld of the same size. New prices will be found in current quotations.

Steel And Iron Easier; Nails And Wire Steady

London.

IRON AND STEEL, NAILS.—There is a slightly easier feeling in the market for iron and steel, common bar iron now being quoted at $4.65 base and bar steel at $4.75 base. Wire nails and wire products are holding steady in price. Standard steel wire nails are being quoted at $4.65 base and bar steel at $4.75 base. Wire nails and wire products are holding steady in price. Standard steel wire nails are being quoted at $5.45 base and cut nails at $5.60 base. Base price on smooth steel wire is still $6.50 per 100 pounds.

Plaster Of Paris Up 10c; Canvas Belting Advances

London.

PLASTER OF PARIS, BELTING.—An advance of 10c per barrel has been

made effective on plaster of Paris, which makes the new price $2.60 per barrel. Canvas belting is also one of the lines to register an advance through the changing of the discount. Maple Leaf brand of belting is now quoted at 32 per cent. discount.

Rope Market Firm

There is a very firm situation in the rope market at the present time, due to the difficulty in getting supplies of hemp from the Philippine Islands. Prices are unchanged in this market, however, pure Manila being quoted at 39c per pound base; British Manila and New Zealand hemp rope at 33c lb. base; sisal rope at 27½c lb. base. Cotton rope, 3-16 in., is quoted at 57c lb., and ¼ in. and larger at 56c lb.

Sledge Hammer Handles Go Higher

London.

HAMMER HANDLES.—New list prices have been made effective on sledge hammer handles, which provides for an increase in price. Following is the list price for second growth stock: 24-in., $2.50 dozen; 26-in., $2.60 dozen; 28-in., $2.70 dozen; 30-in., $3.60 dozen; 32-in., $3.60 dozen; 34-in., $4.30 dozen; 36-in., $4.30 dozen. Above prices are subject to a discount of 40 per cent.

Oil Heaters Going Well

A good sale for oil continues, caused through the shortage of coal supplies. Following prices prevail on Perfection lines: No. 520, $5.75 each; No. 525, $5.50 each; No. 530, $6.25 each. Above prices are subject to discount of 25 per cent.

Hockey Skates, Toe Calks, Horseshoes

Starr hockey skates continue to be quoted at 20 per cent. off list. Neverslip toe calks and horseshoes are unchanged in price at 15 per cent. off list for former and 10 per cent. off list on horseshoes.

Hockey Sticks Hold Steady

Hockey sticks hold steady in price, with a fairly good sale still in progress. Boys' white and red are quoted at 85c dozen, men's Rock Elm at $2 dozen, Spalding at $3.75 dozen, and MicMac at $4.75 dozen.

Snow Shovels Have Been In Active Demand

London.

SNOW SHOVELS, SCRAPERS, SLEIGHS, WARMERS.—Due to the recent heavy storms there has been an active demand during the week for snow shovels. Wood No. 118 are quoted at $5.75 dozen, galvanized No. 127 at $8 dozen, galvanized No. 128 at $8.50 dozen. Steel snow shovels are quoted at a discount of 12½ per cent. off list prices. Sidewalk scrapers are quoted at $4 and $5.50 per dozen. Handsleighs are unchanged in price at a discount of 35 per cent. off list prices. There is a good sale for foot warmers at the present time, due to the continued cold weather. Clark's No. 5B are quoted at $1.95 each and 7D at $2.50 each. Coal for these warmers is quoted at 80c dozen.

Ankle Supports Moving

With the favorable skating weather ankle supports have been in fairly good demand. Leather, assorted sizes, are quoted at $2.65 dozen pair, and Perfection steel, ladies' and men's, are quoted at 75c pair.

Lawn Mowers, Spades And Shovels Unchanged

London.

LAWN MOWERS, SPADES, AND SHOVELS.—Prices on lawn mowers hold unchanged at 40 per cent. off list for Daisy, Star, Woodyatt and Empress. Prices on spades and shovels also were in steady market, firsts being quoted at 30 per cent. discount from list prices, seconds at 20 and 2½ per cent., and fourths at 5 per cent. discount. Harvest tools are quoted at a discount of 25 per cent. off list.

Netting, Screen Wire Unchanged

Prices on poultry netting, Canadian make, are unchanged at 15 per cent. discount for 1-inch and 2-inch mesh. Black screen wire in 100-foot rolls is quoted at $3 per 100 square feet, while bronze screen wire is quoted at 14c per square foot.

Hinges Hold Steady

Screen door spring hinges held unchanged in price at $17.70 per gross pair for No. 20 cast and $20.20 per gross pair for Nos. 7 to 11 steel.

Horse Clippers, Cultivators, Lanterns

The market for horse clippers, hand cultivators and lanterns contained nothing new so far as price changes are concerned. Handicap horse clippers are quoted at $1.50 each, Newmarket at $2 each, Stewart No. 1 power at $8.25 each. Plates for Stewart clipper top are quoted at 94c each and plates for bottom are quoted at $1.31 each. Buco hand cultivators are quoted at $9 per dozen, while Pull Easy cultivators are quoted at $18 dozen. Lanterns, long and short pattern, are quoted at $12.50 dozen. Lantern globes, both long and short pattern, one dozen to case, are quoted at $1 per dozen, three dozen to case at 90c dozen, and in cases of six dozen at 85c dozen.

Roofing Nails Show An Easier Tendency

London.

ROOFING NAILS.—There is an easier situation in American roofing nails; prices in this market have been slightly reduced during the week. In 100-lb. kegs the new price is $7.70 per 100 lbs., and in 25-lb. boxes $7.95 per 100 lbs.

Glass in Firm Market

Although glass is in a firm market, there has been no change in price during the week, prices quoted on single and double diamond being on the basis of 40 and 10 per cent. off list, with cut lights at 33 1/3 per cent. off list.

White Lead In Oil Holds At Reduced Price

London.

WHITE LEAD IN OIL, PUTTY.—Recent reductions in the price of white lead in oil have been maintained during the week. Pure grade is still being quoted on the basis of $15.20 per 100 lbs. in ton lots and $15.55 in less than ton lots. Putty prices were maintained on the basis of the advance recorded last week. Standard grade in 25-lb., 50-lb. and 100-lb. drums is quoted at $5.15 per 100 lbs. Pure putty is $1.75 per 100 lbs. higher than standard.

Linseed Oil And Turpentine Firmer

London.

LINSEED OIL, TURPENTINE.—Although there is a very strong situation in linseed oil, prices have as yet not been changed in this market. For 1 to 2 barrels raw oil is quoted at $1.50 gallon and boiled at $1.53 per gallon. In 3 to 5 barrel lots, raw $1.49 gallon, boiled $1.52. In 6 to 9 barrel lots, raw $1.47 gallon, boiled $1.50 gallon. Turpentine is in slightly firmer market, due to a considerable advance in the primary market. Prices locally hold unchanged at 71c per Imperial gallon in single barrel lots and 70c per gallon in 2 to 4 barrel lots. In 5-gallon lots the price is 78c per gallon.

WINNIPEG MARKETS

WINNIPEG, Jan. 17.—Markets for the past week show an upward trend with but one exception, that being Eley's loaded shells, which show a decline of $1. Among the advances appear: Formaldehyde, burlap, Winchester metallic ammunition, rifles, shotguns, loaded shells and primers, clay pigeons, tennis tapes, window glass, and Big Ben alarm clocks.

Business still continues quiet, and reports from many points indicate that experienced help is very scarce. The recent military draft has been seriously felt among the hardware trade, who have been compelled in many cases to employ inexperienced men.

Formaldehyde Higher; Size Containers Changed

Winnipeg.

FORMALDEHYDE.—At the time the price was established on bluestone, HARDWARE AND METAL predicted that the price on formaldehyde would be in the neighborhood of 30c lb., and present prices just issued show that the estimate at that time was only 1c per lb. too high.

Several alterations have been made in the containers for 1918 as follows:—125-lb. kegs are replaced by 200-lb. kegs, 60-lb. kegs replaced by 100-lb. kegs, 24-oz. bottles replaced by 5-lb. jugs, 12-oz.

bottles replaced by 2-lb. jugs; the change from bottles to jugs has been found necessary owing to the inability of manufacturers to obtain a supply of bottles.

The new prices show an increase of approximately 70 per cent. over last year's price, which was 17c per lb. in bulk. To-day's market prices are quoted herewith:

400-lb. barrels, 29c lb.; 200-lb. kegs, 30c lb.; 100-lb. kegs, 31c lb.; 10-lb. jugs, $3.40 each; 5-lb. jugs, $1.90 each; 2-lb. jugs, 90c each. The price on bluestone remains at 12c per lb.

The price on bluestone remains at 12c per lb.

Burlap Makes Further Advances

Winnipeg.

BURLAP.—Following the advance of other textiles, comes a further advance in burlap of 5c per square yard over the former price, being quoted to-day at 34c per sq. yd. Prices on dyed burlay is not quoted owing to the numerous grades, but the advance on the dyed is proportionate with drab.

Guns, Rifles, Ammunition Higher By 15%

Winnipeg.

GUNS AND RIFLES.—New prices have just been issued here covering the recent advances put into effect by the American ammunition manufacturers and shows advances in guns, rifles, loaded shells, rifle sights and metallic ammunition of approximately 15 per cent. to take effect at once, owing to the extensive line manufactured. To-day's prices on only a few of the more familiar lines of guns and rifles follow:

Winchester Rifles—Model 1890, 22 long, 22 short, 22 W.R.F., $20.60 each; model 1902, 22 cal., $7.75; model 1904, 22 cal., $9.25; model 1906, 22 cal., $19.05; thumb trigger, 22 cal., $6.95.

Savage Rifles—22 caliber, model 1914, $7.75 each; model 1914, $21 each.

Iver Johnson Guns—Single barrel, auto. ejector, 12 ga., $7.75; single barrel, heavy breech, auto. ejector, 12 ga., $10; 410 gauge, $7.75.

Winchester Repeating Shotguns—Model 1897, solid frame, 12 ga., $36.05; model 1897, take down, 12 ga., $39.15; model 1912, take down, 12 ga., $43.25; model 1912, take down, 16 ga., $43.25; model 1912, take down, 20 ga., $43.25.

Winchester Primers—1½W to 4W, $4.25.

Clay Pigeons Advance $1.50 Per Thousand

Winnipeg.

CLAY PIGEONS.—Trap shooters will be compelled to pay more for clay pigeons during the coming season, as the new advance just effective shows an advance of $1.50 per thousand over last year's prices, making to-day's market price $9.50 per thousand.

Tennis Tapes And Staples Higher

TENNIS TAPES.—Prices on tennis tapes and tennis staples for 1918 show strong advances, especially the former, due to the high prices ruling on cotton and are quoted to-day at the following price: Tennis tapes, double court, $6 set; tennis stapues, 60c per 100.

Window Glass Takes 10% Advance

Winnipeg.

WINDOW GLASS.—The market on window glass has shown increasing strength during the past few months due to shortage of fuel and experienced labor which in some cases have caused factories to shut down. HARDWARE AND METAL predicted an advance some time ago. These have been fulfilled in the advance just put into effect, amounting to 10% over former prices. To-day's market prices are herewith quoted:

	Per 100 feet Single	Double
10- 25 in.	$10 50	$15 25
26- 40 in.	11 50	17 25
41- 50 in.	15 00	19 50
51- 60 in.	16 50	20 50
61- 70 in.	18 00	22 00
71- 80 in.	.....	23 75
81- 85 in.	.....	27 25
86- 90 in.	.....	28 50
91- 95 in.	.....	30 25
96-100 in.	.....	34 50
101-105 in.	.....	38 25
106-110 in.	.....	44 25

Single lights are to-day quoted at 40% off list.

Clocks Advance 20%; Shipments Are Slow

Winnipeg.

CLOCKS.—New prices have just gone into effect on Big Ben and Baby Ben alarm clocks showing a 20 per cent. advance. Factory shipments remain very slow and Winnipeg stocks are very limited. Prices quoted to-day are as follows: Big Ben, $2.90 each; Baby Ben, $2.90 each.

Eley Loaded Shells Decline In Price

Winnipeg.

ELEY LOADED SHELLS.—Following the adjusting of prices on many lines of sporting goods for spring, Winnipeg jobbers have announced a reduction of $1 per thousand on Eley's loaded shells to include both black and smokeless powders. Prices prevailing to-day are as follows: Black powder, soft shot, 12 ga., $30; 16 ga., $28.50 per M. Smokeless Powder, chilled shot, 12 ga., $37; 16 ga., $34 per M.

Linseed Oil And Turpentine Unchanged

Winnipeg.

LINSEED OIL, TURPENTINE.—Although Eastern markets report an increase in linseed oil, Winnipeg markets remain steady as formerly quoted with the demand very limited. Prices are as follows: Raw, $1.65; boiled, $1.68 per gallon, in barrel lots.

No change is reported in turpentine prices, the market holding firm with ruling prices as follows: Barrels, 80c gal.; ½ barrels, 83c. gal.; 5 gal. lots, 85c gal.; 1 gal. lots, 85c gal.; with the usual extras for containers.

PITTSBURG MARKETS

PITTSBURGH, Pa., Jan. 12.—During the past ten days the Pennsylvania, Baltimore & Ohio and New York Central lines have declared more or less complete embargoes, refusing to accept freight for many points, excepting Government material, blast furnace raw material and perishable freight.

These embargoes almost completely prevent the Pittsburgh district from shipping its product, while the Youngstown district has only the Erie road to depend on, and it is partly embargoed. No statement is vouchsafed in railroad circles as to how long the embargoes will be kept on. They are strictly an emergency measure, calculated to relieve congestion, and are not directly an outcome of the Government having taken over the roads.

Embargoes Affect Steel Mills

The steel mills cannot stock their product for any length of time, and within a week, if the embargoes continue, some curtailment of operations at finishing plants will be forced. Hitherto the iron and steel industry has felt results from the insufficiency of transportation facilities only in respect to receipts of coke and coal. The restriction in coke movement was such that pig iron production in the country dropped from a rate of 39,400,000 tons a year in November to a rate of 34,300,000 tons in December. The loss in production was chiefly in the Pittsburgh, Youngstown and lake front districts, which depend largely upon Connellsville coke, and the restriction in these districts has at times been as high as 30 to 50 per cent.

Strenuous efforts have been made along individual lines to improve conditions. Blast furnaces have employed many experts to work in the Connellsville region, routing shipments and frequently following them through to furnaces, also in discovering coke stalled en route and getting it started moving again. The railroads, by means of embargoes and otherwise, have sought to relieve the general congestion.

In this and other work that has been done there has been no co-ordination. Each interest has striven merely to improve conditions with respect to its own case. Even since the Government took over the railroads, at the close of December, there does not seem to be any comprehensive plan under consideration for utilizing the facilities of the railroads for various services in the order of their importance. What is being done, and no doubt being done intelligently, is to relieve the congestion in general, whereby there will be a freer movement of freight in general.

Maximum Production Desirable

The practical point is that full production by the iron and steel industry would pave the way for lower selling prices, if indeed it would not produce lower prices merely by the operation of the law of supply and demand. Washington, it is well known, desires lower prices, the set prices now in force being the result of a voluntary agreement between the War Industries Board and the producers, Sept. 21, 1917, and being regarded as temporary. Originally they were set to run to the end of the year and when, late in December, it was decreed they were to continue to March

31 next, the postponement of revision was regarded as a necessity arising out of the circumstances and not as a particularly desirable thing in itself. With co-ordination between those in Washington who desire to see lower prices for iron and steel and the railroad system the way could be cleared for lower prices. Production costs would decrease and there would be more material to sell.

At the present time the whole situation as to production, prices and consumption is an extremely confusing one. Some plants are running full, some are running at restricted rates, and some are closed entirely, while there are

Steel Corporation Activities

As to prices, the set prices govern, in nearly all instances, when there are transactions, but to all appearances the market is stagnant. Producers do not report making any sales to speak of, except to observe that they are receiving Government orders, and details of these are witheld, according to Washington's request months ago. This week, however, has come the puzzling fact of the United States Steel Corporation reporting an increase of 484,612 tons during December in its unfilled obligations. During the seven months preceding the Corporation had been reporting decreases, averaging nearly 500,000 tons a month. Shipments in December were curtailed by only 100,000 or 200,000 tons a month, and where the heavy bookings indicated came from is a mystery. Possibly the Corporation sprang a coup, and quietly booked some large tonnages with industrial consumers. If so, it must have offered inducements. A fact to remember in this connection is that in the Government's announcement of Dec. 29 that the set prices were to continue to March 31 there was a decree to the effect that any contracts made meanwhile should provide for price readjustment on any material delivered April 1 or later to any price that might subsequently be named by a Government agency. The Steel Corporation's December bookings would not be subject to that proviso, and buyers might find it to their advantage, in the matter of priority of deliveries, to have contracts at above the Government prices ruling later.

There is practically no market to report at this time and the whole interest of the trade is as to what is going to develop so as to give the market a definite color. Deliveries on current contracts are behindhand in nearly all cases, and there is naturally no particular occasion for producers and consumers to enter into additional contracts. The striking fact is that, although production has been additionally restricted for several weeks past, there is no evidence that consumers are proportionately incommoded thereby.

Capacity Exceeds Production

[illegible]ime for a twelvemonth or more [illegible]ustry operated at capacity, and the existing capacity, in both pig iron and steel, is much greater than the production has ever been. At the present time pig iron production is at the rate of about 33,500,000 tons a year, or approximately 9,000,000 tons less than the capacity, while production of steel ingots is at the rate of about 38,000,000 tons a year, or 10,000,000 to 12,000,000 tons less than existing capacity.

The question is, what would occur if transportation conditions should be made such as to permit full production. The improvement in traffic conditions might conceivably increase greatly the consumptive requirements, but it would seem rather more probable that steel would become much more plentiful.

LIGNITE BRIQUETTES

That lignite coal briquettes can be laid down at many points in the Prairie Provinces, but more particularly in Manitoba and Saskatchewan, at a lower cost than anthracite is the finding of the committee on minerals of the Commission of Conservation just made public. The report was prepared by W. J. Dick, mining engineer to the Commission, as the result of an investigation made by him into the possibilities of the lignite coal fields of Western Canada as a source of coal supply for domestic purposes.

Mr. Dick gives the following estimate of the saving which would result from the use of carbonized briquettes instead of anthracite in certain cities and towns in Manitoba, and points out incidentally that the price of anthracite is certain to increase. Portage la Prairie, nothing to 45c; Carberry, 80c to $1.30; Brandon, 85c to $1.10; Virden, 95c to $2.30; Moosomin, 95c to $2.20; Wolseley, $1.45 to $1.70; Regina, $1.75 to $2.40; Moose Jaw, $1.70 to $2.50.

The estimated cost of laying briquettes down at Winnipeg is $10.50 per ton, or slightly more than the cost of anthracite.

THE TIN SITUATION

It is stated that at the present time there is a more serious aspect to the tin situation than some surmise. In London, it is stated that there are slightly less than 4,000 tons of Straits and Australian tin, and of this 3,000 tons have been bought and paid for by American manufacturers or dealers. This leaves less than 1,000 tons in the hands of British concerns. There are some 5,000 tons in addition to this afloat and in England of the standard tin. The seriousness of the situation rests in the fact that, although the tin has been purchased in the regular way, the government will not let it out of the country. Shipping permits are held up absolutely in England. It is just about as difficult also to anticipate any delivery from Singapore.

TINNING PLANT INSTALLATION AND JOB TINNING

The New Standard Hardware Works of Mt. Joy, Penna., has made an addition to their plant and organization. The addition to the plant is an increase equipment for all kinds of hot tinning of grey iron, malleable iron, steel and brass stampings, etc. and in connection with this new addition they are in a position to take care of increased quantities of hot tinning.

The new organization is qualified to advise on the outfits, installations and any information regarding tinning plants.

American Industries Ordered Closed

MANUFACTURING enterprises in the United States, with few exceptions, in all States east of the Mississippi, have been ordered by the Government to suspend operations for five days beginning Friday morning. It was further directed that industry and business generally, including all normal activities that require heated buildings, observe as a holiday every Monday for the next ten weeks. This will close down on Mondays not only factories, but saloons, stores, except for the sale of drugs and food, places of amusement and nearly all office buildings.

Shipyards will be permitted to continue operations, but munition plants will be closed. The Government's move came without warning in an order issued by Fuel Administrator Garfield, with the approval of President Wilson, prescribing stringent restrictions governing the distribution and use of coal.

The order is expected to go far towards relieving congested railroad tracks and terminals, and it is possible a rail embargo may be declared against shipment of the products of the plants closed down if necessary further to relieve the roads.

Leaders in the steel industry at Pittsburg have expressed satisfaction with the measure, as at least half of the steel mills are now closed, half of the blast furnaces banked, and it would probably have meant a complete suspension within a few days, even though no order had been issued.

Some opposition has developed which states the order is unnecessary under the fast improving conditions. The opposition goes on to say the order will dislocate industry, throw millions out of work and impoverish families who depend upon daily wages. It is impossible to estimate what the outcome will be.

WEEKLY PAINT DEPARTMENT

Freight Rates to Affect Paint Prices

Long Haul Shipments Will Feel it Most—Consumer Will Pay Advance of Few Cents—Half Gallon and Half Pint Containers May Vanish

INCREASED freight rates are a factor to be considered in connection with the paint business this Spring. Of course Spring bookings in certain cases are accepted on a basis of f.o.b. at many distributing centres which are convenient for a great proportion of the country dealers, but such bookings have to be made within time limits as bona fide Spring bookings. On heavy goods like white lead in oil the freight rate advances will certainly be felt over the long hauls. The manufacturers are going to feel a considerable share of the advances in any case. The consumer is not going to get any share he's likely to notice very much. The increased cost of carrying the paint from factory to counter is going to be shared between manufacturer and distributors without any very serious weight on the retailer. These are views of men in close touch with the situation.

Large Consumer Will Pay Some

Some of the extra cost of carriage will be paid by the consumer. Some will be difficult to pass on. The large consumer of paint, the man who uses gallon and five-gallon cans of paint at a time, will notice a small advance in cost due to the freight rates having been increased. The consumer of the little cans of paint for domestic use will probably get off scot free unless freight rates go a lot higher than the fifteen per cent. East, and ten per cent. West, so far proposed. Retailers who go in for carload lots and have their carloads shipped over a long haul will notice quite a difference on the total freight bill, but when it comes to distribute this extra freight on the ultimate consumer it will be found hard to get the little cans to carry any of it. For it means little picayune two cent advances per gallon which the retailer in many cases cannot profitably pass on to the consumer. In many instances the manufacturer will share the burden with him, and the consumer will get off lucky as consumers have in connection with paint in many cases since the war began.

Won't Affect Demand For Paint

Freight advances will, therefore, not affect demand for paint very seriously. Even the man who has a whole new house to paint will not find the advance in cost of paint much more than twenty-five cents or so on his whole consignment. This makes the outlook for Spring trade in paints very good, indeed. There is every prospect of the demand being at least as good as last year's, and according to present indications it may even be better. Many a carload of paint will roll westwards to Winnipeg, advanced freights or no advanced freights. The farmers' demand is likely to be bigger than ever.

There is less dread of railway delays at present. It is probable that the retailer will get his supplies of paint on time, and as Spring approaches there will be plenty of opportunity to work up a good brisk demand for paint and deliver the goods for the jobs. The car shortage of last Winter is said to be less acute, and improvements in rail transportation are looked for. No doubt with advanced freight rates in sight the railway companies will do better, and in any case last Winter's troubles made remedial steps necessary.

"Freight cars seem to be more easily available this year than last year at this time," said an executive of one large paint manufacturing concern, "and we figure that Spring deliveries of paint will all go out on time. If the increase in freight rates is to mean improvement of equipment and facilities for transportation then so much the better."

The Container Question

In connection with food products the tin container is being done away with as far as possible, and the small package is under a ban. Since tinplate is scarce and costly and the making, packing, and handling of small cans of paint involve extra labor and production cost there has been talk of cutting out the small containers in paint lines as far as possible. Not, perhaps, the small cans of paints for household use. To cut these out would certainly restrict sales of these lines of paints for a household paint-brush wielder will not want to buy a great bulk of paint for a small job. But where paint is being used on a fair-

(Continued on page 50.)

Varnish Stains and the Window Display

Making a Drive on Varnish Stains—The Display Windows an Important Factor—Features That Count—Interiors That Sell Goods

HARDWAREMEN generally are fully awake to the possibilities that await them in the careful, well-planned window display. More and more is the importance of the store front becoming realized by merchants everywhere. It is true of a hardware store as of a dry goods store that attractiveness, brightness, and cleanliness in a store front add a measure of prestige to that store which cannot be easily overcome. The dress of the store very materially affects the class of business done; those that are neat, that make a direct appeal to the man-on-the-street, are sales agents which it should be the endeavor of every merchant to keep primed up to the limit.

Year Round Displays From Paint Department.

It is undoubtedly true that a merchant is not always sure just which lines to display and how to display them. With some lines it is only at certain seasons that displays can be made, with others the appeal can be varied to suit the season. Under the latter category can be classed paints, for under this heading come lines for which, if pushed aggressively, a sale exists during the entire year.

What items sell now from this department? Who wants to buy paint at this season of the year? Isn't it only possible to effect sales in the spring, summer and fall months? These are questions which crop up before some merchants and they wonder how up-to-date, attractive windows can be arranged that will sell goods from the paint department now. It is to those merchants who overlook the possibilities for sales during the winter months that special attention is given in this article.

Varnish Stains and the Window

It need only be necessary to take one line, though others may be covered briefly further on. Let varnish stains be taken as an example from this department. Practically all manufacturers furnish these goods in tins which are at-

tractively labeled. Is there anything which really catches the eye more quickly than brightly-colored cans of stains? Right there, then, the merchant has a big factor to play up in his windows. The tins themselves furnish an attractive appearance—a display of them arranged in almost any fashion is bound to catch the eye.

Planning the Window.

But it is more than just to catch the eye that windows are dressed. There must be an element that will hold the mind. It is not enough that people admire the beautifully lithographed tins—there should be something which even in a glance conveys a distinct impression to the mind. This is the factor which makes for success in this form of advertising—it is to influence the mind to a consideration of individual requirements—to have the onlooker say to himself: "How does that appeal affect me?"

Getting the Customer Into the Store.

The window dresser who succeeds in creating a question in the minds of his customers as to how they can use the varnish stain which he is showing, who can develop a line of thought that will bring them into the store to make inquiries, is accomplishing what is really the aim of all who study this question thoroughly. Once in the store, it should not be impossible to close the sale or give such information as will bring the customer back.

Giving Them Something to Carry Home.

It is by no means likely, however, that all those in whom the germ has been sown immediately enter the store. There must be something tangible which can be carried around, which sticks to a man, which will bring him to your store two or three days, weeks, or even months, later when he is considering the use of varnish stain.

Features That Count.

What, then, should be incorporated in the window besides a neat arrangement of the cans themselves—in what way does that adhesive substance mentioned emanate from the store window? Bright, snappy display cards on which is outlined the work possible to accomplish should be in evidence. Tell your customers that varnish stain can be used on the floor, on the doors and windows, on the furniture. Tell them that it is easily applied, even mentioning that they can do it themselves. Show color cards which will give them evidence of how the line has been extended so that they may employ it to correspond with any finish of furniture which they possess.

And by all means quote them a price. Because paints and varnishes are now higher in price than they were three years ago is no reason why this important factor should be omitted. Varnish stain is not alone in this respect, for other lines have kept steadily climbing, and in giving prices you create a feeling of confidence that your goods are worth the money. It is more than likely, too, that in quoting prices people will realize that the big advances which they had expected have not materialized. True it is that a tin of stain which formerly sold at 75c may now be $1.00, but people look at the dollar price and think that is not so bad. An advance of 25c does not sound as great as though you were to say the advance amounted to 33 1-3 per cent. And what, in actual cost on any work which the householder is considering, does the increased price of stain amount to? It will be found to be very, very little, and when the value of keeping their homes well decorated is pointed out, householders will not grumble seriously, if at all, over the figure asked.

Window displays, then, should carry a neat arrangement of the goods. There should be color cards, and in this connection it might be mentioned that many merchants have samples of boards stained to show just how the product is applied. These are very effective, giving as they do a clear idea of the nature of the work which can be accomplished. Display cards to point out concisely points in connection with how the work is done, how easily the goods can be used, and giving prices, are strong sales points in any window display. These should be borne in mind by the window dresser.

Other Lines Possess Sales Value Now.

Other lines which could be played up from the paint department stock now are floor paints, wall paints, kalsomines, varnishes, enamels, furniture polish and floor wax. These are active at all seasons of the year, but when some items of the paint department do not move, special pressure could be brought to bear on those lines, which will keep the cash register busy.

Interiors That Sell Goods

Interior displays should never be allowed to grow stale. Freshen them up, change the goods around, get the brighten-up idea working in your own store and see how great an affect this will have on sales. Keeping the goods in front of your customers in an attractive way helps the work of the staff materially. Increased sales result with less effort, and in the present times of labor shortage all methods which will keep sales up to a high standard with the least effort should be vigorously employed. Do not overlook the possibilities of the window display, create a favorable impression on the outside and back it up with an interior arrangement of merchandise that will help close sales. The paint department can be kept active with very little effort, it responds with very little coaching in a manner that means profits. Think what an aggressive campaign would bring and you will start planning now. It is by no means too early.

Will Increase Steel Production in Canada

CANADIAN manufacturers of steel have been in Ottawa conferring with the War Committee of the Cabinet relative to steel production. As a result of the conferences held, an increase of twenty per cent. in the steel production of Canada over that of last year is promised.

Full details as to how this will be accomplished are not available, but it is thought the Government plans for speeding up the shipyards may play an important part in securing the results looked for.

In the program which will be followed it is noted that rolling mills are to be established to provide steel formerly secured from the United States. These mills will be employed in making plates, and it is thought they will be located in connection with existing plants at Sydney, New Glasgow, Hamilton and Saut Ste. Marie. The present total capacity of the Canadian mills is 300,000 tons per year.

The Government in the consideration of this question realized that the chief difficulties in the way of successfully carrying on a construction program lay in the fact that steel plates and shapes were not made in Canada. The advantage to Canadian industry as well as to the general cause in making Canada self-contained in this respect are obvious. Negotiations are under way with the object of establishing at some suitable place or places mills for the rolling of ship's plates and shapes to provide maximum requirements.

Whether the proposed program will curtail the amount of steel available for other manufacturing industries is still uncertain. It is more than likely the Government will exercise a measure of control over distribution, and if this is the case those manufacturers not on war work may have to gradually curtail their output.

DEBT OF THE U. S. GROWING

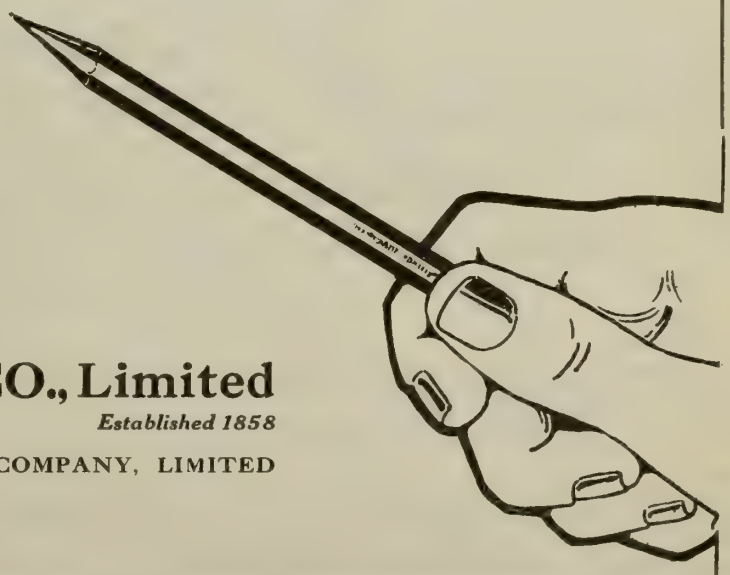
The United States enters the new year with a national debt of $5,615,000,000, more than five times greater than when it entered the war nine months ago; but only one-third of the debt which promises to develop by the first of next year. The debt per capita is about $51 and the percentage of debt to estimated national wealth is 2½ per cent.

Owen Sound, Ont.—The Great Lakes Steel Corporation has been incorporated by Frank Regan, William N. Irwin, and E. J. Murphy, all of Toronto, to manufacture iron and steel products of all kinds, with a capital of $1,000.000.

Become an Agent for

JAMIESON'S

PAINTS and VARNISHES



It is important in these times of stress to have a line of paints and varnishes behind which you can put your whole-hearted recommendation. There is no risk in doing this with Jamieson's quality goods. None but the finest materials are used in their manufacture.

Our guarantee stands behind every sale. Every purchaser of Jamieson's goods must be a satisfied customer, because you want his repeat sales and so do we. You can give the fullest guarantee with Jamieson products and we will stand behind your recommendation.

Prices of Jamieson's products are moderate. None can beat us for quality, but our prices give the consumer full value for his money and at the same time leave a good margin for the dealer. We invite you to investigate, our proposition is well worth looking into.

Link your store with this trademark and your sales and profits will surely grow.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Jan. 16.—The paint markets are normal for this time in January and all jobbers and grinders are well-pleased with the outlook for business during the coming season. Bookings continue to come to hand in very reasonable volume. Once in a while the retail dealers are careful as to their bookings and in this respect there is an evident desire upon the part of the salesman to go over the matter of next year's supplies carefully with the customer and help select as circumstances justify. In the long run it will be well if dealers choose lines and colors that can be sold to the trade which they serve. There is a noticeable activity in lines sold for export and certain shipbuilding supplies are reported to be moving. One of the large paint makers has been able to begin operations at the Halifax plant and is busy with accumulated orders. Linseed oil is firm as are all products. The bad weather has affected seed delivery and this is very poor.

Linseed Oil Feverish With Upward Tendencies

Montreal.

LINSEED OIL.—The feature of interest in the linseed oil situation is the decreasing size of spot stocks. There is little movement of seed, in fact it is almost nil and the stocks that are on hand must necessarily be reduced. Notwithstanding this, crushers are still operating and are living in the hope that conditions as to weather and also delivery will improve before a great while. It is probable that the present tie-up will make a difference of two to three weeks in the deliveries of oil; one dealer is not anxious to make quotations at all for present delivery. Prices are maintained and while there has been a fluctuating condition to the market, the close leaves quotations as made last week, which are as follows:—

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
1 to 4 barrels	$1.48	$1.50½
5 to 9 barrels	1.47	1.49½
10 to 25 barrels	1.46	1.48½

Turpentine Maintained With Higher Tendency

Montreal.

TURPENTINE.—There is not a great deal of demand for turpentine at present. Paint makers state that they have no trouble in securing their needs and that the amount of business coming from the retail trade is still small. Prices at primary points are high and maintained, and the outlook would indicate a rising market. The quotations as made in HARDWARE AND METAL last week are held, with prices ranging at 70 to 73 cents per gallon in barrel lots.

Turpentine—	Per Imp. gallon
5 bbls. and over	$0.69-$0.71
1 barrel lots	0.70- 0.73
Small quantities	- 0.83

Jobbers Expect Advances For White Lead In Oil

Montreal.

WHITE LEAD IN OIL.—A matter on which jobbers seem agreed is that of the probable trend of white lead in oil. The decline of a week ago seems to have had some effect in reducing stocks of the dry white lead. In view of the strong position of pig lead jobbers maintain that the present price of white lead in oil will not continue for any length of time, and that prices may probably be revised within a few days. Quotations are based as revised last week and for five ton lots $14.50 per 100 lbs. is asked; $15 per hundred for ton lots, and for smaller lots $15.35 per 100 lbs.

PAINT IN LARGE TINS TO ADVANCE

Present indications are that a decided advance in the present price of paint in large-sized tins is imminent. The present scale of differentials does not cover the increased cost of production and distribution, and it is understood that advances now under consideration may show a 75 per cent. change over existing prices. Increased cost of tin, manufacturing and handling are factors which enter largely into the reason for this contemplated change.

Will Mixed Paint Be Higher Than At Present?

Montreal.

MIXED PAINT.—There are indications that the mixed paint business for spring will be satisfactory. It is evident that dealers are anxious to buy carefully and in such quantities and assortments as are justified by their individual needs. There are some who have been a little diffident about placing their business, thinking that the price might be somewhat reduced. It is stated that in view of every circumstance, little possibility of a lower price can be entertained. One jobber expressed the opinion to HARDWARE AND METAL that prices would reach higher levels. In the meantime there is a firm tendency and bookings as received by many of the large paint makers are of continued satisfactory volume. Some activity is also reported in export business.

Putty Price Maintained On Recent Schedules

Montreal.

PUTTY.—There is a firm tone to the putty market and jobbers think this will continue. The situation with regard to linseed oil continuing firm, the scarcity and higher price of whiting and the cost of containers will all be factors in the probable maintenance of prices for the immediate future at least. The 25 and 100-lb. drums are selling at $4.95 per 100 lbs.; bulk, in casks, at $4.10 per 100 lbs. and bladder putty in barrels is selling for $5.20 per 100 lbs.

TORONTO

TORONTO, Jan. 17.—Interest in the paint and oil markets largely centred around conditions in white lead in oil. There were rumors afloat during the week that the old price had been restored but inquiry just before going to press elicited the information that prices are still being quoted on the basis of the reduced price recorded last week. Linseed oil is in strong position with a movement upward on the part of some concerns making the low quotations last week. Some lines of varnish have been advanced in price. Stovepipe varnish has also been advanced in one instance. Water paints were also quoted higher by some manufacturers. Booking business for spring delivery continues to be encouraging. Travellers were handicapped in making their rounds during the week through the tie-up on the railways during the first part of the week.

Linseed Oil Moved To Higher Levels

Toronto.

LINSEED OIL.—The low quotations of last week on linseed oil have moved higher by 2c per gallon and the high range has also been increased considerably. Linseed oil is getting scarce owing to the failure of seed to reach the Eastern market in any quantities. In one instance a sale was recorded in single barrel lot at $1 60 per gallon for raw oil. There was a slightly easier tone to the flaxseed market during the week, the net decline in cash seed being 2½c per bushel during the week. For the May option

If interested, tear out this page and keep with letters to be answered.

there was a strong position maintained and prices during the week showed a net concession downward of only ½c per bushel. There seems little prospect of any easier feeling in the market until the railroad situation improves. Receipts of flaxseed at the Western centres during the week were light, movement in all probability being hampered by storm conditions and congestion on the railways. Oil cake is still in active demand with prices being firmly maintained. Oil supplies are light at the present and with any considerable demand higher prices would in all probability ensue.

	Raw, Imp. Gal.	Boiled, Imp. Gal.
1 to 2 bbls.	$1.50-$1.55	$1.55-$1.58
3 to 5 bbls.	1.49- 1.54	1.52- 1.57
6 to 9 bbls.	1.47- 1.52	1.50- 1.55

Less than barrel lots 10c per gallon higher than single barrel price.

Turpentine Is In Much Stronger Market

Toronto.

TURPENTINE.—There was a noticeably stronger feeling in the turpentine market during the week as a result of an advance of 4c per gallon in the primary market. As the result of this condition prices were advanced 2c per gallon in certain quarters which widens the range of prices in single barrel lots to 70c-73c. The differential between single barrel price and 5-gallon lots has also been increased to 10c per gallon in some quarters, showing an increase of 3c in the differential. Demand for turpentine is light in the local market. With a development of demand prices would take an increased firmness.

	Imp. gal.
1 barrel	$0.70-$0.73
2 to 4 barrels	0.69- 0.72
5 gallon lots	0.77- 0.83

White Lead In Oil Holds At Reduced Price

Toronto.

WHITE LEAD IN OIL.—Prices on white lead in oil held steady at the reduced prices announced last week. There was a firmer tone to the market, however, in that rumors were current that the old price had been restored. Inquiry from those who are closely in touch with the situation showed that this commodity is still being quoted on the basis of $15.20 per hundred pounds in ton lots and $15.55 in less than ton lots. It is understood the reduction in price was made with a view to reducing stocks, but reports indicate that booking during the past week on the new basis has not been heavy.

Putty Advance Holds; Glass In Acute Market

Toronto.

PUTTY, GLASS.—Prices of putty were maintained during the week at the advance recently recorded. With linseed oil in light supply and crushers finding it difficult to get seed from the West there is a strong market for that commodity. Whiting supplies are reported light and difficult to obtain owing to the shipping situation. Bulk in casks is quoted at $4.30 per hundred pounds, 100-lb. drums from $5.05 to $5.15 and 25-lb. drums at $5.15 per hundred pounds. Bladder putty in barrels is quoted at $5.40 per hundred pounds.

Glass market is still in a very strong position. Brokers in touch with the situation in the United States have been advised that stocks are within narrow compass in that market and that there is talk of the output being still further reduced. At the present time production is already reduced to about 20 per cent. of normal. Stocks of certain sizes of glass in the local market are also getting within narrow compass. Higher prices seem highly probable should a demand develop for glass in the near future.

Booking Business On Paint Promising

Toronto.

MIXED PAINTS. — Reports from manufacturers indicate the booking business on mixed paints has been very satisfactory during the week and quite as good in most instances as at the same time last year. Some of the manufacturers received requests to ship forward stocks that had been on order and the intimation was made that they are selling freely in that particular locality even under present winter conditions. Conditions so far seem to indicate a fairly good year for the paint trade.

Varnishes And Water Paints Advance

Toronto.

VARNISH, WATER PAINTS.—Advances have been recorded during the week on certain lines of varnishes and water paints. The concern in question has changed their selling basis from net list to list and discount on varnishes, and the new arrangements provides for an increase in price. Following are the list prices on lines changed: Gold Medal varnish, $3.60 in gallon tins; Everlastic, $5.25 gallon; Depend-on, light, hard, oil varnish, $3.35 gallon; Maritime Spar varnish, $7.90 per gallon. Above prices are subject to a discount of 40 per cent. B.H. stovepipe varnish has also been advanced in price and is now quoted at $1.40 per dozen net. B.H. Frescota water paint in 5-lb. packages, white, has been advanced to $6.50 and colors to $7 net. Prices on water paints represent an increase of $1.

FREIGHT RATES TO AFFECT PAINT PRICES

(Continued from page 45.)

ly large scale for outside or inside purposes and is purchased in convenient sized cans in quantity there is a possible economy in cutting out certain sizes.

"The half-gallon, and perhaps, the half-pint cans may be done away with," said a manufacturer in close touch with affairs.

A pint of paint probably meets the requirements of most household purchasers, and to abolish the half pint can may possibly increase consumption of paint for household refurbishing. In the fancy lines of decorative paints and enamels little cans may still hold their own.

Important Differential Change

More likely to come into effect than the abolition of small size cans in the opinion of some paint manufacturers is the alteration of differentials between prices of paints in larger bulk and paints in the small containers. "There seems to be tinplate available in sufficient amounts still," said a manufacturer, "but it costs much more than formerly, and the difference in the cost of handling, filling, and making the small cans, etc., makes a wide difference in price of paint in large bulk as against paint in small cans. I should not be at all surprised to see the differentials between gallon containers of paint and all containers under gallons nearly 100 per cent. higher. They will be from 60 to 75 per cent. I am almost positive."

Colors Available But High Priced

Opinions of manufacturers as to colors which have been scarce since the war fairly got its work in on paint markets incline to the view that this situation is better in hand now but not entirely satisfactory. All colors will be available but not in any amounts, and not at any old prices. The fine quality colors of guaranteed permanence and purity will be available but at high prices.

NEW OFFICIALS

Four Men Advanced to Posts of Greater Responsibility

Four Pratt & Lambert men have assumed the duties and responsibilities of new offices. Three out of the four are occupying entirely new berths, created to fill special needs which the war and growing business have made necessary. R. W. Lindsay, formerly chief chemist, has been appointed Manager of Industrial Sales, with headquarters at Buffalo. Mr. Lindsay has been with the company for ten years and is an authority on varnishes and enamels. Much of his time during the past year or two has been devoted to research and sales work along industrial lines.

A. D. Graves has been made Manager of Trade Sales, with headquarters at Buffalo. During Mr. Graves' ten years with Pratt & Lambert Inc. he has devoted his efforts to the development of the company's dealer trade in Philadelphia. He was one of the "P. & L. Tourists"—salesmen who in 1914, as a regard for unusual sales, were sent on a three months' tour of England and the continent.

H. M. Guisey, who has been with the company ten years, has been appointed assistant resident manager of the Buffalo office. This is a new office, which has been made necessary by the expansion of sales through the Buffalo office.

Clarence Roth succeeds Mr. Guisey, and will conduct the work in the sales department formerly handled by him. Mr. Roth has had a rapid rise, and has made creditable records both in office work and "on the road."

It should be easy to sell Muresco this year

As a really decorative wall covering there is nothing more economical than Muresco and certainly nothing more sanitary. With the minds of all people concentrating on economy and saner living, Muresco should show vastly increased sales this year. Where under normal conditions wall papers would be used, Muresco will be used, because it is cheaper and costs less to apply.

Suggest Muresco in your windows and in your store displays and lay stress on the economy it means.

SPRING OF 1918

WILL BRING BIG DEMANDS

for

SHERWIN-WILLIAMS PAINTS

Homes must be painted—Our Big Consumers Campaign this Spring will teach your customers this fact, and what paint or varnish to use.

BE READY TO PLEASE AND SATISFY YOUR CUSTOMERS by having the paint or varnish they ask for in stock.

Do not let a sale go by. Each sale means a profit for you. Increased sales mean increased profits and better business.

See that you have in stock, or on order, all that you will possibly need. The uncertain condition of the raw material market means a shortage that may occur any time. Have your requirements bought and don't worry.

If you are not a Sherwin-Williams Agent, write us for particulars and participate in this Big Advertising Campaign for S-W Agents.

Can You Imagine a Man or Boy

Who Wouldn't Like to Own This Kit?

No matter what a man's occupation may be, he will find daily use for the "So Handy" Pocket Knife Tool Kit. Autoist, Sportsman, Hunter, Farmer, Boy Scout—these, especially, will find it a pleasing and practical pocket companion. Excellent, too, for use around the home.

Outfit comprises a splendid Jack Knife with cocoa handle and an exceptionally good blade, and the following tools which can be instantly attached to the knife handle: File, Chisel, Reamer, Screw Driver, Bottle Opener, Gimlet and Rule, all made of high grade steel, carefully hardened and oil tempered.

The So Handy Kit is made in five styles. Jobbers—get posted about this good specialty.

RETAIL PRICE $1.50.

Stephens
REGISTERED TRADE MARK

Take your customer's word for it

We do make claims for Wa-Ko-Ver Stain. We do say it will do all that any varnish stain can do, and a little more. We do know that your customer will be thoroughly pleased with Wa-Ko-Ver—so thoroughly pleased that he'll thank you for having recommended it.

But—we do not ask you to accept our estimate of Wa-Ko-Ver. We leave it to your customer to convince you.

We guarantee every single tin of Wa-Ko-Ver. If your customer isn't satisfied, we're not satisfied—our guarantee means something.

Wa-Ko-Ver is the Varnish Stain you've always wanted to push — the kind that you can safely recommend to your best customer. If there is no Stephens' Dealer in your locality, let's hear from you right away.

Setting a standard-and then-living up to it

We have set for ourselves a standard of excellence – not that we might tell you of it, but that we might live up to it. And we are living up to it in a way that is proving satisfactory to Hardware Merchants who require accurate service on their orders of Electrical Supplies and Automobile Accessories.

If you are particular as to the goods you buy and the service you get, let us prove to you the value of the standard we are living up to.

Great West Electric Co. Limited Winnipeg

ESTABLISHED 1849

WOOD, ALEXANDER & JAMES

Successors to WOOD, VALLANCE & CO.

WHOLESALE HARDWARE MERCHANTS

SHELF AND HEAVY HARDWARE

CONTRACTORS' and MILL SUPPLIES

BAR IRON AND STEEL

BUILDING PAPER AND ROOFINGS

AUTOMOBILE ACCESSORIES

BRANCHES: Toronto Office, 25 Front Street East; Wood, Vallance, Limited, Winnipeg, Man.; Wood, Vallance & Leggat, Limited, Vancouver, B.C.; Wood, Vallance Hardware Co., Limited, Nelson, B.C.; Wood, Vallance & Adams, Limited, Calgary. Alta.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index facing the inside back cover, after having secured advertisers' names from this directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

TORONTO JANUARY 19, 1918

The Great du Pont Company Has Doubled Its Advertising Appropriation for 1918. Why?

This Extract From an Article In *Printer's Ink*, By George Frank Lord, Director of Advertising, E. I. du Pont de Nemours & Co., Wilmington, Del., Is an Official Answer and Is of Great Significance to Manufacturers Who May Now Be Hesitating as to Their War-Time Advertising Policies

CONTRARY to general opinion, military sales are in normal times, a negligible factor of this business. The dependable business of a manufacturer of explosives is the sale of dynamite and blasting powder for industrial and agricultural purposes, and of sporting powder for hunting and trap-shooting. But the war in Europe caused a sudden, enormous demand for American military explosives, successfully met by the du Pont, and later, other concerns, through heroic effort, large investment in plants and equipment and the organization and training of thousands of workers. It is not too much to say that American efficiency in meeting this emergency saved the Allies from utter rout in the first year of the war, and hence saved America from the projected attack following the expected fall of France, Russia and England.

This tremendous military business has supplied the du Pont company with great chemical and mechanical plants, necessitated increased capitalization, the employment of thousands, and the creation of two cities.

What will happen to our sales possibilities when peace comes?

How will we earn dividends on the capitalization war requirements made necessary?

How may we fill the war plants with peace products and give peace employment to the thousands of skilled workers living in the war-built cities?

Surely not by wondering what may happen in business when peace comes, but rather by making to happen, what must be to employ these facilities.

We are now engaged in developing to maximum sale possibilities all our old-time peace products: dynamite, blasting powder, sporting powder, pyroxylin chemicals and leather substitutes. We are also entering new but related lines of business: the manufacture of Py-ra-lin, of paint and paint chemicals, of varnish, commercial acids, dyes, drugs and miscellaneous chemicals.

This development calls for extensive, continuous advertising to let all America and the buying world know that the du Pont company which they thought was chiefly a manufacturer of military explosives, is really the world's largest diversified industrial manufacturer producing more than a thousand peace commodities.

We are advertising not merely for current sales results, but for the development of future markets. Our advertising is institutional. We are less concerned with the sale of whatever illustrative commodities we may advertise than with selling the du Pont oval, our trade-mark, and the big idea of du Pont American industries, designed to play a most important part in the post-bellum development of America and the reconstruction of Europe.

Our advertising effort in 1918 will be double that of 1917, and we expect results will justify continued if not increased effort after 1918. In adopting this policy, we believe we are serving not merely the interests of our stockholders, but of the country, and that this service in commercial preparedness is second only to the service that we can render in helping to win the war.

We have no doubt that many other of America's business organizations will in like manner save permanently for American business the fleeting advantages gained through foreign war business.

This should mean an increasing volume of broad, constructive advertising that will forever establish with the American public America's ability to supply all our necessities, utilities and luxuries, and have plenty left over for the markets of the world.

Incidentally, E. I. du Pont de Nemours are advertisers in Hardware and Metal, and have doubled their appropriation for advertising in Hardware and Metal during 1918.

MacLean's Magazine

for JANUARY

Chasing the Submarine---by a Canadian

A CANADIAN, whose name is withheld, in the Motor Boat Patrol Service in the North Sea, tells in the January MACLEAN'S the story of the work and life and triumphs of the Service to which he is attached. It is a fine performance by MACLEAN'S to get this story for the Canadian people. Successes of this sort have made MACLEAN'S go far forward in public favor during past months.

If the horrid and terrible submarine warfare and the conquest of this pest of the deep interest you, learn more about submarines and their capturing in the January MACLEAN'S, and pass on to others the news of this unsigned contribution.

Ships---more ships---and yet more ships

THIS is a very strong article which Miss Agnes C. Laut contributes. As usual she is very well informed. Regarding the duration of the war she voices American opinion when she says that it is likely to be long drawn-out. The United States people are buckling down to a stern struggle. At this time we want very much to read what well-informed, virile thinkers and writers have to say about the war, since things are not any too bright in certain directions. Miss Laut has a good deal to say about the shipping programme of the United States, and certainly she gives facts and sets us thinking as few writers do.

"Jim" by Robert W. Service

A POEM by this strong poet—a poem wrought amid the smoke and hell of battle, yet fanciful and tender. One wonders how men can write fanciful verse amid surroundings that seem so adverse to thinking and writing, yet some gifted can detach themselves and let fancy play; or is it that their minds see through the real and horrible—through the immediate environment into inner things? Whatever it may be, we ought to be glad for the verse that men like Service give us, remembering how and where it is produced.

Adam and Arthur William Brown, Brothers

ADAM BROWN is a Canadian short story writer of large promise. His brother, Arthur William, is one of New York's foremost illustrators. Both brothers have joined their gifts to make Hannibal Helps a mighty good feature of the January MACLEAN'S.

A New Serial by Alan Sullivan

ALAN SULLIVAN'S recent novel, The Inner Door, is being well received. Perhaps we have no better novelist of his type in Canada to-day. He writes books that show introspection and fine analysis. This serial, The Magic Makers, adds venture and mystery to psychological study, and is a rare good thing. Arthur Hemming illustrates the story, which begins in Scotland and is transferred to Canada where the stage is set.

The Regular Departments of MacLean's

REVIEW of Reviews, Women at Work, The Business Outlook—are present in goodly measure. Oppenheim's The Pawns Count, Trench Pictures, and first-class illustrations by artists of note help to make the January MACLEAN'S good value for money.

At All News Stands, 20c

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for machine. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Only through your jobber to-day.

ICE HARVESTING MACHINERY

Our line of tools and machinery is complete. Whether you require a hand saw or a complete outfit—we have it and can fill your requirements.

Get quotations on our sidewalk snow plows and ice levellers for municipal work.

THE "WANT" AD.

The "want ad." has grown from a little used force in business life into one of the great necessities of the present day.

Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.

The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the small affairs and incidents of daily life.

Kindly mention this paper when writing advertisers

Wanted

SIUTATIONS VACANT

WANTED—FIRST-CLASS HARDWARE Salesman, to start work February 1st. Must furnish first-class references, and be exempt from Military Service. Good salary paid to right man. Apply, Box 184, Rosetown, Sask.

WANTED—HARDWARE CLERK BY FEBRUary: two or three years' experience, western preferred. State salary, particulars and references. No loafer need apply. W. C. Auld, Youngstown, Alberta.

WANTED — THOROUGHLY COMPETENT foreman for tinshop in Maritime Provinces. Man with some knowledge of cornice work preferred. No boozer need apply. Apply A. B. C., care of Hardware and Metal, Toronto.

WANTED—FIRST-CLASS SALESMAN CALLing on hardware stores in Eastern Ontario to carry regular lines on commission. Box 723, Hardware and Metal.

FIRST-CLASS HARDWARE SALESMAN — state experience, salary wanted, whether married or single, and if exempt from military service. Do not apply if you cannot sell goods. Apply to D. A. Thomson, Coronation, Alta.

WANTED—A TRAVELLING SALESMAN FOR Western Ontario, to sell washing machines, clothes wringers, etc. Must have connection with the trade and a good salesman. Box 725, Hardware and Metal.

FOR SALE

FOR SALE—BUILDING AND STOCK OF THE Fraser Hardware Co., 1043 Granville Street, Vancouver, B.C.; good terms can be arranged: stock amounts to about $15,000. Fraser Hardware Co.

MISCELLANEOUS

STOVE REPAIRS FOR GARLANDS, PEN Esthers, Sunlights, Silver Kings, Souvenirs, Laurels, Welcomes and all kinds of ranges. Write for list and prices. Grundy Bros., Strathroy.

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada (tf)

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Toronto.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

MISCELLANEOUS

THE SUREST WAY FOR THE MANUFACturers' agent to connect with good live firms, is to tell the manufacturers who read Hardware and Metal, all about his ability to sell their goods. Try an advertisement on the Condensed Ad. Page of Hardware and Metal, under this heading.

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

IF YOUR HARDWARE BUSINESS IS FOR sale, who is more likely to buy it than a hardware man, be he merchant, clerk, or traveller? It is only hardware men who read Hardware and Metal, and a condensed advertisement in this paper offering your business for sale, will put you in touch only with the people who will be most interested.

WANT ADS.

If you want a buyer for your business, or have a situation to fill, or want a situation, send us a Condensed Advertisement. There is someone who is looking for a proposition such as yours. For two cents a word you can speak across the continent with a condensed advertisement in this paper.

TRY IT OUT

DOMINION SHEET METAL CO., Limited
HAMILTON, CANADA

Signs that Dominate

THE illustration above, taken at night, illustrates our illuminated sign on Phillips Square and St. Catherine Street, Montreal. It is 57 feet long and 24½ feet high—truly a national sign, similar to those on the Great White Way of New York.

Strategic positions have been secured in the larger centres of Canada and de luxe bulletins, well illuminated, similar to the above, have been erected to attract the passer-by day and night. Among the desirable locations we have secured for our de luxe signs are—

Quebec —Place Marche Champlain.
Montreal —Phillips Square.
Toronto —Queen and Yonge.
Ottawa —on top Banque Nationale, opposite Chateau Laurier—most conspicuous location in the Dominion.
Winnipeg—corner Portage and Main.

The extensive poster campaign carried on each year from March till May by Brandram-Henderson has been of great assistance to their agents. Every town that has a bill posting plant has had the handsome, familiar 3-can display poster, on which has been featured the local agent's name.

In addition to the posters—painted signs have been placed along the railways throughout Canada—at the approaches to towns—on advantageous locations at street corners. The local agents have been supplied with large field signs 3 ft. x 5 ft. and 5 ft. x 8 ft., bearing his own name and address.

Our agents speak enthusiastically of the selling assistance we give them. Let us submit our Agency proposition to you.

that you'll find easy to sell

CAMPBELL'S VARNISH STAIN
For Floors, Furniture and Interior Surfaces

Famous for its exclusive features of dissolving grease spots, penetrating the wood fibre and never settling in the can.

Comes in 13 colors: Natural or Transparent, Light Oak, Dark Oak, Golden Oak, Walnut, Cherry, Mahogany, Green, Rosewood, Flat Black, Gloss Black, Piazza Green, and Piazza Red.

The varnish stain that has given satisfactory results for over 30 years.

Colorite
COLORS OLD AND NEW STRAW HATS

The magic liquid that three million women bought last year to make their old straw hats look like new. A fast seller with a good profit. In sixteen colors: Victory Blue, Jet Black, Cardinal Red, Navy Blue, Sage Green, Burnt Straw, Violet, Old Rose, Gray, Dull Black, Yellow, Cadet Blue, Cerise, Brown, Lavender and Natural.

The kind women insist upon having.
Don't stock imitations. Order from your jobber today and buy by the name Colorite.

CARMOTE WHITE
Made in High Gloss or No Gloss

The new white finish that has proven to be in a class by itself.

Makes soiled, marred woodwork a beautiful sanitary white. Not just another enamel, but a new white finish made by a scientific process that makes it wonderfully elastic, durable and washable.

Suitable for all purposes, either interior or exterior. Cannot crack, chip or peel off, withstands the hardest cleaning and keeps virgin white under all conditions.

Better Products with a Big Advertising Campaign to Make Them Sell

In addition to the high quality which sells them over and over again, Carpenter-Morton Economy Products will be advertised to 30,000,000 women in a big way through full pages in four colors and black and white in such nationally famous magazines as the Saturday Evening Post, Ladies' Home Journal, Delineator, Designer, Woman's Magazine, etc.

Plan to take full advantage of the big campaign by using our window displays to tell the women of your neighborhood that you sell the Carpenter-Morton Economy Products they see so widely advertised.

Write us for suggestions to make our advertising work for *you*.

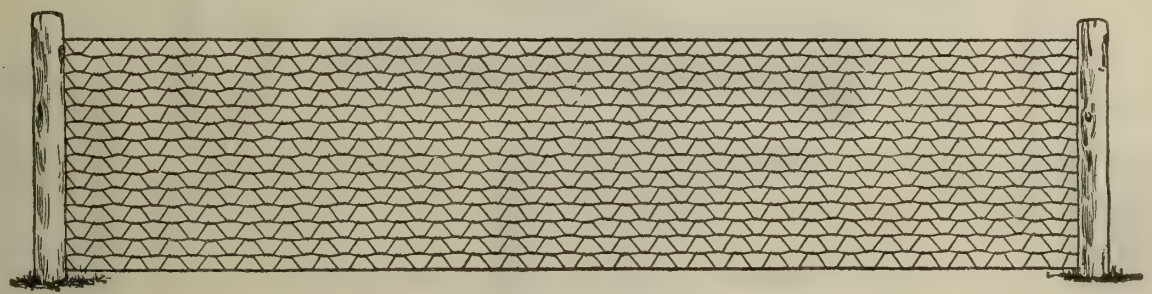
IT SELLS AT SIGHT

"WW"
BRAND
Poultry Fencing



Superior construction

Made in one and two inch mesh

Horizontal wires one gauge heavier than all other makes.

THE FEATURES: Horizontal wires in truss formation are two sizes heavier than cross wires. At intersections the wires are completely twisted, avoiding hinging tendencies and openings by unwinding that are common with other makes. Will hang straight and tight between posts without affecting width, not requiring rail or board at top or bottom.

NOTE THE DURABLE AND PLEASING APPEARANCE.

Prices Attractive. Write for Proposition.

Actual Size of 3½ x 3½
No. 500.

A Good Selling Butt

Our No. 500 Wrought Steel Ball Tip Butt has proven very popular. It can be furnished in Bright Steel, Japanned, or in any one of a large variety of plated finishes. It comes in sizes from 2x2 to 5x5.

No. 500 is packed in the handy, sales-inducing "National" way. The 2x2 size comes one-half dozen pairs to a carton, each pair in a separate envelope with screws. All other sizes are packed one pair in a box, each Plated Butt wrapped separately with screws.

This good seller offers you a good opportunity of getting acquainted with the advantages of handling "National" goods.

Is your name on our list for the 1918 National Catalog?

NOTE: Above prices as figured under the several Tables indicated are for 100 feet of 3-strand Plymouth Manila Rope. For variations such as 4-strand Rope and for Lariat use a Table sufficiently higher to cover the advance over basis.

THESE FIGURES APPLY TO PLYMOUTH ROPE ONLY. DO NOT ATTEMPT TO USE THEM FOR ANY OTHER ROPE

MEASURED

Mr. Customer wants a piece of rope 100 feet long. He knows it must be just that length because he measured for it.

He is coming into your store to ask you how much it will cost.

What are you going to do? Tell him exactly to a cent in about ten seconds by our Rope-by-the-Foot plan, or are you going to say, "Rope is selling for so much a pound now —I cannot tell you just how much it will cost until I cut it off and weigh it?"

Why don't you put yourself in a position to sell rope on a basis your customer knows and wants? You will satisfy him better and save your own time.

Yes, and you can increase your own profits by this method. Others have increased theirs up to 20%.

Ask for our booklet, "Evidence."

Hack Saw Mileage

Just as some tires puncture and some wear out, some hack saws break, others dull quickly.

The utmost in hack saw mileage requires a saw that is hard enough to cut keenly, yet not too brittle.

Starrett Hack-Saws

give the utmost mileage—they are of the highest quality just as Starrett Tools are of the highest quality. Tungsten steel to start with, milled teeth, the right set, and hardened just right for the metal it is intended to cut. And this hardening is important—combined with the right shape of teeth and the best number per inch it insures quickest cutting, thereby saving mechanics' time—the greatest possible saving. But to get most mileage from a hack saw, even a Starrett, the right saw must be used. It's easy to find out what is the right saw for the metal or shape—from page 208 of the Starrett Catalog No. 21MA.

Full of Good Points

In fact as well as in name.

The shape teeth of the "Famous Five" files was determined after many experiments.

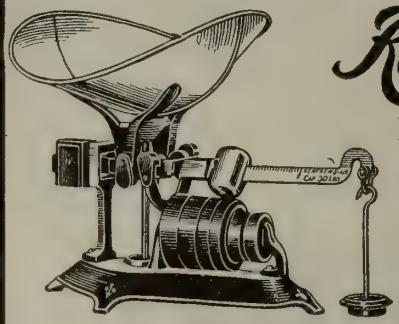
Different shapes and depths are made, according to the work for which the file is intended.

Consequently you can get a "Famous Five" file that will cut fastest, and leave the best surface on any kind of material.

And a "Famous Five" file will stay hard and sharp for the longest possible time.

Their cutting qualities have been standardized. You can rely upon them.

Specify them when ordering from your jobber. They are:



Show Her the Way

FOR goodness' sake, cries the average housewife, show us how to save some money out of the deluge of sky-high prices for meats, sugar, flour—everything. And seldom a thought has she of what a tidy sum can be saved every little while by checking up the honest mistakes of grocer, butcher, etc. Show her

Just a bit of enterprise, pushing the Renfrew Scale to the front—displaying it—and showing her how it soon pays for itself will stir up a tidy lot of sales worth while. Right now is the "psychological moment."

Clinch your sales by showing the Government Inspector's Certificate of correct weights accompanying every Renfrew. Scales supplied in black or all nickel-plated finish. The

Renfrew

HOUSEHOLD SCALE

Capacity ½ oz. to 30 lbs.

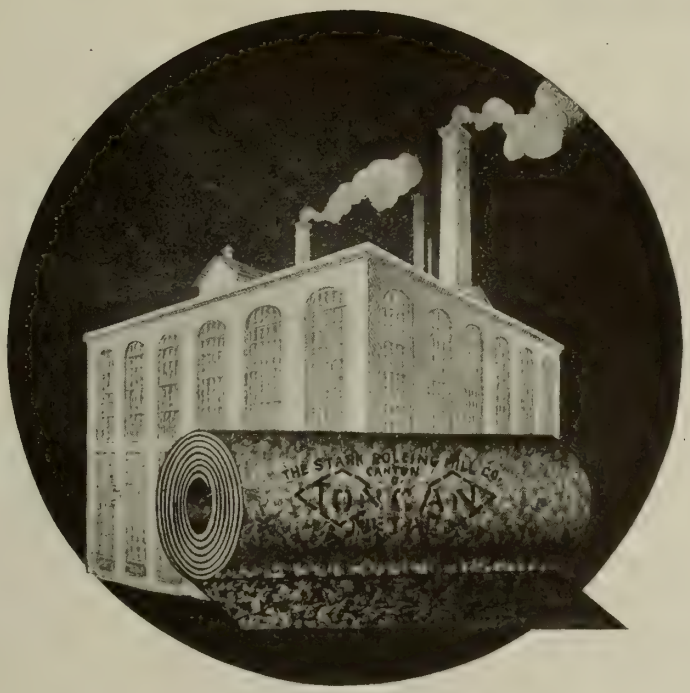
How Much Did You Furnish?

How much material did you furnish on the Brown job? How much did you make on Jones' repair work?

Beaver Board was used on both jobs. It sold other things, too. Paints, varnishes and hardware are needed on every Beaver Board job. Someone made a profit on every item sold. How much did you get?



Worth thinking about isn't it? It surely is when you realize how much Beaver Board is going into every kind of building job.

We've got some interesting data on this subject. How any number of dealers throughout the Dominion have landed good Beaver Board Business and other business with it. Send for it today.

Go After the Big Jobs

ONE big job brings another. And Toncan Metal will help you get the big jobs—the cream of the business in your locality. Here's how:

When a buyer, through force of habit, asks you to bid on "steel" or "iron" or "galvanized sheets," explain to him the advantages of Toncan Metal. It may be just what he wants—a more durable material than steel and iron, yet moderate in cost. And you'll find that nearly always after comparing prices, he will use Toncan Metal, because he realizes it is the cheapest in the end.

Your competitor, in most cases, will try to get the job on price alone. He forgets that the final cost is just as important to the buyer as the first cost. And there's your advantage.

Go after the big jobs. Toncan Metal will help you land them.

DISSTON'S New Saw for Double Duty Work

PATENT APPLIED FOR

This DISSTON D17 DOUBLE DUTY HAND SAW far excels any other pattern ever made for use in heavy construction work of all kinds—studding up houses, shoring for sewers, making forms for concrete building, railroad work, millwright, farm use, and in fact for all general purposes.

The combination of crosscut and rip teeth with the very deep gullets enables this saw to crosscut, rip or cut diagonally across the grain with great ease and rapidity.

The most practical saw of the kind ever made.

Armco Iron Welding Material

Is the Favorite of Practical Welders Everywhere

Because of its unique purity and evenness and the absence of slag inclusions, it works freely and smoothly and makes possible a welded joint of 100 per cent. effectiveness.

For constructions which have to endure severe shocks and jars the high *ductility* of Armco Iron is of the utmost value in welded joints. Where Armco Iron has been employed as a filler the joints have the maximum strength and reliability.

A large manufacturer writes: "We have used various grades of imported and domestic iron in an effort to obtain one whose purity would suit our purposes. We introduced the use of Armco Iron a few months ago, and the results have been exceedingly satisfactory." Another: "We find that the Armco Iron rods are far superior to any welding rod we have as yet been able to obtain." A welding company: "We cannot say enough for Armco Iron welding wire. It works perfectly in the weld and retains its strength and toughness."

PAGE STEEL & WIRE COMPANY, of Monessen, Pa., are manufacturers and distributors of Armco Iron Wire for welding and electrical purposes. They carry an ample stock of wire 16 to 8 gauge and of rods ⅛ to ¼" in diameter.

AMERICAN ARMCO INGOT IRON

The trade mark **ARMCO** carries the assurance that iron bearing that mark is manufactured by The American Rolling Mill Company with the skill, intelligence and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for it.

WRITE FOR SAMPLES

WANTED, AT ONCE — CAPABLE HARDware man to manage retail hardware business in thriving Ontario town. State experience, salary expected, and give references. Apply Box 182, Hardware and Metal.

Men who are capable of managing a retail hardware business are not easy to find. The position requires a high type of ability. Above all, it requires a man who recognizes opportunities and who knows how to make the most of them. That type of man in the hardware business is almost invariably a reader of HARDWARE AND METAL. There were fifteen replies to the advertisement shown here. It was a point in favor of all the applicants that they were in the habit of reading HARDWARE AND METAL.

Guaranteed Service to Consumer.
Guaranteed Profit to Dealer.
Guaranteed Satisfaction to Both.

What the world wants to-day is something BETTER than usual in ANY line.

The buying public is tired of the "Just as Good" things, weary of the commonplace and worn thick and thin with the guilty, grass-grown average.

RAZORS ARE NO EXCEPTION

and it is worth remembering that the

AutoStrop

meets man's insistent demand for a razor better than usual, with service features for correct and easy shaving better than EVER.

A more complete and practical razor does not exist—it is the only razor that sharpens its own blades automatically, and so convinced are we of the shaving satisfaction it gives to any man who buys one that we say to you with emphasis: DO NOT TAKE YOUR CUSTOMER'S MONEY UNTIL HE IS SATISFIED THAT THE GOOD SERVICE GIVEN BY THE AUTO-STROP SAFETY RAZOR WARRANTS THE INVESTMENT.

With thousands of Canadian men called to the colors—all in need of a good, reliable razor, you will find it profitable to prominently display the Auto-Strop Safety Razor and personally point out its merits.

Hundreds of customers buy extra blades for old styles of safety razors and many of them complain of the expense and annoyance so frequently incurred. Here is your opportunity to explain the wonderful advantage of the Auto-Strop Safety Razor, its true economy—its comfortable service—the guarantee of 500 shaves.

WHILE the car is being run into the garage, the door is held open by the Stanley Garage Door Holder No. 1774 which prevents the door from slamming against the car and causing damage to the machine or injury to its occupants. After the car is in, a slight pull on the chain releases the holder arm and permits the door to be closed easily.

STANLEY GARAGE HARDWARE

Because they are designed especially for garages, these STANLEY products give perfect satisfaction.

STANLEY BUTTS AND HINGES insure smooth swinging doors—no warping, sticking or binding.

STANLEY BOLTS mean that the doors are positively and safely closed.

The STANLEY LATCH AND PULL HANDLE are of generous, comfortable design—no more pinched fingers.

There are scores of garages being planned right now in your vicinity. STANLEY HARDWARE is needed.

To-day write for your free copy of "Selling More STANLEY Garage Hardware." It's really interesting.

"Home Comfort" Range

It's Wise to Sell a Single Model

A dealer acting as agent for the "HOME COMFORT" doesn't have to keep a big stock. We make only one size and one style. This simplifies matters a whole lot. It used to be, and still is, the custom for the dealer to put forward on his floor the simplest and cheapest model of a range, and to sell his customers this particular range. Then having made the sale, the dealer would proceed to induce the customer to buy extras. For this purpose, the more expensive models kept in the rear would be used for the purpose of demonstration.

Experience has taught a good many dealers that it is wiser to sell but one model, a model like the "HOME COMFORT." It saves time and money—dealers do not have to carry a large stock. This single model plan pleases the customer, too, and makes it safe and easy to make a choice.

We have made the "HOME COMFORT" the most easily sold range on the market. Write for agency proposition. It's a good one.

Let the Women Know

YOUR store is the place where women like to be reminded of the household needs that have "slipped their minds." Even for so well-known an article as

O-Cedar Polish

a reminder is needed. Housewives will be glad to see O-Cedar before their eyes when they enter your store. Every woman wants O-Cedar Polish because it is the quality polish—because it renews and protects all their furniture—because it cleans as it polishes.

The extensive and powerful advertising given O-Cedar Products is making more O-Cedar users every year. Let your store be known as an O-Cedar store, and you will ensure your share of this profitable business. People will be sure you have it, if you utilize the convenient O-Cedar Sales Helps—O-Cedar Floor and Counter Stands; Electric Sign Displays; and O-Cedar advertising plates. Ask your jobber about yours, as well as about the Profit Deals that will make additional money for you.

Advertise the Goods, the Price, the Store

Milton Alexander, Retail Advertising Counsel, Detroit, Tells Toronto Ad. Club Principles of Successful Retail Store Advertising—Basic Appeal—Price and Value Comparison—Personality—Pictures—Proper Display—Honesty

"BUSINESS is not just business, it is service to mankind." Enunciating this as the basic creed of all merchandising business, Milton Alexander, Counsel on Retail Advertising, Detroit, got into the swing of a constructive address on "Retail Advertising" before the Toronto Advertising Club on Tuesday.

"The business of the retailer—satisfying the innumerable requirements of an over-exploited public," he said, "tends to elevate the standards of living, and make life purer, better, nobler, and generally more worth while. Business is not business: it is service to mankind, and we see in the development of this idea how advertising ideas have left a clean-cut impress on our complex modern life."

Best Business in Cities of Homes.

In illustration of this, Mr. Alexander showed that the most satisfactory cities to do business in or to advertise in on permanent lines, are the cities where people can establish homes, and to the system of selling furniture on the instalment basis he ascribed more beneficial results in service to mankind than perhaps to any other business idea.

"The cities of homes are the centres of successful retail advertising," he said. "Cities of tenements, boarding-houses, and apartment blocks are the places where retail advertising is retarded, and business wrestles with bad conditions."

The Chief Error in Retail Advertising.

"One of the chief weaknesses of the retail advertiser," said Mr. Alexander, "is his inclination to place in his copy a vast amount of extraneous matter which serves no useful purpose except to tickle the vanity of the writer and provide valuable material for the family scrap book. The retail advertiser who fills his advertisement with accounts of his own noble achievements is like the old darky who used to talk to himself because he always liked, as a listener, to hear a good speaker, and as a speaker to have an attentive audience. The public is not interested in your business success, or power, or progress, but in what you have got to sell.

The "Clever" Advertisement Impotent.

"Clever advertisements are sometimes the most impotent," said Mr. Alexander. "Bright ideas don't function unless they help the merchant sell his merchandise. I want no copy of mine ever to be commented upon as 'What a clever advertisement.' I had much rather those who read it would think simply 'That's something I want to buy.'

"The moment attention is drawn to the make-up of an advertisement that much attention is withdrawn from the commodity which it is intended the reader of the advertisement should want to buy.

Three Advertising Principles.

"There are three principles in writing a retail advertisement," said the expert. "The first is to state clearly what the article or the service is.

"The second is to state what the price of it is.

"The third is to state where it can be secured.

"After these three points have been brought out forcefully and well, then further details may be brought out if desired in more leisurely fashion.

Give The Price—Not Over-Emphasized

"Every retail advertisement should carry the price mark of the goods, for through that and that alone is the public given an idea of the market value of the merchandise offered. There is a genuine danger in this, remember. The danger lies in over-emphasis. We have to-day watches we learned to know as "Dollar" watches retailing at $1.25, and many other instances of the danger of over-emphasis of retail price might be given.

Discover the Basic Appeal.

"In preparing a retail advertisement it is necessary to discover the basic appeal of the merchandise to the prospective purchaser," said Mr. Alexander. "This is sometimes easily discoverable, because it consists in simple appeal to the senses. For instance phonographs sell on their tone quality—appeal to the sense of hearing. Clothing sells on style—appeal to the eye. Mattresses are sold on comfort—appeal to feeling. Perfume is sold by its appeal to the sense of smell. Beverages appeal to the taste, and so on. But in some cases it is much more difficult to discover the basic appeal of the goods, and there the advertiser has to employ the greatest skill But every article possesses some quality above all others that compete with it, and to discover this the advertiser must concentrate all the powers he can use. The very weaknesses of some things are the sources of their strength of appeal.

Keep Personality in Advertisement.

"Some retailers in preparing advertisements take from them all their personality in an effort to make them clean and dignified. It is not necessary for any advertisement to be weak in order to be clean and dignified, any more than it is necessary for a man to be effeminate in order to be becomingly dressed. Readers of advertisements quickly and unconsciously sense the lack of personality in an advertisement, and the attempt to attain dignity at the expense of strength.

The Appeal of Comparisons.

"Comparative prices and comparative values are primarily appeals, but it is over-emphasis of this feature which has produced the most frequent examples of fraudulent statements in advertising. I think that the reason for

this is that the stating of comparative prices and values is the easy route for the advertiser to produce effect. In saying this I don't mean to defend dishonest use of comparative prices and values, but to point out that when these are honestly used they represent the very strongest kind of selling point.

Pictures Are Remembered

"We all know something about the great pictures by the masters, Rembrandt, Gainsborough, Turner and so on," said Mr. Alexander, "but what do most of us and the masses remember about the literary celebrities contemporary with the great artists? The message of the ages comes down to us through the picture, and I believe the time is coming when every advertisement in the columns of the newspapers will be duly illustrated. In this connection it is false economy to spare the cost of a picture for an advertisement, the space for which in the newspapers is already costing a good deal of money, if the use of the illustration will make the space so much more effective for its purpose.

Advertisements Not "Printed Salesmanship"

"Advertisements have sometimes been called 'Printed Salesmanship," said Mr. Alexander. "This is not the truth. A real good salesman does not make a good advertising man in every case. The advertising man must bring to his task certain very definite qualities distinct from salesmanship. He must be appreciative of art and illustration values. He must be able to write English forcefully and fluently, convincingly, and with originality. He must be able to judge of things from the psychological viewpoint, as well as estimate their objective value. No man can pass on the complex advertising problems of the day, unless he can bring to bear on them these qualities and more.

Secret of a Fortune by Advertising.

"An old man who had made a fortune by advertising lay dying. His wife thought he might like to have a word read to him from the Bible. She asked him what text he would like to hear.

" 'The text isn't very important so long as it has plenty of white space around it and is well displayed,' murmured the old advertiser, true to his first principle of advertising success.

Milton Alexander told the story to the Toronto Advertising Club, and left the many retailers present to note the moral.

"We are coming to a time," he said further, "when advertising is going to be the only way left open to the retailer to achieve success. The retailer who advertises shows that he is a man of courage, confidence, and energy, who is ready to accept his responsibilities. The retailer who advertises shouts aloud to the world, 'Here am I.' Thieves don't believe in visiting cards. It is only honest men who dare be open about themselves. Widely-known men and goods don't dare to misbehave themselves. If they did wise men and knaves would not hesitate to talk about them.

State Advertising Bureau.

"Advertising is justified if only by its share in winning the war," said Mr. Alexander in conclusion, "and the national governments must inevitably establish national departments of advertising and publicity, not only in the interests of national publicity, but likewise to act as an advisory and supervisory force over the important matter of national development through advertising."

At the close of his address Mr. Alexander replied to direct questions from retailers on advertising problems. The questions and answers are given on another page.

Hints on Advertising for Retailers

Milton Alexander, Advertising Expert for Retail Trade of Detroit, Replies to Direct Practical Enquiries of Retailers at Toronto Ad Club—CANADIAN GROCER Gives the Problems and Their Solution

MILTON ALEXANDER, retail advertising counsel, Detroit, whose address on retail advertising before the Toronto Ad. Club is reported on another page, gave direct answers to retailers' questions on actual advertising problems. Questions and answers are here given from shorthand report:

Shoes, Their Price, And Sale Price

Q. I am a retailer in charge of a shoe department of a store. I have a stock of shoes of different grades, their average price about $6.00. I want to get rid of these and put on a sale advertising "Shoes worth from $5.00 to $8.00 —Now $4.25." There is one pair of shoes in the lot worth $8.00 and a couple of pairs worth $7.00. The rest are worth from $5.00 to $6.00. Is my advertisement honest?

A. No, I don't think it is. That is a base rather than an honest use of price appeal. If there had been originally a lot of shoes which had been priced as high as $8.00, then it would have been honest, but not unless.

Amount to Spend on Advertising

Q. What portion of the revenue of a retail business should be apportioned to retail advertising? asked another retailer.

A. I think the idea of stating any definite amount for retail advertising is basically wrong. Advertising must be regarded as an investment not an expense. But I should roughly suggest that in brisk business periods about 5% to 10% of the revenue should be for advertising, and in dull times up to 20%.

Small Space Often or Big Space Less Often?

Q. Advertising in the daily press, which is the most effective—a small space frequently, or large space less frequently used?

A. That is a very natural question. I don't remember a single meeting at which I have answered questions where this one was not asked. The answer cannot be given offhand. It would be determined by a vast number of conditions and considerations. First, the class of readers of the papers being used. Then the number of prospective users of the product. Then whether the article is one for which demand has been already created, or a new article. Then whether the story of the article can be told in a few words or not. There are fifteen or twenty arguments involved, and every one of them alters the answer to this question. I should say, however, that small copy consistently used is better as a general thing, but in many cases the size of the space used is an element of strength in favor of the advertisement.

Here I would point out that the department stores' full pages in the press are not published that size because the size of space counts with them so much as because their matter is such that it cannot go into any smaller space. Some copy is like that and calls for large space accordingly.

Big Space Used Regularly

Q. Here is a special case of a merchant who uses three-quarters of a page of an evening paper every Friday as against competitors in the same line who are using smaller space, but more frequently. Which is better?

A. There are just two possibilities of psychological inference from that proposition. One is that the reader of the advertisement might take it from the size of advertise-

ment that the store was a large one, and be more inclined to patronize it accordingly. On the other hand it might react against him as giving an impression of extravagance.

The Right Size for an Advertisement

The right size for any advertisement is the smallest possible size which will include the story to be told and still dominate the page. I should say that 27 inches —that is 3 cols. x 128 lines—is sufficient to dominate the page if properly used.

On What Days to Advertise?

Q. What days of the week are the most effective for retail advertising?

A. That would have to be determined largely by local conditions. In Detroit the best days in their order for retail advertising in the daily press are: 1, Friday night; 2, Sunday; 3, Thursday night; 4, Tuesday night; 5, Monday night. Custom has a good deal to do with this. Saturday is a general shopping day in view of the Sunday holiday which causes fresh demands to be created. And Monday brings after-holiday demands. Saturday and Monday will always be good shopping days.

Evening or Morning Paper?

Q. How is it that the evening papers usually get more retail advertising than the mornings? Is there any reason for that?

A. One medium should be as good as another for retail advertising, but the evening papers have apparently developed the retail merchandising end while the morning papers have gone in more for other business advertising.

Q. Why do you favor more percentage of revenue for advertising in dull times as against brisk?

A. I don't know that one time should be more important than another. A man can be satisfied if he likes with less advertising when business is bad than when business is good. But if the advertising is effective and reduces overhead which is the object to attain, then it would be profitable to expend $1,000 in bad times for every $100 when business is brisk.

When Counter Calls Reduce Spending

Q. I hardly agree with the idea of increasing the appropriation when there are many counter-calls for money, patriotic calls, etc., taking people's minds off spending in retail business channels. I think it a mistake to try to force business when it is naturally quiet as for instance in August, or January or February. Is it good policy to spend money on advertising then?

A. In answer to that there is of course a certain point where the law of diminishing returns comes into force and makes the advertising unprofitable. There is always a time to stop advertising. But consider this; if the total amount spent on say clothing in Toronto in a good month say April, is $5.000.000 and the total in January only $1,000.000, and if in brisk business times a retailer's fair proportion of that business is say 5 per cent. it is possible that by advertising in dull times he might get his proportion of the total business available up to 25 per cent. A great many merchants have got more business than their competitors even in bad times by advertising.

Carrying on a "3 Day" Sale

Q. If I run a sale announced as a "Three Day" sale, and returns are not as good as I expected, am I justified in carrying it on beyond the three day term, or would that be false advertising?

A. If you announced very definitely "For Three Days Only" then I think it would be dishonest, though not the sort of dishonesty that does anybody any harm. It's rather like taking apples that would rot anyway if left. But the retailer who ever made a practice of this would certainly get himself where his sales advertisements would be as little believed as the shepherd boy's "Wolf! Wolf!" in the fable.

Basic Appeal of Beverage Advt. is Taste

Q. I am in doubt whether the basic appeal of a beverage advertisement is invariably taste. What is the appeal?

A. Unquestionably it is taste. I'll give you a case. A man came to ask counsel on advertising a new grape juice. He said to me 'I'm going to advertise this on the medicinal properties it has. I notice none of the other fruit juice advertisers seem to touch that aspect of it.' I asked him 'Do you drink anything, beer for instance?' He said 'Yes.' 'Which do you prefer of the different kinds?' I asked. 'Oh I prefer——' he replied promptly. 'Why?' I asked. 'Oh it tastes better' he said, and suddenly realised that the basic appeal of a beverage people are to like is taste. Even a medicinal beverage sells better the better it tastes.

Montreal Automobile Show Opens

Large Attendance on Saturday and Monday Nights—Exhibits Are Large—Accessory Displays Interesting

THERE are sixty-two individual exhibitors at the Montreal Automobile Show being held this week. This is held in the Almy block on St. Catherine Street west. Provision was made for the temporary removal of the Almy stock and the whole third floor was thus given over to the motor show. Space has thus been afforded for a large showing of pleasure cars and trucks, accessories, bicycles, motorcycles and other lines.

The motor truck has so woven itself into the commercial and industrial life of our cities and towns that a consideration of some of its advantages is timely. All makers have bent their energy toward the production and maintenance of a type of truck that would meet and satisfy the needs of a growing demand. Thus, if the truck be wanted for the use of the small retailer, there is a variety to suit his need; if the manufacturer wants one or the jobber, to suit the needs of his business and to carry the heavier loads of machinery or merchandise that are called for by his business, there is likewise plenty of choice.

The Motor Car Exhibits

The makers of cars have not departed greatly from the models of the past season. It has been felt unnecessary to make radical changes, especially in view of the strenuous conditions of to-day. But that which is desirable in a car for comfort is to be found in the models shown. Convenience and attractiveness is not wanting, and from the small to the larger and powerful car one who wishes to select may do so from a very wide showing. The purse of the modest buyer as well as that of the man with the means to buy a limousine of the most approved type may find what he wishes to purchase.

Some of the Exhibits

The following cars are shown: Briscoe, Murray, Cadillac, Detroit Electric, Elgin, Ford, Winton, Gray Dort, Reo, Premier, King, Hudson, Chevrolet, Franklin, Pathfinder, Dodge, Maxwell, Locomobile Marmon, Reamer, Scripps-Booth, Rolls-Royce, McLaughlin, National, Paige-Detroit, Studebaker, Chalmers, Stutz, White and Willys-Overland.

The Accessory Exhibits Good

There are some very good exhibits. None have better ones than those arranged by the accessory dealers. Among these are exhibits by the Jas. Walker Hardware Co., Ltd. This has a background of cloth in amber and black, and the result is pleasing and effective. The usual line of accessories is carried and several of the specialties for which the firm is agent.

The exhibit of John Millen and Sons is novel in that it has a model "tank" complete, apparently, in most details, and quite as natural looking as the real thing. Their background is made up principally of a sign in which illuminated lenses are shown to advantage by the use of a colored-light effect. Accessories are displayed in neat manner.

The Northern Electric Co. has an effective display, a large part of it being so arranged that when the electric current is turned on movable displays attract attention. They have a bobbin-winder to show how cable is made and another interesting electric novelty. The full line of accessories is shown and also samples of a new station for air service.

The Champion Spark Plug Co. has a unique display of its products. A "Globe" is used, and around this, in a wooden circular frame, spark plugs are placed, and when the current is turned on the Globe revolves, through the use of a small motor, and the plugs "spark."

The Champion Ignition Co.'s display is made up of spark plugs.

Convention Program Now Complete

Program Most Practical Ever Provided by Association—Deserves Large Attendance —Splendid Talks to be Given by Business Experts

ALL arrangements have now been completed for the fourteenth Annual Convention of the Ontario Retail Hardware & Stove Dealers' Association to be held in Hamilton, Can., February 19, 20 and 21.

The program is thought to be the most practical that has ever been prepared for the Association, at least, it is the opinion of the officials and of several of the members who have been consulted since the partially complete program appeared in last week's issue of HARDWARE AND METAL.

Business Problems

One of the best features of the Convention will undoubtedly be the address on business problems by John C. Kirkwood, business counsel.

Mr. Kirkwood will take up various subjects in the following order:

1. Ascertaining and recovering the cost of doing business.
2. Making a net profit of thousands per year.
3. A salary for the boss.
4. Selling more goods or the matter of turnover.
5. Making the man behind the counter a better salesman.

Mr. Kirkwood's address alone would be well worth while the attendance of any merchant.

Mr. Kirkwood is well qualified to deal with the subjects owing to his wide experience and the careful study he has made of these subjects.

Following the address, the meeting will be thrown open to a discussion of the various problems, and this will no doubt prove one of the interesting features of the Convention.

Very frequently speakers undertake to address retailers on these subjects, but only cover them in a very general way. Mr. Kirkwood will get right down to brass tacks and show in a practical manner how the retail hardwaremen can apply the most modern methods in their business.

Outlook for 1918

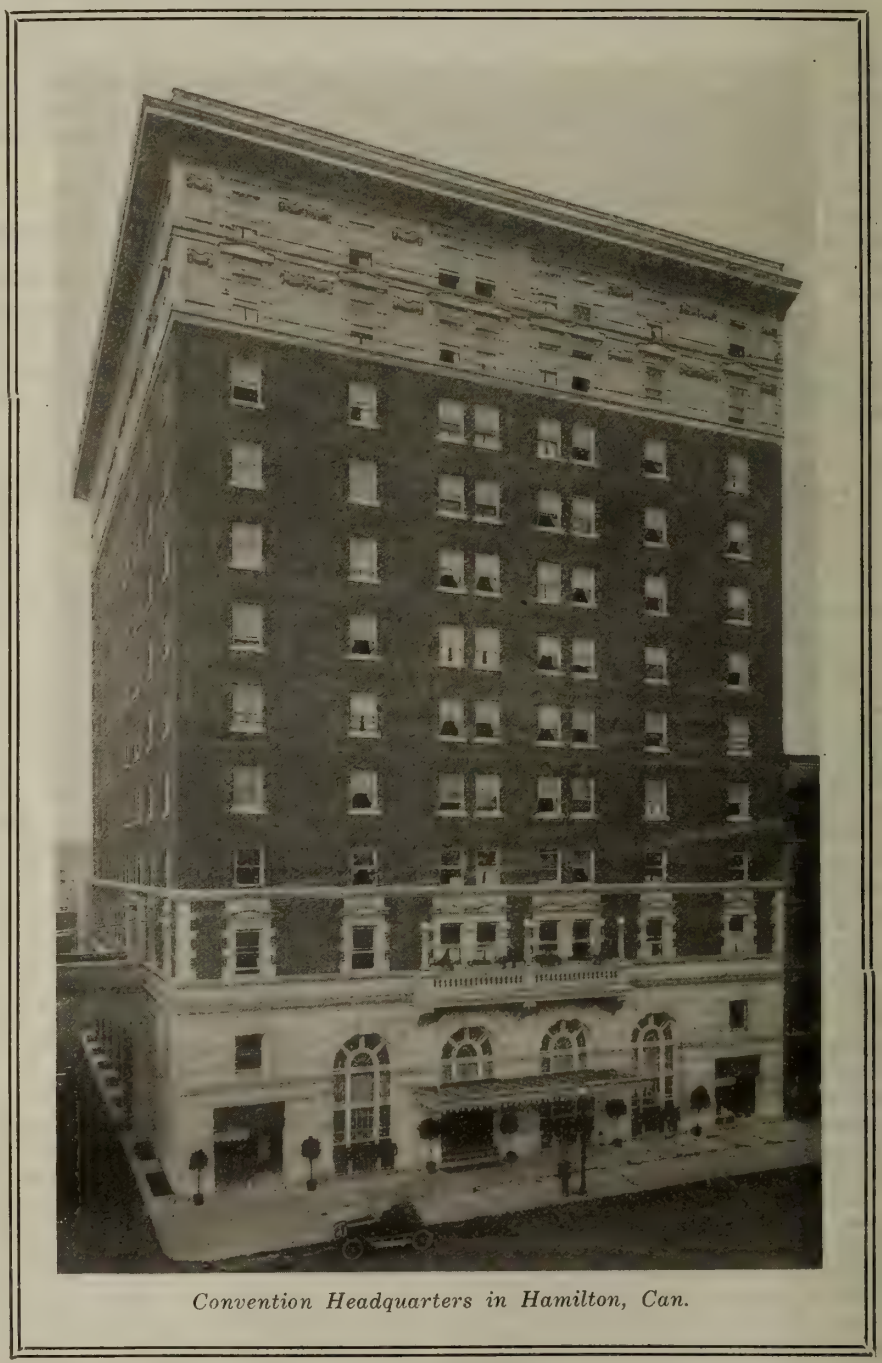
Another most interesting feature of the Convention will be a series of short addresses on the outlook for 1918 by prominent manufacturers and wholesalers. The speakers will undoubtedly give their hearers a large amount of valuable information regarding the future outlook—information which should prove of inestimable value to retailers during the next few months.

Addresses will be delivered on the following subjects: "The Linseed Oil and White Lead Situation," by H. M. Ashby, managing director Sherwin-Williams Co., of Canada, Ltd., Montreal.

"A forecast on sheet metals," by A. T. Enlow, president Dominion Sheet Metal Co., Hamilton.

"Saws and tool situation," by H. P. Hubbard, general manager, E. C. Atkins & Co., Hamilton.

"Shovel situation, present and future, as we see it," by W. G. Skelton, Canadian Shovel & Tool Co., Hamilton.



"Hinges and wrought hardware," by A. F. Hatch, manager Canada Steel Goods Co., Hamilton.

"Ready mixed paint outlook," by F. J. Penberthy, manager Lowe Bros., Ltd., Toronto.

"The metal market," by W. G. Harris, senior, president Canada Metal Co., Toronto.

"The outlook from a wholesaler's standpoint," by T. B. Williamson, of H. S. Howland, Sons & Co., Ltd., Toronto.

Following the addresses a discussion

Convention Headquarters in Hamilton, Can.

will take place and queries from members will be given consideration.

Advertising Problems

The address on advertising by A. A. Briggs, advertising manager, Dunlop Tire & Rubber Co., Toronto, should also prove a most interesting feature, and those hearing the address will undoubtedly receive a great many splendid ideas which they can use to advantage in their own advertising. This address will also be followed by a discussion on advertising problems.

Address on Salesmanship

Another interesting feature on the program is an address by Geo. A. Simpson, sales manager, Steel Company of Canada, Hamilton. Mr. Simpson has had an exceptionally wide experience in sales problems and is an authority on this subject. A number of Mr. Simpson's articles have appeared at various times in HARDWARE AND METAL and other publications.

Department Stores and Mail Order Houses

The buying and selling methods of department stores and mail order houses will be covered in an address by G. D. Davis, manager HARDWARE AND METAL. Many of the methods of department stores and mail order houses will be covered in this address.

Following the address, a "Question Box" session will be held in which a large number of important matters will be brought up for discussion.

There are two "Question Box" discussions on the convention program, and no doubt many important questions of interest to the trade will be brought up and thoroughly discussed.

Another feature of the Convention is demonstration of actual salesmanship, in which prominent members of the Association will take part. Mock sales will be a feature of the Convention program at Thursday morning session.

Election of Officers

A new plan will be followed this year regarding the election of officers, and election will take place by ballot. Nominations will be received during the first and second day of the Convention, after which ballots will be printed and the election will take place on Thursday morning.

It is expected that members will take a deep interest in the election of officers this year and elect men who are best fitted to carry on the work of the Association.

Closed Meetings

It is also planned to provide distinctive badges for members, Association members and visitors.

Some of the meetings will be open to all those in attendance at the Convention, while others will be closed meetings at which only members will be admitted. It is felt that at the closed meetings where they are confined

(Continued on page 60.)

CONVENTION PROGRAMME

THE ONTARIO RETAIL HARDWARE AND STOVE DEALERS' ASSOCIATION

ROYAL CONNAUGHT HOTEL, HAMILTON
FEBRUARY 19-21, 1918

TUESDAY, FEBRUARY 19

10.30 a.m.—Meeting of Executive, appointment of Convention committees.
Reports of Officers for approval by Executive.

2.00 p.m.—Open Session.
Reception by Mayor and Trade Association representatives.

3.00 p.m.—Business Session for members.
President's Address.
Secretary's Report.
Treasurer's Report.
Reports of Executive and Advisory Committees.
New Business.

Evening—Open for entertainment.

WEDNESDAY, FEBRUARY 20

9.30 a.m.—10-minute addresses on "Outlook for 1918," by following speakers:
"The Linseed Oil and White Lead Situation," by H. M. Ashby, Managing Director Sherwin, Williams Co., Montreal.
"A Forecast on Sheet Metals," by A. T. Enlow, President Dominion Sheet Metal Co., Hamilton.
"Saws and Tool Situation," by H. P. Hubbard, General Manager E. C. Atkins & Co., Hamilton.
"Shovel Situation, Present and Future, As We See It," by W. E. Skelton, Superintendent Canadian Shovel & Tool Co., Hamilton.
"Hinges and Wrought Hardware," by A. F. Hatch, Manager Canada Steel Goods Co., Hamilton.
"Ready Mixed Paint Outlook," by F. J. Penberthy, Manager Lowe Bros., Ltd., Toronto.
"The Metal Market," by W. G. Harris, Sr., President Canada Metal Co., Ltd., Toronto.
"Outlook From the Wholesaler's Standpoint," by T. B. Williamson, H. S. Howland Sons & Co., Toronto.
Queries from members and consideration of forecasts.

WEDNESDAY AFTERNOON

1.30 p.m.—Address by John C. Kirkwood, Business Counsel. Mr. Kirkwood's address will cover the following subjects: Ascertaining and Recovering the Costs of Doing Business; Making a Net Profit of Thousands Per Year; A Salary for the Boss; Selling Enough, or the Matter of Turnover; Making the Man Behind the Counter a Better Salesman.

3.30 p.m.—Address on "Advertising," by A. A. Briggs, Advertising Manager Dunlop Tire & Rubber Goods Co., Toronto.
Queries and discussion on above subjects by members.
Question box.

WEDNESDAY EVENING

Closed meeting for members.
"Department Store and Mail Order House Methods," by Geo. D. Davis, Manager HARDWARE AND METAL.
Question Box Session.

THURSDAY MORNING

Closed Session.
9.30-10.30—Election of Officers and General Business.
10.30—Address on "Salesmanship," by Geo. A. Simpson, Sales Manager Steel Company of Canada, Hamilton.
"Mock Sales."
"Demonstration of Actual Salesmanship."

THURSDAY AFTERNOON

New Lines for the Hardware Store.

WHAT TO DO NEXT MONTH

Suggestions for More February Business

Make Your Plans Now—Revise the Mailing List—Watch Newspaper Copy — Tool, Paint, House Furnishings, Electrical, Auto Accessory and Sporting Goods Departments Capable of Development

HARDWAREMEN are already planning their next month's business, and February presents an opportunity to the retail merchant for good sales and effective organization for the entire year. In the majority of cases stock-taking has been completed and merchants are in a position to know how they stand, whether their business has been conducted along profitable lines. From those whose figures do not reveal the results they had wished better things may be expected during 1918; to those who had a balance on the right side of the ledger equally good if not better returns are possible. To improve should be the watchwood during the present year; not necessarily bigger business but better business should be determined upon. In attaining this end merchants should plan ahead; they should not wait until business comes to them, they should prepare for it and go out after it.

February Good Month to Revise Mailing List

ONE of the most important points to be taken up during next month should be the mailing list. Practically every merchant has a mailing list of a certain degree of effectiveness—but to have a list that is right and from the use of which results may be expected should be the aim of every merchant. Time can be well spent in checking the list of present and prospective customers, making revisions and additions so that you have a list which is up-to-date in every particular.

This makes it possible to place in the hands of your customers advertising matter which not only directs attention to your store, but in a large way influences sales. In every possible manner, merchants should encourage those mediums of publicity which will bring results with the least strain on the sales staff. By the use of the mails it is possible to get your message right to the people needing the goods, and this will back up newspaper, window display and store interior advertising most effectively.

What of the Tool Department?

THE appeal to those on whom the inactivity of long winter evenings grates miserably suggests a line of endeavor which many would be glad to follow, that of the amateur carpenter. Though February is the shortest month of the year, it is one of the hardest for the average citizen to endure. By encouraging the man of the house to undertake those odd jobs which his wife has been wanting done for months, the merchant makes friends from both sides of the house. The man has something to do, the woman derives the benefit. This will mean a demand for hammers. saws, files and planes, and it will be found that the call is for tools of the better class.

Sales of Paint Naturally Follow.

PROBABLY the amateur carpenter builds a cupboard or puts up extra shelving. He will want a can of paint to finish up his work, to have it correspond with the other furnishings, and when he sees how easy it is to apply this paint, it should not be difficult to make sales of inside finishes for the walls, floors or furniture.

But sales of interior paints need not be confined to those who build cupboards. The housewife's interest must be enlisted in the possibilities of the paint department. Right now is an opportune time to encourage the farmer's wife to invest before the men are called out to the fields. The farmer's wife wants her home decorated as well as her town cousin, and the prosperity reigning in the rural communities is sufficient evidence of their ability to have any work done which they desire. The farmer's trade presents opportunities for great development, and should not be overlooked at any time, but much less now.

Getting an early start at the work of decorating the home can be emphasized. Those who depend on outside help need to speak early for the men to look after this and the assistance of the painters and decorators could be secured in this worthy cause.

House Furnishings Present Possibilities.

STOCK-TAKING in the house should be indulged in as well as in the merchant's store. The retailer can suggest this line of action and the result will be to reveal to the housewife the need of replenishing her stock of pie plates, saucepans or roasters. This can be turned into sales for tinware, enamelware, copper ware, aluminum ware, etc., and these lines usually show a very nice profit to the dealer.

Stoves, Ranges and Heaters

IT is quite possible to class these lines with housefurnishings, but they are so important that it might be well to consider them separately. Sales for these items run into money quickly and every merchant takes special care in outlining his sales program. A stove or range that gives baking satisfaction, that is economical on fuel, is what the housewife wants and sales are possible next month as well as any other.

With respect to heaters, the propaganda on fuel conservation should stimulate the sale of oil heaters wonderfully. For that cold room or to relieve the furnace of some of its duties, the oil heater can be played up in such a manner that sales will result. And that means the sale of oil as well, repeat business which all merchants like to have coming along.

Electrical Goods to the Fore

FROM the housefurnishings and stoves it is only a step to things electrical. Electrical heaters perform their function in keeping Jack Frost from rooms not reached by the furnace and will quickly respond in the matter of sales if pushed aggressively.

There are so many electrical labor-saving devices, too, which should be constantly kept before the woman of the house. It is easier to put a plug in a socket to make the toast or prepare the coffee than stand over a fire performing these duties; and the electric iron is ready at a moment's notice to take up its task of ironing the clothes. The vacuum cleaner and the washing machine are two other very important labor savers which might be mentioned.

One of the most active lines in the electrical department of the hardware store of to-day is flashlights. The many and varied uses to which these can be put are becoming well known and a big feature of this trade in towns catering to rural communities is the sale to farmers.

Auto Accessories Cover Wide Field

THE rigors of winter driving are by no means over with the coming of the month of February. There is usually a let-up, however, in the extreme cold which encourages many auto owners who have not driven their cars much before to get same out of storage. To them sales of robes, gauntlets, windshield wipers, heaters, etc., can be made and this should be an opportune time to clear out all remaining stock.

There are many motorists, too, who have experienced the need of a wrench, screwdriver, tire tool or hammer during the past season's running and do not want to be without one during the coming year. Get them to buy now and eliminate similar difficulties during 1918.

Then there is the auto owner whose car needs decorating. This creates an opportunity for paint and varnish sales which can be developed to large proportions by aggressive tactics. From the wheels to the top, finishes are available and by establishing yourself as auto paint headquarters a splendid trade can be worked up.

Cutlery Should Not be Forgotten

SALES of cutlery should by no means be confined to Christmas time or wedding events. Many women will this year be compelled to make their own dresses and those of their children. They will want scissors, small ones, medium size and large. This is only one line which might be mentioned.

Then there is the small boy who will want a knife, the man who will want a strop to keep the razor he got for a Christmas present in shape, those who received silver-plated ware will want to add pieces to complete the set. A review of the cutlery department will show many items for which a demand can be created.

Looking Into the Sporting Goods

A FINAL drive on sleighs, skates and hockey sticks to clear up odds and ends usually has satisfactory results from the sporting goods end. But such lines as boxing gloves, punching bags, exercises, etc., offer a means of healthful recreation which keep the users physically fit. That's a good way to be now, too, when demands on one's best efforts are being constantly made.

February is just four weeks long but a mighty big amount of business can be done in that time with a little extra push. Give it that push by newspaper advertising, circularizing your trade, window display and an interior arrangement that will encourage the spending of money.

Current Events in Photograph—No. 4

A MASTERPIECE *of camouflage—one of the immense guns that travel on light railways just behind the French battle lines. The curious markings on the gun are not the result of chance, but are skillfully painted on as a protection. To any inquisitive German plane, that may succeed in getting this far over the French lines, the monster appears like a great and innocent tree.*

EDITORIAL COMMENT

AS A measure of preparation for the next draft call, all cities in the United States and towns of 2,500 or more population, are being urged to adopt delivery programs providing for one retail delivery a day. Toronto's largest department store has already cut down deliveries from three to two per day. The same idea could be followed out in many towns and cities in Canada.

GRABBING AT OPPORTUNITY

THE paint trade, Cleveland, Ohio, is taking advantage of opportunities presented under war conditions. As soon as the order was given for the closing down of United States factories, warehouses, etc., for ten Mondays in succession, these live wires in Cleveland immediately started a campaign for the renovating, repairing and re-painting of factories, warehouses and other places closed down as a result of the Garfield order.

"Ten Mondays for House-Cleaning" is the slogan behind the big campaign, and Cleveland intends to utilize these ten Mondays in renovating and repairing and also repainting the inside at least of every factory and industrial plant, business building, residence, and public building. It is expected that this campaign will give employment to thousands of workers affected by the Garfield order who would otherwise be thrown out of employment.

The idea was originated in paint trade circles and the Cleveland Paint Oil and Varnish Club is organizing a movement which is being featured in the local newspapers and in co-operative advertising. The idea is a splendid one and will no doubt be taken up by many United States cities.

The plan is one which deserves the co-operation of all those engaged in the distribution of paint, and the Cleveland Paint, Oil and Varnish Club is to be congratulated on the promptness with which they have been able to get the plan under way.

THREATENED SHORTAGE OF TWINE.

THE *Cordage Trade Journal,* New York, directs attention to what is apparently a chaotic state in the binder twine industry caused by attempts at government control of the importation of manila and sisal. Apparently, the subject has been under consideration since last summer, and the trade has given considerable time, thought, and assistance to government officials in an effort to solve the solution to the many problems affecting the industry. Curtailment of production has already been caused by the uncertainties of the last couple of months concerning fibre supplies. It is pointed out that reduced production of binder twine will be difficult to make up because of the scarcity of labor; that in normal times double shifts could be readily put on in order to meet the extraordinary demands, but owing to the present labor situation it is hard to keep a single shift complete.

In addition to this the fuel administration order closing plants of every kind in the eastern part of the United States for five days, and on every Monday for ten weeks, it is said, further reduced the production of binder twine by the majority of all the United States contractors in the area affected by the new order.

It is pointed out that the present outlook is for a heavier demand for binder twine for 1918 crop. If the manufacturers of rope and twine continue to be hindered in their customary work, it is not improbable that the next governmental control failure will be that of the shipbuilding program and of the loss of an important part of the grain crop of 1918.

When the wheat field is ready for harvest the twine must be in the field. No postponement of the harvest can be made, for the wheat will be lost if not harvested. Curtailment of binder twine production might cause a loss of a large portion of the crop, which means a great deal to the allies and which will mean even more to them during the latter part of 1918 and the early part of the following year.

It is reported on good authority that in Canada bookings for binder twine for the coming season are much better than bookings up to the corresponding date of last year. As to how the present situation in the United States will affect Canadian supplies, it is hard to state at the present time, but any shortage of binder twine in the United States will undoubtedly have its effect on supplies for the Canadian trade.

The matter is one which should receive immediate attention of government officials, and every effort should be made to provide sufficient supplies of binder twine to take care of 1918 crop.

CURTAILING INDUSTRIES.

REPORTS from Washington indicate that some pressure has been brought to bear on officials there to use their efforts to cause an order to be issued in Canada somewhat similar to that issued in the United States on account of the fuel situation.

Some United States manufacturers state that if they are forced to close down and Canadian manufacturers are allowed to go ahead with their work, that the Canadian manufacturers will, in a few months' time, reap an advantage over their competitors in the United States. This, some of the United States manufacturers claim, will take many months' time to regain. They point out that to a large extent Canadian coal supply has been furnished by the United States. Dr. Garfield says that Canada should be treated as one of the states in the distribution of coal, but it is stated by some manufacturers that since Canada has secured a pro-rata supply of coal from the United States, that in all fairness Canadian manufacturers should be forced to suffer the same sacrifices as the manufacturers in the United States are said to be suffering on account of fuel shortage. Reports from Washington indicate that negotiations will be commenced with the fuel administration in Canada to have a similar workless day created in Canada if they can reach an agreement regarding cutting down of the Canadian coal supply.

Railroad congestion in the United States will, it is said, be relieved by the order, and it is believed that when full industrial activity is resumed on April 1 that American railways will be in a better condition to handle the enormous war traffic than they have been for two years past. In this respect it has also been claimed that the Canadian manufacturer will reap all of the benefits of the order but will suffer none of the sacrifices unless some agreement is reached causing an equal curtailment in Canadian industries.

There is one feature in connection with this which should not be overlooked, and it is that a great percentage of Canadian industries have been engaged in war industry ever since 1915, and would therefore be exempt from any regulations such as have been proposed. It is also needless to state that while a few have made huge profits, the majority have made great sacrifices, and there is not much danger of securing unfair advantages over their competitors.

TRADE PRESS BRINGS BETTER BUSINESS

"THE trade newspaper is coming into its own on this continent, and in this country (Canada)," says Milton Alexander, retail advertising counsel, of Detroit. "Interest is being more and more directed to the important function of the trade press in developing economy through greater efficiency in the conduct of businesses of all kinds. This is partly due to the war, but it was gradually coming in any case. With the gradual growth of this spirit there is dawning a new day of prestige and appreciation for the trade newspaper which has such an important share in the improvement of business efficiency in the retail trade especially. I believe we are rapidly approaching a time when there will be a strong trend towards fewer businesses better and more efficiently managed for the service of their customers. I think this movement is already afoot, and it means more power to the trade press."

Milton Alexander is recognized as a foremost expert in advertising for the retailer. In a talk with a representative of HARDWARE AND METAL this week, he expressed this important appreciation of the work of the trade newspaper press. Mr. Alexander's opinions count amongst experts—business men, advertising men and retailers. His expressions in reference to the trade newspaper press were voiced half an hour before he delivered the exceedingly pointed and constructive address on Retail Advertising before the Toronto Ad. Club and representative retailers which is reported fully elsewhere in this issue.

ENGLISH STEEL TRADE SATISFACTORY

RECENT reports from England would seem to indicate that the past year's activities in the steel industry have proved very satisfactory. Production of munitions steel has been greatly increased. Manufacturers are laying plans for after-war trade. In outlining the general position at Sheffield, *The Ironmonger*, England, says in part: The past twelve months has witnessed the gradual disappearance of civil trade owing to the encroachments upon the output of steel by the war demand, and such trade is now practically non-existent. This district has increased very greatly its production of ordinary munitions steel, which is now on a satisfactory level. In spite of the immense pressure for war supplies, local firms have found opportunities to extend works and plant with a view to dealing with trade after the war, and to develop what are really new industries. All branches of the steel trade, employers and men alike, have had a year of unexampled material prosperity, and the city's contribution to the Exchequer in the shape of excess profits amounts to an enormous sum. In some of the hand-tool branches, including saws, prices have been systematically revised by the Government Contracts Department to prevent excessive profits, and with such thoroughness that many of the contracts executed have been no more remunerative than in pre-war times.

WATCH next week's issue for announcement of prize winners in HARDWARE AND METAL'S annual window display contest. Eight cash prizes will be awarded.

Bicycle Business Increased 500 Per Cent

Dealers Assert Reason is Due to Increased Industrial Activity in Manufacture of Munitions—Night Operatives Need Transportation.

ONE large wholesale dealer and manufacturer of bicycles states their sales of bicycles have increased 500 per cent. over the normal business prevailing in the pre-war period. This seemed an astounding statement and the reason for such a phenomenon is most interesting. One bicycle dealer in the town of Welland started in business in the year 1915 and disposed of 50 new bicycles that year. The following year he increased his sales to 150 and in 1917 his sales amounted to 215 bicycles. For next year he has on order 300 bicycles. And he expects to sell them. In seeking the reason for this increased demand for bicycles HARDWARE AND METAL approached one of the large manufacturers. He attributed it to the fact that with the increased industrial activity and the working of many munition plants during the night hours, there was a necessity for some means of transportation for the workers. Street cars in many places do not run after midnight. In other towns there is no street car service at all and the workers often lived a considerable distance from the munition plants. Here is the statement of the case as made by one manufacturer's representative:

"Our business in bicycles has increased 500 per cent. over what it was in the year 1914 or in the years immediately preceding the war. This means that we are selling five times as many bicycles now that we did in a normal year before the war. The year 1914 was one of considerable uncertainty in the bicycle field as the breaking out of hostilities in the fall of that year seemed to indicate that all the young men of the country would be enlisting and that the sale of bicycles would be effectually shut off. Dealers throughout the country failed to place their usual orders in the fall of the year and it seemed to point to a very light business in the spring of 1915. Manufacturers were feeling pretty blue over the prospect. But when the spring of that year came around orders started to come in and business was really good. From that time to the present there has been a steady growth of business until it has reached the proportions already mentioned.

"As to the reason for this increased business we have not far to go afield. Munition plants that were started in the suburbs of cities were very often some distance from a car line. Where a car line did run the night workers often found themselves without means of transportation when they finished work at two or three o'clock in the morning. This was one big source of demand. The workers came to realize that the bicycle was the workman's trolley line. It gave him rapid transportation and a sure means of transportation. Furthermore, he was making good money as a result of the munitions industry and could afford to spend thirty-five or forty dollars. The records show that he did spend that money and the bicycle industry grew with leaps and bounds. This development came as a surprise to our own concern. During the year 1916 we had accumulated a reserve of ten thousand bicycles which we had stored in a warehouse in this city. This stock is now completely depleted, in addition to other large sales that have been made.

Looks Forward to Good Year

"With the increased industrial activity that Canada is bound to have during 1918 as a result of the munitions orders that are now coming from the United States, together with the activity in shipbuilding, there is pretty sure to be a continuation of the demand for bicycles, due to the same reason that has caused the demand within the past three years. The demand is not peculiar to Canada alone, as there has been the same increased demand for bicycles in the United States as a result of the increased industrial activity in that country. With the increase in shipbuilding operations there is bound to come a demand for bicycles. Workers in these plants may find that from the location of the industry the bicycle will serve them best as a means of transportation.

No Dearth of Bicycles

For a time during the early part of the war there was difficulty in getting tubing for the manufacture of bicycle frames. Steel plants were engaged on war work and could not give much attention to the tubing business. With the increasing demand for bicycles they have been turning their attention to this line of manufacture. Makers in Canada report they are having no difficulty in getting sufficient supplies of the raw materials and are well provided for next year's trade. Contracts have already been placed with manufacturers of frames in the United States and the needs of this trade have been anticipated far enough in advance to get sufficient supplies of tubing. The bicycle has come to be a necessity. It is no longer a luxury. As the industrial activity of Canada increases the demand for bicycles will undoubtedly become greater. With the increased use of bicycles the demand for bicycle accessories has grown apace. The first thing that a night worker requires is a lamp and a bell. Other lines have greatly increased the demand. There is every chance for the hardware dealer to secure a part of this increased business.

"READY FOR THE STARTING GUN"

The big increase in the sale of bicycles has been helped along materially by the encouragement given to racing, both track and road. Merchants handling bicycles have been the prime movers in getting these started and the success attending their efforts has resulted in increased sales and a mighty fine bit of advertising for the store.

How the Automobile Has Changed the Buying Habits of Farmers

It Has Made Them Shop More and is Enlarging Their Buying Radius

By JOHN ALLEN MURPHY
Reprinted by Courtesy of Printers' Ink

IT is well known that advertising is steadily changing our whole economic and social structure. Not until a few weeks ago, however, did I realize how rapidly these changes are being wrought. Visiting my old home, after an absence of four or five years, I was struck with the wonderful improvements that had been made in this short period. In fact the community had altered its whole social and economic complexion. The living conditions of country people have greatly improved, but what impressed me as being the most remarkable is the way that the buying habits of farmers have changed in the last few years. It is this phase of my observations that I intend to sketch briefly in this article.

The almost general use of the automobile by the farmers in the section I visited is responsible for the extensive changes that have taken place. And the success of the automobile on the farm, as elsewhere, is due primarily to advertising. This fact is not seriously disputed. That advertising has been able, in this way, to compel the sale of a product to such an extent that in a few short years it has revolutionized the habits of people, is a notable testimony to its value.

My old home is located on the northern edge of the nation's corn belt. The automobile did not bring prosperity to this region. Most of the farmers there have been in fine financial condition for more than a quarter of a century. They have had good homes and each year have been investing more and more in modern conveniences. They were pretty well supplied with the material things of life, and taking them as a whole they were not dissatisfied with their lot. Of course, it is true that many of the young men and women chafed under local conventions and rebelled against the supposed limitations of country life. But this was offset by the ever-increasing number of young people, returning from the agricultural colleges, eager to take advantage of the many opportunities the farm has to offer.

So, while the automobile has helped to bring additional wealth to the farmer, it is not true that his prosperity dates from the introduction of the machine. What the motor car has brought to the country dweller is of greater value than mere material possessions. It has broadened both his mental and physical horizon. It has increased the radius of his immediate interests from about five or ten miles to at least fifty miles. It has enabled him to travel so rapidly that he now enjoys all the benefits of the city and still does not have to forsake the advantages of living in the country.

It is for this reason that the buying customs of the farmer have been revolutionized. He goes to his own town oftener, and besides he frequently goes to the large towns in his locality that he seldom visited in the old days. Formerly the weekly or semi-monthly or monthly trip to market was a task often undertaken reluctantly. Now the journey to town is a pleasure jaunt. Frequently the whole family goes. The daily trip to the nearby village or town is not uncommon. In addition it is nothing at all for the farmer to drive over to a city, twenty or twenty-five miles away. Occasionally the trip is taken in the evening, after the day's work is done. The family goes to the movies or to the theatre, which formerly was an event that happened only on very few occasions in a lifetime. During the course of the evening several little purchases are likely to be made, such as ice-cream, candy, chewing gum, perhaps a cigar or two, some fresh fruit and maybe other things.

It is right here that we find an explanation of how the automobile has made the farmer a larger buyer of merchandise. In getting him to town more frequently and to more populous centers than he was in the habit of visiting, it throws him within the influence of window and store displays, where the merchandise itself can make its appeal to him. Creating demand is not the only task of the advertiser. He must place his goods where they are accessible to those who are in the mood to buy them. The farmer, lolling in his easy chair, after a hearty meal, may wish he had a good cigar, but the wish doesn't make a sale, because the nearest good cigar may be ten miles away. However, with the country resident now going to town several times a week, such desires will not long go unsatisfied. The automobile, therefore, has tended to make the farmer buy more of life's little luxuries, to indulge more in the small refinements that add so much to the joys of living.

In getting information for this article, I "made" perhaps twenty-five little villages and towns, and two places that could probably be placed in the city class. I visited a number of stores, where my parents traded when I was a child. I thought it would be heaps of fun to shake hands with some of the old general merchants who used to give me graham crackers, stick candy and other good-will winners when I was a kid. But only one or two of the old-timers are left. In their stead I found a new school of retailers.

Taking them as a whole, the new merchants appear to be vastly more enterprising than were their predecessors a quarter of a century ago. They have better stores; their stocks are more varied and more invitingly displayed; there is a go-get-it atmosphere about their methods. The vast changes that have taken place are more noticeable to the stranger who hasn't been in these towns for years than they are to people living in them and to the traveling man who visits them frequently.

Rural Habits Transformed

The automobile has given country people the shopping habit. They now buy not only in several stores but also in many towns. It is of course possible for a live store to hold most of its trade, but the more far-seeing retailers told me that this growing tendency of farmers to shop is not something to be deprecated. The shopper always buys more than the person who makes out a list of his needs and gives it to some dealer to fill.

To a certain extent, even the buying habits of country people living near large towns of several thousand population has been changed. They may still do most of their purchasing in the home town, but when they want something into which the style element enters, they are likely to sally off to the nearest city for it. In the old days such a journey would have to be taken on a train, and of course the majority would not make it. In other words, the automobile has got people into thinking that a trip of thirty, fifty or seventy miles is nothing at all. This is a fact of tremendous importance to the merchant. In a nutshell, it means that he can widen his trade territory and advertise profitably outside of his own immediate environment.

Now let me see if I can give you another picture of how the motor car has speeded up the farmer's buying. At the home at which I was staying it was discovered one day shortly before dinner that there was no vinegar, which was needed in the preparation of a salad which was already under way. The head of the house, hearing of the shortage, jumped in his car and in a jiffy was off for a little village about four miles distant. He was back in less than half an hour. He not only had the vinegar, but two or three other articles, which would not have been bought were it not for this extra trip. Occurrences of this kind happen very often. That this is true

Red Cross Day in the town of Gilbert Plains, Manitoba. More than 200 automobiles were assembled on the Agricultural Grounds, a record that will be hard to beat, as the town has only a population of 500. A large percentage of the cars are farm-owned in the surrounding community, which gives an indication of the prosperity now enjoyed by the farmer. Over $2,750 was raised for patriotic purposes. This was held last fall.

shows the opportunity that still exists for the village store. Very often these stores are not prepared to take advantage of these pick-up sales. If they carried a fair variety—a large stock would not be necessary—they could sell a lot of things that are usually wanted in a hurry. In this way their function would be somewhat similar to the neighborhood store in the large city.

They Get What They Want When They Want It

Because of the automobile, farmers are getting the habit of going after what they want as soon as they want it. In the old days, they let their wants accumulate and then every so often drove to town and bought a supply that was supposed to last until the next time, but it seldom did. I remember when I was a lad on the farm we were always out of some necessity. If the roads were bad, we would do without the article for weeks at a time. Often we ran out of kerosene and could have no lights for a night or two. We would sit around the coal stove in the dark and finally go to bed in disgust. The farmers today do not have to put up with any such inconvenience. The supply shelves are kept full. Advertising has a chance to get in its work before its influence grows cold.

Now, I hope I have not given the impression that the automobile is creating business for the retailers in one type of town and is taking it away from those in other towns. It may work out that way in some cases, but as a matter of fact the changes in buying habits of country people that the automobile is causing should benefit the retailers in all towns. The more people travel about, the more they buy. Getting them into frequent contact with the product is the thing; and this the automobile does. People, as a rule, are not particular where they buy standardized, advertised goods. The product is always the same and the price is about the same, no matter where it is bought. Hence the farmer is likely to continue buying his standardized staples in his usual trading town, provided he gets good service. Then on his occasional jaunts to the larger towns and cities he is inclined to purchase luxuries rather than necessities. He will also shop for the novelties that may not be extensively featured in his home town.

The automobile may carry some trade away from the villages. At the same time the automobile would bring new trade to the merchants in these places, provided they strive to make it serve them in this way. The radius of the trading circle of the village could be tripled just as the radius of the territory of the large town has been tripled. This fact has been discovered by many enterprising merchants located in small communities. Garver Brothers Company, of Strasburg, Ohio, is a conspicuous instance. They have succeeded in making the automobile bring buyers from cities twenty to fifty miles distant to a hamlet of 1,000 inhabitants.

This growing habit of farmers to do their purchasing in several towns should indicate to manufacturers the necessity for intensive distribution. The more widely their goods are distributed, the more frequently the automobilist will come in contact with them, and quite naturally the more often will he buy. Therefore, the manufacturer's distribution problems are not cared for as soon as he has lined up the dealers in the state's leading trade centers.

The ability to get to town rapidly helps the farmer in more ways than can be described in this short article. Suppose a machine breaks down in the midst of a busy period. Formerly, to drive to town for an extra part, if the farmer lived any distance out, and most of them did, would kill a valuable day. Now the trip can be made in scarcely no time.

When I lived on the farm, our big market was a city twenty-five miles away. We had a number of summer customers there for butter, eggs and other produce. This route had to be covered every Saturday. To make it before the heat of the day set in, we had to start from home at one o'clock in the morning. We reached the city at six. Since the horses had to be rested, it was two or three in the afternoon before we could start back, and well along in the evening before we arrived home. The trip took a day and the better part of a night. To-day the farmers in that same section start for market in their autos or trucks at 5.30 or 6 in the morning and are back on their farms at 9 o'clock, or in time to do a day's work at something else. I mention this incident at the risk of being personal, because it is one explanation of why the farmer can afford to buy more now than he could in the days of yore. The time he saves contributes materially to his income.

The proximity of a farm to a live town has a decided bearing on the value of the property. Other things being equal, farms within an hour's traveling distance of a town are worth considerably more than those that are farther off. The automobile, therefore, has brought farms ten, fifteen, twenty and twenty-five miles distant within an hour's radius, and hence has been the means of increasing their value greatly. For this reason, the man who bought an automobile by this very fact was immediately able to buy many other things. This is a point that was explained to me by a banker, who at one time was opposed to the automobile as a needless luxury.

In still another way has the motor car made the farmer a better prospect for merchandise. The man who does not move about much among his fellows usually hasn't much personal pride. He is satisfied with old clothes. He doesn't care whether or not his barn is painted or what condition his buildings are in as long as they serve their purpose. But bring that man into frequent contact with others, and soon his attitude changes. When he travels about he sees what others have, and before long he, too, wants those things. His immediate neighbors may not be progressive and

Closing Order Will Relieve Situation

Some Results Apparent From U.S. Government Action—Fuel Situation Still Serious—Only Essential Railroads to be Taken Over

THE United States government's five day closing order which went into effect last Friday will, it is thought, accomplish the results aimed at by the Fuel Administrator in putting through this drastic measure. During the five day period which closed Tuesday night extreme cold weather prevented the fullest benefit being derived from the measure, but that the necessity for action existed to relieve the fuel situation has become more and more apparent.

From the latest reports the fuel crisis is still grave and recommendations have been made to place an embargo on acceptance by the railroads of any freight except coal and wood for the next few days. In fact, Administrator Garfield has intimated that to assure adequate movement of fuel during the balance of the present week such action is imperative. The prolonged strain under which the railways are working, due to deep snows and intense cold, threatens to further affect the transportation situation.

For some time past the production of steel products has been diminishing and during the past few days has been curtailed to a somewhat alarming extent. The curtailment of production has been serious, due directly to a lack of transportation. When congestion is removed, then operations can be resumed successfully and speeded up to a point which will overcome to some extent the poor showing made during the past few weeks.

As matters stand, many steel producing plants are so loaded up with accumulated finished products that it is impossible for them to proceed. The railroads have been unable to meet the demands for transportation, with the result that warehouses, yards, terminals and trains of cars are loaded to capacity with goods. Plants crowded with orders have been speeding up to a limit only reached when the scarcity of fuel became apparent. The output has been enormous and greatly out of proportion to the distributing capacity of the railroads.

In reviewing the iron situation, no improvement is noted as yet. Lack of materials accounts for this, but it is hoped improved weather conditions will overcome to some extent the transportation difficulties under which the railroads have labored for some weeks. Freight has of course been piling up which will hamper mills for weeks, and it is quite obvious that mines cannot ship coal unless cars come back as empties. This means that the fuel shortage will cripple the industry indefinitely.

The sharp cutting down of steel output points to a tighter rein being drawn over less essential industries in the distribution of mill products. In this way more labor could be turned upon imperative government work. The most serious phase of any proposal affecting iron production, such as the order taking coke from merchant furnaces, is the loss of organization where the shut down is complete. The alternative of repeated bankings of furnaces, while wasteful of coke, would obviate the scattering of working forces.

The consensus of opinion is that railroad congestion in the United States will be relieved materially by the drastic order, and it is believed that when full industrial activity is resumed on April 1 that American railways will be in a far better condition to handle the enormous war traffic than they have been for the past two years.

Director-General of Railroads McAdoo has given notice that he does not intend to take all of the American railroads over under government control. He maintains that to take those railroads which are not essential to war work of the nation would cause a great burden upon the treasury of the country. Short line railroads, except where they contribute war freight to trunk lines, will be allowed to operate under private control, the director-general has indicated. An exhaustive study is now being made to determine which of the railroads are essential to the nation's war needs.

Pratt & Lambert Hold District Conventions

Separate Salesmen's Meetings Held at Chicago, Buffalo and New York—Year's Sales Show Satisfactory Total

ENTHUSIASM marked the three recent division meetings of the Pratt & Lambert sales force, held at Chicago, Buffalo and New York. The difficulties to be overcome caused by the partial paralysis of the building market, which war conditions have made so prevalent the country over, made things look a bit blue for some of the salesmen.

However, as the company's new offerings for 1918 were put before the men, the meetings assumed a cheerful attitude, and it is stated that each of the three meetings ended with every man being imbued with a firm conviction that once again in 1918 the sales total will show an increase over the preceding year.

The company's 1917 sales were not completely tabulated at the time of the meetings. President McNulty simply announced that from the indications it appeared that the 1917 sales would almost equal those of 1916, which had been a banner year. However, complete figures for 1917 available since the meetings show that the sales for the last year not only equal those of 1916, but exceed them by a substantial margin.

The three banquets were scenes of much merriment, under the direction of Toastmaster Wm. H. Andrews. The P. & L. Song-book was once again in evidence.

The Chicago banquet was held after the meeting on Jan. 4th at the Chicago Athletic Club. In Buffalo on the 7th, the knights feasted at the Iroquois Hotel, and on the evening of the 9th in New York the Vanderbilt Hotel was the scene of the banquet.

At all of the banquets, checks were distributed to the salesmen who had attained their quota. At the Buffalo meeting great praise was showered on the Canadian contingent, every one of whom was awarded a quota check.

At each of the meetings a collection was taken to purchase smokes for the P. & L. boys who are now on active service.

AUTOMOBILE AND FARMERS

(Continued from page 42.)

unfortunately he has been under their influence. However, when he takes an automobile trip over into the next county and sees that the farmers there have silos and neatly painted buildings and other things that he always thought unnecessary, he wakes up and shakes out the kinks in his mind. Hence, the next advertisement for these articles that he runs across is likely to accomplish its mission. It would be easy to elaborate on this whole question, but enough has been said to show how unmistakable the tendency is.

But how does this development affect the mail-order business, you say? I asked that very question of a number of retailers. If farmers are traveling more and are going to town more frequently, is there so much occasion for them to buy by mail? Undoubtedly one of the principal reasons for the growth of catalogue buying among farmers is the inaccessibility of the goods they want. The automobile has removed that condition. Therefore, shouldn't mail-order trade decline? Well, it hasn't. The opposite is true. The explanation is that the new conditions which have grown up on the farm have led to an intensification of demand. Farmers are more particular buyers and larger buyers. They buy some from the retailer and some from the catalogue house. The competition between the representatives of these two rival systems of selling is getting keener all the time. The more progressive retailers, however, regard the catalogue houses as just competition, to be dealt with like any other competition, and not as a menacing octopus, which is the view of the weaker dealer.

EVENTS IN THE TRADE

BUSINESS CHANGES

Ferintosh, Alta.—H. Creighton, hardware, has sold out.

Redvers, Sask.—A. J. Silcox, hardware, has sold to James Thomas.

Hepworth, Ont.—J. A. Rourke, general store merchant, has closed out hardware department.

Transcona, Man.—Transcona Furniture and Hardware Company have discontinued business.

TRADE NOTES

Holdfast, Sask.—M. Thompson, general store merchant, has disposed of hardware stock.

New Liskeard, Ont.—George Taylor Hardware has undergone extensive alterations recently. Almost a new store has been built on the site with double the floor space of the former.

FIRE LOSS

North Bay, Ont.—Wm. Munns, hardware, suffered fire loss, insured.

Gananoque, Ont.—Ontario Steel Products Co., Ltd., suffered recent fire loss.

North Bay, Ont.—East End Hardware Co. suffered fire loss.

Toronto, Ont.—Wilkinson & Kompass, wholesale carriage hardware, suffered damage by water.

Windsor, Ont.—The plant of the Studebaker Auto Co. has been damaged by fire with a loss of $75,000.

Cornwall, Ont.—M. B. Ramsdell hardware at St. Regis Falls, was destroyed by fire in conflagration which destroyed New York and Ottawa Railway Station.

OBITUARY

Bradford, Ont.—Robert Neilly, hardware, is dead.

Galt, Ont.—Peter Hay, vice-president of Peter Hay Knife Co., Ltd., is dead.

James H. Munro, founder of the Munro Wireworks, Winnipeg, died on Jan. 17, following an attack of apoplexy.

David Watson, past president of the Commercial Travelers' Association and a vice-president of the Dominion Commercial Travelers' Mutual Benefit Association, died recently in Montreal.

TORONTO CREDIT MEN MEET

The Canadian Credit Men's Association met at dinner in the Board of Trade club room on Tuesday evening. The gathering was addressed by W. E. Segworth, administrator of the Vocational Training Military Hospitals Commission, Ottawa, on the work being done by that body.

APPOINTED SALES MANAGER

Tom M. White is now sales manager of Whites Limited, wholesale hardware & metals, Collingwood, Ontario.

Mr. White started his hardware career with his present firm and his experience

TOM M. WHITE
Sales Manager Whites Limited, Collingwood.

both in the warehouse and as traveller has qualified him for the position to which he has been promoted. James Latimer will succeed him on the territory.

ROBERT WYATT DEAD

Robert Wyatt, who has been in the hardware business in Winnipeg for forty years, died in Minneapolis, Tuesday morning, Jan. 15, while en route to California which his wife and daughters, Olive and Gladys. His son, A. E. Wyatt, went as far as Minneapolis, and accompanied the remains and bereaved ones on their return journey to Winnipeg.

Mr. Wyatt was born in London, Ont., on Jan. 16, 1851. He was educated at the public schools of London, and after completing his studies went to learn the trade of tinsmithing with the firm now known as the McClary Manufacturing Company, with whom he remained 10 years. In 1878 he came to Winnipeg as a representative of the McClary Manufacturing Company, and remained in this position for three years, when he went into business on his own account in the stove and tinware line, and later added hardware. A. E. Wyatt will continue the business.

HARDWARE COMPANIES MERGER

Official announcement has been made of a merger of the firms of Baker & Hamilton, Inc., and the Pacific Hardware and Steel Company, both of San Francisco. The business will be conducted under the name of Baker, Hamilton, & Pacific Company. The new company will have a capital stock of $4,250,000, of which $3,000,000 will be in preferred stock and $1,250,000 in common stock.

PERSONALS

C. C. Cartwright, of Winnipeg, was a visitor in Toronto during the week.

Joseph Akitt, hardwareman of Creemore, Ont., was in Toronto on Wednesday of this week on a business trip.

George A. Hutcheson, representing Canada Foundries and Forgings, Ltd., Brockville, called on the Toronto wholesale houses during the week.

Ed. G. White, representing the sporting powder division of E. I. du Pont De Nemours & Co., Wilmington, Del., was in Toronto during the week calling on the wholesale trade.

Lt.-Col. W. M. Gartshore of the McClary Mfg. Co., London, Ont., has been re-elected chairman of the Hospital Trust.

J. L. Vokes, of Vokes Hardware, Toronto, has been elected treasurer of an organization known as the King Street Association, which will endeavor to better the condition of King street from a business standpoint.

Fred W. Field, editor of the "Monetary Times," and a leading authority on financial and commercial matters in Canada, has been appointed British Trade Commissioner at Toronto, with a territory that will probably embrace the entire Province of Ontario.

G. T. Milne, British Trade Commissioner for Australia has been appointed senior British Trade Commissioner in Canada, in succession to Hamilton Wickes, who is for the present remaining at headquarters in England. Mr. Milne's headquarters will be in Montreal.

Capt. Harry G. Pepall, brother of Geo. Pepall of Samuel, M. & L. Benjamin & Co., Toronto, has been appointed to the command of a company in the 2nd Central Ontario Regiment. He went overseas with the 37th Battalion. He was recommended for a captaincy in July, 1916, being wounded two months later and returned home in January, 1917.

INSPECT ELECTRIC APPARATUS

Commencing with the first of April, the Hydro-Electric Commission of Ontario will not permit the sale of heaters and other electrical apparatus which have not been approved by the commission and tested by their authorized engineers. This decision is largely the result of numerous fires caused by defective electrical connections in heaters and other apparatus.

ELECTED DIRECTOR LIBERTY NATIONAL BANK

Henry J. Fuller, president of the Canadian Fairbanks-Morse Co., Limited, Montreal, has been elected a director of the Liberty National Bank of New York City.

H. J. FULLER

President Canadian Fairbanks-Morse Co., Ltd., who has been elected a director of the Liberty National Bank of New York City.

WHITES LIMITED EXPANDING

According to J. F. Zimmerman, manager Whites Limited, Collingwood, Ont., the company's business has expanded to such an extent that it has become necessary to put the management of sales under a distinct head and the company is preparing for a large business during 1918. The travelers representing the house on four distinct territories are now as follows: W. D. White, James Latimer, W. A. Thurston, W. M. Smith.

MONTREAL NEWS NOTES

J. P. La Grand, of Paspebrack, Quebec, was a business visitor to Montreal this week.

Mr. Gibson, representing Oneida Community, Ltd., was a Montreal visitor during the week.

H. M. Bolger, sales manager for the McClary Mfg. Co. at Montreal, is in Ottawa this week.

Geo. Shaw, of the Millers Falls Co., of Millers Falls, Mass., has been calling on the trade.

Mr. Moxey, of the Burlington-Windsor Blanket Co., of Toronto, called this week on the Montreal trade.

J. Flack, Toronto manager for the Thos. Davidson Co., was a visitor to the home office in Montreal this week.

R. W. Robinson, manager of the Winnipeg branch of the Thos. Davidson Co., has been a visitor to the Montreal office of his company.

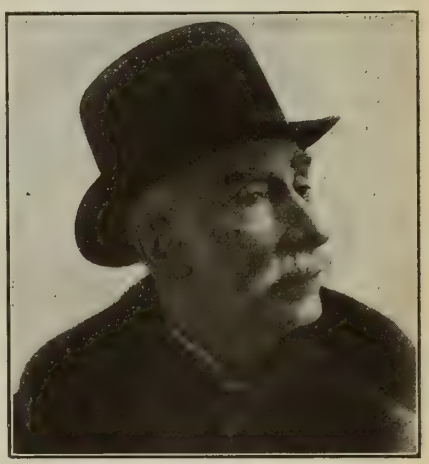
W. F. Duffield, representing the Reading Hardware Co., of Reading, Pa., was a Montreal visitor in the interests of his firm.

B. A. Burke, with the Corning "Pyrex" Glass Works, Corning, N.Y., has been in town and visited the trade in his firm's interests.

C. F. Kendall, sales manager for the Martin-Senour Co., was in Ontario this week, where some of the territory served by his company was visited.

H. Kearns, sales manager for the B. & S. H. Thompson Co., metal importers, of Montreal, is away for a couple of weeks. Mr. Kearns will visit Cleveland and other United States points before returning.

Sergt. E. McIntyre, who gave up his position with Lewis Bros. at the beginning of the war, joining the 13th Battalion Royal Canadian Highlanders, has for some time been a prisoner of war in Germany. A card from the Red Cross Society in London, England, received this week by Col. C. M. Strange, states that his present address is No. 24083, 13th Battalion R.C.H., Hotel Edelweiss, Murren, Switzerland. He is here convalescing and some of his friends will be pleased to have the address.



AGREE TO EARLY CLOSING

Merchants of Alliston, Ont., have signed a petition agreeing to close their business places at six o'clock every evening of the week except Saturday during eight months of the year. Early closing will commence the first of October and continue till the end of May. From the first of June till the end of September the town will be open two evenings each week—Tuesdays and Saturdays.

PIONEER HARDWARE MAN DIES

Michael Philbin died at his home in Montreal, on Dec. 22nd, after a brief illness of four days. Mr. Philbin was 76 years of age.

When still a youth Michael Philbin was apprenticed to the hardware business in the employ of Foley's hardware store. When a young man, he severed his connection with that firm to go into business with a Mr. Warrington on McGill Street, this city. Later he took over a store in the Queen's Hall Block on St. Catherine Street on his own account.

The late Michael Philbin.

Mr. Philbin retired from active participation in his business four years ago. As a monument to his enterprise there are now three retail stores, all located on St. Catherine Street. The active management of the stores continues under the supervision of H. St. L. Philbin, and each of the branch stores is in charge of a manager.

McGraw Sales Organization Convenes

Advertising and Sales Promotion Plans Outlined—Optimistic Outlook for Tire Industry

THE annual sales convention of the McGraw Tire & Rubber Co. of East Palestine, Ohio, was held at the new McGraw club house from Jan. 2 to 5. General Sales Manager C. E. Miley gave the address of welcome to the diffferent district managers and salesmen, who had come from all parts of the country. The first thing of note was a trip throughout the factory inspecting the various departments. Following this, policies were defined by General Sales Manager Miley, assisted by O. E. Pumphrey, sales manager. Advertising and sales promotion plans for 1918 were outlined in detail.

A banquet was held on the night of January 3, at which an optimistic outlook for the tire business was presented by Judge L. M. Kyes, secretary of the McGraw Company. He outlined at length national trade conditions affecting production in the automobile and related industries. Vice-president and Treasurer John Morgan spoke on business organization, and gave a strongly patriotic address, in which he pointed out that business in 1918 can have but one objective—the winning of the war, and that all business organizations and individuals must keep this constantly in mind.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

THE HALL LENS

A. & D. Gorrie & Co., Ltd., 205-13 Victoria St., Toronto, Ont., have put on the market the Hall Lens, which, it is claimed, complies with the requirements of every province in Canada.

It is stated that this lens is scientifically constructed and so perfectly balanced that it throws a silvery light to all parts of the road. The Hall Lens will, it is claimed, light the curves and the roadside at all angles, as well as clearly illuminate the road ahead; at the same time the light is free from the dazzling effect that worries the approaching motorist or pedestrian. It is called the lens with the silver glow and is made in a size to fit every automobile.

The Hall Lens.

NON-BREAKABLE HYDROMETER

A non-breakable hydrometer made from pure celluloid is being put on the market by the Borden City Auto Supply Co., Windsor, Ont. It is stated the simplest and almost universal method of testing the charge of a storage battery is by taking the specific gravity of the liquid in the cells by means of a syringe hydrometer. It is claimed the ordinary syringe hydrometer is composed of a fragile glass hydrometer enclosed within a glass syringe, equipped with rubber bulb and tubing. Both of these glass instruments and particularly the hydrometer are fragile and easily broken, a defect which it is claimed, the celluloid hydrometer overcomes. It is stated the celluloid hydrometer is impervious to acid, accurate, quickly read and durable.

Non-breakable Hydrometer.

"MINUTE" SPARK PLUG CLEANER

It is stated that one of the simplest, handiest and most efficient of new automobile accessories is the Champion "Minute" Spark Plug Cleaner, manufactured by the Champion Spark Plug Co., of Canada, Limited, at Windsor, Ont.

Spark plugs become foul with carbon and grease and heretofore to clean a spark plug meant the necessity of taking it apart. It is claimed the Champion Minute cleaner has eliminated the necessity of taking the plugs apart or getting the hands soiled. It consists of a 5 in. tube, with a quantity of special steel needles. The open end of the tube is fitted with a rubber bushing into which the spark plug is screwed in exactly the same manner as it is screwed into the cylinder.

Champion "Minute" Spark Plug Cleaner.

The operation of cleaning a spark plug it is stated consists of filling the tube half full of gasoline, screwing the carbon and grease-coated spark plug into the bushing and shaking vigorously for a minute. By this method, it is claimed, the steel needles quickly pick the carbon from the porcelain, the gasoline washes it away and dissolves the accumulation of oil.

AUTO STROP MILITARY OUTFITS

An Auto Strop Military Outfit with mirror is now being sold by the Auto Strop Safety Razor Co., Ltd., 83-87 Duke St., Toronto, Ont. The outfit consists of a silver-plated self-stropping razor, twelve blades, strop and metal mirror, in pocket edition, flexible case. These outfits are made in two styles, black leather and khaki leather, and are light to carry, weighing only five ounces. The measurements of the outfit are 3½ x 4¼ inches, ¾ inch thick when closed.

Auto Strop Military Outfits.

CLOVER HOT-FLO ELECTRIC FAUCET

The Clover Hot-Flo electric faucet is now being distributed in Canada by the Electrical Products Corporation of Canada, 179 St. James St., Montreal, who make the following claims for it:

By the use of this faucet, instant hot water in any quantities and at any time is available. It has successfully passed rigid and exacting laboratory tests and is being successfully used by doctors, dentists, in the hospital, barber shops,

Clover Hot-Flo Faucet.

(Continued on page 60.)

THE CLERKS DEPARTMENT

FROM NEWS BOY TO MILLIONAIRE

Henry L. Doherty Was Always Looking For Something Harder to Do and Has Not Yet Found Anything Too Difficult

THERE is a young man in the public utility business worth millions who sold papers on the streets of Columbus, Ohio, not many year ago—Henry L. Doherty. There are several reasons to account for his spectacular rise but Doherty himself puts it down to will power and lets it go at that. A biographer, H. Thompson Rich, in the American Magazine, says that his success can be summed up by reference to the fact that he is always looking for something harder to do. As soon as something harder looms up he drops the work he is on and goes at the difficult task. Mr. Rich writes:

Although to-day one of the great men of finance, and probably the very greatest in building and operating American public utilities, Doherty started life humbly. At twelve, he was a newsboy. At twenty, he was a gas engineer. At twenty-five, he was manager of a public utility plant. At twenty-seven, he was manager of a syndicate of such properties. At thirty-four, he was head of a concern of his own. At forty, he controlled an immense corporation and was really an extraordinary scientist, and at forty-seven, he is one of the few real powers on Wall Street, controlling two hundred gas and electric companies reaching nearly every state in the Union, and having oil holdings the second largest in America.

Step by step he has risen. From an obscure boy, by push and grit, he has become a man of international importance. How did he do it? What is the secret power? Doherty says he doesn't know; but talk with men who have watched him fight his way to the top of the heap, and they will tell you that one of the reasons for Doherty's success is his love for "cracking a tough nut." "As soon as a job becomes easy," says one man, "Doherty's interest lessens. All the fun has gone from that job, and Doherty begins seeking another difficult piece of work. You know, you can't keep a man down who is always looking for something hard to do."

Doherty has cultivated the habit of trying to think straight and clear and without prejudice. That habit has now become second nature. When he wants to solve a problem, he frees his mind from everything but the one thought. Then he concentrates until it works out.

One of Mr. Doherty's strongest convictions is that worry kills more men than overwork. He believes a man can stand any amount of work, provided he makes a pleasure of it.

NO EFFICIENCY HERE

Six French vs. Twelve British Cutting Reeds

An officer returned from Salonika tells the following interesting story, states "The Ironmonger," England. In order to provide a supply of thatch after the fire in the town mentioned, a party of six French soldiers were detailed to cut reeds. At the same time a dozen British soldiers were sent in another direction on a similar errand. When the reeds began to come into depot, it was found that the Frenchmen were sending along about four times the quantity that came from the other party's area, and an officer went out to investigate the cause of so great a difference. Visiting the French he found the men cutting the reeds with bagging-hooks, which had been obtained from the Greeks. The hooks were light to handle and easily kept in nice condition with a rubstone. When, however, he came upon the "Tommies," he found that they had been supplied with straight matchets very heavy to wield and so thick and blunt that instead of cutting the reeds they merely notched them, and the men had to break the stems with their hands against the soles of their boots. I am not concerned to apportion the blame for this piece of carelessness; the point is that there was misdirection of effort because there was no preliminary consideration of the conditions and difficulties likely to be encountered, and a complete ignorance of the relative values of the available tools.

Henry L. Doherty had no high school or college education, yet before he was forty he had invented and perfected processes and apparatus requiring the greatest technical skill, and had established a reputation for theoretical and practical achievement known the world over.

If you ask him where he got the rudiments of his education, he will tell you: "Out of a gas catalogue."

It sounds funny, but it is true. While he was still a newsboy in Columbus, he got a job at the gas works. There, down by the roaring coke furnaces and retorts, he pored over that catalogue until he knew, better than the words could tell him, what it was all about—those furnaces and retorts luring him like a romance from the Arabian Nights.

He looked into the heart of that gas house and saw coal turning into gas, and gas into power and heat, saw that the coal and the gas and the power and the heat all came from the bowels of the earth and resembled the fires of the sun. Then he tore back to the catalogue to find out, if he could, what the deuce made the thing happen. And if he couldn't find out there, he asked someone or dug up another book.

This is the keynote of his education. He went from the thing to the word, not from the word to the thing, as most of the schools and colleges teach.

Often during those early years, after a sleepless night spent over some deep scientific volume, he would duck his head into a basin of cold water and go cheerfully off to work, down to the gas plant or out on the street selling papers—a fourteen-hour-a-day man right from the start. Those were the hard years of preparation for the work to come. He was getting an education such as no school can give. He was learning first-hand, from life as well as from books, taking practical and theoretical together.

By the time he was twenty he was a gas engineer, and an uncommonly good one. Yet he acknowledges that he did not really wake up mentally until he flung a stone through the air one day, and caught a glimpse of the vital scientific principles behind the parabola his random bit of rock described in its flight.

At twenty-two Doherty was made assistant to the manager of the Columbus plant—because he could do things men twice his age couldn't do. That was the first score in his game of success. I say game, for success was then, as it still is, essentially a game within him. He cares little for wealth and power. The joy is all in the work, and the work is play, because he makes it play.

They tell this story of Doherty's first big promotion: The Columbus company was operated by a large Wall Street bond house. They wanted a man to go up and reorganize the Madison, Wisconsin, company. Doherty was mentioned for the honor, and a representative was sent to try him out.

"Would you go, Doherty?" the representative asked.

"Yes."

"When?"

"At once!"

They gave him the job and he caught the next train out of Columbus, without so much baggage as a brush and comb. He was happy that he had got the job, because it meant new problems, harder work, more responsibility. Columbus had begun to be too easy. Madison looked like a tougher job.

At Madison, Doherty made a splendid record, putting the disorganized company back on its feet and re-establishing public good will. So successful was he that in an incredibly short time he had become president of the Madison company.

Until the age of thirty-four, Doherty had not known what it was to be his own boss. But the break was bound to come, for a man of his original ideas and attainments would not always be willing to be hampered and held back by other peoples' hesitating methods and conservative capital. Also, his genius for organization had become so highly developed that reorganizing sick companies was rapidly becoming child's play. There were many problems in public utilities that were more interesting and harder to solve than the work he was doing at the time. He looked forward to tackling these hard jobs. So, when the break eventually came, the result of a difference of opinion between

Doherty and those higher up, Doherty tendered his resignation and stepped out, free at last to go ahead as he chose.

Doherty's first capital was raised from his immediate friends—boys with whom he had sold papers, men with whom he had worked. With this he bought up a bankrupt Western company, reorganized it, and put it back on its feet. That he was able to accomplish this is due to his former training.

That was the second score in his game of success. He took a chance and won, not because he was a gambler but because he had built his house of facts up block by block on a solid foundation.

Soon Doherty took over another "sick" company, and "cured" it; then another and another, reorganizing them and putting them on a healthy dividend-paying basis, until gradually he acquired the great chain of companies he and his associates control to-day. The story of the reorganization of each separate company is too long to be told here. Moreover, the story of one company is, in the rough, the story of all, for to each he applied the same general principles. So successful has he been that his friends call him "the bankruptcy doctor," and allude to him as "the man who cures sick business."

An interesting phase of the Toledo fight, one of his most sensational, was "the trolley affair." A three-cent fare ordinance had been passed. Now Doherty knew that this was the result of previous bad management, and if continued would wipe the company off the map. So he began a quiet attempt to have the fare put back to five cents.

The council had expected and hoped he would get out an injunction, whereupon a long-drawn political wrangle would have ensued. But Doherty is dead against politics in public utilities. So he kept the case away from the courthouse, and decided to let public opinion settle it. He instructed his conductors to charge five cents a ride and to give free rides to anyone who would not pay the full fare, thereby appealing directly to the people.

You can't damn a company that gives you good service and free rides, so the mayor and council got together and decided they would force Doherty to accept the reduced rate. One day they went out in a body to proffer three-cent fares. But Doherty got wind of it and it roused his sporting blood, causing a return of his boyish deviltry. With the aid of detectives, he was informed where the party were to board the cars. Employing an automobile, he boarded at the same crossing, at once grasped the mayor's hand in a glad clasp, and with a "Permit me, gentlemen," handed the conductor full fares for all. The party didn't grin yet. They hadn't caught on. They rode a block or two, then got off to try it again. They crossed to another line operated by Doherty's company. But, behold, the genial, generous Doherty once more mounted the platform and did the honors. This time everyone shook hands so hard it was a cramp, and grins widened to laughter.

A third time the mayor and council tried it, but Doherty managed to treat them to rides once more, at five cents per person.

So those wily city fathers gave it up, and decided they would either have to pay full fare or ride free. As things turned out they came to see it as Doherty did, and the five-cent ordinance was put back on the books.

Sharples Sales Convention Held

At West Chester, Pa.—Necessity For Ordering Early Was Emphasized

THE Sharples Separator Company held their sales convention from December 31 to January 4 at West Chester, Pa. Nearly 200 of their branch and sales managers, as well as salesmen, were called in from the entire country for the purpose of discussing sales plans for the coming year.

One most important point brought out by the several speakers, as well as by the discussion of the salesmen, was that 1918 would see an unprecedented demand for separators and milkers and that the dealers must be prepared to meet this demand.

A number of salesmen brought out the fact that some dealers are ordering separators and milkers six to twelve months ahead of their actual needs. The salesmen have been instructed to influence all dealers and, through the dealers, the greatest possible number of farmers to get their orders in as early as possible in order to make sure of securing what they want. This will eliminate as far as possible any disappointment from non-delivery of goods.

Salesmen of the Sharples Separator Co. assembled in Convention at West Chester, Pa.

MONTREAL AUTOMOBILE SHOW

(Continued from page 33.)

Lariviere, Incorporee, has an exhibit of accessories shown on a three-panel effect over khaki-colored burlap, and a movable attraction, illustrating fire-extinguisher is used.

The International Electric Co. has a panelled section for its background, the three large panels comprising twenty-seven small sections.

The Canadian Fairbanks Morse Co. has a good display with its background of khaki-color, suitably trimmed. Its trade-mark forms part of the back scene. Lines for which they are agents are carefully displayed in the foreground.

Renaud Motor Supply Co. have an illuminated display for flashlights, and have their tools and accessories shown against a backing of Canadian flags.

Jos. Dixon Crucible Co. have a unit display of their graphite lines and these are shown against a backing made up of their different styles of advertising matter and a picture of the factory in the centre.

Bicycles and Motorcycles

The Canada Cycle and Motor Co. show some 16 different styles of bicycles. The background here is made after a landscape setting and shows a party of cyclists out for a spin. They also show a line of accessories and of their Automobile skates.

Indian Motor cycles and bicycles are shown by the Arlington Bicycle Co. and of these there are some seven styles in all.

Hyslop bicycles occupy a space and show several styles of bicycles in various finishes as well as accessories, and a cord type of automobile tire.

Tire and Other Displays

The Gutta Percha & Rubber Co. have used their well-known sign to give an effect to their display, as a background. This is that of two hugely built tires, with a mountainous landscape in the distance. The effect is good and the foreground is used for a display of tires.

The display shown by the Goodyear Tire and Rubber Co. is against a backing of black and orange. The foreground of this display contains tires and other rubber products made by them.

A three-panel effect makes a suitable background for the Canadian Consolidated Rubber Co.'s display. These panels are reproductions of the company's advertisements. In the foreground a raised platform contains some of the products made by this company.

Displays of oils and greases are made by the Imperial Oil Company and the Express Auto Oil Co., and the Spence Co., lubricants, while the S. F. Bowser Co. displayed a full line of its measuring outfits.

The Willard Storage Battery Co. displayed parts of its storage batteries on suitable background and also had a battery connected so that it might be possible to see how a battery works.

Garage equipment was shown by the Weaver Auto Equipment Co.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

THERE has been a decided inclination toward lower prices in some quarters during the week, declines having been registered in heavy gauges of black steel sheets, corrugated sheets, eavetrough, conductor pipe, metal siding, metal shingles, metal ceilings, large sizes of common bar steel and spring steel. Declines in some of the commodities mentioned have been due to a desire to foster trade that has been scared away through high prices. Manufacturers assert that new prices will mean unprofitable business but rather than see the trade drift into such limited channels they have decided to sacrifice profits for the time being.

The iron and steel industry in the United States has been suffering from the worst tie-up in the history of the industry, caused through recent severe storms. Mills have been idle for some time owing to the severity of conditions. Sheet mill production is reported to have fallen 50 per cent. during the past two or three weeks.

Advances in regular hardware lines have been numerous during the week in spite of the lower tendency in some of the commodities. Higher prices were recorded on lumbering tools, axes, horse shoes, horse nails, steel tackle blocks, horse cards, garden cultivators, snow shovels, weatherstrip, window glass, drills, lamp chimneys, liquid glue, bicycle cement, house brooms, stable brooms, marking brushes, kalsomine brushes, washboards, gas tubing, wall cleaner, teapots, electric veranda balls. Stoves and ranges have increased in price. An advance has been recorded in the price of white lead in oil, following the recent decline. Prices for spring booking on arsenate of lead in dry and paste form have been announced and show an advance of over 50 per cent. in most instances over opening prices of last season. Mixed paint is in firm position largely through the increased cost of containers. Conditions are improving in the matter of transportation but are still far from normal. Business has been reported seasonably good in spite of the drawbacks to trade.

MONTREAL MARKETS

MONTREAL, Jan. 24.—There have been a number of changes in the markets this week. Most of these are of an upward trend. Clocks, hoop iron, carpenters' clamps, lumbering tools, axes and stoves are up. Horseshoes have gone up 50c per keg all round. One brand of horse nails has been advanced $1 per 100 lbs. The lead market is strong with a firming tendency. Owing to the higher prices asked for hemp importers look for an advance in rope very soon. The manufacturers of pig iron state that they cannot get delivery of coke and that until they can no prices will be quoted on pig iron. The United States War Board has renewed the fixed price of $23.50 on copper, to June 1st, 1918. Old metals are firmer. The only item in the list showing a downward revision is that of soldering coppers, the decline being 2c per lb.

Horse Shoes And Horse Nails Have Advanced

Montreal.

HORSE SHOES AND NAILS.—An advance of fifty cents per keg in the price of horseshoes has been made. This applies to the entire line. Elsewhere the new prices will be found in current quotations. An advance of $1 per 100 pounds has been added to the list for the product of the M. R. Mills Company and these advances are also shown in the quotations given in current markets. This follows a firming of the situation for steel and other grades of iron used in making these products.

Chopping Axes And Lumbering Tools Go Up

Montreal.

AXES, LUMBERING TOOLS. — A sharp advance has been recorded this week in the price of axes. This applies to all lines, both loose and handled and represents an increase of from $2.50 to $4 per dozen. The scarcity of steel and labor are assigned as direct causes for the advances. Lumbering tools are also higher, the average advances made in this line are from 15 to 17½ per cent.

Revolvers, Guns And Rifles Are Higher

Montreal.

GUNS, REVOLVERS, RIFLES. — In view of the tendencies predicted last week in HARDWARE AND METAL new prices are available this week on rifles and guns. This applies to the product of the Remington U-M-C Co. and the average advance is from 15 to 20 per cent. over the ruling prices previously quoted. The resale prices are now 40 per cent. advance over list. Iver Johnson revolvers have also been marked up and are now selling about 20 per cent. over list. The No. 32 B is now $10.50 and the 38 B $10.75 each.

Soldering Coppers Down; Bench Screws, Clamps Up

Montreal.

SOLDERING IRONS, CLAMPS, ETC. —Among the changes recorded this week are those of lower prices for soldering coppers. These are quoted down 2c per pound and the prices are as follows:—Half pound 34c per pair, 1 lb., 65c pair, 1½ lb., 92c pair and 2 lb., $1.20 per pair. Bench screws of Taylor-Forbes make are now $10 per dozen as against the former price of $9.90. Carpenters' clamps have also been slightly advanced.

Gun Oil, Hoop Iron And Clocks Are Higher

Montreal.

VARIOUS LINES, CLOCKS.—Among the changes this week an advance is recorded in the price of Big Ben and Baby Ben clocks. The wholesale price to retailers is now $2.92 each and the new

resale price has been raised to $4 each. Remington gun oil is also higher and the gross price is now $29.35 and the less than gross price $2.65 per dozen. A slight advance in the prices of hoop iron has been made, the new prices running from $8.45 to $11.55 per 100 lbs., according to weight and widths.

Market Holds Firm On Gasoline And Coal Oil

Montreal.

GASOLINE AND COAL OIL.—The market for gasoline and coal oil is holding at prices quoted for the past two weeks. There is a fairly active demand for coal oil, and gasoline sales are maintained fairly well for this season of the year. Altogether the oil refiners state that they are unusually busy in a general way for this early date in a new year. Even though deliveries have been interfered with stocks in hand are satisfactory. Palacine coal oil is selling at 20c, Royalite at 17c and Electroline at 20c per gallon, while gasoline is still 32½c.

Wire Nails Hold On Maintained Basis

Montreal.

WIRE AND NAILS.—There is a fair volume of business coming forward for wire nails. Some are inclined not to place their business just at present, expecting some move to be made upon the part of the manufacturers. One of the large jobbers is of the opinion that a new price can be expected soon. The base price remains at $5.50 per keg and on cut nails the price is still $5.75. On cut nails a revision downward is anticipated. Stell wire is unchanged at $6.50 per 100 lbs. base.

All Sheets And Plates Delivered In Small Lots

Montreal.

SHEETS, PLATES, ETC.—The importers of sheets and plates report that there are very few shipments coming forward. All that are received are limited to supplies the government will allow forward under the permits required, and the lots coming through are small. Prices are held as recently revised and a fair amount of business is passing. Deliveries are also much deferred in consequence of the present congestion.

MONTREAL—

BLACK SHEETS—		100 lbs.
10 gauge	$9 50	$12 50
12 gauge	8 65	11.50-11.60
14 gauge	8 80	8.85- 8.55
16 gauge	9 00	8.65- 8.65
18-20 gauge	9 25	8.75
22-24 gauge	9 40	8.90
26 gauge	9 45	8.95
28 gauge	....	9.05
10¾ oz. (28 English)	10 55	10.75
GALVANIZED SHEETS—		
10¾ oz.		$10 00
28 ga.		9 65
26 ga.		9 25
22 and 24 ga.		9 05-10 45
20 ga.		10 30
18 ga.		8 85
16 ga.		8 70

Iron And Steel Hold Steady Without Change

Montreal.

IRON AND STEEL. — There have been no changes in iron or steel for the week. Deliveries have been curtailed to such an extent, however, that it is doubtful if there will not be a shortage of certain sizes before the congestion is relieved. Tendencies have been upward on two of the manufactured lines, horseshoes and horse nails. Mills are confronted with shortage of certain supplies and this makes the market firm.

MONTREAL—

Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	11 00
Mild steel	5 05

Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 20-0 21

Shortage Of Coke Affects Iron Quotations

Montreal.

PIG IRON.—Owing to the impossibility of securing supplies of coke there are no available prices. In fact these have been withdrawn and the situation is therefore without further feature for the immediate future at least. Producers will be able to quote only when there is an available supply of the essential coke.

Better Outlook For Old Materials

Montreal.

OLD MATERIALS.—The week has seen a little more activity. This is not great but there is a better tone to the demand for some old materials than has existed for some weeks. Tea lead is up 1c. Heavy lead pipe is a little firmer and is quoted at 6¼ to 6½c per lb. No. 1 wrought iron is quoted up $2 per ton, making the price $25. Old rubbers and shoes are a little firmer at 8 to 8½c. There is a better tone to the market, but scrap iron is in the most active position.

MONTREAL—

Tea lead	$ 0 05	....
Heavy lead pipe	0 06¼	0 06½
Yellow brass	0 13½	0 14
Red brass	0 20	0 21½
Light brass	0 08	....

No. 2 busheling	....	13 00

Prices Maintained On Lead Pipe, Sheets, Etc.

Montreal.

LEAD AND ZINC PRODUCTS.—The features of the week in lead are limited and all prices are maintained without change. The tone is one of firmness and supplies are going forward slowly. Solder is very firm and at the high prices there is but a small and normal demand. Zinc sheets are rather firmer. The amount of business in these lines generally is about normal for January.

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....
Lead traps and bends	Net list	
Lead wool, lb.		0 14
Lead sheets, 3 to 3½ lbs. sq. ft., lb.	0 12½	0 13
Lead sheets, 4 to 8 lbs. sq. ft.	0 11½	0 12½
Cut sheets, ¾c lb. extra, and cut sheets to size, 1c lb. extra.		
Solder, strictly, lb.	0 47	....
Solder, commercial, lb.	0 45	....
Solder, wiping, lb.	0 42	....
Zinc sheets, casks	0 26	0 30
Do., broken lots	0 28	0 32

Ingot Copper Price Set And Licenses Renewed

Montreal.

INGOT METALS, COPPER.—The feature of the week is that of the price set or approved by the United States for this product. The $23.50 government basis has been renewed until June 1st, 1918. Trading is light. The price of 33 to 34c is still held.

PIG LEAD.—The lead market is firm and the quotation of 9½c to 10c per pound is still held. Spot deliveries in primary points have tended to a firming of the prices. Importers expect higher prices.

TIN.—Prices on tin are still maintained and deliveries are very small. It is stated by one importer that the government will regulate with regard to import with past imports as the basis for their ruling. Prices are quoted from 79c to 82c per lb.

SPELTER.—Little movement is recorded. Prices hold here at 10½ to 11c per lb. At primary points the market is dull, traders waiting for the suggested fixing of the price.

ANTIMONY.—There has been a certain amount of buying by the U.S. Government but prices are unchanged. The local demand is light at 18c per lb.

ALUMINUM.—Very quiet. The trading is reported as light locally. In the New York market a quiet condition prevails. The price here is 58c to 60c per lb.

Hemp Prices Make Rope Tendencies Firmer

Montreal.

ROPE, TWINES.—There has been no upward movement in hemp prices. It is stated by importers that there must necessarily be an increase in the prices of manufactured lines in the very near future in view of the increased costs that are now ruling for hemp. Indeed, some of them state that if the present prices of hemp were the basis for the quotations as given on manufactured rope their costs would not be met. In the matter of cotton twines prices are very firm and some

marked their prices to higher levels. The general tendencies continue very firm.

Stoves Marked Higher; Enamelled Ware Selling

Montreal.

STOVES, KITCHENWARE.—There has been an advance in the price of stoves and heaters as applying to the McClary line. This affects the general line, both stoves and ranges, and heaters. The advance is represented by a five per cent. increase. The sales of enamelled ware are reported good and with one firm are better than were looked for so early in January, and reflect a good condition from the country. Generally speaking, the stove business is fair, with demand confined pretty well to small requirements.

TORONTO MARKETS

TORONTO, Jan. 24—Conditions in the hardware trade are settling into normal channels again, following the recent storm which held up deliveries and prevented travelers for wholesale houses making their rounds with any degree of freedom. Advances have been quite numerous during the week, and include such lines as horseshoes, tackle blocks, lumbering tools, horse cards, axes, glass, snow shovels, horse nails, weatherstrip, stovepipes, drills, lamp chimneys, garden cultivators, liquid glue, gas tubing, wall cleaner, electric balls, teapots, bicycle cement, vulcanizing patches, graphite anti-freeze mixture, radiator cement, clutch and brake compound valve grinding compound, fire extinguisher powder, shellac, engine enamel. Trade has been seasonably good in spite of the difficulties attending distribution.

Horseshoes and Horse Nails Higher

Toronto.

HORSESHOES, HORSE NAILS.—An advance of 5c per keg has been made in price of horseshoes which makes price now $6.70 for light iron No. 1 and smaller, and $6.45 for No. 2 and larger. A similar advance is made on all other lines of horseshoes. M. R. M. brand horse nails has been advanced 25c per box and net prices quoted are as follows: No. 5, $3.75; No. 6, $3.50 per box; No. 7, $3.25; No. 8, $3.25; No. 9, $3.05; No. 10, $3.05.

Steel Tackle Blocks Advance 10 Per Cent.

Toronto.

TACKLE BLOCKS.—Higher prices have been announced in some quarters on steel snatch blocks and steel tackle blocks. Prices on snatch blocks are as follows: 7 in., $5.10 each; 8 in., $6.15 each; 10 in., $9.10. Steel tackle blocks are quoted as follows: 4 in. single, 75c each; 4 in. double $1.40 each; 5 in. single, 80c each; 5 in. double $1.60 each; 6 in. single, $1 each; 6 in. double, $1.80 each; 7 in. single, $1.15 each; 7 in. double, $2.15 each; 8 in. single, $1.50 each; 8 in. double, $2.55 each; 10 in. single, $2.25 each; 10 in. double, $3.55 each. Advance in these lines amounts to 10 per cent.

Horse Cards And Garden Cultivators Up

Toronto.

HORSE CARDS, CULTIVATORS.—An advance of 15 per cent has been made effective on horse cards, No. 4 is now quoted at $2.75 and No. O4 at $1.95. Buco five-prong garden cultivators have been advanced $3 on list, making the list price now $15 per dozen, subject to discount of 25 per cent.

Axes Up $2 Dozen; Snow Shovels Advance

Toronto.

AXES, SNOW SHOVELS.—An advance of approximately 20 per cent has been made effective on all grades of axes. This advance follows a similar movement in the United States made within recent weeks. Single bit axes are now quoted from $12.60 to $16 per dozen, according to grade. Double bit axes are quoted at $19 to $21 per dozen; boys' handled axes are quoted $10.50 to $14.70 per dozen; hunters axes are quoted from $10.50 to $12 per dozen; bench axes remain unchanged in price; long-handled japanned snow shovels are now quoted at $4.65 per dozen, while galvanized snow shovels are quoted at $6 dozen.

Lumbering Tools Up 15%: Weatherstrip Higher

Toronto.

LUMBERING TOOLS, WEATHERSTRIP.—An increase amounting to 15 per cent has been made effective in lumbering tools such as peavies, canthooks, skidding tongs and similar lines. Weatherstrip also shows a substantial increase in price. Bosley's wood and felt weatherstrip is quoted: No. 60, $19 per M feet; No. 61, $19 per M; No. 62, $30.50 per M; No. 64, $38 per M. All felt weatherstrip: No. 18, $2.40 per 100 feet; No. 19 $2.85 per 100 feet; No. 20, $3.25 per 100 feet. Frost King is quoted at $4.20 per dozen boxes. Above prices on weatherstrip are booking prices for next season's delivery.

"POST NO BILLS"
—Record, Philadelphia.

Drills, Lamp Chimneys, and Stovepipes Higher

Toronto.

DRILLS, CHIMNEYS, STOVEPIPES.—Through the changing of discounts on bit stock drills, straight shank drills and half-inch shank drills, higher prices have been made effective. Where discount was formerly 40 per cent it is now 37½ per cent. Lamp chimneys also show a substantial advance, A size in case lots of 8 dozen now being quoted at $8.25 per case, and B size, 6 dozen to case, $6.85 case. An advance was announced in these columns last week on stove pipes. Net price of 7 in. size based on new discount is now $21.85 per 100 lengths. Elbows, light 7 in. are quoted at $2.15 dozen, 7 in. heavy elbows at $2.82 per dozen.

Soldering Coppers Decline 3c Pound

Toronto.

SOLDERING COPPERS.—A decline of 3c per pound has been made on soldering coppers. Base sizes 3 to 8 pounds are now quoted at 61c per pound, former price being 64c per pound. In the primary market ingot copper has been holding steady in price for some time past and arrangements have been completed with the producing interests to maintain present selling price for three months.

Liquid Glue and Gas Tubing Advance

Toronto.

GLUE, TUBING.—Higher prices were made effective on certain sizes of Le-Page's liquid glue. For the 1-oz. size and small tubes an advance of 40c per dozen has been recorded, now making the selling price $1.20 per dozen. One-half gill size now sells at $1.68 to $1.70 per dozen, also showing an advance. Larger sizes remain unchanged at following prices: 1 gill, $2.10 dozen; half pints, $3.37 dozen; 1 pint, $5.25; 1 quart, $8.44 dozen. Steel gas tubing, without ends, has been advanced 1c per foot, now quoted at $6 per 100 feet.

Booking Prices on Hose Accessories

Toronto.

HOSE ACCESSORIES.—Some whole-

salers have announced their booking prices on hose accessories for delivery in spring. Hose couplings, ½-inch, are quoted at $1.50 dozen; ¾-inch, $1.60 dozen. Nozzles are quoted at $5.50 per dozen. Cooper hose menders are being quoted at $1 per dozen. Prices are subject to a quantity discount of five per cent.

Wall Cleaner and Electric Balls Up

Toronto.

WALL CLEANER, ELECTRIC BALLS, TOYS.—An advance of 25 per cent has been made effective on Cleveland wall cleaner, new price being $1.15 per dozen. Electric verandah balls, roughed inside, are higher in price by 10 per cent. Six inch is now quoted at $2.75 dozen, 7 in. at $3.25, 8 in. at $5. Cut star electric balls 6 in. is quoted at $6.60 dozen, 8 in. at $10 dozen. Child's toy washboards have been advanced 15c dozen, now being quoted at $1.65.

Teapots And Cane Bowls up 10 *Per Cent.*

Toronto.

TEAPOTS, CANE BOWLS.—An advance of 10 per cent. has been made effective on English teapots, and following prices are now being quoted: No. 60 globe, $2.10 dozen; No. 42 globe, $2.95; No. 36 globe, $3.20. Cane bowls have advanced a similar amount and are quoted as follows: No. 36, 80c dozen; No. 30, $1; No. 24, $1.20; No. 18, $1.65 dozen.

Bicycle Cement Considerably Higher

Toronto.

CEMENT.—An advance in the price of Dunlop standard bicycle cement has been announced. Former 5-cent size has been advanced to 60c per dozen, compared with the previous price to retail trade of 35c. For the 10-cent size new price is 80c per dozen, an advance of 15c. It will be seen the present advance takes the 5-cent article off the market, since the cost to the retailer is 5c each.

Vulcanizing Patches Advance on List

Toronto.

PATCHES.—New list prices have been put into effect on Vulco-Visco self-vulcanizing patches, now being quoted at 85c per box list of ten assorted sizes, and advance of 10c. Quantities of less than 24 boxes are sold at discount of 25 per cent, quantities 24 to 95 at 30 per cent., quantities of 96 boxes at 35 per cent discount.

Graphite Coating List Is Advanced

Toronto.

GRAPHITE COATING.—List price on Norwesco graphite coating has been advanced 10c, now making the price 60c per half-pint can. This commodity is used as a rust-resistant and lubricant for auto rims and springs. Quantities of less than 12 take discount of 25 per cent, quantities 12 to 48 a discount of 30 per cent, and quantities of 48 cans and over 35 per cent.

Anti-Freeze Mixture And Radiator Cement Up

Toronto.

AUTO ACCESSORIES.—Changes in list prices on Thermite anti-freeze mixture for automobile radiators and Se-Ment-Ol radiator cement have been announced. Thermite in 5-6 Imperial gallon cans is quoted at $2.50 list each, an advance of 60c. Se-Ment-Ol list price has been advanced to 85c for half-pound cans, an increase of 10c on list. On quantities less than 12 discount is 25 per cent; quantities 12 to 48, 30 per cent, quantities 48 and over, 35 per cent.

Prussian Blue Makes Slight Advance

Toronto.

BLUE.—A slight advance has been corded on Prussian blue through changing of list price to 30c per tube, an increase of 5c. This material is used to locate high places or worn parts on metal surfaces. Tubes ¾-inch by 4½ inches in quantities of less than 12 sell at 25 per cent discount, quantities of 12 tubes at 30 per cent, and quantities 48 at 35 per cent discount.

Clutch and Brake Compound Advances

Toronto.

CLUTCH COMPOUND.—An advance of 10c on list price of Norwesco clutch and brake compound has been made effective, new price now being 55c list for pint cans. Compound is designed to cause clutches and brakes to renew their gripping qualities. On quantities of less than 12 cans discount is 25 per cent, quantities 12 to 48 discount 30 per cent, quantities 48 and over discount 35 per cent.

Valve Grinding Compound Shows Increase

Toronto.

GRINDING COMPOUND.—A substantial advance has been recorded in Norwesco valve grinding compound through changing of list prices. List price on single tubes is now 30c, an advance of 10c; 4-oz. boxes are now 50c, an advance of 20c; 1 lb. cans are quoted at $1.20 list, an advance of 30c. Discounts on this line are as follows: Less than 24, 25 per cent; 24 to 96, 30 per cent; 96 and over, 35 per cent.

Fire Extinguisher Powder Goes Higher

Toronto.

AUTO ACCESSORIES.—An advance of 5c on list price of Fire-fly, a dry powder fire extinguisher, makes the new list price of 2 in. by 22 in. cans 95c each, while 2 in. by 12 in. size are quoted at 65c each. Discounts on this line are as follows: Less than 12 cans, 25 per cent; 12 to 48 cans, 30 per cent; 48 cans and over, 35 per cent.

Shellac for Gasket Joints Goes Higher

Toronto.

AUTO ACCESSORIES.—Rim and gasket shellac has been advanced in price on some sizes. List prices on half-pint cans are now 60c each, an advance of 15c; pint cans, 90c, an advance of 15c; quart cans, $1.55 each, an advance of 50c; one gallon cans, $5 each, an advance of 90c. On quantities of less than 12 discount is 25 per cent.; quantities of 12 to 48, 30 per cent.; quantities of 48, discount 35 per cent.

Engine Enamel Makes Substantial Advance

Toronto.

ENGINE ENAMEL.—Higher prices have been made effective on Never-burn engine enamel. Pint cans have been advanced to $1.15 each list, an increase of 30c, half-pint cans are now quoted at 70c list each. Quantities of less than 12 cans, discount 25 per cent; 12 to 48 cans, 30 per cent, 48 cans, 35 per cent.

New Lists And Discounts On Skates

Toronto.

SKATES.—New lists and discounts have been issued for Starr skates for next season's prices. Discount now applying to new list is 30 per cent. Former discount was 20 per cent. off old list. The result of the change is to leave the prices approximately where they have been for some time past. Parts are quoted at 20 per cent. off list. Prices are for booking December delivery of this year.

Possibility of Government Control

Toronto.

CORDAGE, TWINE. — Intimations have been made from Washington that the United States Government intends to take over the purchase and distribution of manila hemp. During the past two weeks advance in manila fibre to the extent of ¼c to 1c per pound have been made with a total advance in the hemp of 3c to 4c per pound since November 15 last. As to what effect government control will have on prices is not apparent at this time. Under the present basis of raw materials the market for cordage is in a very firm position, but whether the possibility of government control will have a retarding effect on prices remains to be seen. Announcement has been made that the United States government will in all probability take control of the binder twine situation. Those closely in touch with the Canadian situation are of the opinion that prices will be several cents per pound higher than the opening price of last year. Trade in rope is light this season. Booking orders on binder twine are now about completed.

Prices of rope held unchanged during the week.

Roofing Nails Are Lower in Price

Toronto.

NAILS, WIRE.—Lower prices were made effective on large head roofing nails during the week, new price being $8.25 per keg, a decline of 20c. Prices on standard steel wire nails held unchanged at $5.45 per 100 pounds base, with cut nails at $5.65 base per keg. Wire products held unchanged with no improvement in the prospect of getting supplies from the United States markets. Demand for nails is seasonable for this time of year.

Stable Brooms And House Brooms Higher

Toronto.

BROOMS, BRUSHES, AND WASHBOARDS.—Higher prices have been announced on bass stable brooms and corn house brooms and whisks. On the stable brooms the advance ranges from 20 to 30 per cent. in some instances. Lowest-priced bass broom in 12-inch is now quoted at $6.50 per dozen, while the higher-priced brooms in 18-inch block range up to $12 per dozen. Corn house brooms have been advanced $1.10 per dozen, which makes price to retail trade on 20-lb. four-string broom $9.15 per dozen and on 23-lb. four-string $9.65 per dozen. Whisks are now priced as follows: 7-inch, $1.80; 8-in., $2.25 dozen; with intermediate prices ranging up to $10 per dozen.

Marking brushes have been advanced approximately 20 per cent., prices on No. 1 now being quoted 60c per dozen and No. 6 at 70c to 80c per dozen. Dutch kalsomine brushes, made of Russian bristles, have been advanced almost 100 per cent. These are a better grade brush and now range in price from $60 to $70 per dozen.

Enamel and glass washboards have been advanced 50c to $1 per dozen. Diamond King glass washboard is now $5.50 dozen and Western King enamel is quoted at $6.25 per dozen. Tin washboards are in very firm market owing to inability of manufacturers to get supplies. There is strong probability of an advance in tin washboards in the near future.

Coal Oil Demand Heavier Than Ever

Toronto.

GASOLINE, COAL OIL.—Demand for coal is just as insistent as it has been for several weeks past, and gives no prospect of easing off in the immediate future. There is a firm situation due to this heavy demand, induced through the coal shortage and the turning of people to oil heaters as a means of heating their homes. An advance of ¼c per gallon was recorded in the New York market by the Standard Oil Company during the week on coal oil for export. Prices in the local market held unchanged. Gasoline was also in steady market, with quotations being made on the basis of 31½c per gallon.

Stoves and Ranges Advance 5 Per Cent.

Toronto.

STOVES, ENAMELWARE.—There is a heavy demand on coal oil heaters and electric heaters at the present, induced by the difficulty in obtaining supplies of coal and other fuel. Some manufacturers state the inquiry is much greater than they can supply. Cooking ranges are also in fairly good demand for sorting business. Stovepipes are holding steady at the advance recorded last week Enamelware continues in fairly good demand. An advance of 5 per cent. has been made by some manufacturers on stoves, ranges and furnaces, effective January 18.

Bar Steel And Spring Steel Show Declines

Toronto.

IRON AND STEEL.—A decline of 50c to 60c per 100 pounds was recorded in the price of some of the heavier sizes of common bar steel, and following prices now prevail: 2⅛ in. by 2⅞ in., $5.90; 3 in. by 3½ in., $6.50; 3⅝ in. by 4 in., $6.75; 4⅛ in. by 4½ in., $7; 4⅝ in. by 5 in., $7.25; 5⅛ in. by 5½ in., $7.50; 5⅛ in. by 7 in., $7.75; 6⅛ in. by 6½ in., $8; 6⅝ in. by 7¼ in., $8.25. Spring steel shows a lower range of quotations through the coming on the market of additional stocks purchased at lower prices, range in prices on this grade now being from $9.50 to $11.50 per 100 lbs. Sheet cast steel, on the other hand, shows a higher range, having been advanced 7c to 10c per pound, making the price now 42c to 45c per pound.

Heavy Black Sheets And Plates Decline

Toronto.

SHEETS, PLATES.—A decline of $2 per 100 lbs. has been recorded in price of No. 10 gauge black sheet and in 3-16 inch and ¼-inch plate. This readjustment has been made in conformity with the fixed prices now prevailing in the United States market. There was a narrowing of the range of prices on lighter gauges of black sheets as will be noted by the range of quotations given below. Some of the higher-priced sheets have disappeared under stress of pressure by the lower-priced stocks that are now in this market. Similarly there was a lower range from the high quotations on galvanized sheets.

BLACK SHEETS—	Per 100 lbs.		
10 gauge	$	$10 00	$12 00

Corrugated Sheets And Conductor Pipe Decline

Toronto.

CORRUGATED SHEETS, CONDUCTOR PIPE, EAVETROUGH.—Substantial declines were recorded in the price of corrugated sheets during the week, ranging in amount from 50c on the lighter gauge to $4 per 100 square feet on heavier gauges. Range of new prices will be found hereunder. Eavetrough, conductor pipe, elbows, shoes, and similar lines have also declined in price through the changing of the discount. Where formerly these lines were quoted have declined from 50c to 75c per square. Standard galvanized shingles are now quoted at $10.25 per square, standard painted shingles at $8 per square. Standard galvanized siding metal is $8.75 per square, and standard painted at $7 per square. Metal ceilings are also down 10 per cent. Decline has been due to desire to foster trade that had been declining on account of high prices. At the new prices manufacturers point out that it is unprofitable business, but there is a sincere desire to keep trade moving and not shut off the demand entirely.

Heavy Lead Pipe Up; Old Rubber Goods Down

Toronto.

OLD MATERIALS.—An advance of ½c per pound was offered by wholesale dealers for heavy lead pipe, now making the price 6½c. There is a measure of firmness in this metal, due to a better tone to the primary market for ingot lead. Old rubber boots and shoes, on the other hand, showed an easier tendency, prices being quoted down ¼c at 7¾c per pound. There is very little buying at the present time, as those who have old materials are inclined to hold for higher prices.

Tin Market Firm With Good Business

Toronto.

INGOT METALS.—There was better inquiry for tin and antimony during the week. Lead was in firmer tone in the local market. Other ingot metals held steady, with business somewhat quiet.

COPPER.—While there has been no official announcement as yet that the price of copper in the United States is to remain at 23½c, it is generally accepted that this will be the basis for sale during the ensuing three months.

TIN.—There was a good business reported in ingot tin in the local market during the week. Prices were maintained in a firm position as a result of the activity.

SPELTER.—While negotiations have for prime Western spelter. Market locally was quiet, with prices unchanged at 9¾c to 10½c per pound.

LEAD.—Quotations on lead were higher by ¼c per pound during the week from the lower levels, indicating the firmer undertone to this market. Prices ranged from 9c to 9½c per pound. There is not a heavy demand for this commodity at this time.

ANTIMONY.—Better inquiry was reported for antimony in the local market during the week, but prices held unchanged at 16c to 18c per pound.

ALUMINUM.—The market for aluminum held steady at 60c per pound, with an evenness of demand. In the United States market there was an easier tone and quotations were made 1c per pound low than at the close of last week.

PIG IRON.—Producers are concerned over the transportation difficulties Prices held firm at $49.50 per ton for foundry iron.

LONDON MARKETS

LONDON, Jan. 24.—Several advances have been recorded in hardware lines during the week, including white lead in oil, linseed oil, turpentine, shellac, emery wheels, table cutlery, pocket cutlery, butcher knives, axes, garden cultivators, saw wedges, hose nozzles, eye augers, car bits, ship augers, electric irons, toasters, liquid glue, glass. Business here has been fairly good during the week in spite of cold weather and storms. Travellers also report business fair in towns of this district, although freight deliveries are slow. Many merchants are of the opinion that it is advisable to take spring shipments early this year. Collections are good.

Table Cutlery And Pocket Cutlery Up

London.

CUTLERY.—An advance of approximately 20 per cent. has been made effective in Joseph Rodgers' line of table and pocket cutlery and butcher knives. New prices on butcher knives are as follows: No. 1707 by 5½ in., $5.30 doz.; 6 in., $5.55 doz.; 6½ in., $6 doz.; 7 in., $6.95 doz.; 8 in., $8.30 doz.; 10 in., $11.90 doz.; 12 in., $18.95 doz.; 14 in., $28.90 doz. Two-blade buff handle pocket knives are quoted as follows: No. 32345 by 3 in., $8.15 doz.; 3¼ in., $9.20 doz.; 3½ in., $10.20 doz.; 3¾ in., $11.20 doz.

Axes And Emery Wheels Go Higher

London.

AXES, EMERY WHEELS.—A considerable advance ranging in amount from 15% to 30% has been announced on various lines of axes, which now makes the following prices effective: Keystone, $13.25 doz.; Cherokee, $15; Hand-made, $15.50; Black Diamond, $16; Wellandvale Special. $14.75; Wellandvale double bitted, $19.50. Handled axes are quoted: Eagle. $15.75 doz.; Cherokee, $17.50; Hunters' Red, $11; Boys' Red, $12. Broad axes, 6 and 6½ lbs., $35 dozen. Emery wheels are now quoted at a discount of 60% off list.

Garden Cultivators And Saw Wedges Up

London.

CULTIVATORS, WEDGES.—An advance of 25 per cent. has been made effective in Buco five-prong hand garden cultivators, price now being quoted is $11.25 dozen. Garden cultivators were in big demand last season. Saw wedges is another of the lines to show higher prices during the week: ¾ lb., 24c lb.; 1 lb., 21½c lb.; 1¼ lb., 20c lb.; 1½ lb., 20c lb.

Nozzles, Force Cups And Augers Advance

London.

NOZZLES, FORCE CUPS, AUGERS.—Higher prices have been announced on Canadian Gem hose nozzles, new price being $6 dozen. Rubber force cups are also in higher market, Handy Andy No. 2 short handle is quoted at $6 dozen, and same style with long handle is $7 dozen. Eye augers, car bits and ship augers all show substantial advances. Gilmour and Snell eye augers and car bits are now quoted at 40 per cent. off list, while ship augers of same make are quoted at 15% off list.

Lists Up On Electric Irons And Toasters

London.

SAD IRONS, TOASTERS.—An advance of 50c on list prices of Canadian Beauty electric sad irons and electric toasters has been made effective. New list price on Canadian Beauty iron is $5, which is subject to discount of 25 per cent. Net price now is $3.75 each as compared with former price of $3.38 each.

Tap Soles on Sale

Composition tap soles are now on sale in this district, Neōlin men's sizes assorted being quoted at $6.40 per dozen pairs, while ladies' and bovs' sizes assorted are quoted at $5.40 per dozen pairs.

Rope Prices Firm

Although there has been no change in the price of rope a very firm situation prevails. It has been announced the United States Government is going to take control of the situation. What effect this will have on the situation is not yet apparent. Pure manila is quoted at 39c lb. base, British and New Zealand hemp rope at 33c lb. base and sisal rope at 27½c lb. base.

Glass Makes Advance; Discounts Are Changed

London.

GLASS. — Higher prices were announced on glass during the week, the discounts having been changed from 40 and 10 per cent. off list to 40 per cent. off list on single and double diamond. Cut lights are now quoted at 25 per cent. off list. Higher prices follow as result of very acute situation in the industry in the United States.

Small Sizes Liquid Glue Advance 50%

London.

GLUE.—Small sizes Le Page's liquid glue have made an advance of approximately 50 per cent. This is the first ad-

vance in small sizes, although there have been several advances in larger sizes. New prices make 1-oz. bottles and tubes 15c retail in place of former price of 10c. New prices to retail trade are as follows: No. 25 or 1-oz. bottles, $1.20 dozen; No. 27 or 1-oz. size tubes, $1.20 dozen; No. 26 or 2-oz. bottles, $1.69 dozen; No. 29 or ½-gill tins, $1.69 dozen.

Shellac And White Lead In Oil Go Higher

London.

WHITE LEAD IN OIL, SHELLAC.—An advance of 50c per hundred or $10 per ton has been announced as effective on white lead in oil. Pure in ton lots is now quoted at $15.70 per 100 lbs. and in less than ton lots at $16.05. Pure Elephant in ton lots is quoted at $16.20 per 100 lbs. and in less than ton lots at $16.55. Higher prices also prevail on shellac and the following are now quoted:

Orange.—1 gal. jugs, $4.25 per gal.; ½ gal. jugs, $4.30; ¼ gal. jugs, $4.40. 1 pt. bottles, $6.95 per dozen; ½ pt. bottles, $3.85; ¼ pt. bottles, $2.20; ⅛ pt. bottles, $1.20.

White.—1 gal. jugs, $4.50 per gal.; ½ gal jugs, $4.60; ¼ gal. jugs, $4.70. 1 pt. bottles, $7.30 per dozen; ½ pt. bottles, $4; ¼ pt, $2.40; ⅛ pt., $1.25.

Putty Unchanged

Prices for putty were unchanged during the week at $5.15 per 100 lbs. for standard 25-lb., 50-lb. and 100-lb. drums and pure putty $1.75 per 100 lbs. higher than standard.

Linseed Oil And Turpentine Up 2c

London.

LINSEED OIL, TURPENTINE.—An advance of 2c per gallon was recorded on linseed oil following the firm situation prevailing for some time past. In 1 to 2 barrel lots raw is quoted $1.52 gallon, boiled $1.55; 3 to 5 barrels, raw $1.51, boiled $1.54; 6 to 9 barrels, raw $1.49, boiled $1.52. Turpentine registered an advance in equal amount to linseed oil and is now quoted: 1 barrel lots, 73c gallon; 2 to 4 barrels, 72c; 5-gal., 83c per gallon. Differential for small lots over single barrel price has been advanced 3c gallon and is now 10c.

WINNIPEG MARKETS

WINNIPEG, Jan. 24.—Business for the past week shows about the average for this season of the year. Orders are mostly sorting as many dealers are still engaged in stock taking.

Stove Pipe Advances; Delivery Uncertain

Winnipeg.

STOVE PIPE AND ELBOWS.—much has been said during past year in HARDWARE AND METAL regarding the difficulty of securing adequate supplies of Canada plate combined with ever rising markets. Conditions to-day are not much improved regarding deliveries, and a further increase of about 12½ per cent. has just been put in force on patent stove pipe making to-day's market price on 6 in., $21.65 per 100 lengths; 7 in., $23.20 per 100 lengths. Taper pipes are quoted at $5.75 doz.

Prices on elbows remain unchanged as follows: 6 in., heavy, $2.75 doz.; 7 in., heavy, $3.05 doz. This is largely due to the fact that stocks in general are fairly heavy.

Lanterns Higher By 50 Cents Dozen

Winnipeg.

LANTERNS.—In the Jan. 5, issue of HARDWARE AND METAL, an advance in lanterns was predicted and now prices just issued confirm the above. High prices prevailing on tin is given as the necessity of the advance which is 50c per dozen on both plain and Japanned making to-day's ruling prices as follows: per dozen, long globe, plain $13; long globe, Jap., $13.75; short globe, plain, $13; short globe, Jap., $13.75; No. 25 dash, $17.50.

Lamp Wick Makes 10 Per Cent. Advance

Winnipeg.

LAMP WICK.—Further advances are announced on all kinds of lamp wick which has been on the upward trend during the past year. New prices show an increase of 10 per cent. over former prices. Net prices now in force are as follows:

Flat lamp wick, No. O, 69c; No. A, 86c; No. B, $1.26; No. D, $2 gro.

Rochester lamp wicks, No. 1, 39c; No. 2, 53c; No. 3, $1.80 doz.

Flat stove wicks, 3 in., 45c; 3½ in., 53c; 4 in., 63c; 4½ in. 70c, 5 in., 80c doz.

Cotton Products Go To Higher Levels

Winnipeg.

COTTON PRODUCTS, ROPE, ETC.—Few of the markets, if any, have shown such strong advances as cotton. All lines of cotton products are moving upward including candlewick, packing, cotton rope, clothes lines, sash cord and wrapping twine. The new prices show a sharp advance over old prices both of which are given below for comparison:

	Old Price	New Price
Candlewick packing, per lb.	$0 58	$0 65
Cotton rope, ¼ in., per lb.	0 52½	0 55
Cotton twine, 3-ply, per lb.	0 57½	0 60
Do., 4-ply, per lb.	0 60	0 65
Cotton clothes lines, 48 ft., doz.	3 00	3 25
Do., 60 ft., dozen	3 50	4 00
Sash cord, No. 7, 8, 9, per lb.	0 58	0 64

Awning Cord—Old price, 25%; new price, 20% discount off list.

Lubricating Oils Up; Coal Oil Unchanged

Winnipeg.

LUBRICATING OILS, COAL OIL.—New prices just issued by the oil companies for 1918 show numerous advances varying from 5 per cent. to 30 per cent. on some lines of machine and gas engine oils while coal oil in most cases remains unchanged. The following are to-day's ruling prices per gallon:

Buffolite, 22½c; Ideal Thresher, 47c; B Castor Machine Oil, 38c; Buffalo Eng. Gasoline, 35½c; Buffalo A Gas Eng. Oil, 50c; Royal Gasoline, 35c; Family Safety Coal Oil, 23½c; Engoline Engine Coal Oil, 19½c; Summer Black Oil, 22½c; Kelso Engine Oil, 47c; Electro Dynamo Oil, 45c; Royalite Oil, 19c; Standard Gas Eng. Oil, 46c; Prairie Harvester Oil, 46c.

Shovel And Scoop Handles In Big Advance

Winnipeg.

SHOVEL, SCOOP HANDLES.—As predicted in the Jan. 12 issue of HARDWARE AND METAL prices were expected to advance on shovel, spade and scoop handles. This advance has gone into force this week and shows a straight increase of 75c per dozen on all lines, making to-day's price $5 dozen.

Soldering Coppers Decrease 4c Pound

Winnipeg.

SOLDERING COPPERS.—Owing to a weakness in the copper market manufacturers have issued new prices on soldering coppers showing a reduction of 4c per lb., Winnipeg markets showing the same decrease making to-day's base price 60c lb.

Wire Stretchers And Post Hole Augers Up

Winnipeg.

WIRE STRETCHERS, AUGERS.—Prices on Dillon wire stretchers which have remained firm for some time past show a large increase amounting to approximately 30 per cent. due to increased factory costs, making to-day's selling price $8 each.

New Prices just to hand from manufacturers of Vaughan post hole augers show further increases in the neighborhood of 10 per cent.

New prices now prevailing are, per dozen: 5 in., $12.25, 6 in., $13, 7 in., $14.50, 8 in., $16.25, 9 in., $18

Pliers, Wrenches, Post Mauls Go Higher

Winnipeg.

PLIERS, WRENCHES, POST MAULS.—Further advances have just come to hand covering Bernard and Lodi pliers which move up from 10 to 40 per cent., which are now effective and ruling prices to-day are quoted herewith:

Bernard Pliers—No. 100 x 4½, $7.20; 5½, $9.60; 6½, $12 dozen; No. 102 x 4½, $13.80; 5½, $17.40; 6½, $21 dozen.

Lodi Pliers—5% off list.

Paragon Ticket Punches—No. 250, $3.50 doz.; No. 260, $4.50 dozen.

The price on Hawkeye wrenches which has remained firm for some time past again moves upward. Former price being $5.75 dozen. while price now prevailing is $6.50 doz.

A slight revision in price has been found necessary on post mauls which show an increase of 25c per 100 lbs. over the previous price and to-day's quotation is $4.75 100 lbs.

WEEKLY PAINT DEPARTMENT

The Floors and Advertising Copy

Floors Properly Finished Easy to Keep Clean—Getting the Housewife's Attention—Ads Read Before Society News

THE floors in the home are a vital concern of every good housewife. Floors which are properly finished are very much more easily taken care of than those allowed to grow shabby. With the present shortage of domestic help, many women have been compelled to do their own housework and by pointing out to them the ease in looking after floors well finished, hardwaremen immediately enlist interest which can be turned into sales.

Reproduced herewith will be seen an ad. recently run in the local papers by Carter Bros. of Picton, Ont. In this ad. it will be seen that a single idea is played up—one range of products from the paint department emphasized — those lines which can be classed as floor finishes.

Apart from the single purpose of this ad., which strengthens its appeal, a decidedly interesting factor reveals itself in the evident activity which this firm maintains in its paint department at a time of the year when some merchants have delegated paints to an obscure point in the sales program of the store. There are so many merchants who encourage the sale of interior finishes at all seasons of the year, and particularly when outside painting is impossible, that it would appear that those who only consider paints in summer weather are not getting all they should from this department.

What are the points outlined in this single idea ad. which reach right to the housewife? Look at the heading in black face type "Well finished floors are easy to keep clean." Does that mean anything to the woman who has to take care of this work? This is really an unnecessary question but it offers a line of thought which can be brought out in preparing advertising copy that gets attention.

There has been a feeling created in some quarters that paint is a luxury, that it is only for the wealthy; prices have advanced so that it is beyond the reach of the average purse. But this is not the case and this ad. shows that the question of expense should not be a deterrent factor, when it says "when we say well finished we do not mean that you will have to go to a large expense." This covers those to whom expense is a consideration and does not have a restraining influence on those who have not this point to consider primarily.

Following, finishes adapted to old floors, hardwood floors or soft wood floors are enumerated along with the statement—"we sell every kind of floor finish"—and an invitation—"come and talk to us about your floors." Real, practical suggestions are offered and an evident desire to assist in the solution of the floor finish problem. This ad. brings out successfully the fact that anything wanted is available and makes the point that the selection of the finish best suited to a particular purpose will be made easy through discussion with the sales staff of the firm.

Well finished floors are easy to keep clean

When we say well finished we do not mean that you will have to go to a large expense.

Old floors can be well finished by the use of Sherwin-Williams Inside Floor Paint, which gives a hard, durable, glossy surface.

Hardwood floors can be well finished by the use of Sherwin-Williams Mar-not, a hard-drying, waterproof, Floor Varnish, made to be walked on. It does not scratch or mar easily.

An old, soft wood floor can be well finished, and made to resemble a modern hardwood floor by the use of Sherwin-Williams Floorlac. A varnish and stain combined, made to imitate all the popular hardwoods.

We sell every kind of Floor Finish. Come and talk to us about your floors.

CARTER BROS.

Keeping the paint department busy by advertising special interior finishes is a good plan at this season of the year. This ad. should create interest and the use of the cut brightens it up.

Here again it might be emphasized what an important thing it is to have a complete knowledge of the products you sell. When the statement is made that well finished floors are easy to keep clean, there must be back of it that certain knowledge which creates confidence in the salesman talking his line. The average individual buying paint wants suggestions—he knows the result which he is hoping to get but his method of explanation is oftentimes vague and that is where the salesman must fill the breach to see that the proper product is sold.

Well finished floors are a constant joy to the good housewife and an advertisement to that dealer who supplied the goods. The woman of to-day directs the expenditure of a mighty big percentage of the money which the man of the house earns. To them, then, every attention must be given and the results will soon show in sales if the service rendered is high grade.

It is well known that in the larger centers where a daily paper is issued the ads. are read by the women before the society news. It would seem that this is true in a large measure even in the smaller towns where only a weekly or semi-weekly is issued, if the advertising copy is fresh and newsy, carrying an appeal to the spending proclivities of the housewife. Advertising outside paint in the winter time is just wasting the appropriation, yet there are cases as glaring cropping up continually. No man in business should feel that he should help his home paper and run ads. that are out of season. That hurts the paper as much as it hurts the merchant and is one reason why many local papers are looked upon as jokes. The merchant who keeps changing his copy and has real newsy, up-to-the-minute ads. can demand and will get a better editorial page. This should exert an influence for good which the merchant will be one of the first to feel.

A Good Accessory

for early spring business

Automobile owners will find the use of Ramsay's Tire Paint an additional protection against the slush and ice of early spring and also it adds greatly to the appearance of the car.

If you have an Auto Accessory department order a stock of this quick selling line—you will be well pleased with the results.

If you do not make a specialty of Auto Accessories, display this line in a prominent place—many of your customers will buy it.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Jan. 24.—There are some interesting changes in the paint markets this week. White lead in oil has been marked up fifty cents per 100 lbs. Linseed oil has advanced two cents and even at this some will not accept orders at a definite price. Its scarcity is very marked, paint men assert, and the crushers have been drawing on spot stocks of seed for some time, making the outlook for the immediate future indicate a somewhat bare market. Many of the jobbers will not quote a price on oil excepting for future delivery and then the proviso is made that delivery will depend upon seed deliveries to the crushers. In some quarters a revision upward in paint prices is anticipated. Varnishes are firm in tone.

Poor Seed Deliveries Send Linseed Oil Up

Montreal.

LINSEED OIL.—There is a decided tendency to higher levels, prices having been advanced two cents per gallon by some and in other instances jobbers will not quote at all, but will fill orders received to the best of their ability in accordance with the deliveries they can secure. Present stocks are reported as decidedly limited and one crusher states that "deliveries are so bad we cannot do anything." For those who wish to place business for delivery in the spring months, jobbers are prepared they say to accept orders "only on condition that the flax comes through."

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
1 to 4 barrels	$1 50	$1 52½
5 to 9 barrels	1 49	1 51½
10 to 25 barre's	1 48	1 50½

Turpentine Tendency Remains Very Firm

Montreal.

TURPENTINE.—The volume of business passing in this product is small and the prices have held without change. In the primary market a firm position characterizes the market and it was predicted as likely that higher prices would probably rule. This, it is explained, would result from a temporary closing of the southern markets. Few shipments are coming forward.

Turpentine—	Per Imp. gallon
5 bb's. and over	$0.69-$0.71
1 barrel lots	0.70- 0.73
Small quantities	- 0.83

Fifty Cents Added To Price White Lead In Oil

Montreal.

WHITE LEAD IN OIL.—It was clearly indicated in the last report appearing in HARDWARE AND METAL that the position of white lead in oil was an unsettled one with the tendency pointing to higher price levels. This upward tendency has become a reality and the quotations this week are fifty cents per 100 pounds higher on all grades. Thus standard lead is now quoted at $15 per 100 lbs. for 5 ton lots; $15.50 per 100 lbs. for ton lots, and for smaller quantities $15.85 per 100 lbs. Jobbers state that there may be an inclination to revise this price downward again in the near future, so long as present prices of the pig lead remain as they are.

Mixed Paint Very Firm; Some Varnishes Higher

Montreal

MIXED PAINT AND VARNISHES.—The mixed paint market is normal with jobbers here. Some state that they have received good business the past week, part of which is for present delivery. In view of all circumstances several of the large jobbers state there is every likelihood of an advance in the near future. This view is substantiated by the increasing difficulty of getting supplies of cans and the scarcity of various materials, with added transportation troubles factors. One firm, representing a large U.S. concern, has advanced its prices on varnishes and this averages from 5 to 10 per cent. Others state that the varnish tendency is firmed, but no changes are announced.

Paint Prices to Advance 25c Gallon

As HARDWARE AND METAL goes to press, it looks as though in all probability an advance of 25 cents per gallon will go into effect almost immediately on all liquid paint, including ready mixed inside and outside paint, floor, wall and porch floor paint. Practically all liquid paint, it is thought, will be affected with the exception of barn paint. It is understood that increased prices will go into effect immediately on sorting orders, but that manufacturers will make provision for dealers who have not yet booked spring orders, and will accept spring orders at the old price up to April 1. It is likely that dealers will be expected to place spring orders complete at one time, with all specifications, in order to get in at the old prices.

It is also probable that immediate steps will be taken to reduce number of sizes of tin containers in which prepared paints are now being sold. This is due to the acute shortage of tin plate and the fact that unless paint manufacturers take action of their own accord, the government will step in and compel the reduction in the number of sizes of paint packages. The situation re tin plate and containers has been thoroughly covered in HARDWARE AND METAL on several occasions of late.

Prices On Box And Pane Glass Are Marked Higher

Montreal.

GLASS AND PUTTY.—The feature of this week is another advance in the price of glass in boxes and on the pane lists also. The discount on box glass, single and double strength, has been reduced from 15 per cent. to 5 per cent., and that on the pane list has been reduced from 20 and 5 per cent. to 15 and 5 per cent. It is also stated the tendencies are to an upward revision of plate glass prices. Putty is holding unchanged at the quotations given below, and in this commodity but a limited business is being maintained.

TORONTO

TORONTO, Jan. 24.—Features of more than usual interest in the paint and oil markets during the week have been the advances in white lead in oil, higher prices for glass and considerably higher prices on arsenate of lead for spring booking. There is a firm situation in mixed paints due to the scarcity of tin for containers. Turpentine is in firm position and linseed oil showed an upward tendency in some quarters. Booking business on mixed paints continues to be quite promising. Prices on Paris green are expected to be announced in the near future. Travellers have been handicapped in making their rounds during the week through recent storm conditions.

Linseed Oil Maintains Firm Tone

Toronto

LINSEED OIL.—Although the range of prices has not been altered during the week, an advance of 2c per gallon was

Ideal Chair Seats, All Shapes.

One of the

DOUGALL QUALITY LINE

Efficiency and economy are the two salient features of this line.

A varnish that is as good as can be made—is used extensively by experts and can be used by amateurs with splendid results.

Easy to apply, and with wonderful covering powers, it is economical and gives a most beautiful finish.

Sell it once—you'll sell it again.

The Dougall Varnish Co., Limited

MONTREAL

recorded in one quarter. There is a strong situation in the market since the transportation difficulty is still paramount. Some small supplies of seed have been coming forward, but not in sufficient volume to take care of the needs of the trade at the present time. Booking has been free on the part of large users and with an abundant supply of flaxseed crushers would be busy. Flaxseed in the Winnipeg market showed a fluctuating tendency during the week, but the net result of the week's activities was an advance of 2c per bushel on Wednesday of this week, as compared with Wednesday of last week. Inspections of seed at Winnipeg reached the total of 93 cars during the week.

3 to 5 bbls.	1.50- 1.54	1.52½- 1.57
6 to 9 bbls.	1.49- 1.52	1.51½- 1.55

Less than barrel lots 10c per gallon higher than single barrel price.

Turpentine Interests May Get Together Soon

Toronto.

TURPENTINE.—Advices have been received from the Southern producing sections to the effect that a movement is on foot to consolidate the factorage interests and is assuming definite form. It is reported that three New Orleans houses and one Pensacola house may be involved in the consolidation which will have control from 100,000 to 125,000 casks of turpentine. If this takes place a factor may be injected into the market that will work out toward much firmer prices. During the week prices held at firm levels in the producing sections of the South, and in the local market prices were firmly maintained. Trade, however, is light at this season of the year.

	Imp. gal.
1 barrel	$0.70-$0.73
2 to 4 barrels	0.69- 0.72
5 gallon lots	0.77- 0.83

White Lead In Oil Advances 50c Hundred

Toronto.

WHITE LEAD IN OIL.—The market for white lead in oil has again advanced after having been held at a price lower by $1 per hundred for some two weeks. At the time the decline was made intimations were made that the price was likely to be advanced in the near future. Manufacturers made the lower price by way of inducing movement of stocks which had been accumulating. Response to this invitation not having been very keen, prices were advanced 50c per hundred during the week, making the selling basis now $15.70 per 100 pounds in ton lots and $16.05 in less than ton lots.

Window Glass Has Again Been Advanced

Toronto.

WINDOW GLASS.—Following the firm situation that has prevailed in the glass market during the past few weeks, which condition has been referred to in these columns, with the intimation that prices would in all likelihood advance, an advance has been recorded this week through the changing of the discount. Single and double diamond glass are now quoted at 40 per cent. off list, the previous discount being 40 and 10 per cent. Cut lights are quoted now at 25 per cent. off list. Plate glass and fancy glass hold unchanged. Local dealers are making sales of glass subject to having sizes in stock.

Arsenate Of Lead Shows Big Advance

Toronto.

ARSENATE OF LEAD.—Prices for spring booking have been announced on arsenate of lead in dry and paste form by the manufacturers during the week and show advances in the neighborhood of 65 per cent. over the opening prices of last season. Paste arsenate of lead in barrels of 600 pounds quoted last year at 14¾c per pound has an opening price of 24½c per pound this year. The increased price has been due in large measure to the higher cost of arsenic acid, which has been in great demand for the manufacture of munitions. Following are the new prices that are now prevailing:

	Dry, Pound	Paste, Pound
Barrels, 600 lbs.	....	0 24½
Half barrels, 300 lbs.	....	0 24¾
100s	0 45	0 25
50s	0 45½	0 25½
25s	0 46	0 26
10s	0 47½	....
5s	0 49½	0 29½
2s	....	0 31
1s	0 52½	0 32½

GLASS WILL BE SCARCE AND VERY HIGH IN PRICE.

Anent the glass situation at the present time, one of the leading Canadian dealers put the case to Hardware and Metal as follows during the week, in speaking of the advance which has been put into effect:

"With a view to conserving fuel and of helping relieve the freight congestion, the American manufacturers agreed with the Government to produce for 1918 only 50% of their capacity. When it is realized that it takes about seven cars of raw materials to make one car of finished product, this action on the part of the American glass manufacturers will be of considerable assistance, as it also withdraws them from the purchase of a like quantity of raw material, some of which is indispensable to the Government in the manufacture of munitions. Such is the case with soda ash, for instance, used largely in the manufacture of glass, but also in munitions to the extent that the U.S. Government has taken the product of the largest soda ash manufacturers in the U.S. Glass, therefore, is not only going to be high-priced, but scarce at any price."

Prices On Spraying Compounds Announced

Toronto.

SPRAYING COMPOUNDS.—Prices for spring booking have been announced on dry lime sulphur, dry tuber tonic, and arsenate of calcium, prices showing a substantial advance in some instances. Following are the quotations made:

Dry Lime Sulphur—Barrels, 11¾c lb.; 50s, 12¼c lb.; 25s, 14c lb.; 10s, 14¼c lb.; 5s, 14¾c lb.

Dry Tuber Tonic—50s, 51½c lb.; 25s, 52½c lb.; 10s, 53½c lb.; 5s, 15½c lb.; 1s, 55½c lb.

Arsenate of Calcium—100s, 30c lb.; 50s, 30½c lb.; 25s, 31c lb.; 10s, 31½c lb.; 5s, 32½c lb.; 1s, 34½c lb.

Terms, 1% 15 days; net 30 days.

Shellac Market Firm; Putty Prices Hold

Toronto.

SHELLAC, PUTTY, VARNISH.—There is a firm situation in varnish shellac at present and higher prices would not come as a surprise. Varnishes are also in strong market, some of the manufacturers having advanced their price on furniture varnish. Jobbers have not altered their price as yet. Putty prices were maintained during the week. There is an acute shortage of whiting and higher prices would not come as a surprise on this commodity.

CONVENTION PROGRAMME NOW COMPLETE

(Continued from page 35.)

strictly to retail members, those present will discuss matters more freely than on previous occasions when outsiders were in attendance.

Entertainment

Tuesday evening has been left open for entertainment, and program for this evening is now being arranged.

A number of other important matters, such as addresses of officers, reports, etc., are included in the complete program which is published elsewhere.

Announcements regarding railway rates, etc., will be published at a later date.

A number of firms have intimated their intention of having exhibits at the Royal Connaught during the exhibition as on previous occasions.

Starting on Time

Meetings are to be called on time and carried out according to schedule.

Convention dates are Tuesday, February 19, Wednesday, 20, Thursday, Feb. 21. Headquarters, Royal Connaught Hotel, Hamilton, Canada.

NEW GOODS DEPARTMENT

MOORE'S
House Colors

3 Good Reasons for making Moore's House Colors the Leader in your Paint Department

Salability-Quality-Profit

SALABILITY

1 The new paint buyer accepts Moore's House Colors readily because he has heard of them before. He has learned through the experiences of his friends that Moore's is good paint for both amateur and professional painter. Anyone who has once used Moore's House Colors never changes to another brand. 1

Moore's House Colors sell because they enjoy a high reputation fully earned.

When a man buys a can of paint that gives him *efficient* and *economical* service he doesn't forget where he bought it. This is especially true in this period of high prices. Satisfaction of this kind will bring him back sooner or later for more.

Over half a century of high quality paint-making has gained the full confidence of the consumer for reliability of our lines. They bring a steady patronage.

Your customers are keeping a diligent eye to the practice of *economy*, yet they want reliable products. *Economy* and *reliability* go hand-in-hand in

JAMIESON'S
PURE PREPARED PAINTS

As the "Anchor" holds the ship from drifting, *Jamieson's Paints* hold customers to your store by sheer strength of their quality and durability.

The "Crown" is symbolic of worthiness—Jamieson's have proved their worth as the Sovereign paint for over fifty years. *Let this Brand dominate your paint department and hold your trade.*

Let us tell of the advantages of our proposition.

SUN VARNISH STAIN

A combination of a high-grade varnish and stain that insures perfect results

Experience has Taught Your Customers that no Brand will do but CP Sun Varnish Stain

C.P. Sun Varnish Stain is a ready seller, and moves quickly from your shelves. It creates confidence in the consumer, which insures more sales for other C.P. lines which you have in stock. A piece of furniture when badly scratched or marred can be made to look like new. Old furniture, which under ordinary circumstances would be consigned to the garret, can be refinished and put to further use.

Have you taken advantage of the big offer made in our Sun Varnish Stain assortments? If you are not perfectly familiar with the contents of this assortment, and our sample distribution plan, write us or get in touch with our representative.

Be sure that you have read our booklet —"What, When and How to Paint."

Big Market for Brushes

Will you let us say to you that there is a much larger market in every community than is generally perceived. We make a hundred or more different kinds of brushes. For example, there are **Meakins Brushes** for horse stables and carriage cleaning, for garages and automobile needs, for butchers, barmen, stove-makers; for walls, radiators, floors, bannisters, cornices; for kitchens, parlors, schools; for cream separators, gun barrels, bottles.

We do not suggest that you carry stocks or even a sample of every variety of brush, but we do suggest that you have our catalogue and familiarize yourself with our various brushes in order to be able to suggest the right brush to the right person for the right need.

Sell from our Catalogue—Just a last word: Meakins Brushes are good brushes—and our catalogue will tell you why. Our catalogue is valuable. Have you a copy?

The West certainly appreciates Stephens' Paints

Stephens' Paints are compounded to do duty under Western Climatic Conditions. For over thirty years now they have given service that no other paint could give, and the West has shown appreciation in greatly increased sales.

A close study of the effect of the Western climate on painted surfaces has enabled us to evolve a paint that shows exceptional wearing qualities.

Wherever Stephens' Paint has been used in the West it has made instant and permanent friends. It goes on so smoothly, is so true to shade, and wears so wonderfully.

Give your trade the paint best suited to their needs—that's Stephens' Paint.

If there is no one selling Stephens' Paints in your locality, lose no time in applying for the agency. It will help your whole business.

Westwo REG'D

Wagon Sets in Crates

The Dealer who orders Westwo Wagon Sets in crates secures to himself the extra advantage of having sets perfect in every detail —no bruised woods —no marred finish—just as good-looking as when they left the factory. It costs very little to be assured of this perfection, and having it to add weight to the Westwo absolute guarantee, makes selling easier and business more profitable. Get the Westwo folder which illustrates and describes Westwo Sets, Hitches and Eveners for Wagon, Implement and Plow.

D. Ackland & Son, Ltd.

Winnipeg—Calgary

GUARANTEE

All Westwo

Sets are guaranteed, and any defective part will be replaced free.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index facing the inside back cover, after having secured advertisers' names from this directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

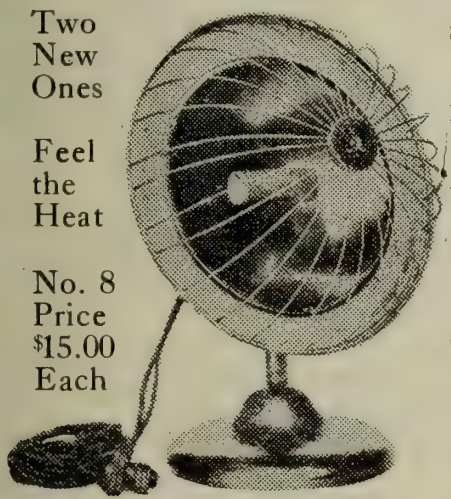
"To help keep down your coal bill"

"Majestic" Sun Ray Heat fills every requirement.

THIS new "Majestic," No. 8, as illustrated, is a strong, compact heater (with heavy base), which can be carried from room to room and placed anywhere where instantaneous heat is desired.

Fitted with two heat units consuming 960 watts per hour.



Strongly made and handsomely finished in oxidized copper with a parabolical reflector of polished copper.

An all-year-round heater, most convenient for removing the chill and dampness from any room.

Two New Ones

Feel the Heat

No. 8 Price $15.00 Each

Supplied with 8 ft. cord and attachment plug.

Height 18½ in. Net weight 7 lbs.

Diameter of reflector 13½ in.

Packed one in a substantial carton.

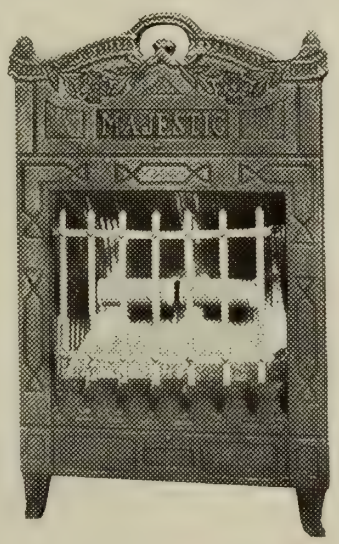
Size of carton ready for shipment 21 in. x 10 in. x 11 in.

Gross weight 9 lbs.

Our "Majestic" No. 7 heater is the same design as No. 8, but with one heat unit, 1½ in. smaller in diameter and 3 in. lower. Consumes 615 watts per hour. This heater makes you think of the good old summertime as you sit near it or come into the room where it is in operation. A strong volume of comforting Sun Ray Heat continually.

Price $10.00

Over 4,000 satisfied "Majestic" customers in Ontario alone.



THIS handy Heater can be carried to any room in home or office. Radiates a surprising quantity of pure and healthful heat. Creates instant comfort. Economy, stability, and low cost of upkeep—our claim for our Gold Medal "Majestic" heaters.

Supplied with 8 ft. cord and attachment plug.

In same design as below we have "Majestic" No. 4, one heat unit, 615 watts; "Majestic" No. 6, three heat unit, each consuming 615 watts, with a three heat attachment switch, which enables the user to regulate the heat for moderate or real cold weather.

Patented United States, June 1, 1914.
Canada, June 1, 1915.

Majestic No. 5

Two heat units.

Consumes only 960 watts per hour.

A Wonderful Heater.

No. 4,	price	$12.00
No. 5,	"	16.50
No. 6,	"	25.00

Dimensions:

No. 4—19 in. x 11 in. x 7¾ in. Weight 8 lbs

No. 5—21½ in. x 13¾ in. x 9¾ in. Weight 11¼ lbs.

No. 6—25½ in. x 17 in. x 10 in. Weight 16¼ lbs.

We also carry a full supply of Electric Appliances, Toasters, Irons, Percolators, etc. Also Flash Lights and Batteries in stock for immediate shipment.

Write for prices and particulars of the new Nitro Electric Light Bulbs.

Munns Wall Size

The safest foundation to use under paint, varnish, kalsomine and wall paper. It insures best results at the least cost. It is a non-brittle, elastic, durable foundation, which penetrates, commingles and becomes part of any surface that has suction. It is not a varnish or glue size and is not made from shellac. It will not oxidize, become brittle or saponify. Munns Wall Size *is a money saver because*—it does the work of more expensive materials and does it better.

Use Munns Wall Size

As a Primer or First Coat

For all surfaces before applying oil paint of any description.

For Kalsomine

By tinting the size it is only necessary to use one coat of size and one coat of kalsomine to get satisfactory results.

As a Stain Killer

For water stains, mineral stain, tar, creosote and stains of almost any and every description.

Munns Wall Size

is a combination of dry chemicals packed in one-pound packages, and each package will make 1½ gallons of size. Write for full details and demonstration of this wonderful labor and money-saving paint product.

As a Wood Stain or Filler

It makes an excellent wood filler and tinted to any desired shade with dry colors, will do the work of a wood stain. Only one coat of varnish required to give a high gloss over 2 coats of Munns Wall Size.

For Sizing Walls Prior to Hanging Wall Paper

It will stop suction, neutralize lime and the paper can not peel. High glossy walls are safe to hang wall paper after giving them a coat of size.

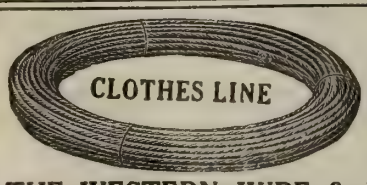
THE "WANT" AD.



The "want ad." has grown from a little used force in business life into one of the great necessities of the present day.

Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.

The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the small affairs and incidents of daily life.

YOUR WANTS are many here below. Use the want ad. page and get rid of a few of them.

Spiers was licked!

WHEN Spiers, representing Cotton & Co., called on a certain Canadian retailer to solicit business, he was asked—"Why doesn't your firm advertise in DRY GOODS REVIEW, my business paper?" And Spiers replied, "My firm doesn't believe in trade newspaper advertising." Said the retailer—"Then I don't want to do business with your firm. Your firm may not believe in advertising, but I do, and I'm the man to be considered if you want my business."

The Retailer had a good deal to say to Spiers. Boiled down, it was:

"Your firm insults my intelligence. I pay $2 a year to have DRY GOODS REVIEW. It is the best newspaper, from a business point of view, that comes to me.

"I read the advertisements in it. They have a news value to me, and I am their debtor in many ways. Since war broke out, and goods have become scarce, I've sent mail-orders to a number of these firms. Travellers don't call on me as frequently as formerly. I suppose there are fewer of them, and I know its harder to get to me, since mine is a general store, off the main line. I want the advertisements of firms with goods to sell, and I want them published in DRY GOODS REVIEW. I don't want stuff sent me in an envelope through the mail.

"That's expensive for one thing; and it's a nuisance for another. I want a business firm's proposals to me in the newspaper I take home with me, and where I can always find it when I want to refer to it.

"When your firm says it doesn't believe in trade newspaper advertising, I have to regard it as a back-number firm in other ways. Probably it doesn't believe in adjusting complaints, or in giving me the sort of service I want and insist on having. I'm afraid of your firm, Spiers; and there are always other firms keener to do business with me than Cotton & Co. are. If you want to sell me, Spiers, link up with a house that gives me the information I want and in the way I want it."

Spiers is of that type of traveller who thinks that trade newspaper advertising is his competitor, not his assistant. He wants *all* the credit for orders secured. He thinks that he can command more money, in the way of salary, when his solicitations and successes are not contributed to in any way by trade newspaper advertising. He is somewhat like the manager who wants to do all the detail work himself, who is afraid to hire a good man for fear he will supersede him.

* * *

If this little story of Spiers and Cotton & Co. has any truth and point in it, it means that the following retailers' newspapers are worth considering as trade-influencers.

	Frequency.	Minimum Page Rate	Yearly cost Page every issue
DRY GOODS REVIEW	Monthly	$35	$ 420
MEN'S WEAR REVIEW	"	30	360
BOOKSELLER & STATIONER	"	25	300
SANITARY ENGINEER.....	Semi-monthly	16.70	400.80
CANADIAN GROCER	Weekly	24	1,248
HARDWARE & METAL.....	"	24	1,248

Breaking down the resistance of retail buyers by warm-hearted proposal-full communications addressed to them in page spaces in their business newspaper is cheap, when results are considered, at a yearly cost of $300-$1200. The amount to spend per annum depends (1) on the number and accessibility of your actual and potential customers; (2) on the number of your travellers; (3) on the frequency of their calls; (4) on the volume of your annual sales; and (5) on the nature and extent of your opposition (competitors).

If you will permit us to work out a definite proposal for submission on its merits framed in the light of the five factors noted above, please write us without fear that you compromise your fullest liberty of action and decision.

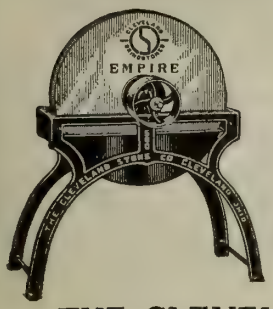
What Our Readers Say

The unsolicited testimonials below are extracts from letters received in the days' mail. No further comments are necessary. Names will be supplied on request.

Letter from company with three stores renewing subscription for copy for each store:

"Enclosed find cheque for $9 in payment for three subscriptions to HARDWARE AND METAL. *You have made such great improvements in* HARDWARE AND METAL *during the past few years that we cannot see how any up-to-date hardware store can get along without it."*

The following is from a traveller:



"I am in receipt of your statement re subscription to HARDWARE AND METAL. *While the rate is in excess of former years I can not persuade my mind to dispense with* HARDWARE AND METAL *as I have been a regular reader of its editions for nigh on 30 years, and have always found in each issue some week-end stimulant and aid that was helpful to one in trying to become a success."*

The following from a hardware merchant in a town of only 600 population and who is rated $10,000 to $20,000 first grade of credit:

"Enclosed find money order for $3 to cover my subscription to HARDWARE AND METAL *as per notice herewith. I have a letter from you saying I allowed your draft to be returned. This is not correct as I did not have draft presented to me. If I had I would have paid it. I have taken your paper continuously since first published, not because you are nice fellows, but for the reason that I would not be without it. I want it. Wishing you continued prosperity."*

Cleveland Grindstones

It's in the Grit

Sandstone of commerce is made from sand, which is pressed together in Nature's wonderful laboratory.

There are about 20 different grades—from coarse to fine. "Cleveland Grindstones" are carefully selected by experts of years' experience.

Ask your jobber for "Clevelands." Write for folder, "Selection and Care of a Grindstone."

"White"

MOP WRINGERS

EASE OF OPERATION, THEIR GREAT UTILITY AND THEIR SUBSTANTIAL CONSTRUCTION, COMBINED WITH THEIR PRICE, MAKES THE WHITE MOP WRINGER A RAPID SELLER.

Made of malleable iron and the best of hard woods — Maple or Birch. Fits any kind of pail and wrings the mop thoroughly.

It has more than one use —often used for fruit and vegetable presses and works perfectly. The advent of the White Mop Wringer proved a boon to the housewife—it sells itself and is a good profit-maker.

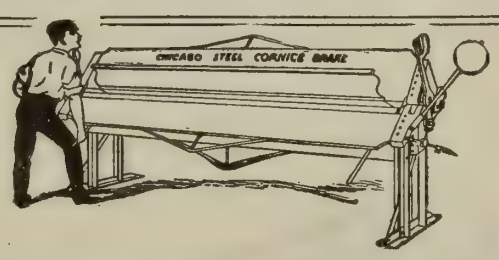
Give your salesmen more time for selling



Making change takes time that might be used to better advantage in selling more goods. And, too, it takes the salesman's mind from his real business. We have a Cash Carrier to suit every place and there is no better investment for a merchant than the purchase of a system to suit his place. Salesmen's time would then be occupied to the best advantage.

Level, Grade and Perpendicular Wire Cash Carriers, Parcel Carriers, Cable Carriers and Pneumatic Tubes.

Write for our four-page leaflet, which tells how to obtain a double check on sales, and how you can give your clerks more time and greater opportunity to display their full selling ability.

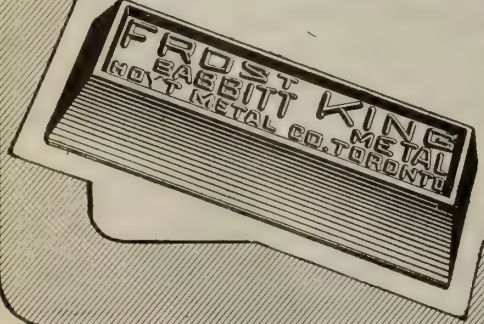
HOYT METALS

MEMO

January 26th



for your Babbitt Metal file

FOR ALL ROUND WORK

on engines and machinery of all kinds play safe by recommending Hoyt Frost King Babbitt. "Frost King" has made friends wherever used because it stands up under severe usage. It is carefully alloyed of well-selected metals which combine to give that friction-resisting hardness which makes "Frost King" so efficient and durable.

You can with complete assurance sell "Frost King" to your most crotchety customer.

Ask us about prices and about other Hoyt Metals.

HOYT METAL CO., Toronto

NEW YORK, N.Y. LONDON, ENG. ST. LOUIS, MO.

MISCELLANEOUS

OWING TO THE GOVERNMENT RESTRICtions on the sale of revolvers, we find ourselves overstocked with Iver Johnson make. These we are offering at a saving of from 50 to 75 per cent. on the present laid down cost, while they last. All prices f.o.b. Vancouver. This is our list, with prices:—26-38 cal., 3¼ nickel automatic hammer, $4.75 each; 12 each, 32 and 38 cal., 3¼, nickel hammerless revolvers, $5.30 each; 20 U.S. automatic revolvers, hammer, blue, 32 cal., $3.25 each; 14 U.S. automatic revolvers, hammerless, nickel, 38 cal., $3.25 each; 25 U.S. automatic revolvers, hammerless, nickel, each 32 and 38 cal., $4.00 each; 21 U.S. automatic revolvers, hammerless, blue, 32 cal., $4.40 each. Tisdalls, Limited, Wholesale Sporting Goods. Fire Arms and Ammunition, Vancouver, B.C.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

MISCELLANEOUS

STOVE REPAIRS FOR GARLANDS, PEN Esthers, Sunlights, Silver Kings, Souvenirs, Laurels, Welcomes and all kinds of ranges. Write for list and prices. Grundy Bros., Strathroy.

THE SUREST WAY FOR THE MANUFACturers' agent to connect with good live firms, is to tell the manufacturers who read Hardware and Metal, all about his ability to sell their goods. Try an advertisement on the Condensed Ad. Page of Hardware and Metal, under this heading.

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

IF YOUR HARDWARE BUSINESS IS FOR sale, who is more likely to buy it than a hardware man, be he merchant, clerk, or traveller? It is only hardware men who read Hardware and Metal, and a condensed advertisement in this paper offering your business for sale, will put you in touch only with the people who will be most interested.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada (tf)

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor Costs only $70. Write for catalogue "B." Otis-Fensom Elevator Co., Toronto.

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

The next time you want a clerk, be sure to advertise in the "Wanted" Page of HARDWARE AND METAL. You will receive inquiries from the livest clerks in the Canadian hardware trade, because reading HARDWARE AND METAL is a test of the clerk's interest in his business.

MACLEAN'S MAGAZINE for FEBRUARY

John Bayne Maclean Robert W. Service
Agnes C. Laut George Bernard Shaw
Archie P. McKishnie Alan Sullivan, *et al.*

RAISING THE CANADIAN ARMY

The leading article in the February issue of MACLEAN'S MAGAZINE will give the inside story of the formation of the "First Thirty Thousand" and of the part Sir Sam Hughes played in it. It will bristle with stories never told before.

SOLVING OUR IMPERIAL PROBLEM

The second article by **George Bernard Shaw** will appear. It is headed, "The Folly of Ulster," but it lays down the basis on which the British Empire must be constituted after the war.

BEHIND THE CANADIAN LINES

A second article by a Canadian artist serving in France, **H. W. Cooper,** giving some unusual experiences and profusely illustrated with pen-and-ink drawings by the author.

FINDING THE MEN FOR WAR

An article dealing with the labor problem by **Agnes C. Laut.** It shows how acute the crisis in man power has become in Canada and the United States and suggests the remedy.

WHEN WILL THE GOVERNMENT START?

An editorial article on the need for immediate action on the part of the Government to increase food production in Canada during 1918—a strong indictment of government laxness

ROBERT W. SERVICE

Another stirring war poem in the new series by this master of martial verse, Canada's most famous poet.

SAFETY IN SUBSTITUTES

An article by **Ethel M. Chapman** on methods of food conservation during the winter months.

THE BALLAD OF THE FORTY SILENT MEN

A story of the battle of Cambrai in verse form by **Alfred Gordon,** a young Canadian poet of remarkable promise.

FICTION

THE WINNING OF YOLANDE

A delightful love story, the third and last of a series by **Ethel Watts Mumford.**

IN THE SHADOW OF OLD CREATION

A strong story of adventure by **Archie P. McKishnie.**

THE PAWNS COUNT

Another long instalment of the secret service serial by **E. Phillips Oppenheim.**

THE MAGIC MAKERS

Second instalment of the strong Canadian serial story by **Alan Sullivan.**

CAPTAIN CARLOTTA

A story of submarine chasing and of a mysterious invention by **W. Victor Cook.**

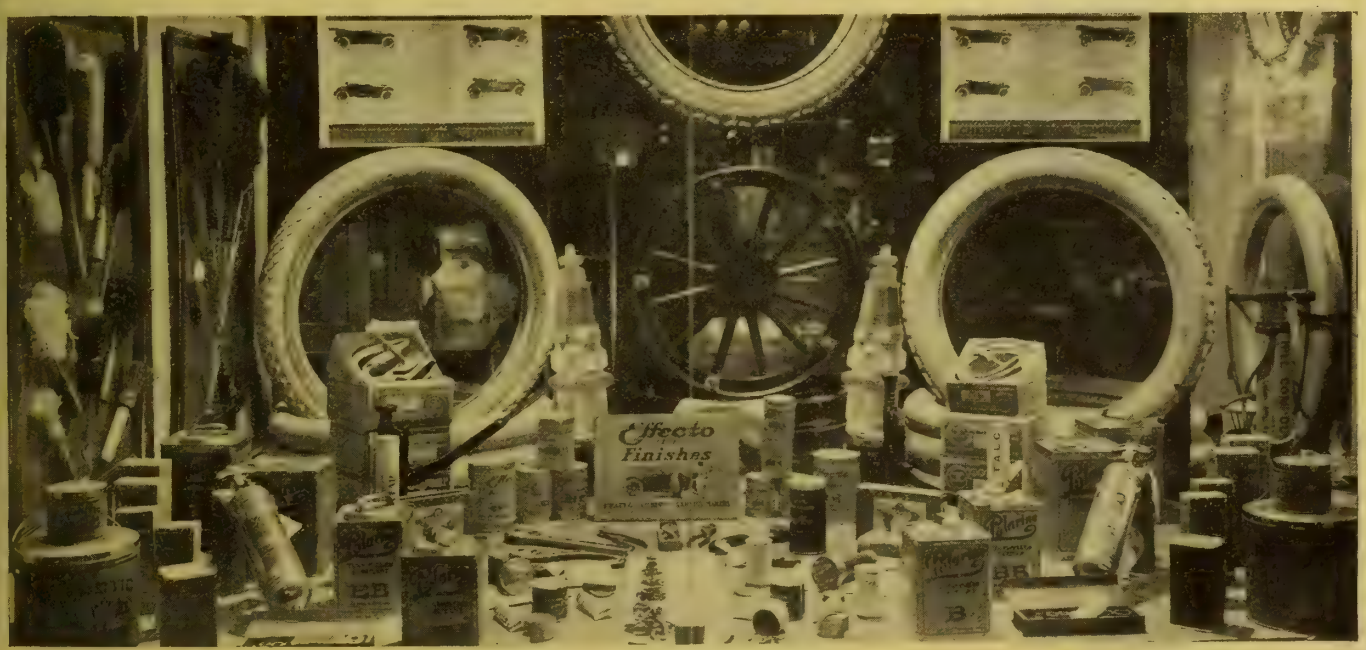
The Logical Distributor



ONE of the reasons why retail hardware firms have been making such a success of selling motor accessories is that the hardware merchant possesses facilities for displaying the goods.

The hardware merchants' show windows are a centre of interest to motorists, mechanics and the general public. The hardware merchant not only uses the show windows, but also makes use of interior displays, including silent salesmen, wall cases, special display tables and racks, etc.

The retail hardware trade of Canada also makes extensive use of local newspapers for advertising purposes.

An indication of how the hardware merchant is interested in advertising is shown in HARDWARE AND METAL'S electro service. Within a comparatively short time Canadian retail hardware firms have purchased 25,000 hardware electros through the electro service department of HARDWARE AND METAL.

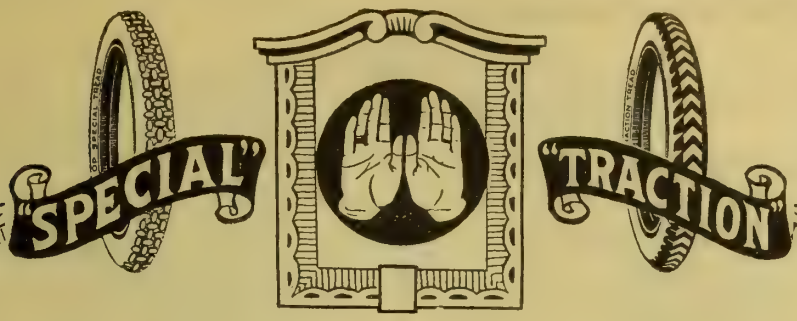
The Canadian retail hardware merchant is the logical distributor of motor accessories, and has the display facilities, staff and knowledge of local conditions to make a success of selling any line on which he is sold.

Display of motor accessories in one of the display windows of Aikenhead Hardware Co., Toronto.

GOODELL-PRATT

1500 GOOD TOOLS

HIGH SPEED



For drilling large numbers of small holes very rapidly this new High Speed Hand Drill will be found superior to any other type of hand-power drilling device made. It has a chuck speed of seven revolutions to one of the crank, which is twice the usual Hand Drill speed.

The machine-cut, carefully-fitted Gears, running in grease, are inclosed in an aluminum housing. The large End Handle enables the tool to be used as either a Hand or Breast Drill. The long Crank with a large Crank Handle insures good power. Ball bearings make the Spindle run easily. The Chuck holds Round Shank Drills from 0 to ¼-inch in diameter. The whole tool is 15½ inches long and weighs 2¼ pounds. Aluminum parts are polished, and those of steel are polished and nickel-plated.

DUNLOP AUTO TIRES

With so many low-priced so-called anti-skids obtainable, would that great host of motorists pay more for

"Dunlop Traction Tread"

if they could get its merits elsewhere?

Also, would that other large list of car owners buy

"SPECIAL"

if tires which somewhat resemble it in appearance resembled it in efficiency?

Dunlop Auto Tubes

Every Dunlop Tube is seamless—therefore, perfectly air-tight. The method of making them is automatic—cannot go wrong. Elasticity stays with Dunlop—so do countless motorists.

Dunlop Tire Accessories

Like Dunlop Tires and Tubes Dunlop Accessories are thoroughly dependable.

Besides being practical and readily adaptable, the range is wide to cover every need at prices no higher than what Auto owners have to pay for other kinds.

If interested, tear out this page and keep with letters to be answered.

Poor Connections Cause Three Quarters *of* Battery Troubles

It's not difficult to make a proper connection, but because of its simplicity carelessness often creeps in with the result that trouble occurs—and too often the battery is blamed.

* * *

A few things to remember in making a battery connection are: Remove insulation from wire and scrape wire until it is bright. Wind wires around post, **twisting from left to right,** and tighten screws, being careful to have no shreds of insulation in the connection.

* * *

It is absolutely essential that a tight connection be made to do justice to any battery.

* * *

Keep your sample of "Master" Batteries in your auto accessory show case. Show the "Master" in your auto accessory counter and window displays.

TOWNSEND'S

LAWN MOWERS

BUILT LIKE A WATCH

TOWNSEND MOWERS are superior in every feature of design and construction. In strength, durability and high character of work they do, they have no rivals.

No Noise but the Swish of the Blades

All **Blades** are of crucible steel, oil tempered. **Ball Bearings** originally adapted to lawn mowers by Mr. Townsend, insure easy, quiet operation. **Triple Compound Gears** permit of maximum strength with minimum weight. They are entirely enclosed and prevent dirt or grass clogging the pinions. Handsomely finished in colors and gold.

We manufacture a full line of mowers for use on Golf Courses. Send for complete illustrated catalogue and trade terms.

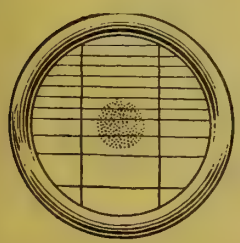
James R. Cravath, one of America's four greatest authorities on illumination. Inventor of the Osgood Lens.

Biggest Lens Seller in 1917 Success Assured for 1918

In its first year on the market, 1917, the Osgood Lens was the biggest lens seller in the United States.

And these represent actual sales to actual car owners—not mere "shelf" sales.



This great success is due to the fact that the Osgood Lens embodies a scientific principle of road lighting by which all glare is abolished, 74% more light thrown on the road, beam thrown one-third mile.

Similar success awaits it in 1918, because in addition to producing a better road light, the Osgood Lens meets the exacting requirements of headlight laws.

If you are not already handling the Osgood Lens, write to-day for interesting sales data.

Keep Shotguns Busy

How many shotguns are there in your city? Suppose we say a hundred. Now if 50 were used at the trapshooting club each week, 1,250 shells and targets would be sold.

It is the idle gun that keeps your stock of shells on the shelf. The Du Pont Company

By Boosting the Trapshooting Game

creates a steady demand for loaded shells, targets, trap equipment, sporting goods and many other articles. By vigorous and continuous advertising; employment of salesmen thoroughly familiar with the trapshooting game and its promotion; conducting a shooting school at Atlantic City; introducing novel and instructive features in local, state and national events, and being the leaders in every beneficial project to popularize trapshooting, we are carrying on a vigorous campaign to "put across" the patriotic sport of trapshooting.

Where There's a Gun Club

we want to put more "pep" into its membership—get more guns working. If there is no club organized—write us. Let's get busy—mark X before "Trapshooting" and "Gun Clubs," and mail the coupon to-day to Advertising Division.

Mr. Hardwareman,

North Star Multiple will last twice as long and give your customer less trouble. No connections to work loose, less liable to short-circuit. Especially adapted for Ignition and Lighting service.

Selected cells put up in an attractive blue moisture proof case. Every cell is insulated from the case and from the other cells. Heavy copper ribbon soldered to the terminals is used for connecting the cells, which are surrounded by a waterproof insulating compound. Just connect two wires to the binding posts and the battery is then ready to operate. A convenient handle is provided for carrying.

Made in several sizes to give various voltages and capacities.

Make sure your jobber understands it's "North Star" Multiples you want.

Announcing

The New "To-Lo-Co." Ball-bearing

SWIVEL TRUCK CASTER

No. 84

Around sharp corners, through narrow aisles, into elevators, down escalators, everywhere, anywhere goes the store and factory truck.

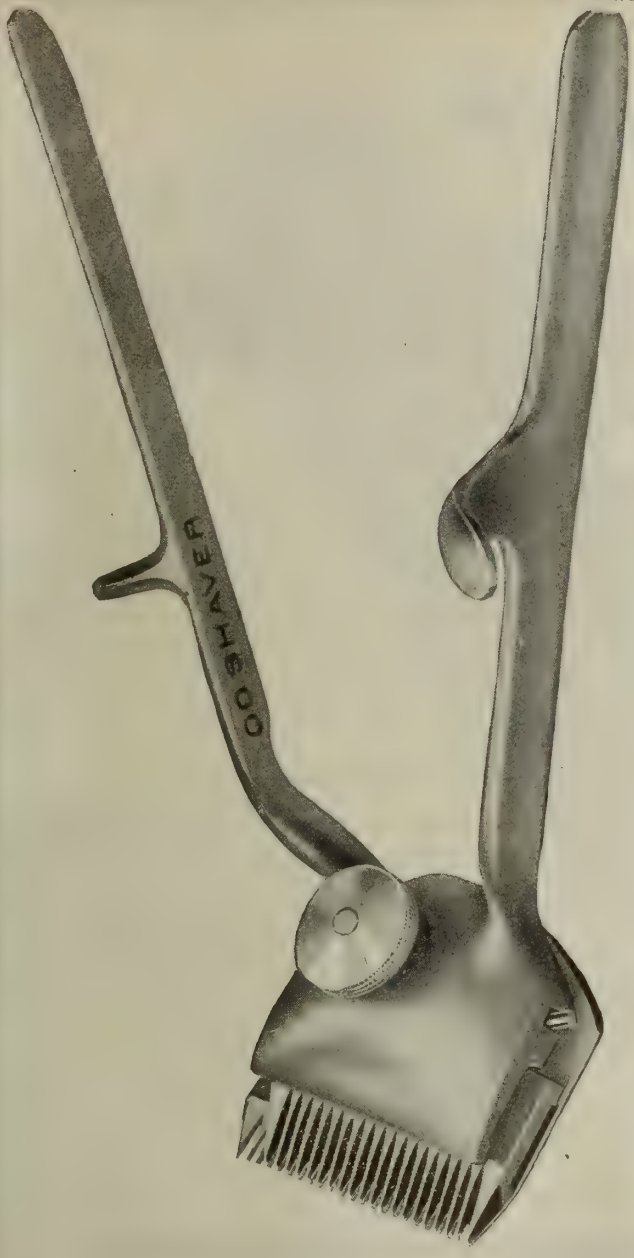
It's one of those indispensable pieces of modern equipment which has grown out of necessity—the outcome of efficiency, the solution to the over-crowded problem of almost every business.

The modern truck to be most efficient must be fitted with casters which allow **freedom** of **operation,** dodging in and out, and around corners without effort or friction.

These are the qualifications of the "To-Lo-Co.," No. 84, the new truck caster just put out by us. This caster is the ball-bearing swivel type **made with special hardened steel balls and extra heavy steel axle and pivot**—which means long steady service. Made in following sizes:

No. 84. Diam. of wheel, 2½ in., height, 3⅝ in.
No. 85. Diam. of wheel, 3 in., height, 4¼ in.
No. 86. Diam. of wheel 4 in., height, 5½ in.

We also make the **Stationary Truck Caster** which is a well known type, efficient in every detail though not so elastic in its operation as the Swivel. Comes in three sizes:



No. 74. Diam. of wheel, 2½ in., height, 3⅝ in.
No. 75. Diam. of wheef, 3 in., height, 4¼ in.
No. 76. Diam. of wheel, 4 in., height, 4¾ in.

Send your specifications at once for Spring Delivery. Also ask for descriptive literature on the Rixson line. New catalog of complete "To-Lo-Co." is now ready. Write for your copy.

A Cost Cutter In Making Butter

MAKES
TWO POUNDS
OF
MERGED BUTTER
FROM
ONE POUND OF
BUTTER
AND
ONE PINT OF
MILK

HOW IT IS DONE

Pour one pint of sweet milk into the "Universal" Merger and add one pound of butter shaved in thin slices and one teaspoonful of salt. Place the jar in warm water to soften the butter. Do not melt it. Put jar back in churn frame and churn for two to three minutes until thoroughly mixed. Butter and milk are now ready to put in a cool place to harden.

HIGH-CLASS TOOLS

The measure of your success is governed by the class of goods you have to sell, for there is something in the appearance of a well-made tool which carries to the mind a conviction of its efficiency. *That is "Selling Force," while the actual working qualities keep it sold.*

Particularly true is this of the **Disston Saws and Tools,** and in calling special attention to the

DISSTON
PLUMBS and LEVELS

you will find they stand in a class apart from others in regard to Quality of Material, Workmanship, Efficiency and Beauty of Finish.

The simplicity of the adjustment feature is one which will appeal to all users. Operated by double jamb-screws, easily accessible, the adjusting requires but a moment's time, is firm and secure, there being no spring tension to get out of order, nor can the screws rust in position.

The stocks are made of selected lumber, long and well-seasoned. All brass ends are of solid drop-forged metal, not hollow castings.

"DISSTON"

Stanley Tools

STANLEY
DOWEL AND ROD TURNING MACHINE
NO. 77

A tool that will appeal to Carpenters, Cabinet Makers, Pattern Makers, Furniture Manufacturers and especially to Supervisors and Instructors of Industrial Education, in fact to anyone interested in woodworking.

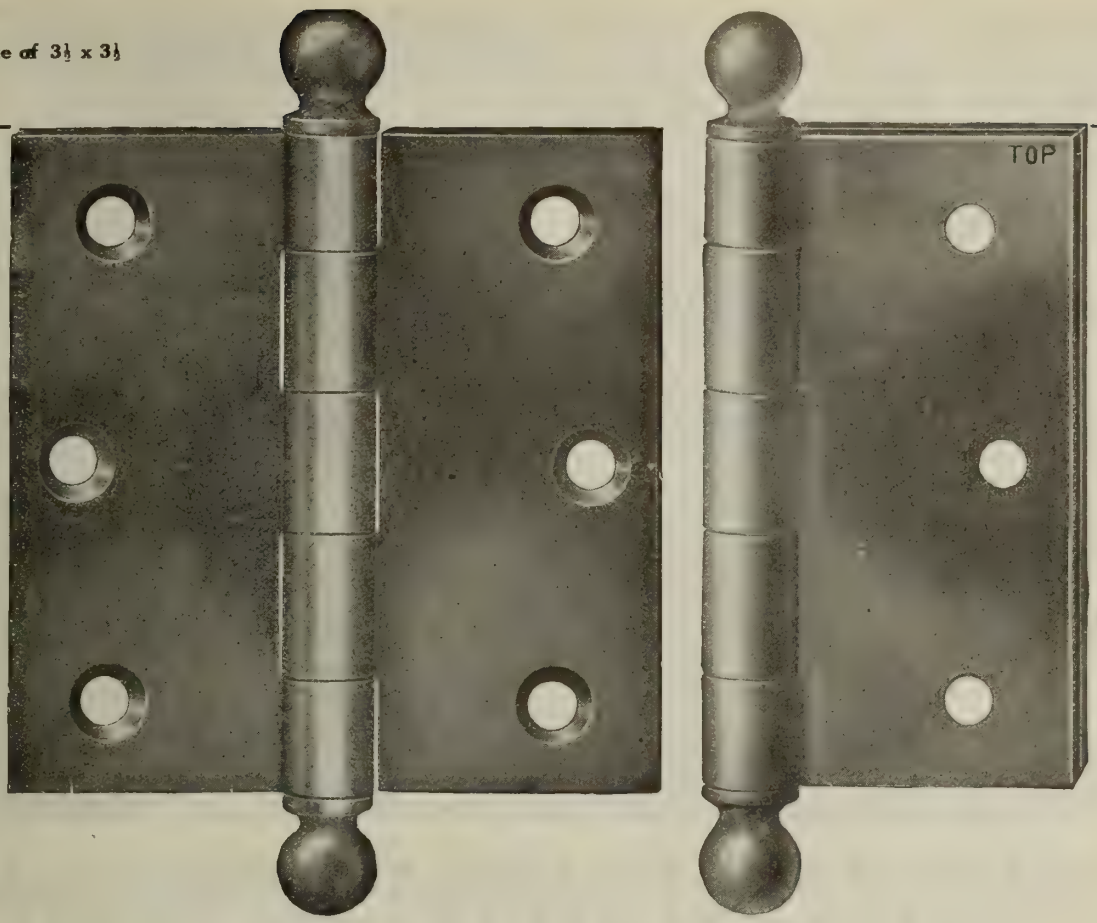
It will not only cut dowels of varying sizes and lengths to perfect dimensions, but with it one can also form rods of practically any length.

Ready made or stock dowels have a tendency to warp and shrink, making them very unsatisfactory to use where a close fit is desired.

With this machine the workman can cut his dowels when he is ready to use them and furthermore of the same material as the wood being worked.

One cutter head complete for making dowels or rods 3/8 inch in diameter is furnished with each machine.

Additional cutter heads with cutters 1-4, 5-16, 7-16, 1-2, 9-16, 5-8, 11-16 and 3-4 inches can be furnished at slight extra cost.



A workman whose tool equipment includes one of these machines and a Stanley Doweling Jig can make doweled joints with surprising quickness and accuracy. The List Price is $8.50.

A Profitable Tool for you to Carry.

Each of our trade brands known as *Canada, National, Hatch, America* and *Great West* embody distinct features that make them easy to sell, and show you a good profit.

To-day—write our Hanger Dept. for particulars of how we can help you sell more Hangers.

Canada Steel Goods Co., Limited, Hamilton, Canada

THE "MORRISON"

A Cellar Drainer

Without an Equal

Automatic in operation, and dependable. Requires no attention when once adjusted, the water turned on and put into operation, being actuated by the raising or lowering of float as the water level changes. It operates purely by water. It works under a far greater range and gives much larger capacities than any other device on the market, so far as we know, operating as low as 10 lbs. water pressure.

The operating limits of most types of cellar drainers range from 15 to 18 feet lift. The Morrison cellar drainer will lift as high as 30 feet at 60 lbs. pressure.

All working parts above water. Nothing to get out of order.

HELP CONSERVE FOOD BY SELLING THE

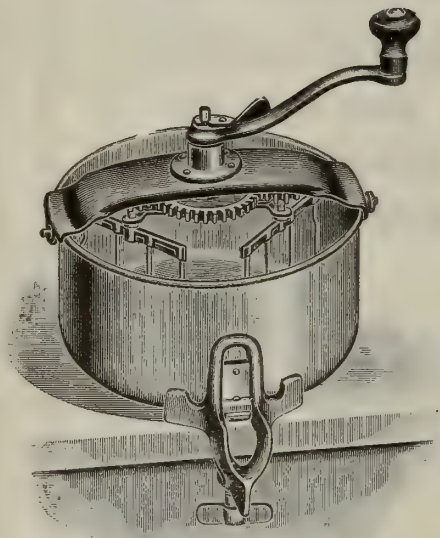
UNIVERSAL

Food Chopper

Cuts Like a Pair of Shears

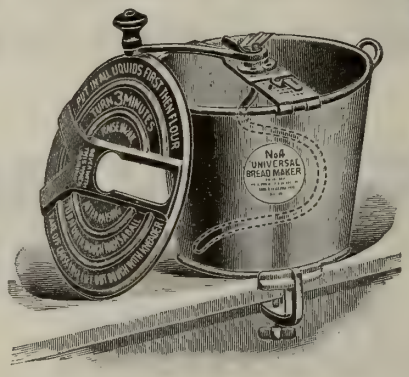
Many so-called choppers crush and tear the meat or vegetables, wasting the juices and destroying the flavor.

The UNIVERSAL—the original Food Chopper—cuts like a pair of shears, with two sharp, beveled edges. These edges are so adjusted that they keep sharp automatically by acting one upon the other.



The UNIVERSAL Food Chopper cleanly chops all kinds of meats—raw or cooked—and fruits and vegetables—coarse or fine as desired—*without mashing or tearing.*

Each UNIVERSAL Food Chopper is equipped with coarse, medium and fine cutters.



Extremely simple. Nothing to get out of order. Parts interchangeable—easily cleaned.

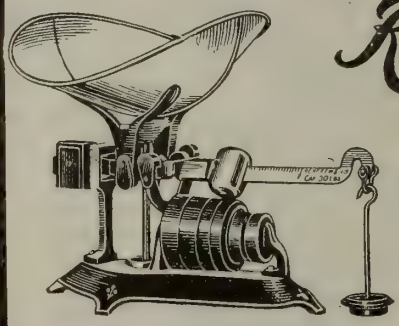
INSPECTION

that really inspects.

Every "Famous Five" File that leaves our works is mechanically perfect.

The steel itself is carefully inspected when it comes to us from the mills.

Every file is inspected after each process. Special care is given to the shape of the teeth. After hardening, every file is tested on a piece of hardened steel; and if a file shows the slightest defect, at any stage, it is rejected.



That is why every file is mechanically perfect when it leaves our works.

And that's why it pays you to specify "Famous Five" files when ordering from your jobber.

The Dispute Settler

Here is a scale that captures confidence the minute you show it. And confidence "sells goods." In a dispute over correct weights, for instance, the owner of a Renfrew can defend its accuracy against any other scale, no matter how elaborate. The Government Inspector's Certificate, accompanying every Renfrew is indisputable evidence of accuracy in every weight from ½ oz. to 30 lbs. That is one reason why the Renfrew sells like everything, these days. The housewife is ferreting out every leak due to honest mistakes in weighing. Get the

There are no dissatisfied owners of Reliable Churns

The Reliable Churn was designed to give women who churn just exactly the churns they think best. It has been amply demonstrated that the dash churn gives by far the best results. Many women are to-day still using the old-fashioned dash churn because no one has show them a better.

So the old dash idea has been adapted in the Reliable Churn. Linked up with a crank mechanism it gives the same dependable results but eliminates practically all the labor.

It gives also, greater capacity. For instance, a 5-gal. "Reliable" will work perfectly 4 gals. of cream. No other churn can approach this.

Because "Reliables" do all and more than their owners ask of them, there is never any dissatisfaction. They who sell "Reliables" experience no kicks and have no apologies to make. Everybody's satisfied.

Reliable Churns bring good profits to dealers. Better find out about them right away.

SPEED

in Hack-Sawing

It's not "How much did the hack saw cost?'

But "How fast will it cut?"

Only a fast-cutting saw saves a mechanic's time.

Some saws clog because they are not suited to the material or shape being cut.

Some dull quickly because the "quality" isn't there.

Some break without provocation because too brittle.

Save valuable time by using

Starrett Hack-Saws

CUT QUICKER—LAST LONGER

You know this if you have compared "Starrett" with other saws—if you haven't used them, try a few—you may feel safe in doing so for

Starrett Hack Saws are Unexcelled Just as Starrett Tools are Unexcelled.

Catalog No. 21MA shows what numbered saw will give real speed—save time.

Your Clerks

Mr. Merchant:

To secure the whole-hearted co-operation of your clerks is of the utmost importance in conducting your business.

If they can be induced to give the maximum of productive effort, they will be a valuable asset to your business. To secure this result, encouragement and the proper inducement must be given.

It should be your aim to get your clerks to view the business from your point of view; to place before them any or all of the information at your command, which, if given to them, will net returns.

A careful investigation reveals the fact that National Cash Registers are a big factor in determining who are the best clerks. They are endorsed by thousands of clerks and merchants in all parts of the world.

Tear off the coupon and mail it to us, we will send you valuable literature on store systems, free. Talk with our representative, because he can be of assistance to you and is trained in store efficiency.

The President Has the Right Idea

IT was the Annual Meeting of the Weaver Knitting Company, makers of underwear and hosiery. The particular item of the balance sheet that excited the caustic comment of one shareholder was the moderate sum of $13,567.83 for advertising. "When we are so much oversold," said he, "surely it is not necessary to keep on spending money to advertise our goods." And there were some who thought as he did.

"Gentlemen," said the President, "if you figure it out, our advertising expenditure for the year is about 1%—not a very heavy sum to pay out to maintain the good name and favor which our brand enjoys. There was a time when we had to spend a good deal more than the sum in the balance sheet to get our brand into the retail stores of the country, and to induce the public to buy it. I am willing to cut out advertising, and I'll tell you why.

"Our men are not canvassing with the diligence they gave to the work of selling when business was harder to get. They are not calling as often as formerly, and when they go, they are not very urgent. But we would be committing suicide if we ceased to court the good-will of the retailers and to keep our brand in the public eye. We have and will have competition. We must have regard for the post-war trade. If we quit our solicitation now, we shall have to do double work later on, at a heavy cost. I am authorizing our present advertising as a form of business assurance.

"Our goods continue to be sold through the retail trade. We owe it to our retail customers to keep in solicitous touch with them—to show them that we value their co-operation and good-will, even though we cannot always fill their orders. We tell our retail friends the naked truth, and we are keeping their loyalty. If we pursued any other course, I fear we would greatly rue it in days to come.

"Our advertising latterly has put us in touch with many new accounts and prospects. Our men cannot call on as many men as they did when train schedules were better than they are to-day. We are employing advertising to lower selling costs, and if Mr. ———— will give me half an hour after this meeting, I think I can satisfy him that our advertising outlay has played a large part in putting our balance sheet in the good terms in which it appears.

"Our trade mark is worth, as an asset, a goodly sum—many scores of thousands of dollars. That value has been created and maintained by our previous advertising. But, Gentlemen, if we dropped our advertising during these war years, the certain thing is that the value of our trade mark would fall sharply, and the good-will and co-operation of the retail trade would likewise fall away. From this point of view it is good business to spend 1% or so to maintain the value of our trade mark and the asset known as good-will.

"Gentlemen," proceeded the President, "I am sorry to have taken so much time to defend our policy. Need I say more?"

UPON that, Mr.————, the objecting shareholder, rose and said: "I wish to withdraw my criticism of the item of advertising expenditure. I had not looked at the matter as our President has presented it. I feel rebuked. Also I am persuaded that the President's course has been wise, and I wish to say to him and to you all that I sincerely regret my criticism."

Among the mediums serving retailers used by the Weaver Knitting Company are:

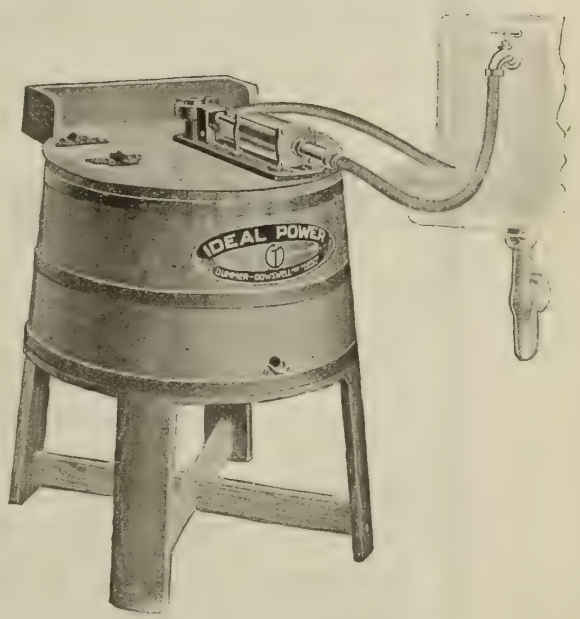
Dry Goods Review ..Page 12 times in the year $420
Men's Wear Review ..Page 12 times in the year $300

These are ridiculously small sums to expend to maintain retailers' good-will and co-operation, and get by-mail business.

Other mediums serving Canada's retailers and which will be of interest to other firms are:

Canadian Grocer	.....Page 52 times in year	$1,248
Hardware and Metal	....Page 52 times in year	1,248
Bookseller and Stationer	.Page 12 times in year	300
Sanitary Engineer	....Page 24 times in year	400

ADVERTISING to the retailer is too valuable a salesman to omit from one's organization. And the cost per annum is quite too small to be a barrier. Also there is this: Whether or not the manufacturer believes in advertising, his retailer customers and prospects do. So it is wise to fall into line with the wishes of customers—the men who call the tune, because they pay. We have hundreds of letters to prove this.



We are always glad to discuss this matter of advertising with manufacturers—not in a strong-arm way, but reasonably. If we have the right idea, it certainly becomes profitable for manufacturers to possess the same idea. We solicit correspondence from interested manufacturers.

Paint Manufacturers Take Action

Conservation on Large Scale—Range of Colors to be Curtailed — Certain Sizes of Containers Eliminated—Changes in Differentials—Prices of Paints and Varnishes Advanced

THE most important and far-reaching changes ever instituted by Canadian paint and varnish manufacturers will shortly become effective. The program represents the voluntary action of Canadian manufacturers in facing national problems which have developed as a result of the war. The manufacturers have taken time by the forelock and have voluntarily undertaken to make changes which would undoubtedly, at some future date, have been made compulsory by the Government had the paint manufacturers not taken the first steps to grapple with a problem which is daily becoming more serious.

In last week's issue HARDWARE AND METAL exclusively announced that at the time of going to press it looked as though in all probability an advance of 25c per gallon would go into effect on all liquid paints and that the increased prices would go into effect immediately on sorting orders, but that manufacturers would make provision for dealers who had not yet booked and who would accept spring orders at the old price up to April 1. It was also stated that immediate steps would be taken to reduce the number of sizes of tin containers in which prepared paints are now being sold.

The forecast was correct and an advance of 25c per gallon has been made in the price of first quality liquid paints. An advance has also been made on second quality paint.

It has also been decided to eliminate the half pint and half gallon size paint containers.

Not only have manufacturers decided to eliminate certain sized packages, but they have also decided to cut down the number of colors shown on paint color cards. In the past it has been customary to show a wide range of colors covering anywhere from 48 to 60 colors. Under the new arrangement the maximum number of colors will be 36, exclusive of black and white. This applies, of course, to house paints.

Prices of varnishes have also been advanced and certain sized packages will be eliminated in the future.

Differentials on round cans or paint and varnish containers have also been changed and details are given later in this article.

It is claimed that with a reduction in the number of colors of paints and also in the sizes of containers dealers will be able to operate on smaller stocks and this will reflect to the advantage of the dealers and also the manufacturers and release quantities of material and capital which would otherwise be tied up on the retailers' shelves.

The sweeping changes which the paint manufacturers propose to put into effect would have been considered suicidal two years ago. War necessities, however, have created new conditions which make unusual action necessary on the part of manufac-

CHANGES IN BRIEF

Liquid paints, first quality house, floor, wall, porch, concrete, ground color, priming paints. Advance 25c. gallon.

Second grade house paints, floor paints and liquid oil paints. Advance 25c. gallon.

Barn paints and dory paints. Advance 15c. gallon.

Shingle stains, ordinary colors. Minimum price, $1.15 gallon.

Shingle stains, green and special colors. Minimum price, $1.35 gallon.

Shelf lines, such as enamels, verandah chair paint, auto finishes, carriage and wagon paints, radiator enamels, canoe enamels, engine enamels. Advance 10% net.

All varnishes and varnish stains advanced 10% net.

Provision made for supplying one spring specification order at old prices.

Differentials on round and square paint and varnish cans now as follows:

½ gal. size, 10c. gal. over gallon price.
¼ gal. size, 20c. gal. over gallon price.
1 pint size, 40c. gal. over gallon price.
½ pint size, 80c. gal. over gallon price.
¼ pint size, $1.60 gal. over gallon price.

One pint and one-half gallon sizes in paints and varnishes to be discontinued.

Range of colors of house paints to be cut down to a maximum number of 36 exclusive of black and white.

Change in differentials on varnish cans

turers. Although the changes proposed are the most drastic that have ever been put into effect in the history of paint making in Canada it is claimed that new arrangements when put into effect will benefit both manufacturers and retailers.

The tinplate situation, which has been covered thoroughly in HARDWARE AND METAL on many occasions during the past few months, has made it necessary to eliminate certain sizes of containers if manufacturers wish to secure supplies from the United States. The action taken in Canada follows action which has been taken by United States manufacturers and it is highly probable that if United States manufacturers are forced to cut down on various sizes, the United States Government which permits exports of tinplate under license only, would not consent to shipping supplies into Canada if Canadian manufacturers were making sizes of containers which were banned in the United States.

The Canadian paint and varnish manufacturers have taken action of their own accord to forestall the difficulties which would have been bound to come up later and which would probably require action on the part of the Government.

Extensive experiments have been made by the paint manufacturers towards getting other classes of containers made of fibre wood, etc., but so far the manufacturers have not been able to secure a satisfactory container to replace the tin containers.

Elimination of Sizes

It has been decided to eliminate the ½-gal. and pint sizes in paint and varnish cans, and where products such as stains, enamels, etc., are sold in packages, the sizes of which are designated by number, all equivalents of the Imperial pint size will be discontinued. The new rule becomes effective on July 1 of this year. Dealers will still be supplied with these sizes for sorting and spring orders in so far as manufacturers present stocks will meet the demand. All classes of paints, varnishes and sundry lines are affected and ½-gallon and pint cans will not be distributed after July 1. This action on the part of Canadian paint manufacturers is in accord with the action United States manufacturers of similar lines have been compelled to take.

Cutting Down Range of Colors

The next radical move decided upon is a narrowing down of the range of colors of house paints. Heretofore the range has consisted of anywhere from 48 to 60 colors. This has necessitated manufacturers and retailers carrying large stocks of manufactured goods, thus tying up large stocks of cans, which represent huge quantities of tinplate. Retailers have been practically forced to carry in stock all colors shown on the color cards. There has in many instances been a marked degree of similarity in many of the colors. This has not only meant almost a duplication of stock, but has also caused great loss of time in retail stores when customers have been trying to decide on the color which would best suit their purpose. It is felt by the manufacturers that many shades can be eliminated without causing inconvenience to either dealers or the public, and with resultant advantages to all concerned.

It has therefore been decided that the maximum number of colors to be shown on the color cards will be 36, exclusive of white and black. This applies to all house paints, and the change will go into effect on January 1st, 1919. All color cards in 1919 will be on the new basis, but supplements will be issued for a short period, showing the discontinued colors, for the purpose of assisting retailers to work off their old stock. Although the reduction has been practically forced upon the manufacturers as a result of war conditions, it is pointed out that for some years past there has been a demand from dealers for a reduction in the number of colors of ready mixed house paints. Manufacturers are emphatic in stating that even in pre-war days they were frequently urged by retailers to eliminate some of the colors shown on most color cards. New cards will be ready in the early fall of the present year, to be used in booking business for 1919. No changes are contemplated in shades now being manufactured. There will simply be an elimination of certain colors which are not considered indispensable. Manufacturers will continue to supply 36 of their present best selling shades.

Price Advances Go Into Effect

As predicted exclusively in HARDWARE AND METAL last week, and in previous issues for some time past, prices of liquid paints have advanced. Price advances become effective at once, but it is understood that manufacturers are all allowing retailers an opportunity to book one spring specification order for normal requirements for shipment up to April 1. According to the manufacturers present conditions would justify new prices immediately on all business, but as many manufacturers are doing business on what may be termed an exclusive agency plan, they have already booked a considerable number of their dealers. The manufacturers feel that in justice to other dealers on whom travellers have not yet called, an opportunity should be given the dealers to book their spring order at the old price. Every dealer will therefore be given an opportunity to book his spring order at the old price. It is said, however, that sorting orders for immediate shipment are to be charged at the new prices.

Amount of Increases

An advance of 25c per gallon has been made on all first quality house paint, floor paint, outside porch paint, flat wall paint, concrete paints, first quality marine paints, painters' stock white and ground color, priming paints.

An advance of 25c per gallon has also been made on second grade house paints and floor paints, and every liquid oil paint with the exception of barn paints and dory paints in the marine list. Both of the latter have been advanced 15c a gallon.

Minimum Prices on Shingle Stain.

Shingle stains remain practically unchanged with the exception that a minimum price of $1.15 per gal. has been made for ordinary colors and a minimum of $1.35 for greens and special colors in one gallon cans.

Shelf Lines Advanced.

All shelf lines, such as enamels, high-grade white enamel, screen, canoe and engine enamels, verandah chair paint, auto finishes, carriage and wagon paints, radiator enamels, are all advanced 10% net beyond present levels.

Varnish Prices Also Increased.

All varnish and varnish stains have also been included, and have advanced 10% net over previous price. On sorting orders new prices apply immediately, but old prices will be allowed on spring specification order up to April 1 on same basis as on liquid paints.

Big Changes in Differentials

Differentials on round cans or paint and varnish containers have also been changed.

On the half-gallon size the differential remains at 10c per gallon above the one-gallon price. No increase has been made here, in order that present stocks of half-gallon cans on manufacturers' hands can be expeditiously cleared out. On ¼-gallon cans the differential in future will be 20c gallon over the one-gallon price. (The old differential on the size was 15c gallon.) On ⅛-gallon or 1 pint size the new differential will be 40c gallon over the one gallon price. (The previous differential on this size was 25c.) On the 1-16 or ½-pint size the differential is now 80c gallon over the one gallon price. (Previous differential on this size was 45c gallon.)

On the 1-32, or ¼-pint size, the new differential is $1.60 a gallon over the gallon price. This latter size is not usually used with goods sold on a straight gallon basis, but as a general rule are sold each or by the dozen from the list price. The differential will be figured on a basis of $1.60 per gallon advance over the gallon price of the same product.

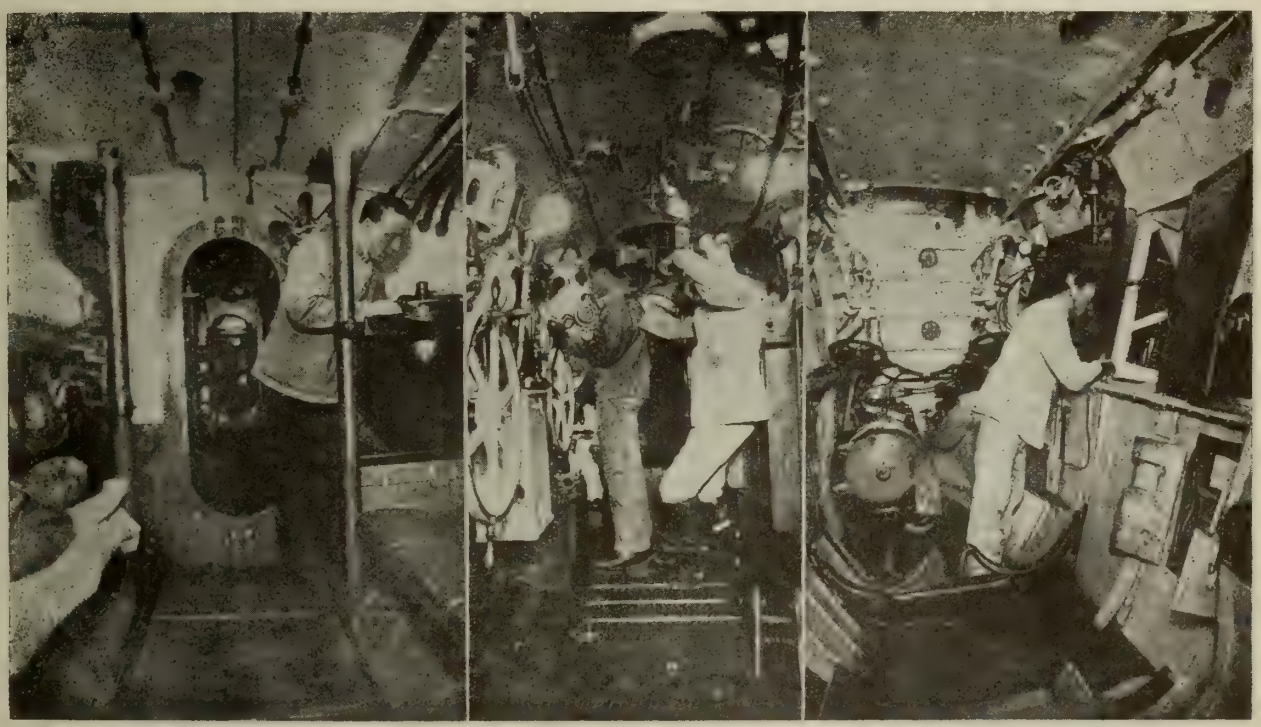
Varnish Can Differentials Altered

The new differentials on varnish cans, which are mostly square cans, are as follows: One-half gallon cans, 15c per gallon over 1 gallon price; ¼-gallon cans, 30c gallon over 1 gallon price; ⅛-gallon cans, 60c gallon over 1 gallon price; 1-16 gallon cans, $1.20 per gallon over 1 gallon price.

Terms Unchanged

No change has been made in the new terms adopted some time ago. Terms are 2% 15 days, net 60 on all standard goods. Oil and turpentine are net 30 days. All spring paint and varnish orders are shipped on a basis of April 1 dating. During the past year paint and varnish manufacturers, like those in many other lines of business, have been confronted with new problems of financing. Owing to the shortage of raw materials it has been necessary to purchase supplies for spot cash, payment frequently having to be made long periods before goods are received. The manufacturers claim that the advances which have just gone into effect were warranted several months ago. The last general advance in paint prices took place on June 23, 1917. There have, of course, been many changes on white lead, linseed oil and other products as reported in HARDWARE AND METAL'S weekly market reports.

During recent months HARDWARE AND METAL has on a number of occasions intimated that many changes, such as previously mentioned in the article, were likely to take place. To those who have followed the markets closely the many changes outlined in the article will not come altogether as a surprise.



Action Also Taken by United States Makers.

Following several conferences in the United States between manufacturers, jobbers and government officials, the following statement has been issued by the Council of National Defence:

"To conserve tin and linseed oil and other ingredients of paint that are necessary for carrying on the war, paint manufacturers, now making in some cases as high as 100 shades of house paint, will limit themselves after July 1 to 32 shades. They will also eliminate several sizes of containers. Recommendations to this effect have just been issued by the Commercial Economy Board of the Council of National Defence. The board consulted with practically all manufacturers and representative dealers in preparing the recommendations, and is already assured of the co-operation of practically the entire trade.

"The detailed limitations refer to all kinds of paint and varnish. Enamels, for instance, will be restricted by the manufacturers to 8 shades, floor paint to 8, roof and barn paint to 2, shingle stains to 12, oil colors to 30, carriage paint to 8, architectural varnishes to 10 grades, marine

Current Events in Photograph—No. 5

THE HEART OF A SUBMARINE

THE submarine has become one of the great factors of the war, yet it remains still a good deal of a mystery. The photo above shows three views of the interior of a French submersible. On the left is the forecastle, or quarters of the crew. The compass is here also, and an officer is shown studying it. Center, amidships, the wheelsman is shown at his post, and an officer is shown looking through the vessel's periscope. Right, the stern of the vessel, wherein are located the ship's boilers and dynamos, and also the radio outfit, with which one of the men is shown at work.

varnishes to 4, and so on. In many cases this will mean a reduction of 56 per cent. or more.

"Half-gallon cans are to be discontinued altogether for both paints and varnishes, as are also all cans smaller than half pints. In several kinds of paints pint containers are to be eliminated and all cans smaller than gallons in barn and roof paint and shingle stain are to be dropped. The reductions are expected to involve little inconvenience to consumers."

According to the *Paint, Oil and Drug Review* the United States paint grinders have agreed to a reduction of shades as follows:—

Exterior house paints to 32.
Porch and floor paints to 6.
Flat wall paints to 18.
Automobile paints to 6.
Paste colors will ultimately be reduced to about 50.

As to the grading of varnishes, the following grades were determined upon by the Varnish Manufacturers' Association:

Architectural varnish, 10 grades.
Marine varnish, 4 grades.
Automobile varnish, 3 grades.
Miscellaneous varnishes including shellac varnish, bronzing liquids, etc., 28 grades.
Flat wall finishes, 18 grades.
Penetrating stains, 6 grades.
Varnish stains, 8 grades.
Interior enamels, 8 grades plus black and white.
Automobile enamels, 8 grades plus black and white.

Manufacturers must ship out present stock prior to July 1st and it is the government order that no cans or packages can be taken back from the customers as that would not be consistent with conservation because it involves extra costs of freight, resale, etc.

In addition to the foregoing sweeping changes the question of conservation in size of packages was carefully considered and the elimination of unnecessary sizes agreed upon.

All odd sizes are to be discontinued in the paint trade particularly half sizes and most of the smaller sizes.

As a result of the Washington meeting it has been decided that no varnish packages less than pints will be sold. In automobile finishes no pint or half gallon cans will be used. In flat wall paint no half size cans will be used."

What Hardwaremen Are Doing

Newspaper Advertisements Show How Retail Hardwareman is Taking Advantage of Fuel Shortage to Sell Many Lines From His Stock — Oil Heaters, Ash Sifters, Electric Stoves all Featured Extensively

"SAVE Fuel!" Under this heading THE WILLIAM BEATTY CO., LTD., PARRY SOUND, ONT., strike a note in a recent newspaper advertisement which is of interest to every householder to-day. Continuing, the ad. says: "The present scarcity of coal is a serious problem in many homes, and it is necessary for all to put forth every effort to make the present supply go as far as possible. Sift your ashes, we have several kinds of sifters ranging in price from 30c to $7.50. Coal Oil Heaters, we handle the ——— heaters in several styles, and also the ——— heaters in two styles. Wood Heaters, many people are providing themselves with wood heaters for emergency purposes, ——.. air tight wood heaters have no equal." These lines are of vital interest to many householders who are feeling the fuel shortage, and in addition this firm, which carries the slogan "The Busy Corner Hardware," lists skates, sleighs, snow shoes, snow shovels, ice saws and tools, etc.; all seasonable, saleable lines.

* * * * *

W. H. THORNE & CO., LTD., ST. JOHN, N.B., add attractiveness to one of their recent newspaper advertisements by using a cut to illustrate the line on which they are making a special drive. "For a Good Hot Drink in a Hurry," the ad. starts off, and follows along with "How often have you wanted a hot drink, quick—coffee, cocoa, milk, or beef tea—especially when you're out of an evening and return too late to re-light the range. Then on cold winter mornings when you'd no time to spare. On just such occasions ——— solid alcohol stoves fill the much-felt need to a nicety. Just fill the boiler, put it on, light the solid alcohol and almost before you realize it a piping hot drink—grateful and comforting—awaits you. These handy little stoves are also invaluable in cases of sickness. Come and see them, then buy yours." Following the prices of the different types are given, and the ad is backed by a direct appeal to their window display when they say: "See our Market Square window.

* * * * *

In advertising oil heaters, the CINNAMON-ALLIN, LTD., LINDSAY, ONT., store head their announcement: "Save the coal situation, use oil heaters. We sell the ——— oil heater, all black, $5.00, nickeled, $6.00. We sell ——— oil. The ——— oil heater will heat your rooms warmer than is possible with the furnace. Can be carried from room to room. Is economical on oil." These short, pointed sentences are attractively arranged on each side of a cut of the heater, which appears in the centre of the ad.

"Cold weather will not worry you," is the message given to customers of WHYTE & ORR, DAYSLAND, ALTA., in advertising the line of heaters which they carry. There is, however, a proviso following this heading which says in part, "If your home is heated by one of our high-grade heaters. We are showing this year, as usual, the old favorites, ——— hot blasts and ——— round oaks." An interesting feature of the ad. is contained in the announcement: "Several hundred of these ——— hot blasts are used in this district to-day, some for the past ten or twelve years, without one cent for repairs yet." In listing the ——— round oak heaters, this firm states: "Are built to last. Ask the man who has one what he thinks of it. Not cheap in first cost but very cheap considering their great economy of fuel and long lasting qualities." Cuts are used to further brighten the ad.

To show how extensively the hardwareman is branching out another paragraph from this firm's ad. is quoted: "Are you thinking of getting a phonograph?" reads a query, which is followed by the suggestion: "Let us show you the ———, the highest ideal yet realized in talking machines. ——— records are in a class by themselves, are practically everlasting. Let us demonstrate these for you." Surely the hardware merchant of to-day carries a diversified stock, and many of these new lines yield a splendid profit.

* * * * *

To meet an apparent shortage of gas REID & CO., WELLAND, ONT., inserted a timely advertisement on electric ranges. This ad. is well illustrated, and says in part: "In six styles and sizes, priced from $50 up. The only electric range with an absolutely sanitary oven. You can operate this electric range as cheaply as if you were burning gas. Don't let the gas shortage hold you up. Call at our store and investigate the ——— range."

* * * * *

"Burn oil or gasoline. The coal situation, why worry?" In this manner BOXALL & MATTHIE, LTD., LINDSAY, ONT., draw attention to the line of stoves they sell. "Facts that make ——— stoves better than other makes. No wicks to clean or buy, burners are equipped with heat condensers, preventing waste heat and saves fuel, burns a fourth oil less than other makes, is one of the most valuable articles for the home. See them working at our store. Demonstrations daily." Not only are statements made as to their worth, but this firm goes further and gives something of great interest in those last two words, "Demonstrations daily."

Where Quality Roofing Points the Way

Now a Fundamental—Getting the Facts About Roofing—Knowledge is Power—Application an Important Feature—Talk Quality, Advertise Quality

IT is not so many years ago that ready roofing was considered in the light of something temporary, only to be used on outbuildings which were not expected to be used more than from six months to three or four years. The real, long life service possible in its use did not enter into the sale, there was no attempt made to play up the real quality roofing which possessed years of service in its makeup.

Quality Now a Fundamental

How the tendency in this respect is changing can be seen from the class of advertising now being done. Advertising to-day of quality roofing places particular emphasis on long life, years of wear, entire satisfaction for the better class of building.

In looking over some newspaper advertisements recently the writer was impressed by an appeal for roofing which carried in large, black faced type the following important announcement. "For fine residences and public buildings." Surely this is getting away from the old idea of putting this roofing on only barns, implement sheds or construction camp quarters.

Getting the Facts About Roofing

What enters into the quality roof, what are the points to be emphasized in selling roofing for the better class of buildings? Is the roofing you sell made up from materials combined in such a manner that it will back up the service you claim for it?

Here is where knowledge enters into the game of selling roofing in such proportions that it can't be played up too strongly. Only recently in making a couple of calls, a dearth of real knowledge concerning roofing was apparent. This is by no means the rule but neither of those to whom reference is made could have sold roofing to any one wanting to know why they might expect service and satisfaction.

Where Knowledge is Power

Their attitude was quite different from another type to whom a possible purchase of roofing was suggested. "We sell ——— roofing, sir; let me show you samples and explain why we pin our faith to this line." This was the opening sentence of one of the finest talks one could listen to on roofing. A real knowledge of the goods was displayed and confidence in the merchant and his product grew as one followed his talk.

First of all, this merchant wanted to know for what type of building it was to be used. On learning that it was for a residence, all points which might crop up were covered. The products used in the manufacture of the roof were outlined, how these were compounded to give maximum wear and long service; how easily it was applied; its fireproof qualities; the cost of upkeep. This man was a merchant in the full sense of the word.

Knowing the Other Man's Line Too

Not only was this man's own line known to him but when it was suggested that ——— roofing had been highly recommended he proceeded to show where the line he sold excelled the other. He knew the other merchant's goods too. That was a point that impressed the buyer greatly. There was no knocking of the other product—no waving the matter aside—he admitted the other was good roofing but the line he sold was better and he stood ready to prove it.

Put It on Right

One of the most important factors in roll roofing is its application. Applying this type of roofing in any other than the right way leads to ultimate dissatisfaction and special emphasis should be placed on this feature. Boards of the same thickness and free from large holes should form the base—a faulty foundation is the cause of more roofing dissatisfaction than nearly any other feature and there should be no loophole through which the purchaser can lose faith in the quality product you are selling. The merchants' responsibility does not cease when he rings up the sale in his cash register. He should see that the roof is given a chance to uphold the standard of service which he has outlined as possible in its use. This can only be done by paying particular attention to its application.

Talk Quality, Advertise Quality

In selling roofing the quality point should predominate—not only in the actual sales talk to the customer but throughout the newspaper ads., window displays and interior displays. There are roofing and roofings on the market but it is the product which possesses the basis of quality, is built with the idea of living and upholding a reputation, that should be pushed.

This can be incorporated in newspaper advertising most effectively. The roofing is decidedly an important item in the construction of any building and as such deserves great care in handling. In another ad. which appeared featuring roofing, this heading was used: "Don't put on the roof until you investigate." This is a very wise precaution for any builder to take and it is in courting investigation that the merchant secures an opportunity of explaining the virtues of the product he sells.

Giving the Customer Something to Think About

Other points incorporated in this ad. which go right to the heart of the situation are: "——— has demonstrated that it is not only a most durable roof, but also the most efficient roof. It is economical to buy, inexpensive to lay and costs practically nothing to maintain. It is light weight, clean, sanitary, fire-retardent and weather-tight. It is now used as the preferable type of roof for office buildings, factories, hotels, stores, warehouses, garages, farm-buildings, etc., where durability is demanded."

Prepare "Copy" Carefully

To write newspaper ads. which carry a message straight to the reader that is the type to bring results and is what the merchant should spend time in preparing. Simply announcing that you carry roofing is not enough—specify the kind, tell how it can be used and why it is best. Advertising copy that is interesting, that compels attention, that will bring inquiries is the kind that should be written and can be written with a little study.

In talking quality, the merchant has a theme on which he should be able to wax eloquent. After all, there is where success in merchandising roofing lies, for it is only by selling quality that the long wear and satisfactory service wanted can be given. A good roof is really essential to any building and the opportunities for the sale of roofing in this class are many.

MARKET FOR FIREPROOF ROOFING

In connection with the construction of public warehouses for storing rice, the Siamese Government has encountered difficulty in securing suitable fireproof roofing material. This is largely the result of the present high prices of galvanized iron (the material mainly used for this purpose in tropical countries), apart from certain inherent objections to its use under any circumstances.

This roofing question has aroused much interest for a long time all over tropical Asia and the East Indies and has never been wholly satisfactorily solved. It is thought that the matter is one that might well engage the attention of American manufacturers and exporters, both in Siam (which is at present in a prosperous condition) and in other countries of the Far East, particularly the Philippine Islands. To obtain a really good market, any material of this kind should be as low in cost as possible, but it should be both fireproof and waterproof to a high degree and easily applied by relatively unskilled native labor.

Winners in Christmas Display Contest

High Standard of Excellence Attained in Winners' Windows — Entries Show Growing Interest in This Field—Selling Power a Feature — The Winners — Price Cards Play Important Role

HARDWARE AND METAL'S annual Christmas Window Display Contest which closed on January 2 last met with a splendid response, entries coming along in great numbers during the last few weeks of the old year. This meant a large assortment for the judges to go through, and their task proved no easy one, as the quality of the displays was indeed high. Every consideration was given to even minute details, and the awards were only arrived at after thorough examination, this resulting in the majority of cases in close decisions being rendered.

PRIZE WINNERS IN HARDWARE AND METAL'S ANNUAL CHRISTMAS WINDOW DISPLAY CONTEST.

In Towns Over 5,000

1st Prize—H. W. Parr, care of Fawcett Hardware Co., Saskatoon, Sask.
2nd Prize—J. F. Macdonald Bingham, care of May Brothers, Toronto, Ont.
3rd Prize—P. E. Hughes, care of Cochrane Hardware, Ltd., North Bay, Ont.
4th Prize—G. E. Hammond, care of Mills Hardware, Ltd., Hamilton, Ont.

Those receiving honorable mention in order of merit are as follows: L. K. Bradbury, Manville Hardware Co., Prince Albert, Sask.; F. S. Keller, Latham's Hardware, Moose Jaw, Sask.; N. W. Barton, Barton & Fisher, Port Arthur, Ont.; Fanny Dickson, Sumner Co., Moncton, N.B.; M. H. Serson, Baxter Hardware Co., Windsor, Ont.; Charles Harvey, Wills & Emerson, Port Arthur, Ont.; Harry J. Hanwell, Marks, Clavet, Dobie & Co., Port Arthur, Ont.; Sam Wilson and E. Batineau, Sumner Co., Moncton, N.B.

In Towns Under 5,000

1st Prize—W. A. Schaefer, care of M. Weichel & Son, Ltd., Waterloo, Ont.
2nd Prize—J. C. Kayser, care of Rutherford & Kayser, Simcoe, Ont.
3rd Prize—S. C. Manly, care of W. K. C. Manly, Grand Forks, B.C.
4th Prize—G. A. Culbert, care of Johnson Bros., Boissevain, Man.

Others to receive honorable mention are: H. I. Gayton, care of John Dutton, Govan, Sask.; W. H. Cuddy, Strathroy, Ont.

Selling Power a Feature

In planning the window, it is to sell goods. The window which will create the most business is by far the most successful to make. It is often true that windows arranged artistically and with due regard to nicety of detail will attract greater attention than one perhaps less striking at first glance, but unless selling force is incorporated, the quality really sought is lost entirely. It is necessary that a good assortment of articles be shown, and price cards are regarded as essential to achieve the best results. These are points which the judges kept in mind in making their decisions.

The Contest

The contest followed lines established in previous years —two sections, one for towns over 5,000 population and one for towns under 5,000 population, being established. In each section there were four prizes, as follows: First prize, $10; second, $5; third, $3; fourth, $2

The prize-winners are listed in the accompanying panel, and the first prize displays in each section are reproduced herewith. In succeeding issues the other prize-winners' displays will be shown.

Winner in Over 5,000

Harold W. Parr, of the Fawcett Hardware Co., Saskatoon, Sask., winner of first prize in towns over 5,000, is a former prize-winner in HARDWARE AND METAL contests, and his reference to price tickets and their selling value is reproduced herewith:

"You will notice that I have all the articles in the window priced with small but plain price tickets. It has been my experience that many exceptionally good displays lack the price tags. May I quote from the results we achieved by including same in the hope

Awarded first prize for places over 5,000 population, in HARDWARE AND METAL'S *Annual Christmas Window Display Contest. Display arranged by H. W. Parr for the Fawcett Hardware Co., Ltd., Saskatoon, Sask.*

that other window dressers will see how price tags work out to advantage? People would come into the store and say:

" 'Let me see that percolator at $4;

" 'Let me have that fern pot at $3;

" 'Give me that sugar and cream set at $4.50,' and so on. They decide while outside the store just what they want, and they know how much they are going to pay for it.

"I had a lady in the store one night who declared that she had been taking in all the store windows on the street for an hour and one-half and could not recall a store where the prices were shown on the goods excepting in stores where the merchandise was of a different nature to what she wanted. Her own words convey my message very clearly: 'Evidently you are not afraid to tell the people what you want for your goods.' Incidentally her purchases before leaving amounted to $12, made up from small items such as salt and pepper shakers, cold meat forks, baby spoons, etc."

A brief description of the window has been outlined by Mr. Parr as follows: "Background, carmine and white; pillars, white; flame globes on top of pillars. Body of window, dark red plush; holly wreaths and sprays as decorations, with a few artificial asters in vases. Show cards, wiring, scrolls on background and bells all done by the writer."

Winner in Second Section

W. A. Schaefer, with M. Weichel & Son, Ltd., Waterloo, Ont., trimmed the first prize-winner in the section for places under 5,000. Mr. Schaefer did not include description of display, but it will be seen from the reproduction herewith that a splendid assortment of goods was shown and price cards used freely. In sending along this entry, the following note from Mr. Schaefer explains itself: "As this window display has brought us such magnificent results, I wish to enter it in your contest. The photographer made a poor job of this, as part of the front was cut off and also a portion of the left-hand side."

In the first sentence the keynote to successful window display advertising is given—"this window display has brought us such magnificent results"—and this is just where prize-winners of each section lay particular emphasis. Mr. Parr considers the use of price tickets profusely as a big factor in the results achieved—this must have been a point of merit that helped in the attainment of the magnificent results Mr. Schaefer speaks of.

Altogether the standard of window display advertising is showing improvement and the greater interest being taken in hardware stores from coast to coast would indicate the growing importance placed on this part of the selling program. Time devoted to arranging attractive, seasonable and sales producing windows is well spent. Get the people interested and looking forward to your displays—the business will soon show improvement.

Many new contestants have been noted in this year's contest and some who received honorable mention a year ago are now with the winners. This shows a tendency towards improvement which is welcomed and although it is not possible for all to be winners, HARDWARE AND METAL is pleased to note the growing interest evidenced by the large number of entries. In looking over the winner's windows, it is possible points may be gathered which will be of use in arrang ing other displays and it is with the idea of elevating this branch of retail merchandising that this contest is conducted.

Awarded first prize for places unaer 5,000 population in HARDWARE AND METAL'S *Annual Christmas Window Display Contest. Arranged by W. A. Schaefer for M. Weichel & Son, Waterloo, Ont.*

STANDARD GAUGE WIRE FENCING

In a recent letter to HARDWARE AND METAL, a subscriber asked the question as to whether the sale of 9½ gauge wire fencing was permissible in Ontario. He also asked whether this might be called a standard gauge. There are perhaps other merchants faced with the same questions and a copy of the reply sent to this man is reproduced for their benefit.

"Acknowledging your letter of January 22, there is no restriction placed on the sale of 9½ gauge wire fencing. This might also be called a standard gauge.

"Your letter opens up a really big field for discussion. To import wire from the United States it is necessary to declare fencing No. 9 gauge to have it come in duty free. However, the customs authorities allow a variation of two or three points and in this way 9½ gauge which is really a light No. 9 could be brought in.

"Canadian manufacturers are not compelled to conform to any standard in the selling of fencing outside of the fact that when they declare same is a certain gauge it must be that gauge. There is no reason why a Canadian manufacturer could not draw 9 gauge as well as 9½, but in either case he would have to declare his product.

"The British Imperial standard gauge, known as the "S.W.G." or standard wire gauge is the legal wire gauge of Great Britain. It is also the Canadian customs standard for metal sheet plate and wire. The Birmingham wire gauge, also known as "Stubbs" iron wire gauge, is used in England as the standard for iron and steel wire and by some makers in the United States. There is a slight difference in the two No. 9's represented by these two gauges.

"In selling a 9½ gauge wire fencing, and calling same a standard gauge fence any manufacturer would be quite within his rights."

EDITORIAL COMMENT

REPORTS from Germany state that a process has been patented by which tin plates can be tinned on one side and, it is claimed, used for preserve tins, paint tins, etc. According to reports the process is one by which two sheets of the same size of tin are placed tightly together and soldered along the edges before being dipped into the tinning vat. After tinning the sheets are separated. It was at first feared that the expansion of the air between the two sheets would cause them to separate during the dipping, but reports state that this difficulty has either not arisen or has been overcome. This is probably one of the alleged 10,000 new processes adopted by the Germans since the outbreak of the war.

GETTING DOWN TO EFFICIENT BASIS

ONE of the things the war has done and is doing for Canadian industry is to cause a reorganization on a more economic basis. Manufacturers are ridding their decks of useless lumber in the shape of multiplied lines which are very similar to other lines. For the small difference in style there has been no real advantage to either the manufacturer or the consumer.

Scale manufacturers have cut down the number of designs by one-half in some instances. Some manufacturers have discarded certain styles entirely, as for instance the household scale. Where formerly there were some two hundred designs of railway track scales, one large Canadian concern now manufactures only six designs.

Paint manufacturers have decided to do away with half-gallon and pint sizes in tins and to greatly reduce the number of colors manufactured. These are but signs of the revolution that is being effected in Canadian industry at the present time. Canadian manufacturers have a new vision of world markets and the capturing of world trade. They are clearing their decks for action and are getting down to an economic basis of manufacture. These factors are going to help Canada secure her rightful place as a resourceful and energetic manufacturing nation.

UNIFORM MARGINS OF PROFIT IMPOSSIBLE

THE suggestion is frequently made when discussions on price-fixing are going on that the percentage of profit a retailer may make be set at a uniform rate for all regulated articles. It is possible that this plan might work if applied to a few staple lines but were this adopted to cover a large number of products the results would very soon show wherein it was not practicable. It would affect one of the underlying principles of merchandizing and tend towards upsetting retail methods which have been successfully established for many years.

It would appear that this method would simplify merchandizing considerably, and, if practicable, would be the general rule, but experience has proved that it is impossible for any great number of items to carry a uniform profit. Many factors enter into the determining of the price an article shall be sold for but decidedly it is the salability which must form the true basis of arriving at retail prices. The most important factor is really turnover.

Most assuredly the hardware man could not be expected to sell a line which turns but once a year at the same margin of profit as those which turn five or six times in the same period. In establishing a uniform profit it must needs be at a higher average profit. This would result in the one-turn-a-year line being a little cheaper but the six-turn-a-year goods would show decidedly higher figures. This is by no means fair to the merchant selling the goods nor to the consumer.

Every item in the hardware man's stock has to bear its fair share of overhead and selling expense. Those lines which remain on the merchants' shelves for months and require greater effort in selling must naturally bear a greater share of the expense. Until the point is reached where all merchandise is equally salable, profit margins cannot be made uniform and the day when this condition of affairs will prevail is by no means imminent.

EXPORT TRADE REACHES HUGE TOTAL

AN exceptional growth in volume and value is evident in Canada's export trade as outlined in a special article in this week's issue of HARDWARE AND METAL. Figures for 1917 reveal the fact that Canada's trade in food, ammunition and other manufactured products with the Allies is reaching such proportions that gradually the status of the Dominion as a debtor nation is improving.

Practically all branches of industry have participated in this expansion, which shows an increase during the three-year period of approximately 58 per cent. in mineral products; 26 per cent. in fishery products; 31 per cent. in forest products; 177 per cent. in agricultural products, and 469 per cent. in manufactured goods.

Canadian Manufacturers Specializing

Canadian Concerns Turning Their Attention to Specializing on Few Lines Rather Than Diffusing Their Efforts Over Many Lines—Manufacturers Have New Conception

THAT the war has given a new conception of business organization and manufacturing outlook is an established fact. Manufacturers who previous to the war were limping along and diffusing their efforts over many different lines are now getting down to a more economic method of doing business. Where formerly their efforts were directed to making numerous lines they have decided to do away with many lines which in a sense overlapped. This trimming down of lines is going to enable the manufacturers to organize their manufacturing processes so that they can specialize on a few lines and get a bigger production on the ones they deem best suited to meet the needs of the trade.

A striking example of this new conception of business is to be had in the manufacture of scales. Canadian manufacturers in some instances cut the number of lines previously manufactured in half. One concern formerly manufacturing eight different styles of platform scales is now manufacturing only four. In the case of railroad track scales where upwards of 200 different sizes were manufactured there are now only six sizes manufactured. Following show the various sizes previously made on portable platform scales together with the sizes now being manufactured:

	Old sizes manuf'c'd capacity	Sizes now manuf'c'd capacity
Portable platform, lbs.....	2,500	....
Portable platform scale ...	2,000	2,000
Portable platform scale ...	1,500	1,500
Portable platform scale ...	1,200	....
Portable platform scale ...	1,000	1,000
Portable platform scale ...	800	....
Portable platform scale ...	600	500
Portable platform scale ...	400	....

Eliminating Unnecessary Sizes

From the above table it will be seen that the 400-lb. size is eliminated. Those who require a scale to weigh up to 400 pounds will have to purchase the 500-lb. size. Those requiring to weigh 600 and up to 800 pounds will have to take the 1,000-lb. size. Two sizes are effectually eliminated by doing this. Those requiring to weigh up to 1,200 pounds will have to secure the scale of 1,500 pounds capacity. Manufacturers hope through the saving in manufacturing cost thus effected to be able to give the customer the larger scale for about the same price as the smaller scale was formerly sold for.

In the large railroad track scales, where formerly there were some 200 different designs the number has been reduced to six designs. The standard scale for railways will now take 150-ton engines and have a platform length of 50 feet. The heaviest scale previously was one which took only 100 tons capacity and when heavier weights were placed upon it there was a constant strain. This results in the scales becoming inaccurate in a short time with a consequent variation of weight of all scales used in weighing railway cars. Now the lightest scale that is made is of 100 tons capacity.

Through the adoption of the standard size at 150 tons capacity the possibility of inaccuracies in weight are eliminated as the scale will weigh the heaviest engines without any danger of strain. There is possibility of an enormous saving in the cost of the production of these railway scales and at the same time a product will be secured that will be absolutely accurate in its work.

Household Scales Eliminated

One concern has eliminated the manufacture of household scales entirely. They assert that there is not sufficient demand for these to make it worth their while to fritter their efforts away on them. They would rather expend the same effort in concentrating upon the lines which will be in greater demand. In this way they hope to reduce the operating cost on the lines that will be more generally used. This will reduce the cost per scale and enable the manufacturers to give a better product for the same amount of money. It is hoped even to give lower prices in some instances.

Getting Ready for After-War Period

There is a shaping of the business activities of Canadian concerns toward the after-war period. Many there are who feel that competition will be keen for trade when plants now working on munitions turn their efforts to production for peace requirements. This has been one of the big considerations that has impelled Canadian manufacturers to clear their decks for action and get rid of a lot of lumber in the case of numerous superfluous lines. Energies frittered away on numerous lines is wasted energy. It does not enable the concern to get to an economic method of doing business. If free trade comes throughout the world as a result of this war, as President Wilson evidently suggests that it shall, it will mean that industry can no longer be bolstered up under a high tariff wall. Each country will have to depend upon its own resources and the ingenuity and skill of its manufacturers. This will mean the taking

(Continued on page 50.)

Millions from the Sugar Bush

Hardwaremen Should Cultivate the Farmer's Interest in Tapping More Trees—Room For Development—A Patriotic Side To It

IN the year 1916 the Province of Quebec gathered from its crop of maple syrup and sugar over three million dollars and it is stated this could be increased by several millions more.

Fifty-Five Thousand Bushes

No fewer than 35,000 sugar bushes are said to be known of in the Province of Quebec alone, while in the other provinces there are some 20,000 more. Now is the time then that the hardware man should turn his attention to a consideration of this topic, as the perid of active operations approaches. By giving this matter some thought, business in the line of goods pertaining to this industry can be stimulated, and the advantage will be beneficial to both farmer and merchant.

Reliable Information

To France, Scotland, England, Australia and other foreign markets our maple products can be sent and there find a ready market. It is stated that an excellent demand exists which cannot be supplied at the present time.

In the first place it would be well to advise your customers to use sap buckets that are large enough to catch a day's run of sap, and to urge that these must be clean and free from foreign matter. Much sap is wasted in certain parts when buckets are used that will not hold the day's run. Advise the frequent scalding of buckets—this should be done daily.

It is best to select an evaporator that is suited to the size of the bush owned by the farmer. This is important, and the size selected should be large enough to accommodate the day's run of sap. It will be an easy matter to get sizes and capacities from the manufacturer, and he will willingly co-operate with the hardware man in matters of this kind.

Sap gathered should be boiled down the same day. Make necessary arrangements to have a good fire as soon as the sap is ready for boiling down. The hotter the fire, the more brightly it is kept burning, the better, and the care and attention directed here will amply repay for any trouble. Upon the condition of the fire depends the density of the syrup. Generally speaking, the shorter the time spent in boiling down the better the quality of the syrup, and in addition the sugar will be better too.

Make Displays Early

Get your windows ready and show the various supplies that the farmer will need. Make good displays and keep the matter before all who will be interested. Write your customers and when they come to town be prepared to talk syrup and sugar. In doing this you will be performing a patriotic duty, for the harvesting of this natural crop will tend to release just that much more of the refined sugar for the troops and allies overseas.

Something New for the Cardwriter

A Series That Will Give Ideas and Instructions for the Cardwriter Who Has Already Mastered the Rudiments of the Work.

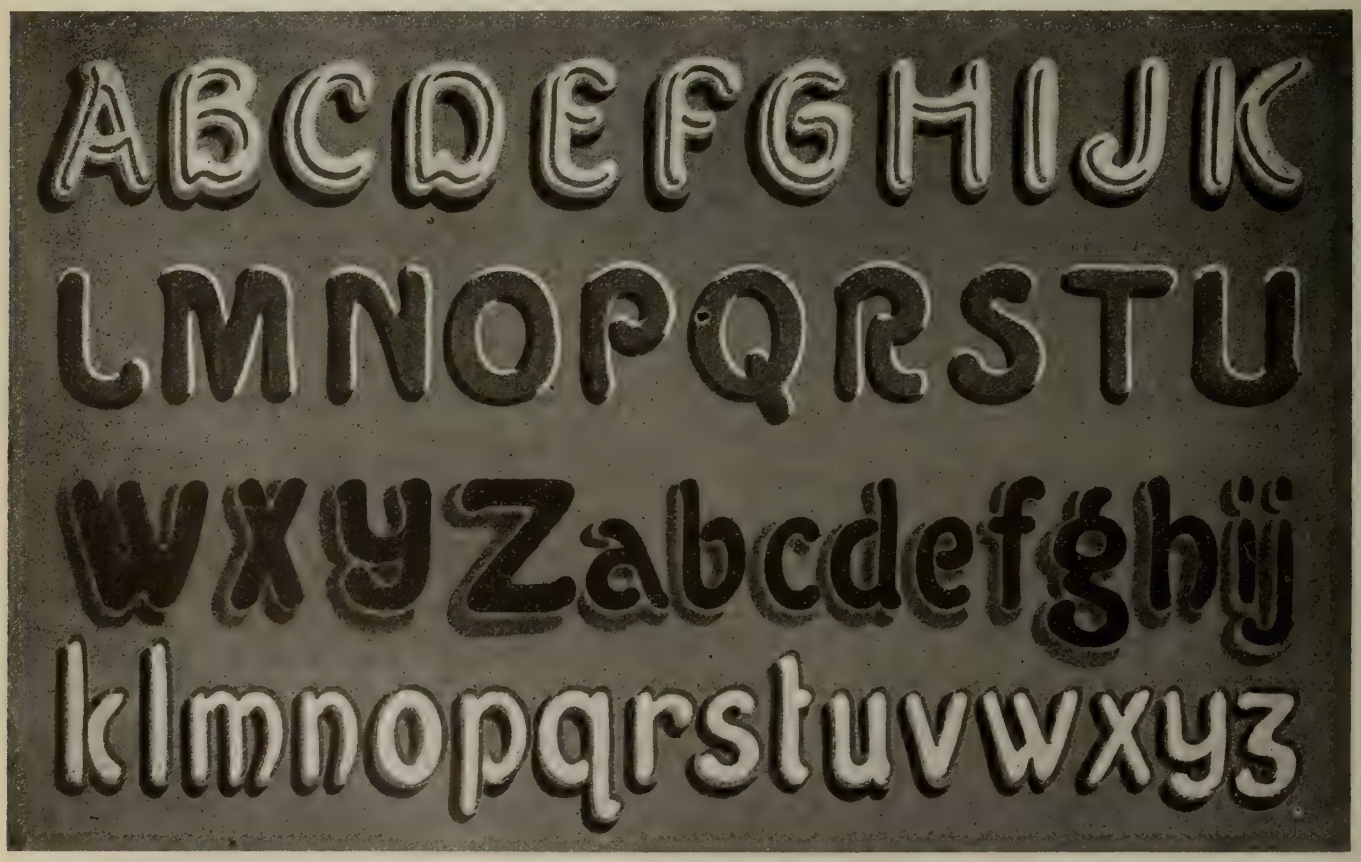
By Robt. T. W. Edwards

TO get away from the usual run of our show card lessons we are going to give in the next few lessons the ideas as worked out by other Toronto show card writers as well as our own. The actual work we will do but the layout and form of lettering will be gleaned from the work of Toronto's best cardwriters—men whose cards appear in the best stores.

If you are familiar with Toronto and have noticed the style of show card which has been prevalent up to a year ago and compare it with those which are being displayed at the present time, you will notice an almost complete change of layout, design and lettering. Never in the existence of this city has there been such a remarkable revolution of style as the last year brought forth. Apparently the reason for this is that new blood has come into the city and has brought with it fresh ideas—ideas which appealed to the local cardwriters for their originality and artistry. Not only did they appeal to the cardwriters, but to the many firms who buy show cards for their own use. The ideas of the local card writing world were diverted into a new channel, and no wonder, for this new style commended itself to both public and cardwriters—to the former on account of its artistic appearance, to the latter for its simplicity.

One of its most noticeable features is the absence of air brush work. Previous to this most cardwriters seemed to think the sign of the air brush had to appear on all cards of a fancy nature but this new style now prevalent has proven that with a good knowledge of handling colors one can get very satisfactory results without it.

Undoubtedly it is a good thing for the card writing profession that this has occurred as the public were becoming satiated with the sight of cards plastered with elaborate air brush designs. The idea, like many another, was overdone. Now it will be used sparingly by the best cardwriters and will therefore have a tendency to uplift the value of both air-brushed and hand-worked show cards.



At first glance this show card lesson may seem familiar to the student who has followed this series carefully but on a closer inspection the difference will at once become apparent.

In the first place there are fancy letters to be used in making up words which are to feature on the show card. These words must be used sparingly—say not more than two or three words to each card. The rest of the reading matter should be put on in a less conspicuous form. This will tend to make the entire card more readable and attractive than would be the case were all the words on it made of fancy colored type. Above all things don't overdo your work. Always leave a wide background on the cardboard as it is this which makes the letters stand out.

The main feature of this lesson is, of course, the lettering so we will turn our attention to studying its formation and color combination.

First let us look at the chart. Here we have an upper and lower case alphabet. This letter formation is a free and easy style and one that is not hard to learn. Practice is the main thing. The ends of the letters, as you will observe, are all finished round and are therefore easy to do. The letters are not of brush-stroke formation, as in many previous lessons, but can be made by either outlining the work with a small brush and filling in the centre or can be made with a wider brush which will make the width of any of the letters with two strokes and therefore avoid filling in. You can try both ways, the result will be the same.

You will notice that, while the alphabets are all the same formation each line

has been treated with different forms of shadings. This will give you some idea of where the shades are applied.

There is one thing which should be explained before going further and that is that the best results are obtained by using tinted or pastel shaded cardboard such as creams, pale gray, light browns, in fact all light shades of cardboard can be worked into attractive show cards providing the proper colors are used for the letter formation. The reason that the tinted board can be used with better effect is that white can be used as a letter or a "high light" thus giving you more scope for variety.

The first line of the alphabet shows a white letter with a black shade and a narrow brush-stroke of orange over the top of the letter. Other color combinations can be used. If your card is dark blue use a black shade with a pale blue

letter and a medium shade of blue for the over stripe. Dark cardboard is best for a white letter.

The second line shows the shading used in a different manner to the first. The body of the letter is dark red with a narrow white line on the high light side and a narrow black line on the shadow side of the letter. Here also can be used many different colors. You can make this an entire combination of blues. A royal blue letter with a pale blue high light and a dark blue shadow line on a cream colored surface makes an excellent card.

The third line is a solid black letter with a French gray shade. This is just to show what a solid black letter looks like. The kind of shade used to make any letter stand out entirely depends upon the color of the surface you are working on. For instance, don't use a gray shade over a cream cardboard. The pale shading colors must harmonize with the surface color of the card.

The last line of the chart shows a pale blue letter with a darker blue on the upper and right hand side and a black shadow. This will work up splendidly on a misty gray or cream colored card.

Do not use any but opaque colors for this work and those must be thoroughly mixed and inclined to be thick rather than otherwise. Transparent colors are absolutely worthless.

As stated before this is only one form of letter treated in this manner. Many other new forms will be gone into later.

Fig. No. 1 shows a dozen other varieties of letters from which whole alphabets can be worked up. These are just given to show what a variety of fancy letters can be made.

"P" shows a brown round-end letter with a darker brown outline, outside of which is an outline of white. Black and white shawod and high-light lines are on the face of the letter.

The E shows a white letter with a black shadow with a light green brush stroke line on the face of the letter. This letter can be worked out with different shades of blue.

"A" shows an excellent letter formation for this work. It is a light brown letter with a black shadow and a white high-light line.

"S" is a good letter to be used on a white card. Black for the letter with a high-light of cream. Use a pale cream shade.

"H" shows a very dainty form of lettering and one that can be used on a high class card with good effect. Many color schemes can be contrived with this letter. Try a green tone. Use a pale green letter shaded with a darker green. The letter is outlined in white.

"G" is a letter to match the "S" in formation. Various colors can be used here.

"R" shows another form of letter which is good for this work.

"T" is a thick and thin without any spurs.

"D" is a heavy spurred white letter with a dark outline and a pale blue brush line shade.

"K" makes another nice form. This is a heavy spurred letter of dark blue with black shade and a white line on the letter.

"W" shows another form of letter which has all the shading on the face of the letter.

"M" is of a fancy Roman formation.

The completed cards shown here are

FIG. 1.

only a few of the many designs that can be made by following the method just explained. They are made by using the same letter formation as illustrated in the chart. You will notice that the large exanse of background which is shown and which has the effect of giving greater prominence to the lettering.

WOOD FUEL TO RELIEVE COAL SHORTAGE

A vigorous campaign is being planned to encourage the eastern provinces of the Dominion to substitute wood instead of coal for fuel purposes. The Dominion Fuel Controller has repeatedly called attention to the urgent need for increasing the production of wood. Provincial governments are at work on the problem and will co-operate with the federal authorities in every way. City and municipal governments in some cases have taken steps to accumulate a reserve of wood fuel to supplement the dealers' stocks. From Winnipeg, the mayor reports the action of the city in making this purchase proved an important factor in averting a local fuel crisis.

Special organization is essential to stimulate production and consumption of wood fuel, to reduce the demand for coal. Farmers and rural communities generally, within easy reach of wood supplies, should make as general use of this fuel as possible. Now is the time for action to be taken. Steps under way in this direction will no doubt meet with the full support of the public.

EVENTS IN THE TRADE

BUSINESS CHANGES

Kincardine, Ont.—A. L. Shiells, hardware, has sold to Peter Shiells.

Roland, Man.—Geo. Ross, hardware, has been succeeded by Roland Hardware Co., Ltd.

Roland, Man.—Milton J. Horn, hardware, has been succeeded by Roland Hardware Co., Ltd.

Canora, Sask.—Sines & Johnson, hardware merchants, implement agents, etc., have dissolved partnership. Lewis Sines is continuing.

GEORGE HENDERSON

President, Brandram-Henderson, Ltd., Montreal, re-elected president of the Canadian Paint, Oil and Varnish Association.

INDUSTRIAL NOTES

Oshawa, Ont.,—Thornton Rubber Co., Ltd., has obtained provincial charter.

Halifax, N.S.—Hillis & Sons, Ltd., Hollis Street, plan to rebuild their foundry.

Hamilton, Ont.—Canada Steel Goods Co., Ltd., Arthur Street, will erect a $3,000 one-storey frame storage warehouse.

Whitby, Ont.—The United Rubber Manufacturing & Reclaiming Co., has purchased site for the erection of a plant here.

Tillsonburg, Ont.—The erection of a $35,000 extension to factory is contemplated by the Maple Leaf Harvest Tool Company.

False Creek, B.C.—Canadian Metals and Equipment Company have leased a site on Industrial Island for the construction of a plant.

Hamilton, Ont.—Canada Steel Goods Co., Ltd., Arthur Street, contemplate the erection of a $150,000 four-storey reinforced concrete factory.

Toronto, Ont.—International Malleable Iron Company, Ltd., has been authorized to increase the capital stock of the company from the sum of $250,000 to the sum of $500,000.

Toronto, Ont.—Canada Cycle and Motor Co., Ltd., has been authorized by supplementary letters patent to increase the capital stock of the company from the sum of $50,000 to the sum of $2,000,000.

Three Rivers, Que.—City Council have granted guarantee for $100,000 to the Page Wire Fence Co. of Canada, head office Walkerville, to locate their complete plant here. The company will spend $150,000.

OBITUARY

James Gow, sheet metal contractor of Toronto died recently in his sixty-second year. Deceased commenced business in New Westminster, B.C.

Thomas Stacey, for many years a leading hardware merchant of St. Thomas, Ont., died recently at the age of ninety-one years. Deceased was the oldest resident of the city. Major George Stacey, son of the deceased, who is now overseas, is a member of the firm of Stacey Bros. Cutlery Co., St. Thomas, Ont.

PERSONAL

Lieut. Frank P. Vokes, son of Miles Vokes of the Vokes Hardware, Toronto, and a director of the company, has been seriously wounded at the front.

H. E. Burt, founder of the Burt Hardware Company and a leading citizen of Woodstock, N.B., has been elected Mayor of the town by acclamation.

INCORPORATIONS

Bracebridge, Ont.—W. W. Kinsey Co., Ltd., has been incorporated with a capital of $40,000 to manufacture and sell hardware, roofing harness, automobiles, etc.

FIRE LOSS

Chatham, Ont.—D. H. Douglas, hardware, has suffered loss by fire.

Guelph, Ont.—G. A. Richardson, hardware, has suffered loss by fire.

North Bay, Ont.—Hardware store owned by William Munns, damaged by fire to the extent of $6,000.

Chatham, Ont.—Plant owned by the Pittsburg & Des Moines Steel Co., Inshes Avenue, damaged by fire to the extent of $10,000.

Guelph, Ont.—G. A. Richardson, hardware, suffered loss by smoke and water in recent fire, which destroyed G. B. Ryan store.

Chatham, Ont.—D. H. Douglas, hardware, suffered serious damage by fire. A stock of $15,000 was on hand, about half of which was covered by insurance.

WALTER B. RAMSAY

President A. Ramsay & Son Co., Montreal, re-elected vice-president of the Canadian Paint, Oil and Varnish Association.

NEW FIRMS

Melfort, Sask.—Messrs, Moser & Bishop who recently purchased the hardware business of G. B. Jameson, have commenced business. Mr. Bishop has represented the wholesale hardware firm of Merrick-Anderson of Winnipeg for some years. He will return to his duties on the road when businness connections have been completed.

OTTAWA STORE REORGANIZES

H. J. Daly, who for some years has been managing director of the National Cash Register Co. of Canada, has purchased the assets of the A. E. Rea Co. of Ottawa including stock, fixtures and building. The new firm will be known as

the H. J. Daly Co., Limited, with H. J. Daly as president, W. P. Grant, store manager, J. Gulbranson, superintendent, G. L. Johnson, merchandise manager, and B. L. Cook, treasurer.

The store is being reorganized from the bottom up and some new and radical methods will be adopted. For instance the office of the store manager will be right at the front entrance, and will have no door on it. A sign will invite customers to enter with complaints or suggestions.

The new firm will be particularly strong financially and will pay spot cash for all purchases.

Mr. Daly is enthusiastic over the prospects of the new venture and the trade will watch with interest the advanced methods that will be employed.

H. J. DALY.

—Courtesy International Press Service.

MONTREAL NEWS ITEMS

G. W. Carter of the Eagle Lock Co., Terryville, Conn. has been in Montreal in the interests of his firm.

W. B. Stewart, representing the firm of W. B. Stewart and Son Cotton Co. of Toronto, was a visitor to Montreal this week.

Isaac Lobsitz, representative for the Lalance and Grospean Manufacturing Co., of Syracuse, New York, is calling on the Montreal jobbing trade.

Royal Cluxton of the Canada Paint Co. Montreal, spent a few days last week in Toronto, where he was in attendance at the conference of the paint men.

H. R. Picketts, of Picketts & Shurman, hardware and accessory dealers, of Radville, Sask., was a caller at the Montreal office of HARDWARE AND METAL on Wednesday. Mr. Picketts is very enthusiastic regarding present conditions in the West.

Jas. Reid, of the purchasing department of Caverhill, Learmont and Co., is confined to his home with a rather severe illness. Mr. Reid is able, however, to sit up at this writing but it is expected that it will be some weeks before he will be able to resume his duties.

J. S. Bowbanks, representing the Starr Manufacturing Co. of Dartmouth, N.S., has been calling on the Montreal Jobbing trade this week.

Among those attending the recent conference of paint manufacturers in Toronto were George Henderson, president of the Brandram-Henderson Company and W. F. McLennan of the same firm.

W. A. C. Hamilton, secretary-treasurer of the Consumers' Cordage Co. has returned to the Montreal office after spending a month in visiting Western Canadian points. At Winnipeg and as far through as the Coast, Mr. Hamilton found conditions as relating to business, very good. There is an indication to be more careful as to buying, Mr. Hamilton stated to a representative of HARDWARE AND METAL, but that needs were being selected carefully, as required. Particularly at the Coast, there is an air of activity as to the immediate future development of the shipping industry.

ST. JOHN, N.B., NEWS

Senator Thorne, head of W. H. Thorne & Co., Ltd., has offered a handsome silver trophy for competition between the various boy scout patrols of St. John.

Philip Granan's hardware and stove store, Main street, St. John, was damaged by fire this week, his loss of $5,000 on the building and $3,500 on the stock being covered by insurance.

A. O. Skinner, president of the St. John branch of the Retail Merchants' Association, has tendered his resignation, which, however, has not yet been accepted by the executive.

The congregation of St. David's Presbyterian Church, St. John, has decided to proceed with the erection of a new church to replace that destroyed by fire, at an estimated cost of $110,000 to $120,000.

It is reported from New Glasgow that the Nova Scotia Steel Company is about to purchase the property of the Eastern Steel Company, which adjoins the New Glasgow plant and that a large plate mill will be erected on the site so acquired.

Commercial men of New Brunswick and Nova Scotia are protesting against the cancellation of the night trains between St. John and Halifax and are urging that at least on Friday nights the trains should be run to enable them to reach their homes for the week-end.

Officers for the coming year have been elected by the St. Stephen's branch of the Retail Merchants' Association as follows: president, S. De Wolfe; vice-president, Parker Grimmer; second vice-president, Fred Sears; treasurer, Chester Gregory; secretary, H. E. Beck; additional members of executive, R. D. Ross, W. A. Mills and Alex. Boyd.

The R. H. Howes Construction Company of Boston and New York have established a shipyard at Meteghan, N.S. The shipyards owned by the estate of James Cosman have been taken over, mills erected and equipped with modern machinery and 500 acres of timber lands purchased. The keel for one vessel has been laid and as soon as spring weather permits keels will be laid for three more and the work on all of them will be carried along simultaneously.

The staff of the T. McAvity & Sons, Ltd.., King street stores, St. John, enjoyed a sleighing party last Saturday evening. After a drive out of the city they returned and found a substantial supper awaiting them. Following the supper, with W. G. Stratton acting as toast master, a list of toasts was honored, those speaking to the toasts including Miss Eva Mitchell, Miss A. Storm, P. J. Legge, W. S. Clark and J. J. Lelacheur. A musical programme was given by Miss Mitchell, Miss Morrison, Mr. Irvine and the Y.M.C.A. orchestra.

NEW COMPANY FORMED

Alfred C. Gilbert, of the A. C. Gilbert Co., New Haven, Conn., and Thomas E. Menzies, of Menzies & Co., Toronto, Can.,

T. E. MENZIES and *A. C. GILBERT*

President and Vice-President respectively of the A. C. Gilbert-Menzies Co., Toronto.

have obtained a charter for a company to be called the A. C. Gilbert-Menzies Co., Ltd., which will be located in Toronto. This company will manufacture many lines of toys in addition to handling electric fans and other specialties.

Thomas E. Menzies is to be president and Alfred C. Gilbert vice-president of the new company.

Correction

In listing the travellers who will represent Whites Limited of Collingwood, Ont., in last week's issue, the names of W. A. Thurston and W. M. Smith were inserted in place of W. A. Fetherston and W. S. Smith.

HARDWARE LETTER BOX

MAKER OF LINOFELT

Ingram & McMaster, Bloor St., Toronto.—Kindly advise name of maker of Linofelt.

Linofelt is made by the Union Fibre Co., Winona, Minn.—Ed.

LUNCHEON AND THEATRE PARTY FOR HARDWAREMEN

In addition to the program which appears on this page, and which was described in detail in last week's issue, a luncheon will be tendered convention delegates by Wood, Alexander & James. The luncheon will be held on opening day, Tuesday, Feb. 19, from 5.30 to 8 p.m. Following the luncheon a theatre partly will be held, at which the delegates will be the guests of Hamilton manufacturers. All convention plans are now complete and it is hoped there will be a large attendance of retailers.

CATALOGUES and BOOKLETS

History of Door Knockers

The Art Brass Company, Inc., 299 East 134th St., New York, have just issued a very attractive little booklet entitled "A History of Door Knockers." In the booklet, many designs sold by this company are illustrated and the origin of the patterns outlined. Copies will be sent to dealers on request.

The Tools Mechanics Buy

The L. S. Starrett Company of Athol., Mass., have just issued an attractive little booklet entitled "The Tools Mechanics Buy." In it many of the products manufactured by this company are listed, with details as to their use and points which can be brought out in making sales. Distribution of the book among hardware stores and clerks is aimed at and copies may be obtained without charge by writing to the company.

Sharples Calendar

The Sharples Separator Co. are distributing their 1918 dealer calendar. This shows a young girl standing at a table drinking milk. The calendar is 40 inches high, finished in attractive colors. These can be secured by writing to the Toronto office.

Soren Bros.' Catalogue

Soren Bros, tinware manufacturers, Toronto, have issued an attractive 1918 calendar. The subject on the calendar represents "The Opera Singer."

Business Calendar

Dowswell, Lees & Co., Ltd., Hamilton, Ont. (formerly Cummer, Dowswell, Ltd.), have issued a business calendar for the 12 months, beginning February, 1918. In addition to the usual features this calendar gives a number of important historic and patriotic days, birthstones for each month, the complete calendar for 1917 and 1919, and some outstanding events in Canadian history.

CONVENTION PROGRAMME

THE ONTARIO RETAIL HARDWARE AND STOVE DEALERS' ASSOCIATION

ROYAL CONNAUGHT HOTEL, HAMILTON FEBRUARY 19-21, 1918

TUESDAY, FEBRUARY 19

10.30 a.m.—Meeting of Executive, appointment of Convention committees.
Reports of Officers for approval by Executive.
2.00 p.m.—Open Session.
Reception by Mayor and Trade Association representatives.
3.00 p.m.—Business Session for members.
President's Address.
Secretary's Report.
Treasurer's Report.
Reports of Executive and Advisory Committees.
New Business.
Evening—Open for entertainment.

WEDNESDAY, FEBRUARY 20

9.30 a.m.—10-minute addresses on "Outlook for 1918," by following speakers:
"The Linseed Oil and White Lead Situation," by H. M. Ashby, Managing Director Sherwin, Williams Co., Montreal.
"A Forecast on Sheet Metals," by A. T. Enlow, President Dominion Sheet Metal Co., Hamilton.
"Saws and Tool Situation," by H. P. Hubbard, General Manager E. C. Atkins & Co., Hamilton.
"Shovel Situation, Present and Future, As We See It," by W. E. Skelton, Superintendent Canadian Shovel & Tool Co., Hamilton.
"Hinges and Wrought Hardware," by A. F. Hatch, Manager Canada Steel Goods Co., Hamilton.
"Ready Mixed Paint Outlook," by F. J. Penberthy, Manager Lowe Bros., Ltd., Toronto.
"The Metal Market," by W. G. Harris, Sr., President Canada Metal Co., Ltd., Toronto.
"Outlook From the Wholesaler's Standpoint," by T. B. Williamson, H. S. Howland Sons & Co., Toronto.
Queries from members and consideration of forecasts.

WEDNESDAY AFTERNOON

1.30 p.m.—Address by John C. Kirkwood, Business Counsel. Mr. Kirkwood's address will cover the following subjects: Ascertaining and Recovering the Costs of Doing Business; Making a Net Profit of Thousands Per Year; A Salary for the Boss; Selling Enough, or the Matter of Turnover; Making the Man Behind the Counter a Better Salesman.
3.30 p.m.—Address on "Advertising," by A. A. Briggs, Advertising Manager Dunlop Tire & Rubber Goods Co., Toronto.
Queries and discussion on above subjects by members.
Question box.

WEDNESDAY EVENING

Closed meeting for members.
"Department Store and Mail Order House Methods," by Geo. D. Davis, Manager HARDWARE AND METAL.
Question Box Session.

THURSDAY MORNING

Closed Session.
9.30-10.30—Election of Officers and General Business.
10.30—Address on "Salesmanship," by Geo. A. Simpson, Sales Manager Steel Company of Canada, Hamilton.
"Mock Sales."
"Demonstration of Actual Salesmanship."

THURSDAY AFTERNOON

New Lines for the Hardware Store.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

CYCLONE WINDMILL PUMP

The Cyclone Windmill Pump is a new toy just being brought out by the Wolverine Supply and Manufacturing Co. of Pittsburg, Pa.

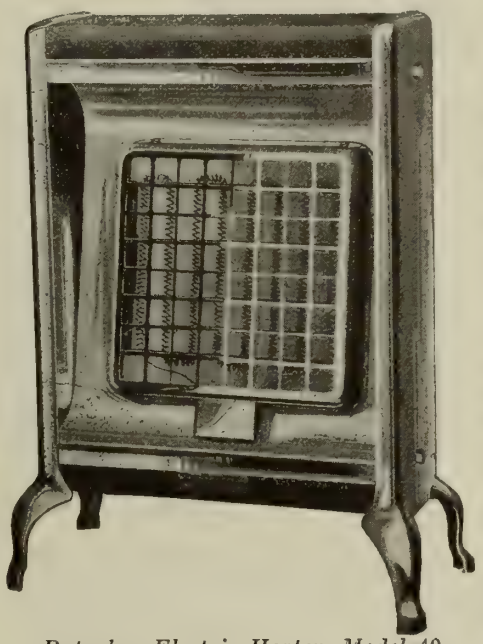
It imitates the windmills that boys and girls see in the country.

To operate it, the following directions are given: pour into the hopper the can of white clean sand, which goes with each toy, and set the can back under the pump spout. Then set the toy in the wind, or if the wind is not blowing, work the pump handle by hand and immediately it is stated the white sand begins to flow from the pump spout, just like water flows from a real pump.

It is claimed one can also make the mill run by blowing against the fan

Cyclone Windmill Pump.

blades, or again the same effect is had by setting the toy in the breeze of an electric fan.



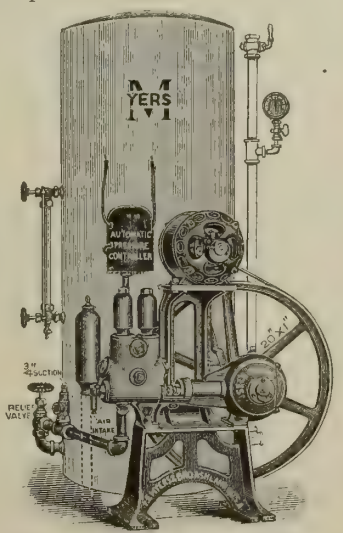
It is stated that some of the boys who have electric motors or toy engines, can run the windmill like any other of their toy machines, simply by connecting the pulleys by a belt made of ordinary soft white wrapping string.

The containing carton serves the purpose of a sand tray. Metal binding strips to stiffen the edges accompany each toy; also a sand scoop as well as full and illustrated instructions for setting up and operating.

RUTENBER ELECTRIC RADIATOR

The Rutenber Electric Heater, Model 40, is manufactured by the Rutenber Electric Co. of Marion, Ind. This is what is known as the reflector type, being so designed that the greater part of the heat is thrown out from the side, which it is claimed, makes it very comfortable to use in any small room.

It is stated that special care is taken in finishing nickel-plated ends and reflectors being used, with black-baked



Rutenber Electric Heater, Model 40

enamel body. The element glows at a bright red, making a very intense heat. Eight feet of heater cord with attachment plug complete is furnished. The dimensions are, length 12½ in.; width, 6 in.; height, 16 in.

MYERS ELECTRIC HOUSE PUMP

P. E. Myers and Bro., Ashland, Ohio, have recently introduced the Myers self-oiling electric house pump, which is designed for use with open or pressure tanks, for shallow wells or cisterns, is motor driven and has a capacity of 180 gallons per hour.

Myers Electric House Pump.

It is claimed that the Myers electric house pump can be operated by any electric current and from the farm lighting and power systems now on the market. The motor equipment is 1-6 h.p. Operation is automatically controlled by the use of the automatic pressure controller. This appeals to users generally as it saves electricity, wear and tear on the pump itself, and saves time and labor in starting and stopping when water or pressure becomes low.

All working parts are automatically lubricated by oil splash from the crank case except the idler pulley which has a self-lubricating bushing—this eliminates frequent usage of a dirty oil can.

Points enumerated by the manufacturers as of interest to the trade are brought out in the following:

The base is a one piece iron pedestal with machined pads for pump and motor making a mounting for the entire equipment and insuring perfect belt alignment.

The valves are rubber on brass seats of the grid pattern and are held in position by brass studs fitted with springs for quick closing. Each valve is located in its own valve box and may be reached by removing the cap immediately over it without disturbing any other connections or fittings.

Air chambers are placed over the discharge valves and eliminate water hammer, a combined vacuum chamber and priming reservoir steadies the flow of water and insures priming. A relief valve is provided to protect the pump and motor from excessive pressure.

The power end of the pump has a ⅞ inch diameter pulley shaft which runs in long, easily renewable bearings located on opposite sides of the eccentric which operates the connecting rod. The connecting rod is bronze and adjustable for wear. The crosshead is also bronze and runs in a bored guide.

PARKER SHEET METAL SCREWS AND DAMPER QUADRANTS

The Parker Supply Co., 784 East 136 St., New York, N.Y., are placing on the market the Parker Sheet Metal Screws and Parker Damper Quadrants.

It is claimed the Parker sheet metal screws do away with bolting, rivetting, etc., and their use results in a saving of 75 per cent. in cost and labor.

The Parker damper quadrant is used for damper regulation in hot and cold air ducts and the results obtained by users, the makers state, justify their assertion that it is the best in the world.

THE CLERKS DEPARTMENT

"BINGO BYNG" BELIEVER IN BUSINESS EFFICIENCY

Character, Training and Career of General the Hon. Sir Julian Hedworth George Byng, Whom Canadian Soldiers Delight to Honor

EFFICIENCY, brilliant business-like efficiency in warfare has brought General the Honorable Sir Julian Hedworth George Byng, K.C.B., K.C.M.G., to the forefront in his calling. He had been called the "Apostle of Efficiency." He had been endowed with the title of "Bingo Byng" by the Canadian troops whom he led, drilled, and disciplined into first class fighting men for more than a year before the famous battle of Cambrai. The boys rejoiced in him though he did insist on their polishing their buttons back and front, and keeping the very nails on their boots free from rust. And when it came to the big British drive at Cambrai they gloried in upbuilding the glory of General Byng. His heroic treatment of them in training brought out the best in them —best behind gun and bayonet—and made him their hero first, and afterwards Britain's. That's Byng.

In this war General Byng has had a notable record of success. After being with the early British Expeditionary Force in the battle that began before Antwerp, he was placed in command of the Third Cavalry Division that made the stand before Ypres, protected the Belgian withdrawal, and thrust back the Germans for the first time in what was to have been their "march to the sea." In the official reports at that time General Sir John French stated that the troops under General Byng "were repeatedly called upon to restore situations at critical points and fill gaps in the line caused by the tremendous losses which occurred." In recognition of his work at that time, which had been highly praised by the Commander-in-Chief, General Byng was made a Knight Commander of St. Michael and St. George.

On Somme and at Vimy

It was under General Byng that the Canadians performed their great part in the battle of the Somme, and effected the brilliant capture of Vimy Ridge last April.

"Byng was in charge at Vimy Ridge," said a British officer "and he certainly ran that show well!"

General Byng quickly discovered the Canadian army qualities of courage and initiative, but realized that these qualities, to have military value, must be coordinated by strict discipline. To-day, having learned their lesson from experience, that most terrible of all teachers, the Canadians welcome the sternest discipline; and since they combine with this the will to use the bayonet they are now among the most effective troops in Europe. Byng trained the Canadians. And look at those Canadians! There's nothing to beat them.

At Suvla Bay Landing

General Byng succeeded General Stopford in command of the Ninth Army Corps at Suvla Bay in 1915, and took part in the later stages of the Gallipoli campaign. It was in May of 1916 that he was placed in command of the Canadian troops with whom he has always been popular.

From the first he recognized their high fighting worth. He knew that with the right training they could beat the Kaiser's best.

Under his discipline, as distinguished from the kind of training that the laymen might possibly call more "practical," the men parade and parade and parade and "form fours." They learn to respond automatically to directions, to obey orders unfailingly even in the midst of unspeakable confusion and horror, to be perfect in their mastery of detail.

"A man isn't prepared for a battle when he is taught things that depend on his thinking," a British officer said. "In battle the soldier can't think. He must be able to do the right thing without thinking."

That is the reason for the discipline that men like Byng stand for, as opposed to the other type of training, and Byng wins battles.

Byng's Birth and Training

General Byng is fifty-five years old. His wife, who was Miss Marie Evelyn Moreton before her marriage in 1902, is well known in England as a novelist. His grandfather, the first Earl of Trafford, was a noted English Field-Marshall. He is the seventh son of the Earl of Strafford.

As a young man he entered the Army with a commission in the 10th Hussars, and with that regiment he served in the Sudan campaign in 1884 and won distinction in the South-African war, where he was promoted to be colonel of his regiment. In 1902-4 he commanded the regiment. After that he became head of the Cavalry School at Netheravon, Salisbury Plain. He was made a major-general in 1900, and since 1914 he has been a divisional commander.

Hard School of Discipline

It was at Netheravon that he began to be most definitely recognized as one of the "new men," the type of the "new tradition" that the South-African war brought to the British Army. Before that time, as an English student of his country's affairs pointed out when talking of General Byng, the tradition of the British Army centered in India, and Rudyard Kipling was its poet laureate. Since the beginning of the present century the tradition of the British Army has found its center and its expression in Aldershot, the place where men are trained. Sir Douglas Haig and the other "new men" are men of that tradition. It is a tradition of rigid—and to the outsider inexplicable—discipline.

If you need any argument for the excellence of the kind of discipline and training obtained at Aldershot and Netheravon, which made the little British Army absolutely second to none in efficiency, you can find it in the mere fact that when the new armies were trained in the widst of this war they were trained in just that same way.

The Third Army and Cambrai

Last June, when General Sir Henry Edmund Allenby was sent to Egypt, General Byng succeeded him in command of the British Third Army.

"He has never been a gallery player at all," an officer said of him, "yet with his Third Army he has led one of the midst of this war they were trained in war."

General Byng is the second British commander thus to be mentioned in the official report from the Field-Marshal's headquarters. The first general thus honored was Sir Herbert Charles Onslow Plumer, to whom, by name, Sir Douglas Haig gave first credit for the Messines Ridge advance in June.

It was erplained that the reason General Plumer was especially mentioned in the report was that he had himself originated and perfected the plan and preparation of the attack. It is a not unnatural inference that the idea of the tank onslaught, and the marvelous secrecy that preceded the sudden action, may be due to General Byng himself.

CONSIDER ELECTRIC HEATING

The Ottawa Hydro-Electric Commission is giving some study to the question of electric heating, in connection with the fuel problem. It is recognized that the stage has not yet been reached in electrical development where the general us of electric current for heating is practicable, but the commission is considering the possibility of electric heating as an adjunct to coal.

It is suggested that the fuel situation could be considerably relieved by the use of electric heating for some weeks in the spring and fall, when the weather is mild.

The commission is going into the question of the possibility of selling electric current for this purpose at a rate that would make such heating not too expensive. — from the Ottawa *Journal-Press.*

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

OF more than passing interest in the hardware markets this week was the decline in the price of wire nails and wire. Such a turn in the market came as somewhat of a surprise in some quarters. Reason for the decline is due to the accumulation of heavy stocks of wire rods at seaboard shipping points for which transport space could not be secured. These stocks were thrown on the market and prices went down accordingly. Manufacturers of nails were able to place their order for rods at a price that would permit of a reduction in nails and wire. Since these stocks of wire rods have been disposed of there has been a firmer trend to the market and advances of $5 per ton in the basic materials for nails and wire have been recorded.

One of the most drastic changes to be recorded during the week was that on paint products. In addition to advances in prices of all paints and varnishes it has been decided to eliminate certain sizes and to cut down the range of colors now being manufactured by Canadian paint manufacturers. Differentials on paint and varnish cans have also been altered.

Advances have again been numerous and include price change in the upward direction on tool boxes, snubbers, wooden taps, jelly glasses, chamois skins, heater wicks, rifles, shotguns, skates, electric irons, toasters, post hole augers, grain cleaners, drag scrapers, vises and anvils, barrel churns, batteries and flashlights, Paris plaster, fuel oil, oil heaters, handles, grindstones, shears, clothes line reels, barn door hangers, saws, scythe stones, seine twine.

Business is reported seasonably good. Transportation difficulties have greatly hampered business, both in the shipment of goods to customers and in the movements of travelers for wholesale houses.

MONTREAL MARKETS

MONTREAL, Jan. 31.—There have been a number of minor changes for the week, none of which are very great. Cut nails have been reduced 15c per keg to $5.60 base. All kinds of axe handles are subject to a revised discount of 35 per cent., the former being 40 per cent. Barrel churn discount has been reduced from 22½ per cent. to 17½ per cent. A few lines of wheelbarrows have been increased, as shown in current quotations. Plain grindstones are up 30c to 40c per 100 lbs. P. S. & W. tinners' shears are quoted higher. Some of the Taylor-Forbes lines have been advanced from 10 to 20 per cent., these being for such lines as clothes line reels, sad irons, saw vises, barn door hangers, and bench screws. Simonds' saws, both crosscut and circular, are higher. Scythe stonts, garden cultivators and seine twines are all higher. The state of trade is quite satisfactory, notwithstanding the severity of the weather and the congestion of traffic.

Railroad Milk Cans And Cream Cans Are Higher

Montreal.

MILK AND CREAM CANS.—The heavy railroad milk cans and cream cans sold through the trade recorded new advances this week. The former have been selling on an advance of 10 per cent. over list, and this has been increased to 20 per cent. over list. The cream cans, selling heretofore on an advance over list of 20 per cent., are selling now at a 25 per cent. advance on list.

New Prices Are Set For Wax Products

Montreal.

WAX PRODUCTS.—An advance of 1c per pound all around has been made in the prices of manufactured wax products. This is effective at once and covers the 20, 40 and 100-pound cases, and is also applicable to parowax. The new prices will run from 13½c per pound to 14c, according to the sized quantity bought and the nature of same.

Good Supplies Of Coal Oil And Gasoline

Montreal.

GASOLINE AND COAL OIL.—There is one consoling fact amid the great number of shortages that are now prevalent here and there, and that is the report of ample stocks of coal oil and gasoline. These are moving very freely for this rather dull season of the year, and the prices are held without change. Coal oil is quoted at 17c for Royalite and 20c per gallon for Palacine and Electroline. Gasoline is 32½c.

Tinners' Shears, Clothes Line Reels Higher

Montreal.

CLOTHES LINE REELS, SHEARS.—Among the lines recording advances this week are shears of the Peck, Stow and Wilcox line. The advance is stated to be about 10 per cent., which makes the price of the No. 7 $3.60 each; No. 8, $2.90, and No. 9, $2.50. Advances of from 10 to 20 per cent. have been made in certain lines of Taylor-Forbes goods, such as barn door hangers, clothes line reels, saw vises, bench screws, and sad irons, there being no definite percentage advance applied to the lines mentioned.

Barrel Churns Are Up; Plain Grindstones Higher

Montreal.

GRINDSTONES, CHURNS.—Two advances of interest are made this week, one of considerable proportions in unmounted grindstones. These sold formerly at from $1.60 to $2.20 per 100 lbs., and have now been advanced to $2 to $2.50, according to the weight per 100 lbs. Barrel churns have also been marked higher. The previous discount of 22½ per cent. has been reduced to 17½ per cent.

Wheelbarrows And Axe Handles Are Marked Up

Montreal.

WHEELBARROWS, AXE HANDLES.—An advance has just been recorded in the prices of certain lines of wheelbarrows. The light garden are now jobbing at $53.50 per doz., the No. 3 garden at $75 per doz., and the navvy at $51.50 per doz. It appears that these are pretty hard to obtain at all, even at increased costs. Axe handles of all kinds have been advanced also, the former discount of 40 per cent. now being 35 per cent.

Cross-Cut Saws And Scythe Stones Higher

Montreal.

CROSSCUT SAWS AND SCYTHE STONES.—Advances have been made in two important lines sold through the trade. Simonds crosscut saws and circular saws have been marked up approximately 10 per cent. Canadian makes of scythe stones have advanced nearly 25 per cent., and this is attributed to the scarcity of labor and the costs of boxing, etc.

Seine Twine Marked Up; Also Garden Cultivators

Montreal.

SEINE TWINE, CULTIVATORS.—An advance in the price of seine twine has been made, this being 4c per pound over the previous list and making the price 60c per pound basis. Increasing costs have made this imperative, it appears. Hand garden cultivators have also recorded an advance of 10 per cent., and this will apply to several of the styles sold by the jobbers.

Tendency For Sheets Is Quiet And Easier

Montreal.

SHEETS AND PLATES.—There has been little interest this week in the situation regarding plates and sheets. Trading has been fair and the tone somewhat easy, although prices have been unchanged, except that one firm has made a lower quotation for the 10-gauge black, and this is given at $8, a decline over the lowest quotation of last week of $1.50 per 100 lbs. Other gauges and sizes in both galvanized and black are held unchanged.

MONTREAL—

BLACK SHEETS—		100 lbs.
10 gauge	$8 00	$12 50
12 gauge	8 65	11.50-11.60
14 gauge	8 80	8.85- 8.55
16 gauge	9 00	8.65- 8.65
18-20 gauge	9 25	8.75
22-24 gauge	9 40	8.90
26 gauge	9 45	8.95
28 gauge	....	9.05
10¾ oz. (28 English)	10 55	10.75

GALVANIZED SHEETS—	
10¾ oz.	$10 00
28 ga.	9 65
26 ga.	9 25
22 and 24 ga.	9 05-10 45
20 ga.	10 30
18 ga.	8 85
16 ga.	8 70

Bar Iron And Steel Are Held Unchanged

Montreal.

IRON AND STEEL.—There is just a fair amount of business passing for the iron and steel products, some lines being more in evidence than others. No changes are made for the week. Some difficulty is experienced in sending forward shipments to outside points, although complaints are very few. Prices are as follows:

MONTREAL—

Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	11 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0.17½-0 19
Black Diamond tool steel, per lb.	0 18-0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 20-0 21

Fashioned Lead Lines Are Held Unchanged

Montreal.

LEAD PRODUCTS.—A routine business is being done in the various manufactured lines of lead, such as traps and bends, sheets, etc. No changes have been made for the week, and prices are held as follows in a somewhat uninteresting market.

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....
Lead traps and bends	Net list	
Lead wool, lb.		0 14
Lead sheets, 3 to 3½ lbs. sq. ft., lb.	0 12½	0 13
Lead sheets, 4 to 8 lbs. sq. ft.	0 11½	0 12½

Cut sheets, ¾c lb. extra, and cut sheets to size, 1c lb. extra.

Solder, strictly, lb.	0 47	....
Solder, commercial, lb.	0 45	....
Solder, wiping, lb.	0 42	....
Zinc sheets, casks	0 26	0 30
Do., broken lots	0 28	0 32

Very Firm Tone To Old Materials

Montreal.

OLD MATERIALS.—While there are no changes in the quotations this week for old materials the market is characterized by much firmness. It is quite difficult to move stock, but there is a fair demand from the local users of the various commodities. As soon as weather conditions permit the movement it is anticipated that there will be much more interest to this line. Prices are as follows:

MONTREAL—

Tea lead	$ 0 05	....
Heavy lead pipe	0 06¼	0 06½
Yellow brass	0 13½	0 14
Red brass	0 20	0 21½
Light brass	0 08	....
Scrap zinc	0 05½	....
Heavy copper	0 22	0 23
Wrought iron, No. 1, per gr. ton	25 00	....
No. 1 machinery scrap	27 00	....
Heavy melting steel	18 00	20 00
Pipe scrap	15 00	17 00
Stove plate, per ton	17 00	19 00
Old rubbers, boots and shoes.	0 08	0 08½
Overshoes, lumbermen's rubbers boots	0 07	....
Bicycle tires	0 03½	....
Auto tires	0 04½	0 05½
No. 2 busheling	....	13 00

Spring Orders For Stoves And Enameled Ware Good

Montreal.

STOVES AND ENAMELED WARE.—There is no special activity at the moment in stoves. Manufacturers are very well pleased with the outlook, however, and are prepared to book orders for next fall, subject to delivery as late as August at present prices. This will apply to the usual lines, such as stove pipes, coal hods, stove boards and shovels, stoves and other lines. In the meantime the outlook for spring is good and orders are coming forward in a satisfactory manner. The amount of business coming in from the West, reports one manufacturer, is large. Some difficulties confront them in the procuring of raw supplies, the shortage of coal and coke being partly responsible.

Cut Nails $5.60 Base; Wire Prices May Change

Montreal.

WIRE AND NAILS.—There has been a decline of 15c per keg in the price of cut nails, which are now reduced to $5.60 base. Wire nails are still holding at $5.50, although there may be a revision of this base price in the downward direction in the near future. Bookings are coming along fairly well, jobbers state, and they are well satisfied with the outlook. Standard smooth steel wire is selling for $6.50 base, but indications point to a downward revision.

Advances Are Expected In The Prices Of Rope

Montreal.

ROPE AND CORDAGE.—A decidedly firm tone characterizes the rope situation, which however holds without change. Various sources state that a change is due and may come at any time, for with the constantly increasing price of hemp manufacturers are confronted with the possibility of having to ask higher prices, they say. Many of the United States makers, stated a large manufacturer to HARDWARE AND METAL, are not taking on any business, at least they are not seeking any. The situation is somewhat unsettled in view of the suggestion that the United States Government will take over the Manila hemp supplies. The opening of navigation will see a great stimulus to the trade, but in the meantime some business is being done.

Lead Is Steady And Firm; Spelter Stocks Lighter

Montreal.

INGOT METALS.—There is very little of change in the ingot metal markets for the week. Sales are light and stocks of some lines small.

PIG LEAD.—This is held firmly here, and the amount of trading is small. The supply in New York markets is limited, while the East St. Louis market is very firm, with a strong undertone. The local price ranges from 9½c to 10c per lb.

COPPER.—The price of 33c to 34c is still held and trading is not very heavy, although a few lots are moving. Some supplies are looked for locally as soon as the congestion is eased.

TIN.—Prices are held and the condition of trade is reported as quiet. Stocks in the hands of importers are light. The price of 79c to 82c is still ruling.

SPELTER.—There is a scarcity of spelter here, it is stated. with just a fair demand. The price is 10½c to 11c.

ANTIMONY.—An easier condition is noted at outside points, but locally there is no change. Little demand obtains. Quotations are based at 18c.

ALUMINUM.—The volume of trade is within small compass and the price ranges from 58c to 60c per lb.

TORONTO MARKETS

TORONTO, Jan. 31.—Wholesalers experience considerable difficulty in getting goods distributed to their customers owing to the transportation difficulties. One of the changes of more than passing interest was the decline in the price of wire nails and wire. For the most part price changes have been in the upward direction and include higher prices on electric sad irons, toasters, grain cleaners, drag scrapers, anvils and vises, solder, barrel churns, tool boxes, snubbers, wooden taps, jelly glasses, chamois skins, heater wicks, rifles and shotguns, skates. Business is reported fairly good for this season of the year. Some retailers have asked for shipment of goods in order to take advantage of situation before the increase in freight rates.

Tool Boxes And Snubbers Go Higher

Toronto.

TOOL BOXES, SNUBBERS.—An advance of 40c has been made effective in the price of tool boxes for Ford and Chevrolet cars, the new price being $3.35 each. Gabriel snubbers have been advanced to a substantial degree. Type that formerly sold for $23.50 per set of four are now quoted at $25.20. Type formerly sold at $31.50 per set now quoted at $33.60; type formerly quoted at $37.50 are now quoted at $42. Special snubber for Ford car is quoted at $21 per set list. Discounts on tool boxes: Less than 6, 25 per cent.; 6 to 23, 30 per cent., 24 and over 35 per cent. Discounts on snubbers: Less than 6 sets, 25 per cent.; 6 sets and over, 30 per cent.

Wooden Taps And Jelly Glasses Make Advance

Toronto.

TAPS, JELLY GLASSES.—An advance was registered in the price of Redlich wooden taps, the increase amounting from 10 to 25 per cent. No. 2 is now quoted at $1 dozen, No. 3 at $1.40 dozen and No. 4 at $1.70 dozen. Tin top jelly glasses have been advanced 20 per cent. 6-oz. size is now quoted at $6.50 per gross and 8-oz. size at $7 per gross.

Chamois Skins Advance; Heater Wicks Higher

Toronto.

CHAMOIS SKINS, HEATER WICKS.—Higher prices on chamois skins have been announced by some dealers. Where formerly discount was 7½ per cent. off list they are now sold net list. Export of these skins has been prohibited by England, while French chamois skins have been off the market for some time. United States sources are now depended upon for Canadian supply. Price of Perfection coal oil heater wick has been advanced 10 per cent. No. 3 size is now quoted at $2.45 per dozen. On account of scarcity of coal there has been a heavy demand for these wicks, as the oil heater has been requisitioned more than ever before. Regular lampwick also shows a higher price. No. O is quoted at 72c per roll of 32 yards, No. A at 90c per roll, No. B $1.35 roll and No. D at $2.10 per roll.

THE NEW MESSENGER BOY

—New York *World*.

Rifles, Shotguns And Skates Higher

Toronto.

RIFLES, SHOTGUNS, SKATES.—Higher prices have been made effective on Remington repeating rifles and shotguns to the extent of 7½ per cent., 22 calibre repeating rifle is now quoted $20.35, while 25, 30, 32 and 35 calibre are quoted at $34.50. No. 6 single barrel shotguns are quoted at $8.50 each. Shotgun No. 10A, 12 gauge, is quoted at $44.10 each. Booking prices on Dunne skates have been announced. Round tube are now quoted at $4.35 per pair, diamond tube at $5.30 per pair and special aluminum hockey at $4.35 per pair.

Electric Irons And Toasters Go Higher

Toronto.

ELECTRIC IRONS, TOASTERS.—An advance of 10 per cent. has been made effective on National electric sad irons. Model B 6-lb. and 4-lb. are now quoted at $3.75 each. Classic irons 6-lb. are quoted at $4.25 each. National toasters have been advanced to $3.75, the former price being $3.38 each.

Post Hole Augers And Grain Cleaners Up

Toronto.

AUGERS, GRAIN CLEANERS.—Substantial advances have been recorded in Iwan's posthole augers, increase amounting to 10 per cent. Prices on 7 in. and 8 in. are now $23.75 dozen, 9 in. at $25.50 dozen and 10 in. at $27.75 dozen. Grain cleaners also show an increase in price to extent of 10 per cent. Nos. 0, 1 and 2 are now quoted at $11.25 dozen.

Drag Scrapers And Vises Have Advanced

Toronto.

SCRAPERS, VISES.—An increase in price of drag scrapers amounting to 7½ per cent. has been made effective. No. 2 with runner is now quoted at $12.65 each and without runner at $11.85 each. Diamond anvil and vise has registered an increase of 15 per cent., new price being $5. American comb vise has registered a similar advance and is quoted at $2.75 each.

Barrel Churns Higher In Price

Toronto.

CHURNS.—An increase in the price of barrel churns has been put into effect during the week through the changing of the discount. List prices hold un-

changed and will be found in current quotations in this issue. For Toronto, Hamilton, London and St. Mary's the discount is now 20 per cent., the former discount being 25 per cent. For Montreal, Ottawa and Kingston the f.o.b. price is 17½ per cent. off list and St. John, N.B., 15 per cent.

Prices On Batteries And Flashlights Higher

Toronto.

BATTERIES, FLASHLIGHTS. — Higher prices have been made effective on Eveready Daylos and batteries through the changing of the list prices. Discounts hold unchanged. Following are new list prices on some of the popular types; complete with battery: No. 1991, $1.65; No. 2602, $1.30; No. 2604, $1.60; No. 2612, $1.55; No. 2626, $1.30; No. 2627, $1.15; No. 2630, $1.65; No. 2631, $1.95; No. 2632, $2.30; No. 2633, $3.15; No. 6903, $1.30; No. 6904, $1.30; No. 6909, $1.95; No. 6990, $1.30; No. 6991, $1.30; No. 6992, $1.60 each. On orders up to $50 the discount from above prices is 33 1/3 per cent. and on orders from $50 to $100 the discount is 40 per cent.

Shellac Pails And Pickle Pails Firm

Toronto.

WOOD CONTAINERS.—There is a strong market for manufacturers' packages such as shellac pails and pickle pails. Higher labor cost and cost of raw materials have brought about a condition which indicates higher price in the near future.

Paris Plaster Up; Cement Readjusted

Toronto

PARIS PLASTER, CEMENT. — Higher prices were made effective on Paris plaster, the new price on five-barrel lots being $3.25 per barrel delivered and on single barrel lots $3.65. Labor cost is assigned as one of the main reasons for the higher price. Above prices show an advance of 50c per barrel in five-barrel lots and 40c per barrel on single barrel lots. A slight readjustment has been made effective in selling price of cement, basis now being $2.60 per barrel in carload lots less 5c per barrel for cash in 20 days. In small lots the price is $3.15 per barrel f.o.b. warehouse or $3.25 per barrel delivered.

Rope Market Is In Strong Tone

Toronto

ROPE, TWINE.—There is a continued strong market for Manila rope owing to the difficulty confronting manufacturers in getting supplies of raw materials to this continent. Intimations have been made that the United States Government intends to regulate the price of fibre. If this takes place an uncertain condition may result as to what is likely to turn up. On the present basis of the market, however, there is a very strong situation and advances are not improbable unless forestalled by action of the United States Government. Business has been of a moderate sorting nature. Manufacturers will not take any bookings for future delivery but are selling only on the basis of immediate shipment. Prices will be found in current quotations.

Brushes Are In Very Firm Market

Toronto.

BRUSHES.—Owing to the difficulty in securing bristles for the manufacture of brushes of all kinds a very firm situation is existent at the present time. Bristles from Russia are entirely shut off and there is some doubt as to whether any additional supplies can be secured from China. Increasing costs of all raw materials have induced the manufacturers to look for relief through a revision of prices. There is probability that an advance may be recorded in the not distant future. Bass fibre for the manufacture of brooms is getting very scarce, as no further import from India is to be permitted. Fibre used in the manufacture of certain classes of brooms comes from Mexico normally but the shipping situation has shut off supplies to a great extent. These classes of brooms are in firm market but prices held unchanged during the week.

Fuel Oil Will Be Advanced ½c Gallon

Toronto.

OILS, GASOLINE.—Effective on February 1, an advance of ½c per gallon in the price of fuel oil will take place. In barrels the price will be 13½c per gallon, in tank cars 12c per gallon. There has been an extra heavy demand for this product owing to difficulty in getting other fuel. Coal oil is still in heavy demand and prices are holding firm at the recent advance. Gasoline is quoted at 31½c per gallon. Stormy weather has crippled use of motor trucks considerably and this has caused consumption to drop somewhat.

Oil Heaters Show Higher Price Range

Toronto.

STOVES, HEATERS, ENAMELWARE.—An advance on the list price of Perfection oil burning heaters has been recorded during the week, making the price of No. 520 now $6.25; No. 525, $6; No. 530, $6.50; No. 630, $8.25. On latter style price remains unchanged. Above prices are subject to discount of 25 per cent. There has been a very heavy demand for these stoves, manufacturers as a result being behind with their deliveries. There is also a strong demand for electric heaters. Prices of stoves and ranges held unchanged at the advance recorded last week. Enamelware booking is reported fairly good with a fair volume of sorting business in evidence.

Nails And Wire Decline 25c Hundred

Toronto.

NAILS, WIRE.—A reduction of 25c in the price of wire nails has been made effective during the week which makes the price $5.20 per keg of 100 pounds. For Windsor and Walkerville the decline amounts to 15c per 100 pounds. Wire has also declined 25c per 100, with the exception of hay wire of all kinds and bale ties. The reason for this decline is stated to be an accumulation of a very large tonnage of wire rods collected at seaboard ports in United States for shipment abroad. Sellers were unable to procure ships for the transport of these commodities and the tonnage accordingly had to be placed on the market at a price below prevailing market value. This resulted in a temporary reduction by makers of wire rods which enabled wire nail manufacturers to place orders for their requirements at a price which would enable them to make a reduction in the price of nails. It may be stated, however, that while the matter of price reduction was being discussed an advance of $5 per ton was recorded on wire rods. However, contracts had already been placed and accepted at lower prices. Whether or not this reduction will remain in force for any length of time is problematical and will be entirely governed by the situation in wire rods. Well known makers of wire rods are turning their basic materials into other channels in which they can secure better prices than that on wire rods. This may eventually result in a shortage of the basic material if persisted in for any length of time. While wholesalers are not urging their customers to stock up at present prices they express the opinion that it would be good business to purchase normal requirements. This accumulation of stocks affected the price of various kinds of wire, base price now being quoted at 25c per hundred pounds less than formerly at $6.25. Decline does not affect hay wire or bale ties.

Iron And Steel In Fair Demand

Toronto.

IRON AND STEEL.—The market held steady during the week at readjustments noted last week on large size rounds and squares common bar steel. While the market quite generally did not show the lower range the prices continued to be quoted in at least one quarter. There has been a fair demand for iron and steel of various kinds.

TORONTO—		Per 100 lbs.
Common bar iron	....	$ 5 25

Tool steel	0 20	0 42

Copper Sheets Were In Weaker Market

Toronto.

SHEETS, PLATES.—There was an easier feeling in the market for copper sheets during the week, the desire for business inducing some concerns to quote prices considerably below recent quotations. Plain sheets, 16-oz. and heavier were quoted as low as 40c in some quarters and intimations were made that even lower prices were prevailing. Black sheets held in steady market with prices unchanged from readjustments noted last week. While lower prices have been named on 10 gauge black and 3/16 and ¼-inch plate these prices are obtainable only where it is shown the goods are to be used in shipbuilding or in some other line that is of national importance at the present time. Some fairly good shipments of these heavier gauges of sheets have reached the market. Galvanized sheets held steady.

BLACK SHEETS—	Per 100 lbs.		
10 gauge	$	$10 00	$12 00
12 gauge	7 55	10 10	11 60

No. 18 gauge	23 00-	20 00

Discount 7½%.

Tube Situation Still Continues Acute

Toronto.

BOILER TUBES.—The acute situation in boiler tubes continues. Dealers are allowed to sell only where it is shown they are to be used in the national interest. Stocks which were in the country prior to the embargo are an exception to this, but these are within very narrow compass at the present time.

1 inch	$36 00	$ ....

Lead Products Prices Maintained

Toronto.

LEAD AND ZINC PRODUCTS.—Quiet prevailed in the market for lead and zinc products so far as price changes were concerned. Demand is normal for this season of the year, which is not very heavy. In one quarter strictly half-and-half solder was quoted at 48c per pound, commercial at 43c per pound and tinkers' solder at 48c per pound.

Railroad Wrought Iron At Better Price

Toronto.

OLD MATERIAL.—Higher prices were offered for No. 1 railroad wrought iron during the week to the extent of $3 per ton, while No. 2 railroad wrought commanded $2 to $3.50 per ton higher. Reason assigned is keener demand on part of buyers. Country mixed scrap was also $2 per ton higher at $16 to $17. Old rubber boots and shoes commanded better prices at 8¼c per pound, being ½c higher, while auto tires were ½c higher at 4½c per pound. Market for other old materials continued dull.

Tin Holds Strong And Activity Continues

Toronto.

INGOT METALS.—Ingot metals held steady in price during the week with a better demand reported in some quarters for spelter and a continued strong demand for ingot tin.

COPPER.—The market held steady with no indication that any price change is likely to be effected within the near future at any rate, since the United States Government has again fixed the price at 23½c to extend to June 1. Locally quotations were at 30c to 32c for casting copper.

TIN.—There was a continued strong market for this commodity with a good demand reported. Tin is in an acute situation in the United States as the result of commandeering of spot supplies which have even reached the consumers. Locally quotations were unchanged at 78c to 80c per pound.

SPELTER.—There was a better demand reported in some quarters for spelter during the week. Prices held unchanged at 9¾c to 10½c per pound.

LEAD.—The primary situation is one of a firm undertone due largely to uncertain deliveries. Demand locally is light at this season of the year. Quotations were maintained on the basis of 9c to 9½c per pound.

ANTIMONY.—Quietness prevailed in the market for antimony during the week, following the more active condition noted last week. Prices were unchanged at 16c to 18c per pound.

ALUMINUM.—The market continues in a steady position with quotations still being made on the basis of 60c per pound.

PIG IRON.—Difficulty in transportation continues to be the biggest problem for the manufacturers of pig iron. Smelters are worrying through with available supplies of coke. Prices were unchanged at $49.50 per ton for foundry iron.

Handles Advance In Price 10 Per Cent.

Toronto.

HANDLES.—An advance of approximately 10 per cent. has been made effective in the price of all handles, including pick handles, axe handles, harvest tool handles, canthook handles, hammer handles, hatchet handles, bench axe handles, sledge hammer handles, whiffletress, neckyokes and doubletrees. Discount on these various lines of handles is now 35 per cent. from list. Pike poles remain unchanged at a discount of 35 per cent. Discount of 35 per cent. also applies to hay rakes and horse pokes.

LONDON MARKETS

LONDON, Jan. 31.—A number of important changes have been made effective in hardware commodities during the week. Business in this district continues fair in spite of the cold stormy weather. Oil heaters, coal oil, crosscut saws and chopping wedges are having exceptionally big sale. Hockey skates and sticks and snow shoes are also in good demand. Prices are firm. Buyers, although buying carefully, are trying to keep their stocks in good shape against a possible shortage of goods. Merchants seem to be paying more attention than ever before to market prices, and are marking the resale prices on goods based on latest costs. Most of them now realize how important this is to protect themselves against lower prices in the future.

Coal Oil Heaters Again Show Advance

London.

OIL HEATERS.—An advance has been made effective on the list prices of Perfection oil heaters. No. 525 is now quoted at $6 list and No. 530 at $6.50 list, the former price being an increase of 50c and the latter 25c increase. Discount from list prices is 25 per cent. There is a real shortage of these stoves at present owing to the heavy demand that has existed.

New Net Prices On Glass Figured Out

London.

GLASS.—The glass market is firm at the advance recorded last week. Single and double diamond are quoted at 40 per cent. off list on box glass, while cut lights are quoted at 25 per cent. off list. Net prices figured on the above basis make the following prices to prevail:

	Single Case	Double Case
Up to 25	$10 20	$14 40
26 to 34	10 80	15 60
35 to 40	11 16	15 84

95 to 100	....	39 00
101 to 105	....	41 10

Readjustment In Prices Of Skates

London.

SKATES.—A readjustment in the selling prices of skates has been made in the Starr line. List prices on all medium and low-priced skates are higher, but the discount has also been increased, which brings the net result to about the same figures as previously prevailing. Prices are for 1918 booking. Discount from new list is 30 per cent. Following are list prices on some of lines:

No. 181 Velox, $6.50 pair; No. 189 Regal, $6 pair; No. 190 Tube, $6 pair; No. 129 Mic-Mac, $5 pair; No. 193 Dreadnaught, $4 pair; No. 176 Scotia, $3.75 pair; No. 194 Regis, $3.25 pair; No. 162 Beaver, Flanged, $3 pair; No. 157 Beaver, Plain, $2.75 pair; No. 173 Climax, $2.75 pair; No. 154 Bull Dog, $1.85 pair; No. 156 Acadia, $1.75 pair; No. 150 Starr, $1.65 pair; No. 153 Starr, $1.45 pair; No. 100 Acme, $1.30 pair.

Bread Mixers Easier; Hinge Hasps Higher

London.

BREAD MIXERS, HINGE HASPS, JOINTERS.—New prices issued for Universal bread mixers show a slightly lower price. Four-loaf is now quoted at $29.50 per dozen and eight-loaf at $34 dozen. Hinge hasps have been advanced in price, and are now quoted at 10 per cent. off list. Perfect saw jointers show an advance at the new price of $1.75 per dozen.

White Lead in Oil Steady

Prices on white lead in oil held steady during the week, pure in ton lots being quoted on the basis of $15.70 per 100 pounds and less than ton lots at $16.05 per hundred pounds.

Horse Shoes And Horse Nails Advance

London.

HORSESHOES, HORSE NAILS.—An advance of 50c per keg has been made effective on the price of horseshoes, which now makes the following prices prevail:

Iron—No. 2 and larger, $6.15 per 100 lbs.; No. 1 and smaller, $6.40 per 100 lbs.

Steel—No. 2 and larger, $6.60 per 100 lbs.; No. 1 and smaller, $6.85 per 100 lbs.

M. R. M. brand horseshoe nails have been increased 25c per box of 25 lbs. Following are prices quoted:

No. 4, $9 per box of 25 lbs.; No. 5, $4; No. 6, $3.75; No. 7, $3.50; No. 8, $3.50; No. 9, $3.25; No. 10, $3.25; No. 11, $3.25.

Rifles And Shotguns Advance; Solder Up

London.

RIFLES, SHOTGUNS, SOLDER.—Higher prices have been announced on Remington line of rifles and shotguns, which makes new prices as follows:

Rifles—No. 14A, standard, $34.50 each! No. 12A x 22 cal., $20.35 each; No. 12C x 22 cal., $22.60 each; No. 6 single shot, $8.55 each.

Shotguns—No. 10A repeater, $44.10 each.

Solder is higher in price and strictly half-and-half is now quoted at 42c per pound.

Flashlights And Batteries Go Higher

London.

FLASHLIGHTS, BATTERIES.—An advance of 5c each on list price of batteries for Eveready Daylos and approximately 20 per cent. on Eveready Daylo cases has been announced. Following list prices on some of best selling lines are subject to a discount of 33 1/3 per cent.:

No. 6961 Daylos, complete, $1 each; No. 6962 Daylos, complete, $1.30 each; No. 6991 Daylos, complete, $1.30; No. 6992 Daylos, complete, $1.60; No. 2602 Daylos, complete, $1.30; No. 2604 Daylos, complete, $1.60; No. 2612 Daylos, complete, $1.80; No. 2630 Daylos, complete, $1.65; No. 2631 Daylos, complete, $1.95; No. 2632 Daylos, complete, $2.30; No. 2616 Daylos, complete, $2.05; No. 2619 Daylos, complete, $2.40; No. 6909 Daylos, complete, $1.95.

Batteries—No. 750, 40c each; No. 751, 45c; No. 703, 45c; No. 791, 40c; No. 790, 40c; No. 705, 50c.

Rope Prices Firm; Winter Lines In Demand

London.

ROPE, WINTER LINES.—Prices on rope hold unchanged during the week, but in a firm market. Pure Manila is quoted at 39c lb. base, British Manila and New Zealand hemp at 33c lb. base, and sisal rope at 27½c lb. base. There is a good demand still for winter lines, such as snowshoes, hand sleighs and ash sifters. Snowshoes are quoted as follows: Boys', 10 in. by 33 in., $2.35 pair; ladies', 11 x 36, $2.85 pair; men's, 12 x 42, $3.25 pair; men's, 14 x 42, $4 pair. Hand sleighs are quoted at 35 per cent. off list. Ash sifters, wood sides, are quoted at $2.15 dozen; Banner sifter at $2.90 each, and Rocker sifter No. 1 at $5.25 each.

Barrel Churns Advance 6½ Per Cent.

London.

CHURNS.—An advance of approximately 6½ per cent. has been made effective in price of barrel churns through the changing of discount to 20 per cent. off list. Former discount was 25 per cent. Net prices figured on basis of new discount are as follows:

No. 0, $7.20 each; No. 1, $7.20; No. 2, $8; No. 3, $8.80; No. 4, $10.40; No. 5, $12.80.

Crosscut Saws, Bucksaws, Wedges In Good Sale

London.

SAWS, WEDGES.—Due to the necessity for cutting wood in the face of the coal shortage there is an excellent demand for crosscut saws, bucksaws, and splitting wedges. Crosscut saws are quoted at following prices:

Champion, 55c ft.; Improved Champion, 55c ft.; Premier, Maple Leaf Lance, Pangburn, Maple Leaf Razor, Arrow Head, 5 ft., $4.50 each; 5½ ft., $5.30 each; 6 ft., $6 each.

Bucksaws, Happy Medium, are quoted at $8.70 dozen; Prince Rupert at $11.70 dozen. Splitting wedges, common pattern, are quoted at 12c per pound; truckee pattern at 13c per pound.

Lanterns, Lamp Chimneys

Lanterns are quoted in this market at $12.50 per dozen for tin pattern, while lantern globes, one dozen to case, are quoted at $1 dozen; three dozen to case at 90c dozen, and six dozen to case at 85c dozen. Lamp chimneys are quoted: No. 0, $6 case of six dozen; No. A, $8 case of eight dozen; No. B, $6.75 case of six dozen.

Linseed Oil Up 3c; Turpentine Unchanged

London.

LINSEED OIL, TURPENTINE.—An advance of 3c per gallon in the price of linseed oil took place during the week following the firm situation prevailing in the market for some time past. Following are prices: 1 to 2 barrels raw $1.55, boiled $1.58; 3 to 5 barrels, raw $1.54, boiled $1.57; 6 to 9 barrels, raw $1.52, boiled $1.55.

Turpentine is unchanged in price at 73c per Imperial gallon in single barrel lots and 72c per gallon in 2 to 4-barrel lots. In 5-gallon lots the price is 83c gallon.

Putty Market Steady

The market for putty held unchanged and in steady position during the week. Standard in 25-lb., 50-lb., and 100-lb. drums is quoted at $5.15 per 100 lbs. Pure putty is quoted $1.75 per 100 lbs. higher than standard.

WINNIPEG MARKETS

WINNIPEG, Jan. 31.—Prominent among changes recorded this week are the advances recorded in white lead and horseshoes. Other lines which have undergone revision upwards are fishing tackle, boring machine augers, watches, bull rings, wing dividers, barrel wrenches, mirrors, and Redlich faucets. Shipments from American factories continue to be delayed,

in some cases due to transportation, and others on account of special export licenses. As the United States gets further into the war no doubt many lines now being exported will be cut off entirely, and to make sure of getting their goods many retailers are taking deliveries earlier than usual. Business during the week has been fair, many jobbers now being busy on shipping spring cars.

Horse Shoes Advance Fifty Cents

Winnipeg.

HORSESHOES.—The market on horseshoes again shows an upward trend of 50c per 100 lbs. This represents the second advance during the season. Orders continue to come in and show the usual demand. Prices ruling to-day are quoted herewith:

Iron—No. 0 to 1, $7.25 per 100 lbs; No. 2 and larger, $7 per 100 lbs.
Snowshoes—No. 0 to 1, $7.50 per 100 lbs.; No. 2 and larger, $7.25 per 100 lbs.
Steel—No. 0 to 1, $7.70 per 100 lbs.; No. 2 and larger, $7.45 per 100 lbs.
Featherweight, $8.85 per 100 lbs.

White Lead In Firmer Tone; Advances

Winnipeg.

WHITE LEAD.—A firmer undertone in the lead market has caused white lead to advance 50c per 100 lbs. The general trend of the market for some time past has been downward, declines amounting to $2.50 per 100 lbs. having been registered. Prices ruling to-day at the advanced figures follow: Decorators' pure—Ton lots, $16.15 per 100 lbs.; less than ton lots, $16.50 per 100 lbs.

Mirrors Follow Lead Of Window Glass

Winnipeg.

MIRRORS.—Following the recent advance in window glass, all lines of mirrors show an increase of from 30 to 33 1/3 per cent. This is in a measure due to the scarcity of coal to operate furnaces as well as the shortage of skilled labor needed for silvering. Prices quoted below cover only a few of the familiar lines:

Earl—6 x 9 in., $4.25; 8 x 10 in., $5.15 dozen.
York—5 x 7 in., $1.85; 6 x 9 in., $2.35; 8 x 10 in., $3.05; 9 x 12 in., $3.75 per dozen.
Alexandria—9 x 12 in., $6.35; 10 x 14 in., $7.95; 12 x 18 in., $11.25; 14 x 24 in., $16.10 per dozen.

Fishing Tackle Goes Higher

Winnipeg.

FISHING TACKLE.—Following advances by fishing tackle manufacturers, new prices have been put in force by the Winnipeg jobbers, which show increases ranging from 5 to 50 per cent. The following prices cover some of the more familiar lines:

Fishing Rods—B7½, $2 each; B8½, $2 each; BB6½, $1.50 each; BB7½, $1.50 each.
Ringed Kirby Hooks—No. 1 to 8, $1.20 M.; No. 1 to 0, $1.50 M.; No. 2 to 0, $1.75 M.; No. 3 to 0, $2 per M.; No. 4 to 0, $2.25 M.; No. 5 to 0, $2.50 M.; No. 6 to 0, $2.75 M.
Baits—"Kidney." No. 619 x 1 to 4, $1.35; 5 to 6, $1.70 doz. "Cobourg." No. 1376 x 2, $1.90; 3 to 4, $2.25; 5 to 6, $2.80 doz. "Fluted," No. 110 x 1 to 4½, $1.35; 5 to 6, $1.70; 7 to 8, $2.25 dozen. "Hammered Oval," No. 2, $1.90; 3 to 4, $2.25; 5 to 6, $2.80; No. 7, $4 dozen. "Montreal," No. 2, $1.90; 3 to 4, $2.25; 5 to 6, $2.80; 7 to 8, $4 dozen. Blass Bass, No. 3 to 5, $1.90 dozen. Devon Minnows, No. 0 to 1, $4.50; No. 2, $5; No. 3, $5.50; No. 4, $6; No. 5, $6.50 doz.
Fish Lines—Sea Island Cotton, No. 4, $1.40; No. 3, $1.50; No. 2, $2; No. 1, $2.10; No. 1 to 0, $2.65; No. 2 to 0, $3.25 dozen.

Wood Faucets Go Slightly Higher

Winnipeg.

WOOD FAUCETS.—Prices on Redlich faucets, which have remained firm for the past two years, show a very slight advance, due to increased cost of raw material. Prices ruling to-day are as follows:—No. 2, $1.25; No. 3, $1.45; No. 4, $1.75; No. 5, $1.90 dozen.

Carpenters' Clamps And Augers Register Advance

Winnipeg.

CARPENTERS' CLAMPS AND AUGERS.—New prices just effective show an increase of approximately 10 per cent. on carpenters' door clamps, which are quoted to-day at the following figures:—No. 1 x 3 ft., $6.40; No. 1 x 4 ft., $7.20; No. 1 x 5 ft., $8 per pair.

Bates' boring machine augers again move up in price, showing, however, only a normal increase over old prices. The discount prevailing to-day is 35 per cent. off list, making net prices as follows:—1 in., $9.75; 1¼ in., $12.35; 1½ in., $15.60; 2 in., $20.80 per dozen.

Carll Wrenches Higher; Watches Also Up

Winnipeg.

CARLL WRENCHES, WATCHES.—Another item in the hardware line which has been steadily increasing is Carll wrenches. These advanced only a short time ago, and new prices issued at the first of the year show further increases of 10 per cent., making to-day's price as follows:—No. 60 x 6 in., $11.50 doz.; No. 100 x 10 in., $17.50 doz.

Boyproof and Pocket Ben watches, which have remained firm in price for some time past, show quite a heavy advance of about 15 per cent., being quoted to-day at $1.20 each.

Turpentine Unchanged; Linseed Oil Steady

Winnipeg.

TURPENTINE, LINSEED OIL.—There is nothing of note to report regarding the market on turpentine, prices still holding firm, as formerly quoted:—Barrel lots, 80c; half-barrels, 83c; 5-gal. lots, 85c; 1 gal. lots, 85c gal., plus the usual extras for containers.

Although flaxseed continues to fluctuate, the linseed oil market still holds firm, and no immediate change is anticipated. Prices ruling to-day are as follows:—Raw, $1.65 gal.; boiled, $1.68 gal.

Miscellaneous Lines Go Higher

Winnipeg.

MISCELLANEOUS LINES—Although recent reports show a weakness in the copper market, prices have just advanced on bull rings, and show an increase over the old prices of 25c per dozen. This may be due to the fact that former prices were based on copper bought at lower than present market values. Ruling prices are quoted herewith:—No. 21, $3.75 doz.; No. 22, $4 doz.; No. 31, $4.25 doz.

A revision in prices has been found necessary on wing dividers, which have increased 12½ per cent., and are now quoted at 10 per cent. off list. Net prices are as follows:—No. 50 x 6 in., $4.95; 7 in., $5.85; 8 in., $6.75; 10 in., $9; 12 in., $10.80 dozen.

PITTSBURG MARKETS

PITTSBURGH, Pa., Jan. 31.—During the five-day period ending midnight Tuesday, Jan. 22, covered by Fuel Administrator Garfield's plant closing order, the blast furnaces operated as far as they were able to operate. The Bessemer steel-making departments were all closed, except that two or three resumed Monday morning by reason of the tin plate mills having been given an exemption late Saturday night. The open-hearth steel departments generally were closed, but 20 or 25 per cent. of the normal tonnage was turned out in connection with exempted finished products. Finishing departments generally were closed, the exempted departments representing only a very small percentage of the total capacity. The exemptions as a rule were not received until after departments had closed, some of them not coming until Saturday night, and resumption was difficult. Some were even received Monday and Tuesday, and, therefore, proved of significance only as to the nine following Mondays on which plants generally are to be closed.

While the plant closing order caused a great deal of comment and considerable excitement, it was to the steel industry was disposed simply to hope for accustomed to sudden closings for one thing, while shipping conditions have been so extremely bad that the steel industry only an incident. Steel mills are the best in connection with this drastic order. While there was much criticism of the order in many circles at the outset, there was practically none at any time in the steel industry. The criticism elsewhere has largely died down, as the necessity for the order has come to be appreciated.

Traffic Conditions

In the first week of the month the majority of railroads serving the Pittsburgh and valley mills placed embargoes against the receipt of freight for most points, with a few exceptions. Shipments were accordingly greatly curtailed. A fortnight ago hopes were entertained that these embargoes would be removed by the end of last week. Instead of that the plant closing order announced Thursday was tacit notice that nothing of the sort could be expected.

WEEKLY PAINT DEPARTMENT

How Household Assortment May Help

Interior Finishes Grouped For Each Room in the House — Opportunity For Excellent Window Displays and Newspaper Ads.

MANY methods are employed by retail merchants to stimulate sales of different lines and one which might be used successfully in the paint department suggests itself at this season of the year. Inside finishes are of course the predominating feature in any paint movement of to-day. Could sales not be increased materially by selling a household assortment—making up a neat assortment of real, useful interior finishes that could be sold for five or six dollars?

Windows and Newspapers Help

This presents an opportunity for a splendid window display and effective newspaper advertising that will bring results. Supposing the merchant makes up an assortment for every room in the house. Not by any means an arduous task but one which will simplify your customers' purchases materially, give them something concrete to work on and incidentally show them that it is possible to attain a bright, clean, fresh interior for any one or all of their rooms at a small outlay in actual cash.

Suggested Assortments

Every care should be exercised in the selection of these assortments to see that no lines go out which your customers will not use. Take for instance the parlor: an assortment for this room might include a can of floor wax, or a can of floor varnish, varnish stain for the furniture, a good wall paint, a can of polish and a couple of brushes.

The dining room might have varnish stain for the floor and furniture, wall paint or calcimine for the walls, furniture polish to keep things in general brightened up, and brushes to apply each line satisfactorily.

In the kitchen, floor paint could be suggested along with aluminum paint and stove pipe enamel for the stove and pipes, wall paint and enamel for the table top and chairs.

For the bed rooms calcimine and wall paints are used extensively, along with varnish stain or floor paint for the floors. The furniture could be brightened up by the application of varnish stains or enamel. Where oilcloth or linoleum is used on the floors, a can of varnish might be sold.

In the bath room, bath room enamel, wall paint, varnish and varnish stain are all suitable items.

With each assortment a brush might be given free or where the bill amounts to $5.20, an even figure of $5.00 might be made if such a step were deemed necessary. However, the majority of customers will be so pleased to have the assortment made up for them that it should be no trouble to secure regular prices.

The opportunity for window display which the assortment idea presents is splendid. Half a dozen specials arranged with color cards and an attractive price card outlining the nature of the goods gives the window trimmer a basis to work on which can be developed successfully.

Big Sales, Little Effort

Instead of a possible fifty cent or one dollar sale, five or six dollar transactions can be made with little extra effort and business in the paint department brought up to a point where it is satisfactory. No merchant wants to confine his sales of paint to three or four months in the year when it is possible to maintain activity every month. But it is essential that definite steps be taken to assure this satisfactory condition of affairs. Sitting back in the office chair and waiting is not the policy being employed by hardwaremen of to-day.

Prospects Look Bright

Painters, decorators and property owners are going to be in the market to buy. More materials will be needed owing to the curtailment of supplies bought during the past year or two. Property cannot be allowed to go indefinitely without painting and it is to the merchant who shows that he is out for business and goes after it that the trade will come.

(Continued on page 48.)

Devoting a display window to special lines of your stock should bring in excellent results. At this season of the year the demand for special finishes to brighten up around the home can be increased. An attractive window display will do much towards getting people into your store for these lines.

Cashing In on the Broom Corn Shortage

The present shortage of broom corn, its high price and the practice of mixing a cheaper straw with it is making the corn broom decidedly unpopular with housewives. It's up to you for profit's sake to urge your patrons to use the "Clean Sweep" Broom, which outlasts several corn brooms and sweeps cleaner without raising any dust. The "Clean Sweep" Broom is nicely finished with varnished block and polished adjustable ""Screw Lock" handle; its fine appearance making sales easier.

The material does not break off as is the case with the old style corn brooms.

"Clean Sweep" Brooms are made with adjustable "Screw Lock" handles, which allows the broom to be placed in different positions, according to the height of the user and for convenience in sweeping.

Ask us for prices on "Clean Sweep" and other good floor brooms.

Note different positions possible with Adjustable Handle

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Jan. 31.—The interest of the week centres largely in the advances that have been made on mixed paints and on lines of enamels and other products made by the paint makers. Mixed paint, as definitely predicted in HARDWARE AND METAL last week, has advanced which represents an increase of 25 cents over previous quotations. New differentials have been arranged and for paint these are as given under "mixed paints." Enamels and many other shelf lines have advanced 10 per cent. net, as have also varnishes and varnish stains. The new prices will be found in the current quotations. The increases in barn and bridge paints have been confined to 15 per cent. advance and also to one or two of the rough marine paint lines. After June 30 next no pint nor half gallon tins will be used. Until April 1, for the convenience of retail dealers who have not been able to place their initial spring orders, the old prices will apply but only for these initial orders, as the changes above referred to are immediately effective. An advance of 10 per cent. has been made on varnishes and some specialty lines.

Very Hard To Fill Linseed Oil Orders

Montreal.

LINSEED OIL.—Little can be said regarding the linseed oil situation. Continued storms, covering such a wide area, have served to tie-up the traffic of all roads to such an extent that delivery is almost at a stand-still for the immediate present. All that can be done, under these circumstances, the transportation companies are doing and relief is possible if better weather prevails. Spot stocks of seed and also of oil are rather light, and there is little inclination to quote any prices for immediate delivery. For the present the paint makers are very busy and all are able to report ample stocks for their needs. The outside demand for prompt delivery being light, there is less hardship than would be the case were there any great need at country points,

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
1 to 4 barrels	$1 50	$1 52½
5 to 9 barrels	1 49	1 51½
10 to 25 barrels	1 48	1 50½

Turpentine Holds Here; Savannah Market Weak

Montreal.

TURPENTINE.—The local situation is holding rather firmly, with an inclination in some quarters to take small advances. In the Savannah market there has been a weak tendency, in fact a decline of two cents per gallon is noted. There seem to be no great stocks at any of the import centres and here the quantity on hand is limited, with none arriving from outside owing to transportation troubles. The prices locally hold firmly as follows:

Turpentine—	Per Imp. gallon
5 bb's. and over	$0.69-$0.72
1 barrel lots	0.70- 0.73
Small quantities	- 0.83

Varnishes And Enamels Are Marked Higher

Montreal.

VARNISHES AND ENAMELS.—A net advance of 10 per cent. has been made in the price of varnishes and varnish stains effective at once. In addition to this such specialty goods as enamels of various kinds and other specialty goods sold through the trade have been marked up 10 per cent. also. This is in accord with definite predictions made in last week's issue of HARDWARE AND METAL, and follows as the result of increasing costs for containers and the difficulty of getting supplies forward. New differentials are as follows:—Half gallons 15c over gallon containers; quarts, 30c; eighths, 60c and sixteenths, $1.20.

Twenty-Five Cent Increase In Mixed Paint At Once

Montreal.

MIXED PAINTS.—It was very definitely pointed out in the columns of HARDWARE AND METAL last week that an advance was impending in the price of mixed paint. This has materialized and prices are now higher by 25 cents per gallon. Among the lines affected are first and second grades of regular house paints, floor, porch, wall colors and marine paints and other lines of oil paint, with the exception of barn, bridge and dory paint. The latter have advanced 15c per gallon. The important step has been agreed upon of eliminating two sizes of cans, that of the half gallon and that of the pint. This will apply to several other tins used for colors in oil, such as the wine measure tin or anything approximately the pint size. This actions was taken voluntarily by the manufacturers, in view of the fact that it was deemed necessary and this action follows the lead of the U.S. makers of paint, where action was taken such as made the elimination of certain colors essential also. These prices, while effective at once will not be applied to the initial spring orders given the various travellers as they get over their territory, but such orders must be placed not later than April 1st. But for all orders other than these the advance will apply now. The new differentials on paints are as follows:—Half gallons, 10c above gallons; quarts. 20c above; pints, 40c above and half pints 80c above. These differentials as applying to the half gallons and the pints will, of course, be used until the two sizes are eliminated on June 30. Complete details of the changes will be found in special article on pages 23-26 in this issue of HARDWARE AND METAL.

Glass And Putty Hold Very Firmly

Montreal.

GLASS AND PUTTY.—The local situation on glass holds at the advances made last week and which appear elsewhere in the current quotations. Firmness characterizes the glass market, however, and suggestions are made of a probable advance in plate glass. Putty holds at the quotations given and is very firm. Bulk in casks is quoted at $4.10 per cwt. in less than ton lots and in 100 lb. and 25 lb. drums at $4.95 per 100 lbs. Bladders and in 12½ lb. irons are quoted at $5.20. For lots exceeding tons the prices are 20c per 100 lbs. less.

White Lead In Oil Is Decidedly Firm

Montreal.

WHITE LEAD IN OIL.—The tone of the white lead in oil market is very firm. One large jobber expressed to HARDWARE AND METAL that his opinion would lead him to suggest another advance and that this might be from half a cent to one per cent. lb. in the near future. In the primary centres the price is holding firm without change. Government standard grades are selling at $15 per 100 lbs. for five ton lots and at $15.50 for ton lots, while for the smaller lots $15.85 is asked.

ATTRACTIVE WINDOWS

are one of the greatest assets of any retail store, and Martin-Senour Dealer-Agents have always in the past been supplied with window displays of the highest order. This year will be no exception; in fact, from the illustration of our new display feature for 1918, shown above, it will be seen that the efforts of all previous years have been surpassed.

The trim reproduced above is 26 x 40 inches in size, made of heavy board with easel back, and is printed in very attractive and beautiful colorings, making it one of the most distinctive pieces of display matter ever produced. Its display in your window will directly connect your store with the Dominion-wide advertising campaign of

MARTIN-SENOUR

PAINTS AND VARNISHES

thus enabling you to obtain the larger share of the paint and varnish business in your locality. This is only one of the many new features for 1918 that will do much to help Martin-Senour agents to materially increase their paint business. This publicity, together with the urgent necessity for conserving and economizing, will make Martin-Senour 100% pure paint (on account of its great protecting and preserving qualities) more in demand than ever before. This should be the banner year for all Martin-Senour dealer agents.

It will pay you to be prepared with a complete well-assorted stock of all Martin-Senour products.

If you are not with us already, now is the time to become one of our satisfied dealer agents.

Scarcity Of Shellacs Make Quotations Firm

Montreal.

SHELLAC.—While no price changes are noted there is a decidedly firm tone to the market for shellacs. This has become rather a scarce commodity in many parts, with the result that a number of substitutes are being offered, says one dealer. There is an indication from this source that new prices may be looked for in the near future.

TORONTO

TORONTO, Jan. 31.—Interest in the paint and oil trade has been largely centered around the new prices which have been decided upon. Revision in the upward direction has been decided upon as outlined in a special article elsewhere in this issue. Linseed oil is in firm market with supplies of seed reaching Eastern crushers still inadequate to meet requirements. Turpentine held steady during the week with lower prices prevailing in the primary market. Paint manufacturers report booking business continues good, with volume ahead of last year in some instances.

Greater Need For Flaxseed In Britain

Toronto.

LINSEED OIL.—A dispatch from London during the week asserted that Great Britain would require greater quantities of flaxseed during the present year in order to meet the requirements of the varied uses which are now found for products of the flax. Oil men in this district see a firmer tendency to oil prices in view of the probable heavier demand for flaxseed from Great Britain. Supplies of the seed have been reaching Eastern crushers in rather meagre quantities during the week, being insufficient to meet requirements. There is a strong demand for oil cake at the present time due to restriction of shipments of cottonseed meal from United States. One concern in the United States is reported to have canceled orders for 2,000 tons of cottonseed meal that were on order from Canadian buyers. Owing to the light arrivals of flaxseed recently crushers have been unable to keep pace with the requirements for oil cake. Prices on this commodtiy hold steady, however. In some quarters there was an advance of 3c per gallon on linseed oil during the week, but the price is still within the range of those given last week.

	Raw, Imp. Gal.	Boiled, Imp. Gal.
1 to 2 bbls.	$1.50-$1.55	$1.52½-$1.58
3 to 5 bbls.	1.50- 1.54	1.52½- 1.57
6 to 9 bbls.	1.49- 1.52	1.51½- 1.55

Less than barrel lots 10c per gallon higher than single barrel price.

Turpentine Holds; Arrivals Light

Toronto.

TURPENTINE.—There was an easier trend to the market for turpentine at primary points during the week but quotations in the local market held unchanged. Dealers in this market report they are having much difficulty in getting shipments forwarded owing to the acute transportation situation. A dispatch from London during the week states that turpentine has been placed under control in the British market and that licenses are required for all dealings exceeding an aggregate of five gallons during any one calendar month. Demand in the local market is still light.

	Imp. gal.
1 barrel	$0.70-$0.73
2 to 4 barrels	0.69- 0.72
5 gallon lots	0.77- 0.83

Mixed Paint Prices Are Revised Upward

Toronto.

MIXED PAINT.—By reference to the comprehensive article elsewhere in this issue dealing with the changes in the price of paints a complete survey of the situation will be obtained. Manufacturers report booking business so far has been quite gratifying. Expectation is general that the coming season should be a good one in the mixed paint trade.

White Lead In Oil Market Holds Steady

Toronto.

WHITE LEAD IN OIL.—Market for this commodity held steady in price during the week following the advance recently announced. In some quarters reports are made that booking was fairly heavy under the reduced prices that recently prevailed. Pig lead shows an undertone of firmness, and linseed oil is in firm position. With basic materials showing such a trend there is little evidence to indicate any change in white lead in oil in the near future. Quotations are made on the basis of $15.70 per 100 pounds in ton lots and $16.05 in less than ton lots.

CHANGES IN PAINT

Full details of the important changes which have been made affecting paint products will be found in special article appearing in this issue on pages 23-26.

Glass And Putty Prices Unchanged

Toronto.

GLASS, PUTTY.—Due to the acute situation in the manufacturing districts in the United States and the lightness of spot stocks the market continues to exhibit great strength. With a curtailment of output to the extent of 50 per cent. by United States manufacturers there is small prospect of supplies being replenished very fast. Discounts hold unchanged at 40 per cent. for box glass and 25 per cent. on cut lights, which advance was recorded last week.

Putty is in firm market owing to the scarcity of whiting. Some manufacturers of putty have been hard pressed to get supplies of raw materials. Manufacturers recently decided to eliminate the 50-lb. drums. Prices hold unchanged at those given in current quotations.

CANADIAN MANUFACTURERS SPECIALIZING

(Continued from page 31.)

down of artificial barriers and will compel manufacturers to strip for action along the lines of true merit and price of their commodities. One of the surest ways to get efficiency in products is to confine the attention of the manufacturers along few lines.

Paint Can Sizes to be Limited

Another branch of industry in which there is sentiment toward greater economy in production is in the manufacture of paint. Through the recent shortage in tin plate, manufacturers have been compelled to think along the line of making their available stocks go as far as possible. A decision has been made to eliminate the half-gallon and pint sizes of cans. This would not only save a large quantity of tin plate but would enable the manufacturers to concentrate their production on fewer sizes and so reduce the labor cost.

These are but indications of the trend in Canadian industry. Numerous other lines of manufacture are no doubt undergoing a similar revolution in method. The manufacturers of Canada have a new vision of business and they are preparing their organizations to enter the world markets in competition with other nations. Prior to the war manufacturing trade was to a great extent confined in the main to domestic trade. This trade was protected behind high tariff walls. Now that the Canadian manufacturers have a vision of larger trade outside they are discarding these old ideas and are arranging their manufacturing activities to meet the competition of concerns throughout the world. There can be no doubt but that it will mean bigger business for Canada.

HOW HOUSEHOLD ASSORTMENTS MAY HELP

(Continued from page 46.)

It is by no means too early to plan the selling campaign for the year. Planning ahead is the proper system if results are to be achieved. Haphazard methods adopted at the last minute are not the ones which bring success, so it would be well for merchants to get busy at once.

A Means To An End

The assortment plan is one which can be worked successfully and provides a line of thought which merchants can follow to start action in their paint department. This will suggest other methods to stimulate trade and gets the merchant's mind working along progressive lines. It is not so hard to make the sales once the merchant applies himself to the task. Constructive thinking along the lines of increased sales and profits will work wonders—the suggestion in reference to making up assortments for your trade is to give a basis to work on. Once the hardware merchant starts, the results are assured but what is wanted is to get him started.

THE CANADA METAL CO., LIMITED TORONTO

A Complete Line of Roofing

The Brantford Roofing agency in a town or city grows more valuable every year, because the demand for the different lines of Brantford Roofing is increasing all the time—and every kind of temporary and permanent roofing requirement can be supplied in the Brantford line.

Brantford Asphalt Roofing

This is our leading line of roll roofing. A permanent roofing material for either pitch or flat roofs. Sanded on both sides. 60 lb., 70 lb., 80 lb. per square.

Brantford Rubber Roofing

Same quality as Brantford Asphalt but has a smooth surface. 40 lb., 50 lb., 60 lb. per square.

Standard Mohawk Roofing

is slightly lower quality, but a thoroughly reliable roofing at a low price. Sanded on one side. One weight—40 lb. per square.

Mohawk Rubber Roofing

the same quality as Standard Mohawk but with a smooth surface. Used for all classes of temporary work—sheds, bunk houses, camp sites, etc. 35 lb., 45 lb. and 55 lb. per square.

Leatheroid Roofing

Slightly lower quality than Mohawk Rubber. Used for same purposes. 35 lb., 45 lb. and 55 lb. per square.

Samples of any of these roofings and prices will be supplied promptly, including our famous

Brantford Asphalt Slates

which add beauty to any home or building roofed with them. They are also a very economical roofing. Reddish brown and dark green shades. This line is increasing rapidly in popularity.

FOR EXPORT

We pack all our lines of Brantford Roofing in sizes suitable to get the lowest export freight and ocean rates.

Write for catalog and prices.

Brantford Roofing Co., Ltd., Brantford, Can.

Stockdale Lectures for You!

These lectures throb with vitality, solving many problems which confront all lines of business.

Under the following captions one of America's foremost Retail Merchandising Experts gave in a clear, lucid style the why and wherefores of the success and failures in retail stores:

"Many Businesses Wrecked by Details"
"How to Make Figure Facts Earn Profits"
"How to Measure the Value of Turnover"
"How to Get the Information the Customer Wants"

We had these four lectures printed in pamphlet form for distribution among the trade.

Send for your copy TO-DAY. The supply is limited.

Do your customers realize the economy of using

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

?

Just now everyone is thinking, talking and practising economy. This circumstance gives you opportunity to bring to the attention of your customers one of the outstanding features of Silkstone Flat Wall Colours.

Silkstone is cheaper than wall-paper (and decidedly more sanitary) lasts longer than other wall finishes, can be washed often, and won't rub off. It gives a beautiful soft, silky finish that will outwear any other wall covering. The economy of a finish that costs little to apply and lasts so long will forcibly appeal to all.

Set "Economy" to making sales of Silkstone for you.

If there is no Stephens' Agent near you write for our good proposition.

SAGER AXES always make Satisfied Customers

because of their sterling quality and excellent design. Our "Sager" special chemical process of tempering gives Sager axes their individuality.

Soo Line Logging Tools

Lumbermen prefer Soo Line Logging Tools because of the careful attention given to the design and their dependability when subject to hard usage.

We desire to impress upon the Merchants the necessity of placing orders NOW for Peavies, Pike Poles, etc., for Spring trade, as otherwise they may be disappointed in being unable to obtain deliveries.

Canadian Warren Axe & Tool Co.

LIMITED
ST. CATHARINES, ONT.

Soo Line Logging Tools

Efficiency and economy are the two salient features of this line.

A varnish that is as good as can be made—is used extensively by experts and can be used by amateurs with splendid results.

Easy to apply, and with wonderful covering powers, it is economical and gives a most beautiful finish.

Sell it once—you'll sell it again.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index facing the inside back cover, after having secured advertisers' names from this directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

More-Profit Pumps ---Real Profit

No use to sell a pump that makes trouble for a dealer with his customer.

The trouble is remembered. The cost of repairs is dead loss of time and temper. The dealer suffers.

"Aremacdee" hand and motor metal pumps for force or lift use, every kind, are shown in the big catalogue.

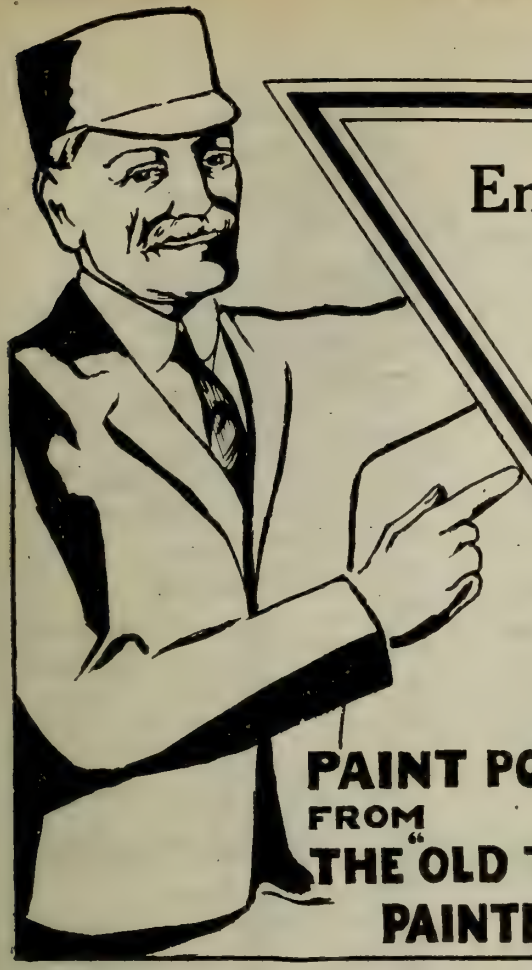
Dealers, ask for prices and terms. Get real profits on your metal pump sales.

The R. McDougall Co., Limited
GALT, CANADA

"HERCULES" SASH CORD

Has a reputation in the Canadian market, thoroughly established for the last eighteen years.

Compares in quality with the best imported brands, but is considerably lower in price.



Tests made by Strength of Materials Laboratory (University of Toronto) prove our claims as to quality.

All wholesale hardware dealers carry Hercules Sash Cord.

Manufactured in Canada

Guaranteed Service to Consumer.
Guaranteed Profit to Dealer.
Guaranteed Satisfaction to Both.

What the world wants to-day is something BETTER than usual in ANY line.

The buying public is tired of the "Just as Good" things, weary of the commonplace and worn thick and thin with the guilty, grass-grown average.

Razors Are No Exception

and it is worth remembering that the

AutoStrop

meets men's insistent demand for a razor better than usual, with service features for correct and easy shaving better than EVER.

A more complete and practical razor does not exist—it is the only razor that sharpens its own blades automatically, and so convinced are we of the shaving satisfaction it gives to any man who buys one that we say to you with emphasis: DO NOT TAKE YOUR CUSTOMER'S MONEY UNTIL HE IS SATISFIED THAT THE GOOD SERVICE GIVEN BY THE AUTOSTROP SAFETY RAZOR WARRANTS THE INVESTMENT.

With thousands of Canadian men called to the colors—all in need of a good, reliable razor, you will find it profitable to prominently display the AutoStrop Safety Razor and personally point out its merits.

Many customers buy extra blades for other styles of safety razors and the majority of them complain of the expense and annoyance so frequently incurred. Here is your opportunity to explain the wonderful advantage of the AutoStrop Safety Razor, its true economy—its comfortable service—the guarantee of 500 shaves.

AutoStrop Safety Razor Company, Ltd.

83-87 Duke Street, Toronto

Sell Handles that are Most in Demand

STILL'S

There are more of STILL'S HANDLES sold in Canada than any other make. What's the logical conclusion of this fact?—*they are the best.*

There's a Still Handle to meet every need: Axe, Pick, Sledge and Hammer Handles; Cant Hook and Peavie Handles.

There's nothing like selling the best of everything. Good profits in our handles, too.

J. H. Still Mfg. Company

ST. THOMAS -:- ONTARIO

Dressing the Store Window

is a big business-builder, no doubt—but—you've got to have the best of goods behind that window to hold the trade.

Take FILES, for instance. Why not stock the best—they're none too good for that discriminating customer of yours.

You'll never go wrong if you stock and sell

P H

TRADE MARK

Quality Files

They're the kind that attract and hold a good customer, for they are "The Standard of File Efficiency."

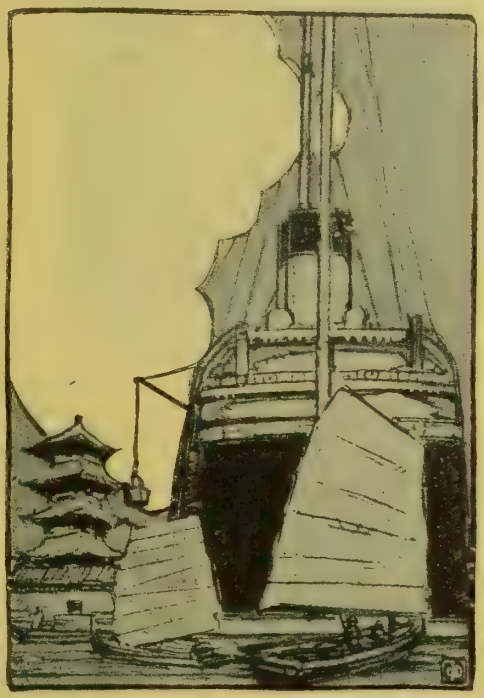
Over a Billion Exports in 1917

Automobiles, Hardware, Machinery, Wire and Nails Show Big Increase—Cost of Production Decreased Through Efficient Processes—Committee on Research to Help Manufacturers—Industries Better Able to Cater to Export Trade



Written for HARDWARE AND METAL *by W. L. Edmonds.*

WHATEVER may be the limit to which the industrial life of the Dominion may attain in the years that are to come, of one thing we may be certain, and that is that future historians will earmark the first two years of the war as a red-letter period in the history of the country, both in regard to the expansion of its export trade and in respect to the development of its industrial activities. The facts warrant no other conclusion.

During the fiscal year 1915 the total value of the merchandise of home production exported was $409,418,000, which was a decrease of $22,170,000 compared with the preceding year. While war orders by that time had begun to come to hand there was no certainty as to their future, for we began to realize that if they were to continue in anything like important proportions we would be compelled to do that which we had never done before, namely, advance the money to pay for them. While the adverse trade balance was not nearly as heavy as in either 1914 or 1913, still a good many business men and financiers were by no means overburdened with confidence, particularly in view of the fact that, owing to our extravagant borrowings abroad, we had to meet interest charges of approximately $135,000,000 annually plus the sum which differentiated between our import and export trade.

A Turn in the Tide

But providence was better to us than we anticipated, for at the close of the fiscal year 1916 it was found that the export trade had not only increased to $741,610,638, a gain of $332,191,000, but that it exceeded the value of the merchandise imported for home consumption by no less a substantial sum than $233,827,000. Then we began to feel a little easier. We also became a little more confident regarding our ability to float further domestic loans and thus get additional orders for munitions, food products and other supplies, all of

which would help to swell the proportions of the export trade.

That this confidence was well founded is evident from the fact that the export trade in merchandise of home production swelled to $1,151,375,000 the following year. This meant that the increase over the previous year, namely $409,765,000, was in itself slightly in excess of the total export trade two years before, while the favorable trade balance for the year was nearly $334,000,000.

That the export trade for the current fiscal year will reach still greater proportions there can be no doubt, the figures for the first six months showing a value of $766,863,722, compared with $536,721,514 for the corresponding period of last year. And the remarkable fact regarding the export trade for the first six months of the current year is that they exceed by about twenty-five million dollars the total for the twelve months of the fiscal year so recent as 1916.

A Comparison With the United States

When we take into consideration the fact that when the population of the United States was approximately equal to that of Canada to-day the value of her export trade in domestic products was but $376,616,000, or $774,759,000 less than ours in 1917, the extent to which the export trade of the country has developed becomes all the more remarkable. As a matter of fact it was not until 1898, twenty years ago, when its population was about 77,200,000, that the export trade of the United States in domestic products reached the figures credited to Canada last year.

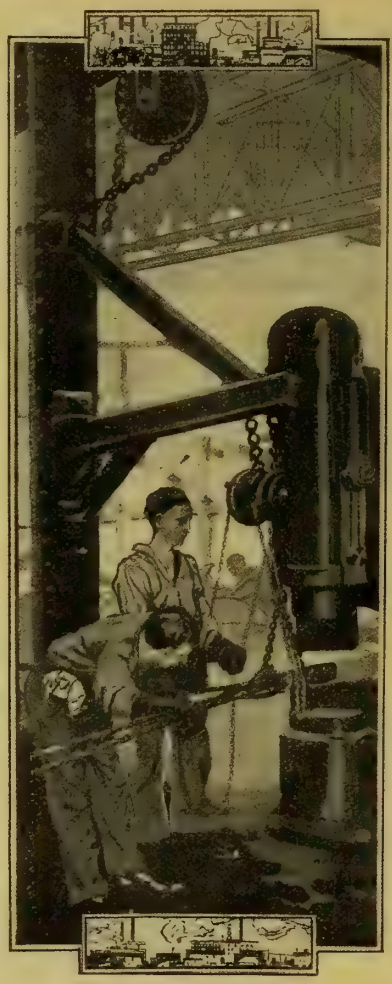
Analysis of the Canadian Trade

In the expansion which has taken place in the export trade of the Dominion practically all branches of industry have participated. This is confirmed by the summary table herewith:

	1915.	1916.	1917.
Mineral products	$ 51,740,989	$ 66,589,861	$ 85,616,907
Fishery products	19,687,068	22,377,977	24,889,253
Forest products	42,650,683	51,271,400	55,907,209
Animal produce	74,390,743	102,882,276	127,795,468
Agricultural products	134,746,050	249,661,194	373,413,701
Manufactured goods	85,539,501	242,034,998	477,399,676

This shows an increase in the three-year period of approximately 58 per cent in mineral products; 26 per cent in fishery products; 31 per cent. forest products; 71 per cent. in animal produce; 177 per cent. in agricultural products, and 469 per cent. in manufactured goods.

The most remarkable increase being in the export trade in manufactured



goods, it is naturally in regard to that line that the principal interest is to be found.

In reality the export trade in manufactured products is much larger than that chronicled in the official trade returns from which the above figures are quoted. Take, for example, bacon, cheese, canned goods, flour, and breakfast foods. They are distinctly manufactured goods, and are recognized as such in the census returns. The same remark applies to products of the smelters, the planing and the saw mills. And yet these as a rule are all credited to classifications other than manufactured goods. These would add more than two hundred million dollars, thereby making the total value of the manufactured goods exported during 1917 somewhere in the vicinity of seven hundred million dollars.

By far the greatest development in the export trade during the last three years has been in lines appertaining to the iron and steel industry. There does not appear to be a branch that has not shared in it. The demand for munitions, the export value of which increased from the modest sum of $221,137 in 1915 to $240,000,000 in 1917, was of course the principal stimulus as far as the steel-making industry is concerned. But there was also a remarkable development in the export trade in other lines which should be of greater permanent benefit to the export trade in general.

During the three-year period the export trade under the classification of automobiles and carriages increased from $3,497,000 to $14,397,000. Electric apparatus from $97,890, to $1,357,000. Gasoline engines from $116,607 to $133,673; firearms from $211,324 to $2,234,000; hardware from $369,714 to $943,755; machinery from $1,424,000 to $2,260,000. But one of the most marked increases was in wire and wire nails, which jumped from $870,319 in 1915 to $9,000,000 in 1917. In 1914 there does not appear to have been any export trade in wire and nails. At any rate if there was it was so small that it was not thought worthy of being recorded in the official returns.

The most striking increase from the basis of percentage recorded was in gasoline launches, there being a jump

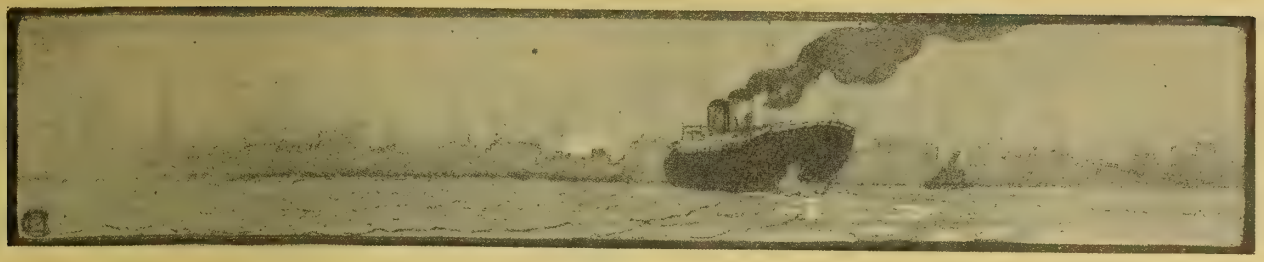
from nothing in 1915 to $15,149,000 in 1917. This is no doubt due to the orders which were placed in Canada by the Imperial Government for motor boats designed for purpose of watching German submarines.

The extent to which the paper and pulp industry has benefited may be gathered from the fact that whereas the value of the export trade in paper was $15,509,060 in 1915, it was $26,123,000 two years later. The wood-pulp trade grew in the same period from $9,266,000 to $20,414,000.

The development under the classification of drugs, dyes, chemicals and medicines is another matter for congratulation, particularly in view of the difficulties which this industry has had to encounter, the export value having increased from $3,543,000 in 1915 to $9,218,000 in 1917.

About the only industries whose experience has been of an erratic nature during the last three years are those appertaining to textiles and manufactures thereof. For example, the clothing exported in 1915 had a value of $7,344,000, in 1916 of $9,148,000, and in 1917 of $6,356,000. Cotton products shrank from $1,815,000 in 1916 to $481,116 in 1917. The value of woollen goods exported was $1,301,000 in 1915, $657,475 in 1916, and $725,148 in 1917. All these irregularities may be ascribed in the main to the conditions obtaining in foreign markets and to the scarcity and high cost of raw material.

From the accompanying table further details may be gathered regarding the course of the export trade during the last three years in the principal manufactured products of the country.



Industrial Development and the Export Trade

While the demand on war account furnished the stimulus to the export trade in manufactured goods, yet it was, on the other hand, because of the developments which have taken place in the manufacturing industries of the country which made its expansion possible. In other words, if the factories of the country had not been able to produce merchandise in greater diversity, in larger quantities, and with greater efficiency than in ante-bellum days the export trade coud not possibly have swelled to the proportions it has during the last three years.

A year or two ago an expert in manufacturing processes in the United States was sent to Canada to study the developments which had taken place since the outbreak of the war. In the report which he subsequently submitted he dwelt particularly upon what he termed the extraordinary way in which the factories of the Dominion had adapted themselves to the new conditions which the war had created.

That aply expresses the situation. The manufacturers of Canada have had the enterprise and skill to adapt themselves to new conditions as they developed. This has been manifested in a two-fold sense.

In the first place a relative decrease in the cost of production has been brought about by the inauguration of more efficient processes in manufacturing. In the second place a great many lines are now being made in the home factories which were hitherto imported. And a commission on scientific research, appointed by the government, is at work studying ways and means to assist the manufacturers of the country in increasing the products of our factories both in variety and in quantity.

Expansion in Iron and Steel Industry

There has been a particularly marked expansion in the plants of the iron and steel industry. In steel making furnaces alone over two hundred new ones have been installed since the outbreak of the war. At points where steel was not produced at all before the war electric furnaces are in operation, producing by this method during the first nine months of 1917 some 31,000 tons compared with but 61 tons for the whole of 1914. Equipment for the production of benzol and toluol have also been installed by two of the steel mills.

Within the last two years industries have for the first time been established for the refining of copper and zinc, thus no longer making us wholly dependent upon foreign markets for the supply of these metals. And that which is more important still, we shall in a few months' time have in operation a plant with a capacity of 15,000,000 pounds annually for the refining of nickel.

More economic methods have been introduced in the cotton industry by the introduction of automatic looms. and the curtailing of lines manufactured in order that longer runs may be obtained. In the woollen textile industry, in spite of the handicap entailed by the scarcity of raw material, new lines are being made, and soon Toronto will have in operation a mill for the production of the finer description of ladies' dress goods.

A particularly new development in connection with the furniture industry is the manufacture of bent wood furniture, all of which before the war was imported from Austria.

In the drug and chemical industry, while there may not have been many new extensive developments, there have been at least some important ones. Aspirin and diarsonal, the latter a substitute for the famous "606" specific, are now being made in the Dominion. Formerly we were dependent upon Germany for both.

Within the last year plants have been established at two points in Ontario for the production of ferro-molybdenum and at another in the same province stellite is now being produced. In connection with the production of high speed tool metal these industries are of particular importance.

Aeroplane Machinery and Engines

The aeroplane factory which began operations in May last is now turning out about two hundred and seventy-five machines a month. The United States government has already obtained several hundred aeroplanes from this factory.

In the machinery and engine manufacturing industry there has been a decided forward movement during the past couple of years. There has been a particularly marked development in the production of marine engines.

Recently experiments have been carried on with a view to the production of aeroplane engines in Canada, and the results have been so satisfactory that one concern is credited with having received an order within the last couple of weeks for a thousand of these engines.

More Aggressive Methods Wanted

While the developments above referred to do not cover the sum total of those which have taken place during the last two or three years, yet they are sufficient to indicate that the manufacturers of Canada are in a much more favorable position to cater for the export trade than they were in ante-bellum days.

Now, with better equipment, lower relative cost of production because of greater efficiency, and greater diversity in product, the next move should be the employment of more aggressive methods in regard to the cultivation of the export trade.

THE RECORD AT A GLANCE

Three Years of Exports in Principal Lines of Manufactured Goods

	1917	1916	1915
Flour, cereal foods, etc.	$ 51,942,056	$40,433,503	$28,051,021

Ramsay's Paints

1842 1918

The difference between Paint and Better Paint is measured by the element of Service.

You should be the Ramsay Agent for the "Right Paint to Paint Right."

The proof of our Service is 76 years in the Paint business and still growing, both at home and abroad.

Why deal in mere paint when Ramsay's costs no more and gives real Service.

OUR EXPORT TRADE IS CONTINUALLY GROWING THROUGH SERVICE AND QUALITY.

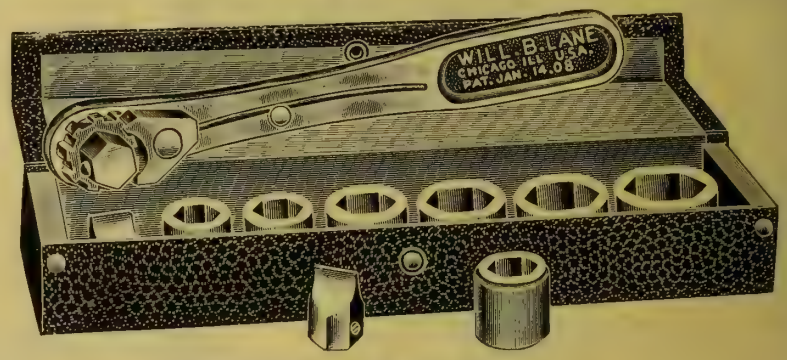
Lane's Unique Ratchet Wrench

Appeals instantly to every autoist



Keep Lane's Unique Ratchet Wrenches before the eyes of the autoists of your district. Let your windows and your counters be forceful salesmen for these handiest of auto tools.

In its neat, compact, leatherette case, Lane's Unique Ratchet Wrench looks good to the motorist. He sees practically every wrench he needs, and he realizes that the ratchet feature means quicker, more satisfactory work in close quarters. Motor owners and mechanics have taken instant liking to this time and trouble saver wherever shown.

Keep in mind the fact that there will be 100,000 more motor owners in Canada this Spring than last, and be ready to get a share of the business this means.

FORD SET contains: 1 Handle 7 inches in length; 2 Screw-driver Bits; 1 Extension Bar 6 inches in length; SIX SOCKETS to fit all nuts and bolt heads on Ford Car, including the cylinder head.

STANDARD SET contains: 1 Handle 7 inches in length; 2 Screw-driver Bits; 7 Sockets to fit semi-finished Hex. Nuts, as follows: U.S. Standard from ¼ to ½ in.; A.L.A.M. Standards from 5-16 to 11-16 in.; Cap Screw Heads from 5-16 to ⅝ in.

Lane's Unique Ratchet Wrenches are machine made throughout of the best material. Sockets are turned from Bessemer Steel and are warranted not to break or spread. Get prices from any of these jobbers.

Harvest King Power Grindstones Cleveland Grindstones

IT'S IN THE GRIT

To satisfy a customer is as important as getting him to buy.

Agricultural implements as well as most tools require grindstones of specially selected grit. The manufacturers have found this out and nine out of ten use Cleveland Grindstones because of their uniformity of grit. They possess just the right degree of hardness to sharpen all cutting tools and put a keen edge on without destroying the temper of the tools.

Make yourself "solid" with horsemen

"Ventiplex," the easy-selling, sanitary, ventilated Housings, Sweat Pads and Saddle Blankets, is the "Open sesame" to the hearts and pockets of horse owners in your district.

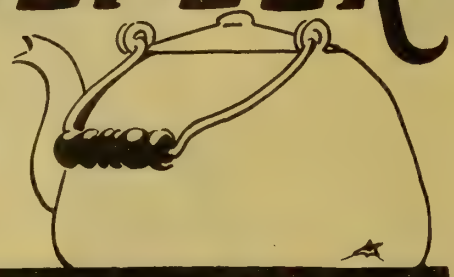
"Ventiplex" gives full protection where most needed, is entirely sanitary and can be washed when soiled. It never gets out of shape or becomes "bunchy" and is altogether the most satisfactory and economical "horse-saver" on the market.

"Ventiplex" puts you "in right" with horsemen by giving ease and comfort to their beloved horses.

If you want to gather in all the business of horsemen in your district, talk "Ventiplex" to them on all occasions. Once you get their horses equipped with "Ventiplex" the owners will be "Solid" for you.

Universal Selling Price. Costs less than stuffed pad.

DON'T OVERLOOK "COMFY" WEATHER STRIP



these cold days when the fuel pile is so low. "Comfy" keeps the heat in and the cold out, and consequently is a great fuel saver. There are sales a-plenty to be made right now.

Your jobber should be able to supply "Ventiplex" and "Comfy." If he is not, tell us about him.

Made in Canada

Conservation of Food

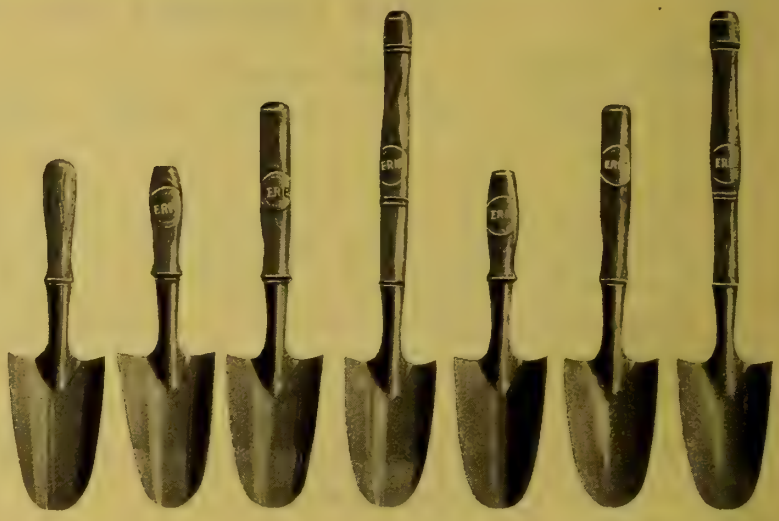
Made in Canada

DOMESTIC ECONOMY is impossible without FRUIT JARS. This is fully recognized by all authorities interested in FOOD CONSERVATION, and their PUBLICITY CAMPAIGN will undoubtedly stimulate the use of JARS this year and create a demand far above normal.

RETAILERS should be ready to do their part by having JARS on hand when required. REQUIREMENTS should be carefully considered and orders placed with WHOLESALERS as early as possible.

LATE ORDERS may not ensure delivery in time to meet the requirements of the PUBLIC.

NO FRUIT or vegetables should be wasted this year for want of JARS.



Ask your wholesaler for JARS "MADE IN CANADA" and guaranteed by a reliable manufacturer.

Here is a line of nicely-finished, well-made tools that includes everything used by the best professional gardeners in Trowels, Transplanting Trowels and Forks, both twisted and straight handles. In addition there are Ladies' Spades and Spades suitable for carrying in an automobile. This line is constantly being added to and will be found always up-to-the-minute with new ideas.

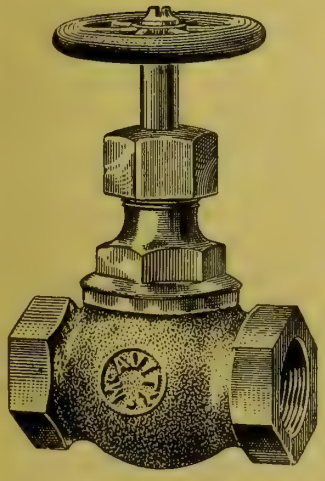
We would like to tell you more about this line. May we?

ERIE IRON WORKS, Limited, St. Thomas, Ont.

FIG. 141
JENKINS BROS.
Standard Pattern Iron Body Globe Valve Screwed with Yoke.

For use under steam service there are no valves quite as satisfactory as

JENKINS BROS.
Globe and Angle Valves
Fitted with Jenkins' No. 119 Discs



The composition of the disc is very hard, but becomes tough and flexible in service when under steam pressure.

It shows remarkable freedom from cracking and flaking and unrivalled durability in working steam pressures up to 150 pounds.

Write for Catalogue No. 8.

FOR SALE—BUILDING AND HARDWARE stock in good live Saskatchewan village. Stock on hand about $6,000. Living rooms above. Good opportunity and terms for right man. Box 726, Hardware and Metal.

MISCELLANEOUS

WANTED—TO REPRESENT A GOOD LIVE proposition in Manitoba or Western Canada. Headquarters now in Winnipeg, where a good connection is already established. Fifteen years' experience in general hardware, stoves and paints, and can furnish first-class business and bank references. Apply Box 731, Hardware and Metal.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

MISCELLANEOUS

STOVE REPAIRS FOR GARLANDS, PEN Esthers, Sunlights, Silver Kings, Souvenirs, Laurels, Welcomes and all kinds of ranges. Write for list and prices. Grundy Bros., Strathroy.

THE SUREST WAY FOR THE MANUFACturers' agent to connect with good live firms, is to tell the manufacturers who read Hardware and Metal, all about his ability to sell their goods. Try an advertisement on the Condensed Ad. Page of Hardware and Metal, under this heading.

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

IF YOUR HARDWARE BUSINESS IS FOR sale, who is more likely to buy it than a hardware man, be he merchant, clerk, or traveller? It is only hardware men who read Hardware and Metal, and a condensed advertisement in this paper offering your business for sale, will put you in touch only with the people who will be most interested.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada (tf)

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Toronto.

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

The next time you want a clerk, be sure to advertise in the "Wanted" Page of HARDWARE AND METAL. You will receive inquiries from the livest clerks in the Canadian hardware trade, because reading HARDWARE AND METAL is a test of the clerk's interest in his business.

NUMBER ONE

The WRIGHT BROTHERS

IN 1896, Wilbur Wright and Orville Wright of Dayton, Ohio, decided to abandon several small business enterprises in which they were interested and concentrate their entire force and inventive genius on the perfection of a flying machine. Up to the time they entered the field no one had ever studied the subject with such scientific skill or such undaunted courage.

The Wright Brothers were masters in all their work. After years of concentration they gave to humanity a gift which ranks in importance with the noblest achievements the world has ever known.

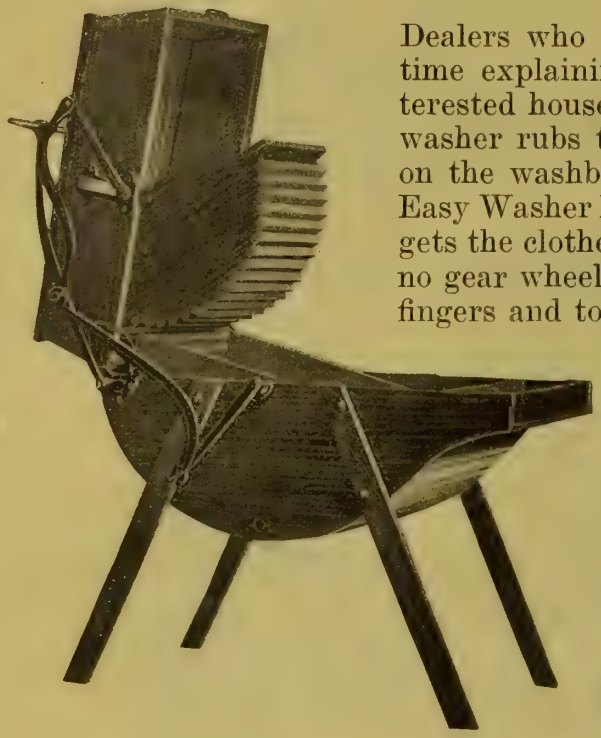
The secret of Wright Brothers' success was

CONCENTRATION

The same principle of concentration, which enabled the Wright Brothers to perfect their Airplane, has enabled us to create the Victor Hack Saw Blade—which is recognized everywhere as the last word in Hack Saw Economy.

For twelve years we have focused all our force on the perfection of this one tool—the Victor Hack Saw. We have centered our powers on making exhaustive experiments and on the development of new processes.

Logic told us that by concentrating all our energies on one tool, we were more likely to produce a Hack Saw Blade which would excel all others, than if we tried to perfect a dozen or a hundred different tools.



As a result of this concentration, we have created the most enduring and efficient Hack Saw Blade known to science. There is nothing vague about the economy of the Victor Hack Saw Blade. It has been proven.

VICTOR SAW WORKS, Ltd.
HAMILTON, CANADA

VICTOR

The Easy Washer is an Easy Seller

Dealers who sell **Easy Washers** don't have to waste time explaining its principle of operation to the interested housewife. She can see at a glance that this washer rubs the clothes naturally, just as she would on the washboard. The only difference is that the Easy Washer has **two rubbing boards** and consequently gets the clothes clean in half the time. Then there are no gear wheels to explain away or to suggest jammed fingers and torn clothes. The **Easy Washer** is simple in construction and operation and its price places it within the reach of every family.

Made in two sizes for "standard" and large families. Crated singly, legs loose to prevent breakage.

The Canadian Woodenware Co.

St. Thomas, Ontario

Manufacturers of The Easy Washer, highest quality Washboards with Glass, Zinc and Metal rubbing surfaces, Clothes Horses, etc. Write for illustrated catalogue and prices

New Design Many Improvements

The extension of the base is flat on top so that the heads of bolts can easily be reached.

The base has lug on both sides, making it possible to lock either side, and is useful in event of one lug being damaged.

The jaws are milled from solid steel bars, tempered in oil—and each one tested.

You Cannot Fail

SPEED

in Hack-Sawing

It's not "How much did the hack saw cost?'

But "How fast will it cut?"

Only a fast-cutting saw saves a mechanic's time.

Some saws clog because they are not suited to the material or shape being cut.

Some dull quickly because the "quality" isn't there.

Some break without provocation because too brittle.

Save valuable time by using

Starrett Hack-Saws

CUT QUICKER—LAST LONGER

You know this if you have compared "Starrett" with other saws—if you haven't used them, try a few—you may feel safe in doing so for

Starrett Hack Saws are Unexcelled Just as Starrett Tools are Unexcelled.

Catalog No. 21MA shows what numbered saw will give real speed—save time.

Will you send for your copy of the "National" Catalog for 1918?

There's a copy of the National Hardware Catalog for 1918 set aside for you. If you will send your address your copy will be mailed to you right away.

Whether or not you are handling National Hardware you will find the 1918 Catalog of decided interest. Besides the excellent illustrations of "National" goods and the complete descriptions there is valuable information on packings, finishing and distribution. The illustrations are all from photographs and the descriptions are ample and suggest good sales arguments that you can use every day.

Aside from its informative value the catalog is a handsome specimen of typographical art well worthy of a place in your business library.

Just send your address. A postal card will do.

LITTLE WORDS WITH BIG MEANING

Quality

According to "Webster," Quality is "an excellence of character; natural superiority."

Service

Webster's definition of "Service" is; "The performance of labor for the benefit of another."

We use these words advisedly—fully understanding their definitions—and realizing the obligation we place upon ourselves by their continued use in connection with our products of Iron and Steel, and our attitude to the people we serve.

Stewart Clipping Machines

Always make good for dealer and user.
The steady increase in sales is the result of real merit.

Stewart Horse Clipping Machines have been a consistent profit-maker for dealers for twenty-five years—each year sales increase and 1917 showed a remarkable gain over all previous seasons.

The Stewart No. 1 Ball Bearing Enclosed Gear Machine

Every dealer in Canada can sell Stewart Machines

and failure to stock them means an actual loss of profit to the dealer.

Heavy purchases for war purpose and a big advance demand from the trade are taxing the capacity of the manufacturer.

Order from your Jobber now while he has the stock to supply you.

Get in some Stewart No. 1 Machines and display them—don't depend on special ordering this season.

Horse Clipping starts with the first spring weather.

ORDER NOW

We are now in our new plant where we have everything in the way of latest machinery and larger space for manufacturing and shipping to continue our reputation for quality and service.

Full of Good Points

In fact as well as in name.

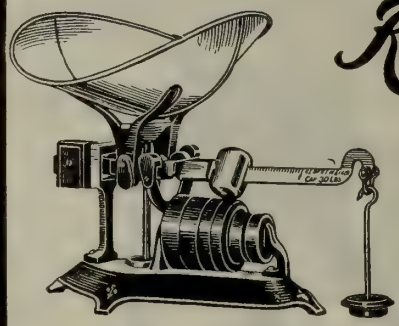
The shape of the teeth of the "Famous Five" files was determined after many experiments.

Different shapes and depths are made, according to the work for which the file is intended.

Consequently, you can get for your customers a "Famous Five" file that will cut fastest and leave the best surface on any kind of material.

And a "Famous Five" file will stay hard and sharp for the longest possible time.

Their cutting qualities have been standardized. Your customers can rely upon them.



Specify them when ordering from your jobber.

They are:

Stirs Up Business

Precious few housewives realize the many uses of an accurate scale in the kitchen—saving losses in careless weighing at butchers and grocers—weighing produce before marketing—weighing flour and other ingredients while baking, etc., etc., etc. It is surprising what a little bit of salesmanship and displaying will accomplish in stirring up big business in Renfrew Scales! The Renfrew is compact, handy, and stands hard knocks. It doesn't get out of order and always tells the truth. A government inspector's certificate accompanies every Renfrew. These features make the Renfrew a lively seller these days. Push business with the

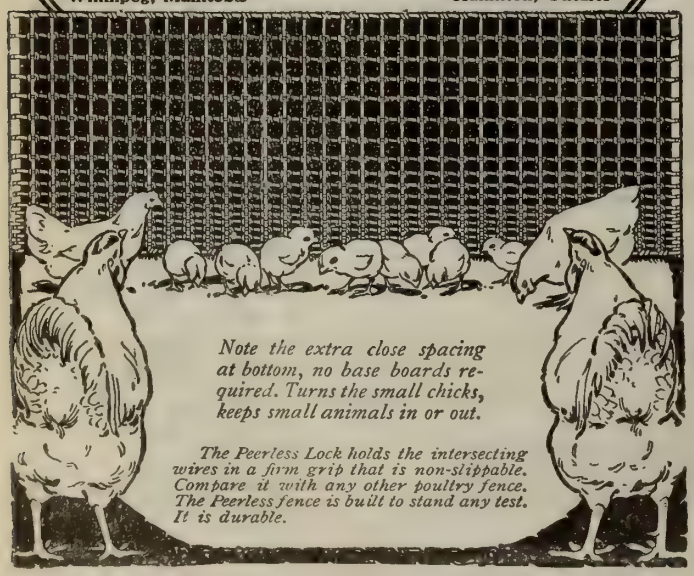
PEERLESS PERFECTION



The fencing upon which you can **build a reputation** and hold the fence trade of your territory. You can put up the strongest kind of a guarantee—we back you up.

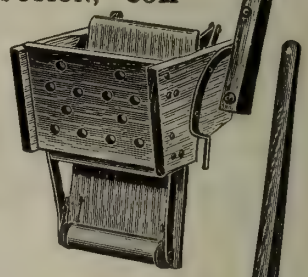
We build this fence of open hearth steel wire with all the impurities burned out and all its strength and lasting qualities retained. Peerless poultry fencing is extra strong, heavily galvanized, can't sag, won't rust, never gets out of shape, keeps in and keeps out—both great and small.

Write for Dealer's Proposition

We show you where the big trade is for parks, lawns, cemeteries, fences plain and ornamental for farms, ranches, all purposes.

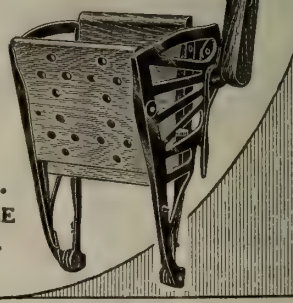
THE BANWELL-HOXIE WIRE FENCE CO., Ltd.
Winnipeg, Manitoba Hamilton, Ontario

Note the extra close spacing at bottom, no base boards required. Turns the small chicks, keeps small animals in or out.



The Peerless Lock holds the intersecting wires in a firm grip that is non-slippable. Compare it with any other poultry fence. The Peerless fence is built to stand any test. It is durable.

"White"



MOP WRINGERS

EASE OF OPERATION, THEIR GREAT UTILITY AND THEIR SUBSTANTIAL CONSTRUCTION, COMBINED WITH THEIR PRICE, MAKES THE WHITE MOP WRINGER A RAPID SELLER.

Made of malleable iron and the best of hard woods — Maple or Birch. Fits any kind of pail and wrings the mop thoroughly.

It has more than one use—often used for fruit and vegetable presses and works perfectly. The advent of the White Mop Wringer proved a boon to the housewife—it sells itself and is a good profit-maker.

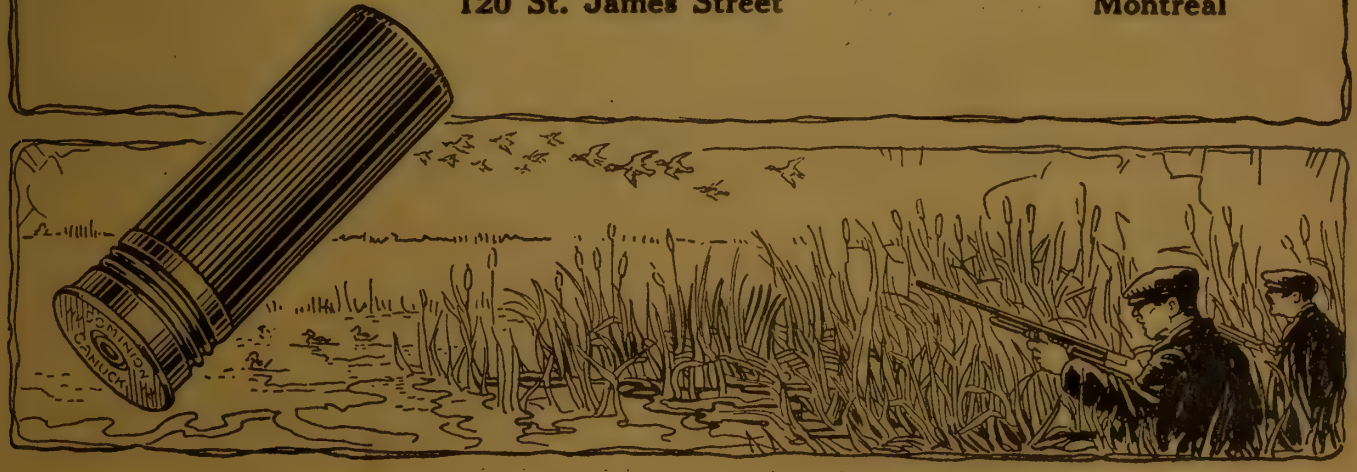
For Those Who Want the Best

—the shot shell that has made its name so rapidly by having the quick punch that blows the clay targets into dust and brings home the finest bags.

Canuck

is the choice

Examine the loading of the Canuck by slicing the side with your knife. Notice the firm crimp with the proper bevel that insures positive operation in repeating shotguns. The body paper is tough but not brittle and will not crack at firing. Test the shot for roundness, hardness and uniformity of size.



Call special attention to the wads. Notice how well they are seated, the cupping, the quality of the felt. Properly seated wads have a tremendous effect on the shooting qualities of a shell. The cleanliness and even granulation of the powder should not be forgotten when showing the loading.

This demonstration of quality will interest your customer and make sales.

All Dominion Shot Shells will stand this test.

Dominion Cartridge Company, Limited

120 St. James Street **Montreal**

The President Has the Right Idea

IT was the Annual Meeting of the Weaver Knitting Company, makers of underwear and hosiery. The particular item of the balance sheet that excited the caustic comment of one shareholder was the moderate sum of $13,567.83 for advertising. "When we are so much oversold," said he, "surely it is not necessary to keep on spending money to advertise our goods." And there were some who thought as he did.

"Gentlemen," said the President, "if you figure it out, our advertising expenditure for the year is about 1%—not a very heavy sum to pay out to maintain the good name and favor which our brand enjoys. There was a time when we had to spend a good deal more than the sum in the balance sheet to get our brand into the retail stores of the country, and to induce the public to buy it. I am unwilling to cut out advertising, and I'll tell you why.

"Our men are not canvassing with the diligence they gave to the work of selling when business was harder to get. They are not calling as often as formerly, and when they go, they are not very urgent. But we would be committing suicide if we ceased to court the good-will of the retailers and to keep our brand in the public eye. We have and will have competition. We must have regard for the post-war trade. If we quit our solicitation now, we shall have to do double work later on, at a heavy cost. I am authorizing our present advertising as a form of business insurance.

"Our goods continue to be sold through the retail trade. We owe it to our retail customers to keep in solicitous touch with them—to show them that we value their co-operation and good-will, even though we cannot always fill their orders. We tell our retail friends the naked truth, and we are keeping their loyalty. If we pursued any other course, I fear we would greatly rue it in days to come.

"Our advertising latterly has put us in touch with many new accounts and prospects. Our men cannot call on as many men as they did when train schedules were better than they are to-day. We are employing advertising to lower selling costs, and if Mr. ———— will give me half an hour after this meeting, I think I can satisfy him that our advertising outlay has played a large part in putting our balance sheet in the good terms in which it appears.

"Our trade mark is worth, as an asset, a goodly sum—many scores of thousands of dollars. That value has been created and maintained by our previous advertising. But, Gentlemen, if we dropped our advertising during these war years, the certain thing is that the value of our trade mark would fall sharply, and the good-will and co-operation of the retail trade would likewise fall away. From this point of view it is good business to spend 1% or so to maintain the value of our trade mark and the asset known as good-will.

"Gentlemen," proceeded the President, "I am sorry to have taken so much time to defend our policy. Need I say more?"

UPON that, Mr.————, the objecting shareholder, rose and said: "I wish to withdraw my criticism of the item of advertising expenditure. I had not looked at the matter as our President has presented it. I feel rebuked. Also I am persuaded that the President's course has been wise, and I wish to say to him and to you all that I sincerely regret my criticism."

Among the mediums serving retailers used by the Weaver Knitting Company are:

Dry Goods Review	**Page, 12 times in the year**	**$420**
Men's Wear Review	**Page, 12 times in the year**	**360**

These are ridiculously small sums to expend to maintain retailers' good-will and co-operation, and get by-mail business.

Other mediums serving Canada's retailers and which will be of interest to other firms are:

Canadian Grocer	**Page, 52 times in year**	**$1,248**
Hardware and Metal	**Page, 52 times in year**	**1,248**
Bookseller and Stationer	**Page, 12 times in year**	**300**
Sanitary Engineer	**Page, 24 times in year**	**400**

ADVERTISING to the retailer is too valuable a salesman to omit from one's organization. And the cost per annum is quite too small to be a barrier. Also there is this: Whether or not the manufacturer believes in advertising, his retailer customers and prospects do. So it is wise to fall into line with the wishes of customers—the men who call the tune, because they pay. We have hundreds of letters to prove this.

We are always glad to discuss this matter of advertising with manufacturers—not in a strong-arm way, but reasonably. If we have the right idea, it certainly becomes profitable for manufacturers to possess the same idea. We solicit correspondence from interested manufacturers.

"Home Comfort" Range

It's Wise to Sell a Single Model

A dealer acting as agent for the "HOME COMFORT" doesn't have to keep a big stock. We make only one size and one style. This simplifies matters a whole lot. It used to be, and still is, the custom for the dealer to put forward on his floor the simplest and cheapest model of a range, and to sell his customers this particular range. Then having made the sale, the dealer would proceed to induce the customer to buy extras. For this purpose, the more expensive models kept in the rear would be used for the purpose of demonstration.

Experience has taught a good many dealers that it is wiser to sell but one model, a model like the "HOME COMFORT." It saves time and money—dealers do not have to carry a large stock. This single model plan pleases the customer, too, and makes it safe and easy to make a choice.

We have made the "HOME COMFORT" the most easily sold range on the market. Write for agency proposition. It's a good one.

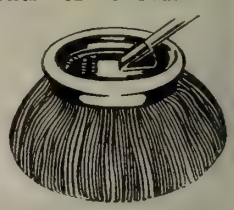
A LITTLE COMPETITION
WILL DO WONDERS

SOMETIMES the store seems to strike a dull period. Things don't go right somehow. You and your clerks don't feel like doing any more than you have to.

Here is a suggestion that will help your business during such a "slack" time.

Let your different clerks, in turn, take hold of the reins and manage the store. Let them dress the windows, fix up the show-cases, arrange the floor and counter displays—in a way they think will bring in the most business. Let each man have charge for a week and compare results. This competitive plan will stimulate both you and your clerks. It will put "life" and efficiency into the business.



Let us give one little tip that will help out everybody. Keep O-Cedar Polish right near your cash register. You'll sell a lot of it, if you say to your customer, "A bottle of O-Cedar to-day?" when making the change from other purchases. You will be surprised how many extra O-Cedar sales you'll make, by the mere suggestion.

O-Cedar Polish

For greater interest in your displays, ask your jobber's salesman to show you the Special Assortments of O-Cedar Products, whereby you can obtain an attractive sales-producing O-Cedar Display Stand for your counter or floor.

Vol. 30 TORONTO, FEBRUARY 9, 1918 No. 6

Results of Fuel Controller's Edict

Action of Fuel Controller Forecast in HARDWARE AND METAL—Retail Merchants' Association Acts—General Spirit of Acquiescence — Railroads Should Benefit—Exemption Claimed For Essential Product

AUTHORITIES at Ottawa refused to accede to the request of the Retail Merchants' Association to have dates for the Fuel Controller's closing-down order changed from Saturday, Sunday and Monday, February 9-10-11, to Sunday, Monday and Tuesday.

Henry Waters and E. M. Trowern, president and secretary respectively of the R.M.A., headed a deputation which waited on the Deputy Fuel Controller at Ottawa on Wednesday of this week for the purpose of securing a clear ruling on the new regulations. At the close of the conference the retailers passed the following resolution:

"That the Retail Merchants' Association, in view of the present shortage of coal, unanimously endorses the movement of the Fuel Controller to conserve the use of fuel, and recommends that all retailers throughout the country heartily co-operate by observing the order, which, after a conference with the Deputy Fuel Controller, is interpreted to mean that all retail stores should be closed."

The Deputy Fuel Controller issued a statement in which he asked the co-operation of retailers in notifying the farm trade. He stated in part, as follows:

"From a point of view of inconvenience, the most serious effect will doubtless be upon those farmers who will come to the market towns on Saturday and who may be ignorant of the provisions of the regulations. It is hoped that retail establishments will take action to post notices in their stores, calling attention to the closing order, and advising the public that they will remain closed entirely on Saturday and Monday."

Among the first to make a definite announcement to the public were the two large department stores in Toronto, Eaton's and Simpson's, who stated that in compliance with the Fuel Controller's order they would close their stores from Friday P.M. to Tuesday A.M. It is understood that these firms will not reduce employees' salaries on account of loss of time.

Early closing had been adopted in many Canadian towns and cities prior to the announcement of the Fuel Controller's regulations. The scarcity of fuel has caused untold distress in some districts and retailers were practically forced through sheer necessity to resort to shorter hours for business purposes. In some towns, as previously announced in HARDWARE AND METAL, stores have remained closed on Mondays of each week.

The Fuel Controller has appealed to all manufacturers to give loyal support to the plan to conserve coal, wood and oil.

Action Forecast Two Weeks Ago

A forecast as to probable action by the Fuel Controller appeared in HARDWARE AND METAL on January 26 last, and what was said in that issue follows:

"Reports from Washington indicate that some pressure has been brought to bear on officials there to use their efforts to cause an order to be issued in Canada somewhat similar to that issued in the United States on account of the fuel situation.

"Some United States manufacturers state that if they are forced to close down and Canadian manufacturers are allowed to go ahead with their work, that the Canadian manufacturers will, in a few months' time, reap an advantage over their competitors in the United States. This, some of the United States manufacturers claim, will take many months' time to regain. They point out that to a large extent Canadian coal supply has been furnished by the United States. Dr. Garfield says that Canada should be treated as one of the states in the distribution of coal, but it is stated by some manufacturers that since Canada has secured a pro-rata supply of coal from the United States, that in all fairness Canadian manufacturers should be forced to suffer the same sacrifices as the manufacturers in the United States are said to be suffering on account of fuel shortage. Reports from Washington indicate that negotiations will be commenced with the fuel administration in Canada to have a similar workless day created in Canada if they can reach an agreement regarding cutting down of the Canadian coal supply.

"Railroad congestion in the United States will, it is said, be relieved by the order, and it is believed that when full industrial activity is resumed on April 1 that American railways will be in a better condition to handle the enormous war traffic than they have been for two years past. In this respect it has also been claimed that the Canadian manufacturer will reap all of the benefits of the order but will suffer none of the sacrifices unless some agreement is reached causing an equal curtailment in Canadian industries."

General Acquiescence to Order

The general attitude of all, however, is expressed in a desire to make whatever sacrifices are considered essential for the general good. This view was expressed by those with whom HARDWARE AND METAL has been in touch, and revealed a spirit of co-operation in following the government's order to the letter.

Many Uncertain Features Straightened Out.

Uncertainty exists in many quarters as to how the closing down order will affect various commercial and industrial organizations, but steps have been taken to ascertain just what action will be necessary to follow. In talking to manufacturers and jobbers the questionable points were brought to the attention of HARDWARE AND METAL. It will be necessary that further rulings be included before the text of the Government's order for heatless days in Canada is fully understood, but these are coming through quickly.

Does Not Use Coal—Buys Steam

A peculiar situation exists with one manufacturer, who states that they do not use coal. Their plant is operated by electricity, and they buy their steam for heating from another concern. However, the firm who supplies the steam uses coal, and for this reason it would appear that

both plants must obey the shutting down order. Further discusion, however, revealed the fact that the heat supplied on Sundays has been virtually the same as on work days. If the same standard were maintained on three closing days it would result in no hardship on the staff were they compelled to work. However, whatever is necessary in the best interests of the country generally will be the line of action followed.

Question Over Fuel Oil Cleared Up

Another angle to the situation developed when one of Toronto's hardware jobbers was queried as to what effect the closing down order was likely to have on their business. "We burn fuel oil, hence do not use coal to heat our warehouses. Whether this ended our responsibility as far as the order was concerned was at first uncertain. However, we took steps to have the authorities in Ottawa define our position clearly." Later advices state that wood and oil will be also included in the prohibition.

Should Help Railroad Materially

Asked to what effect the order would be likely to have on the handling of freight, this jobber continued: "It should afford a decided measure of relief to the railroads. We are, along with everyone else, open to accept freight, though, of course, we can make no shipments. This should give the railroads an opportunity to clear up the congestion now existing and put them in better shape to take care of outgoing shipments. Weather conditions will have to improve materially, however, if the results wanted are attained. It has been impossible to operate successfully under the severe conditions existing during the past few days."

"That the volume of business will undoubtedly be restricted is generally conceded. Saturday's business from the retailers' standpoint is by far the biggest of the week, and Monday is also a good business day. It is undoubtedly true that a great majority of those who would ordinarily be spending money on these two days will not buy when business opens up again on Tuesday. This primarily affects the retailer, but will be reflected in the jobbers' and manufacturers' sales as well."

Work Important, But We Obey Edict

"We had thought of asking exemption owing to the importance of much of the work in which we are engaged, but on going over the situation fully we have decided as a matter of general principle to close our plant." This briefly covers the expression gathered from a metal products manufacturer who is also in munitions.

"There is no doubt but that closing down will materially curtail our output; we cannot help but feel it, but then, these are days of sacrifice and we must do our part. We have for some time past been accumulating heavy stocks so that we might at all times be in a position to make prompt shipments. This will undoubtedly prove beneficial to our customers when we resume operations, and it will not be an impossible task to catch up with shipments of immediate orders. Where we will feel it most is in our producing end, to which even half a day means a great deal. We will make a saving in coal."

Ultimate Good Hoped For

"Yes, we will close; we will have to as a matter of fact, but the effect on our business will not be great," stated an official of one paint concern. "It only means in reality one and one-half days to us, and our business for immediate delivery, while large, is by no means so great but that we would soon be able to catch up in the matter of shipments. Furthermore, our plant is unable to operate at capacity at the present time owing to a shortage of raw material. This is largely a matter of transportation, as the congestion which exists on railroads in the United States and Canada is holding us back considerably. If the railroads, by reason of the permission granted them to deliver freight, are able to speed up shipments, we can see where the closing-down order may ultimately prove beneficial to us."

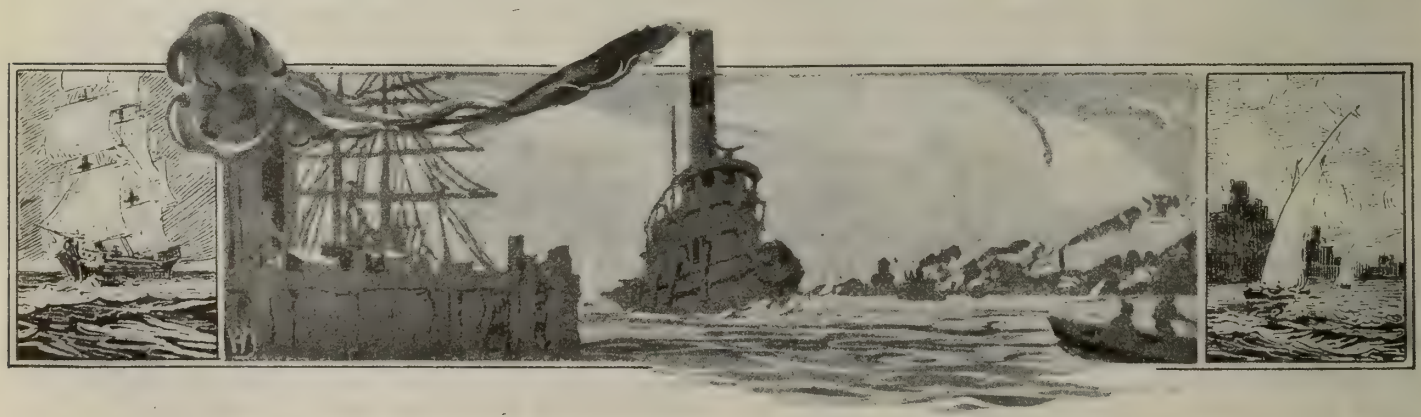
Adds a Day to Government Order

"There is no doubt but that the closing of our plant will curtail our output considerably. Whereas the text of the order outlines Saturday, Sunday and Monday as closing days, in reality one and one-half days, as we do not operate on Sunday. There is Friday to consider as well as Tuesday.

"Prior to a holiday of any kind it has been our experience that production suffers. In this case it will mean that about 3 p.m. on Friday cleaning up around the plant will start, and a number of our machines will be idle for half a day on Tuesday from absentees. That virtually adds another day to the Government's order, and to us the loss of two and one-half or three days in operation is a big item. However, we will cooperate in this as in any other move which will best serve the general welfare of the country."

This phase of the situation, which brings out the day before and day after problem, is an interesting one, and was brought out by the representative of a sheet metal mnaufacturing concern.

Exemption Claimed For Essential Product



"We have applied for exemption from the closing down order issued by the Government as it applies to our dry cell business," stated one manufacturer of dry batteries, flashlights, etc., to HARDWARE AND METAL. "So far as the flashlight end of our business is concerned, we will observe to the letter the Government edict. However, we are supplying dry cells to telephone companies and others engaged in Government work, and were we to close down this part of our plant it would mean a serious loss not only to ourselves but to other very important industries. We have been working against time for months in trying to maintain a capacity output. We have had to put up with a shortage of raw materials, railroad congestion and other distressing features, so that the loss of even half a day when it is possible for us to operate at all means a handicap almost impossible to overcome. Dry cells must be considered in the light of an essential and for that reason we are strongly urging the Government to grant us immunity in respect to this branch of our business."

Slack Season; Order Not Drastic Enough

"As far as we are personally concerned the order comes at about our slackest season, and for that reason we will be able to recover lost ground with little inconvenience," was the opinion voiced by one of the large sheet metal manufacturers. "Our plant operates by electricity and the only coal we use is in heating, so the amount we shall save will not be great. However, we shall close up tight as a matter of principle.

"We might say further that in our opinion it is a question if the order is really drastic enough. We are depend-

Are You Going to the Convention?

EVERY member of the Ontario Retail Hardware and Stove Dealers' Association should be willing and eager to make the coming convention a real success.

In an effort to create renewed interest and enthusiasm in the Association, the officers have this year arranged for a splendid program which should appeal to every retail hardware merchant.

Members and non-members, in fact every retail hardware merchant in Ontario, should do his level best to visit the Convention in Hamilton on February 19 to 21.

Every member of the Association should endeavor to be present not only to show that he appreciates the work done by the officials, but because he will receive some real practical suggestions which he can carry home and use to good advantage in his business.

A real opportunity is now presented for the Ontario retail hardware trade to place this Association on a real firm basis and pave the way for even greater conventions in the future.

A study of the Convention program which has appeared in recent issues of HARDWARE AND METAL, and which will again appear in next week's issue, indicates that it is to be almost entirely a strictly business Convention, and one which should result in untold benefit to all hardwaremen who are present.

Arrangements have been made for a luncheon and a theatre party on Tuesday evening, February 19, following the afternoon session, when reports of officials will be presented.

The Wednesday morning session, at which eight prominent manufacturers and wholesalers will address the Convention on the outlook for 1918, as it affects their respective trades, will be a most profitable session for all who attend.

The afternoon session, to be presided over by John C. Kirkwood, Business Counsel, is a feature which alone will be well worth the attendance of any retail hardware merchant.

Arrangements are also being made to have the Question Box section conducted on an even more efficient basis than in the past, and these sessions should be productive of many splendid ideas for retail hardware merchants.

A number of addresses on advertising, salesmanship, department store and mail order house methods, mock sales, demonstration of salesmanship, etc., will also prove interesting and practical features of the Convention.

The election of officers this year will be carried out on a different basis to that of last year, and elections will be made by ballot.

The closed sessions for retailers are to be confined to retailers only, and in this way it is felt that there will be a free discussion of all the important problems which are affecting the retail trade at the present time.

The time schedule will be closely adhered to and delegates are assured of meetings starting on time and programs being carried out according to schedule.

The City of Hamilton, where the Convention is to be held, is an ideal place for a meeting of this kind. It is suitably located, and is easily accessible from all parts of the Province.

There is splendid accommodation for holding the meetings, and the only thing that is now needed to make the Convention the most successful in the history of the Association is a large crowd of retailers.

Many associations have been instrumental in saving their members large sums of money and in making them more efficient merchants. The officers of the Ontario Retail Hardware and Stove Dealers' Association deserve the enthusiastic support of every retailer in the Province, and they are all urged to be present in Hamilton on February 19 to 21.

Getting the Motorist Ready

Accessories to the Fore—Selling the Motorist Comfort — Looking Beyond Winter's Cold—Overcoming Former Year's Troubles—Paint and Varnish Help—No-Glare Headlights a Necessity—Action Necessary Now

ALREADY, motorists, who have had their cars stored away during the winter, are planning on their requirements for spring—are again aching to sit behind the wheel and feel the car respond to their quest for open. There are many who will, at the first break of milder weather, get their cars out and for them the merchant must be prepared with a line of accessories which will add to their comfort.

Accessories to the Fore

It is by no means too early for the dealer who has relegated motor accessories to the back of the store to bring them into the light. Get them up where the motorist will see them, arrange for window displays, and start your newspaper campaign working. To that dealer whose campaign on accessories slowed down during the winter months the need is urgent that he start the automobilist thinking of his store as the logical one at which to secure his supplies. Stocks should be replenished, and every effort exerted to take care of all the motorist's needs.

Large Field Opening

Production of motor cars will, it is stated, be curtailed to some extent, which means that many cars slated to be sold or scrapped by the motorist will be kept in service. This opens up a large field for the sale of every line the hardware man handles. New tires, new bumpers, seat covers, paint and varnish are only a few of the bigger items which will be called for, the smaller lines such as patches, reliners, tire tools, spark plugs, wrenches, etc., offer a field for a big sale that should not be overlooked.

Selling the Motorist Comfort

What does an analysis of the motor accessory field show, then, in respect to sales prospects now? Take first the motorist who has kept his car in storage but wants to start using it now. Cold weather is by no means over and there will be many nasty days yet before spring comes. Comfort then is one thing which the user of the car wants but—how to obtain it?

Final Drive on Winter Lines

This presents an opportunity at once for the sale of automobile robes and heaters. An automobile robe comes in handy even in cool spring and summer nights so every automobile owner should have at least one and if it's a two seated car, two. The automobile robe not only offers comfort but adds to the appearance of the car as well. In selling the robe, there should also be a place to hang same up when not in use and so a robe rail might be suggested.

The value of the car heater can not be overestimated. There are those which are connected with the exhaust gas and those which burn a type of coal. The fundamental in each case is to supply heat and with heat comes comfort. Driving gloves might also be mentioned as a profitable line to push, and can be classed under the comfort heading.

Keeping the Car in Trim

For the car itself, some provision must be made to keep the radiator from freezing. There are solutions being marketed which eliminate danger from this trouble and besides these a radiator and hood cover helps materially in holding the heat in the engine once the car is running.

Looking Beyond Winter's Cold

But besides the motorist who wants action from his car now, there is the type who is only preparing for the future when the icy blasts of winter shall have become a memory. He is, however, already contemplating how he may secure even greater enjoyment out of his car than he did last year.

Perhaps this type experienced consid-

The value of newspaper advertising cannot be overlooked. Get that motorist into the habit of thinking of auto accessories in connection with your store. The results will be decidedly beneficial and now is a good time to start. There are lots of lines sold to-day to the motorist whether he operates his car or is only getting it ready.

Current Events in Photograph—No. 6

ONE OF WAR'S HARVESTS

AN occupation not without its risks. Salvaging unexploded torpedoes and loading them for transportation to a nearby supply station where they are inspected and returned to the front if found to be in good condition. In the photo is seen a fine harvest of Fritz's aeroplane bombs, which will be returned to him by the shortest possible route.

able tire trouble. He may have had a puncture in some out-of-the-way place and found himself without an extra inner tube or proper patches; if a blowout occurred, a vulcanizer would have helped a great deal, or a reliner might have made his worries less. A broken spark plug is the cause of lots of engine trouble but a good wrench and an extra plug overcome this difficulty easily. These troubles, however, are not the fate of every motorist, however, and there are other equally important phases of the accessory business to be considered.

Seat Covers Sell

Take for instance seat covers. The upholstery on any car becomes soiled and worn from use and a method of overcoming this is provided in the application of seat covers. Many consider these an improvement in the appearance of the car and purchase on that account—others buy to cover up the signs of wear or to prevent the regular upholtery becoming soiled.

How Paint and Varnish Help

The appearance of a car which has been run a year or two could be improved materially by a coat of paint and varnish. Not only would this add to the appearance of the car but it is a form of insurance against deterioration which should be brought forcibly to the attention of every car owner. It may be found necessary to run that old car another year but by changing the color of the body and touching up the wheels, a decided change in the looks is wrought which serves almost as well as having a new car.

No Glare Headlights a Necessity

In many provinces laws have already been enacted against headlights which glare, and sale of lenses will be greatly stimulated as a result. The merchant who is prepared for this class of business and goes after it aggressively will be the one to benefit and none should overlook the possibilities in this trade. Correct information on the subject places the merchant in a position where he can go after this trade successfully—the business on lenses will be big and delaying will only let the other fellow get the cream of the trade.

Tire Chains and Other Lines

For wet and slippery roads, automobile tire chains help out all patterns of tires wonderfully. They afford a measure of control which every motorist likes to feel in handling his car and can be sold to those to whom safety in driving is one of the first essentials.

There are many more lines which might be enumerated individually but

(Continued on page 36.)

Lighting Ontario Store Windows Prohibited

Necessary Power Conservation puts a New Demand on Merchant's Patience—Only Such Lights as Are Essential Permitted—Will Give New Impetus to Early Closing Idea

THE order of Sir Henry Drayton, Power Controller, that became operative on January 8 last, curtailing the lighting of streets and unnecessary store lighting, has been made still more drastic by a new ruling that becomes effective on February 5 that on and after that date all window illumination throughout the Province of Ontario must cease, and that all exterior and entrance lights that do not provide for the public safety must also be eliminated.

These instructions are binding on all communities being served with light from power generated at the Niagara River. In other words on the bulk of the communities in the province.

Instructions have been sent out that this order is to be rigorously enforced. This order does away with one of the retailer's best advertising features, his windows. This is going to work some hardship to the merchants as a whole, but in times such as these the merchant has been and still is ready to make such sacrifices as may be needed, and this would seem to be one of the necessary changes.

Unquestionably this will give an impetus to the early closing propaganda that has been growing in favor in every part of the province.

Broom Corn Scarcity Means High Priced Brooms

Unusual Conditions Prevailing Early Last Year Made Manufacturers Expect a Declining Market—Crop Failures Sent Broom Corn Prices Skyward

THE high price of broom corn is bringing about a situation that will give a new record level to broom prices. As there was a general opinion early last year that there would be a material decline in broom prices owing to the large crop expected, and as some manufacturers were even so sanguine of better conditions as to prophecy material declines, the gradually mounting cost of brooms comes as a surprise to the average retailer.

There were many reasons for this seeming error in judgment. There was a very short crop of broom corn in 1916, and as a result of this, before the crop of 1917 came on the market, there was scarcely a bale of corn to be found in any broom corn warehouse in the United States, and manufacturers were practically all bare of corn. Consequently, both manufacturers and dealers were forced to go into the market and to pay what was then considered a very high price.

Large Crop Expected in 1917

A large acreage was planted in broom corn in the Spring of 1917, and conditions seemed to be rather favorable. A good crop was, therefore, anticipated, and broom corn dealers sent out circular letters freely advising broom manufacturers that there would be a large crop of corn and this would be a year to buy from hand to mouth. Newspapers in the broom corn sections also contained statements of a similar character. Late in the season, however, there was a period of very cool nights and also a period of hot winds which stunted the growth of the corn to a large extent, and when the broom corn began to be marketed in Oklahoma, which is the largest producing State, it was found that a very large percentage of the corn was exceptionally short in length, and that the longer growth, known as hurl corn, was extremely scarce.

Competitive Buying Sent Prices Soaring

There was also a very large amount of red and stemmy corn which is very undesirable, and when this became apparent to the broom manufacturers and dealers, there was a rush to secure the better and longer crops, with the result that instead of prices going down as had been anticipated, they went up very rapidly, and corn showing any length or quality could not be bought for less than from $400 to $500 per ton. This means from 20 to 25 cents per pound for corn in the fields, and when there is added to this a freight rate of about 1¼ cents per pound and 7½ per cent. war tax, it can readily be seen that broom prices must rule very high.

It was difficult for anyone who did not visit the broom corn market in the West to understand how prices could soar skyward so rapidly after he had been advised for some time that there would be a large crop, and that prices would be lower, but those who visited the market were able to satisfy themselves that the oldest and most experienced broom corn men had made a very serious mistake in sizing up the crop this season. There has never been as much poor stock delivered on the market as there was this year, and the only safe thing for a manufacturer to do was to stay right on the job and examine every bale of corn that he bought.

GETTING THE MOTORIST READY

(Continued from page 35.)

when the merchant has once started his campaign, these will come to him naturally. It is hardly necessary to mention tire pumps, jacks, tire testers, speedometers, tire covers, folding chains or rubber cement; the hardware merchant will not lose sight of any item for which there is a possible sale, but it is essential that plans be formulated now and put into execution as quickly as possible.

Action Necessary Now
